Dear sir or madam,

I am compelled to comment on the PACE program and Fanny and Freddie's attempt to do away with it. What are you people smoking up there in Washington (or where ever you may be). This is a no brainer...a slam dunk. We must ween ourselves off fossil fuels. I think we can all agree on that. Alternative energies are going to be the way we do that. So let us encourage people to be energy independent. Conservation, solar and wind. This is what we need to be working toward. The PACE program is a brilliant and creative way to encourage people to be more energy efficient.

The fact that the program stays with the house is a great incentive. I want to shake the hands of the people that came up with the idea of PACE. Let's be on the correct side of history this time. Let's keep the PACE program.
