Subject: RIN 2590-AA53 - Restore PACE programs now

Mar 16, 2012

General Alfred Pollard

Dear General Pollard,

[Please withhold my email and home addresses from the public record.]

When I look to see what our government is doing, I'm encouraged when it's making wise investments in the future. Spending money today to save money tomorrow certainly looks like a wise investment. Especially when it's both good for the environment and helps provide jobs.

I urge the Federal Housing Finance Agency to restore Property Assessed Clean Energy (PACE) programs that help property owners like me make energy efficiency and renewable energy upgrades to our homes, businesses and factories.

Even in election years, it's good government to be financially wise.

Sincerely,

Mr. James Owen
