---------------------	--	------------------------------	---	--------------------

Note, this information is always subject to change as requirements emerge over the year. The information is based on budget information and FHFA Contracting Officer's best assessment of competitive opportunities over Fiscal Year 2020 (Fiscal Year quarters begin October 1, 2019 through September 30, 2020).

Estimated Award Amount

SAT = Simplified Acquisition Threshold. The current SAT is \$250,000 for General Services Administration (GSA) and NASA Solutions for Enterprise-Wide Procurement (SEWP) buys and will be \$250,000 for open market buys upon final revisions to the Federal Acquisition Regulation implementing the National Defense Authorization Act of 2018.

Acquisition Strategy

If possible, award will be made under a General Services Administration (GSA) schedule or Governmentwide Acquisition Contract (GWAC), such as NASA SEWP. GSA schedules, NASA SEWP, and other GWACs allow FHFA to compete requirements amongst a diverse mix of firms, including the ability to conduct small business (SB) or Women-Owned Small Business (WOSB) set asides.

Open market requirements will be advertised on the Contract Opportunities section on beta.sam.gov (the legacy Federal Business Opportunities site) as required by the Competition in Contracting Act.

TBD = To Be Determined.
