FHFA House Price Index[®] Unchanged in February; Up 1.7 Percent from Last Year

Washington, D.C. – U.S. house prices were unchanged in February, according to the U.S. Federal Housing (FHFA) seasonally adjusted monthly House Price Index (FHFA HPI[®]). House prices rose **1.7 percent** from February 2025 to February 2026. The previously reported 0.1 percent price change in January was revised upward to 0.2 percent.

For the nine census divisions, seasonally adjusted monthly home price changes ranged from **-1.1 percent** in the Mountain division to **+0.6 percent** in the South Atlantic division. The 12-month changes ranged from **-0.7 percent** in the Mountain division to **+4.2 percent** in the Middle Atlantic division.

The FHFA HPI is a comprehensive collection of publicly available house price indexes that measure changes in single-family home values based on data that extend back to the mid-1970s from all 50 states and over 400 American cities. It incorporates tens of millions of home sales and offers insights about house price changes at the national, census division, state, metro area, county, ZIP code, and census tract levels. FHFA uses a fully transparent methodology based upon a weighted, repeat-sales statistical technique to analyze house price transaction data.

FHFA releases HPI data and reports quarterly and monthly. The flagship FHFA HPI uses seasonally adjusted, purchase-only data from Fannie Mae and Freddie Mac. Additional indexes use other data, including refinances, mortgages insured by the Federal Housing Administration, and real property records. All the indexes (including their historic values) and information about future HPI release dates are available on FHFA's website: <https://www.fhfa.gov/HPI>.

The next HPI report will be released on May 26, 2026, and will include monthly data through March and quarterly data through the first quarter of 2026.

The Federal Housing Finance Agency regulates Fannie Mae, Freddie Mac, and the 11 Federal Home Loan Banks. These government-sponsored enterprises provide more than \$8.5 trillion in funding for the U.S. mortgage markets and financial institutions. Additional information is available at www.FHFA.gov, on X [@FHFA](https://twitter.com/FHFA), YouTube, Facebook, and LinkedIn.

Further background information

Overview of FHFA HPI

The FHFA House Price Index® (FHFA HPI®) is a broad economic measure of the movement of single-family house prices in the United States. While FHFA produces the HPI by statutory mandate (12 U.S.C. 4542), it began in 1995 with predecessor agency, the Office of Federal Housing Enterprise Oversight. The initial reports only contained information about regional and national house price movements. But sample coverage has expanded with better access to new data sources and technological improvements for processing such information. Today, indexes cover all 50 states and over 400 American cities with information extending back to the mid-1970s.

FHFA constructs several indexes for different market geographies and periods. The entire suite is often referenced as the “FHFA HPI” to reflect that we create all indexes in the same technical manner. The flagship FHFA HPI is the Purchase-Only Index, which uses seasonally adjusted, purchase-only data. This index is the most common choice for press releases, news stories, and social media. FHFA created additional indexes to address questions about house price changes in other market segments such as refinances, Federal Housing Administration (FHA) mortgages, or the entire single-family property market. Data constraints preclude the production of some kinds of indexes in certain geographic areas, but multiple index types (flavors) are generally available. Quarterly reports usually contain index flavors such as:

- “Purchase-Only” HPI: Tracks changes in transaction prices for conforming, conventional mortgages that are purchased or securitized
- “All-Transactions” HPI: Adds appraisal values from refinance mortgages to the Purchase-Only HPI data sample
- “Expanded-Data” HPI: Adds sales price information sourced from county recorder offices and FHA-backed mortgages to the Purchase-Only HPI data sample. We use this index to adjust the conforming loan limits, which establishes the dollar amount of loans that Fannie Mae and Freddie Mac can acquire.
- “Distress-Free” HPI: Removes sales of bank-owned properties and short sales from the Purchase-Only dataset
- “Annual” HPI. Uses the All-Transactions data but constructs indexes on a yearly basis to provide data for very small geographic areas like counties, ZIP codes, and census tracts
- “Manufactured Housing” HPI. We use data on conventional mortgages for single-family detached manufactured homes acquired by the Enterprises. Personal property loans are removed from the dataset. This index should be considered developmental.

The summary table below details the frequency and geography of the available indexes.

	National	Census Division	States	MSAs or Cities	ZIP3, Non-metro	ZIP Codes	Counties	Census Tracts
Monthly	✓	✓						
Quarterly	✓	✓	✓	✓	✓			
Annual	✓	✓	✓	✓	✓	✓	✓	✓

FHFA builds the HPI suite on tens of millions of home sales and offers insights about house price fluctuations at various geographic levels. For more information, see the [HPI Frequently Asked Questions](#).

FHFA HPI Release Dates for 2026

Public FHFA HPI® releases occur at 9AM ET and include a press release, tables, figures, and associated data.

Date	Release Type	Latest Included Data
Tuesday, January 27	Monthly Index	November 2025
Tuesday, February 24	Quarterly Index (with Monthly Tables)	December 2025 and 2025Q4
Tuesday, March 31	Monthly Index	January 2026
Tuesday, April 28	Monthly Index	February 2026
Tuesday, May 26	Quarterly Index (with Monthly Tables)	March 2026 and 2026Q1
Tuesday, June 30	Monthly Index	April 2026
