Subject: RIN 2590-AA53 - Restore PACE programs now

Mar 16, 2012

General Alfred Pollard

Dear General Pollard,

[Please withhold my email and home addresses from the public record.]

I hope the PACE program can be saved to encourage property owners like myself to modify their homes with energy saving changes. It will benefit the homeowner and the environment. We need to give incentives to private citizens and businesses to be energy efficient because without financial incentives, it is virtually impossible to change people's old habits.

This is a win-win situation. No one loses. We get cost savings, reduce green house gases and create jobs!

Sincerely,
Nancy Raskind

Sincerely,

Mrs. Nancy Raskind
