I'm a small business owner of 4 Gas Station and Convenience Stores in Orange and Los Angeles county. The past few years, business has been terrible. We've had to cut our payroll significantly just to stay afloat. The smartest investment I've made has been to retrofit our stores for energy efficiency with lighting and refrigeration improvements. I spent \$15,000 at one site and am now saving over \$7,000 annually from those investments. I want to be able to do that with my other 3 stores but getting access to capital has been next to impossible. PACE serves that purpose for small businesses and residential homes to Go Green!

PACE would be so good for the economy, local businesses, and the environment I don't know what's holding it up. This is one issue that should have complete bi-partisan support and I can't understand how we've gotten to this point on an issue so crucial as our environment and our struggling economy.

Thank You,

Ali Farsai
