Subject: Comments regarding RIN 2590-AA42

I am writing because I am dismayed that wall street exacs keep making big bonuses and that there companies are having record profits while my family and the families of people I see as clients are struggling to pay their bills.

I am a psychotherapist and my practice has been greatly affected by the financial crisis. People are so stressed and discouraged. many are barely eeking out a living and many are on welfare. I see them only because San Francisco county has a single payer plan for the uninsured.

Please do all in your power to make meaningful reform so that banks and huge corporations cannot wreck havoc on the average American again.

Thank you for considering my comments,
