The stated severance packages for Fannie Mae and Freddie Mac are criminal! The public trust has been stomped on enough without any payments. To even imply that these payouts could slip through is a terrible message.

The proposed payouts are excessive for the most stellar performances implying multiple honest gains of that amount while providing the best possible services, with no losses to clients or shareholders. Only gains would warrant that amount of severance as a small percentage of profits, NOT LOSSES!

Whether criminal or ineffective or just unlucky, there is nothing here to suggest that any severance is warranted, let alone \$24 million! Who was supposed to be minding the store?

Why not give all criminals multi-million dollar severance packages? It's as logical as leaving Fannie Mae and Freddie Mac victims without any place to go home to, which is exactly what has happened in too many cases!

What profits are these severance packages coming from?

NO! NO! NO!
