U.S. House Prices Rise 4.0 Percent over the Prior Year; Up 0.7 Percent from the Fourth Quarter of 2024

Washington, D.C. – U.S. house prices rose **4.0 percent** between the first quarter of 2024 and the first quarter of 2025, according to the U.S. Federal Housing (FHFA) House Price Index (FHFA HPI®). House prices for the first quarter of 2025 were up **0.7 percent** compared to the fourth quarter of 2024. FHFA's seasonally adjusted monthly index for March was down **0.1 percent** from February.

Significant Findings

- Nationally, the U.S. housing market has experienced positive annual appreciation each quarter since the start of 2012.
- House prices rose in 49 states and District of Columbia between the first quarter of 2024 and the first quarter of 2025. The five states with the highest annual appreciation were 1) **Rhode Island**, 11.4 percent; 2) **West Virginia**, 9.3 percent; 3) **Connecticut**, 9.0 percent; 4) **Ohio**, 7.6 percent; and 5) **Wyoming**, 7.4 percent. House prices declined in **Hawaii** by 2.2 percent.
- House prices rose in 89 of the 100 largest metropolitan areas over the previous four quarters. The annual price increase was the greatest in **Newark, NJ** at 11.6 percent. The metropolitan area that experienced the most significant price decline was **Lakeland-Winter Haven, FL** at 9.0 percent.
- All nine census divisions had positive house price changes year-over-year. The **Middle Atlantic** division recorded the strongest appreciation, posting a 6.8 percent increase from the first quarter of 2024 to the first quarter of 2025. The **Pacific** division recorded the smallest four-quarter appreciation, at 1.8 percent.
- Trends in the Top 100 Metropolitan Statistical Areas are available in our interactive dashboard: <https://www.fhfa.gov/data/dashboard/fhfa-hpi-top-100-metro-area-rankings>. The first tab displays rankings, and the second tab offers charts.

The FHFA HPI is a comprehensive collection of publicly available house price indexes that measure changes in single-family home values based on data that extend back to the mid-1970s from all 50 states and over 400 American cities. It incorporates tens of millions of home sales and offers insights about house price changes at the national, census division, state, metro area, county, ZIP code, and census tract levels. FHFA uses a fully transparent methodology based upon a weighted, repeat-sales statistical technique to analyze house price transaction data.

FHFA releases HPI data and reports quarterly and monthly. The flagship FHFA HPI uses

seasonally adjusted, purchase-only data from Fannie Mae and Freddie Mac. Additional indexes use other data including refinances, mortgages insured by the Federal Housing Administration, and real property records. All the indexes (including their historic values) and information about future HPI release dates are available on FHFA's website: <https://www.fhfa.gov/HPI>.

Tables and graphs showing home price statistics for metropolitan areas, states, census divisions, and the United States are included on the following pages.

Notes

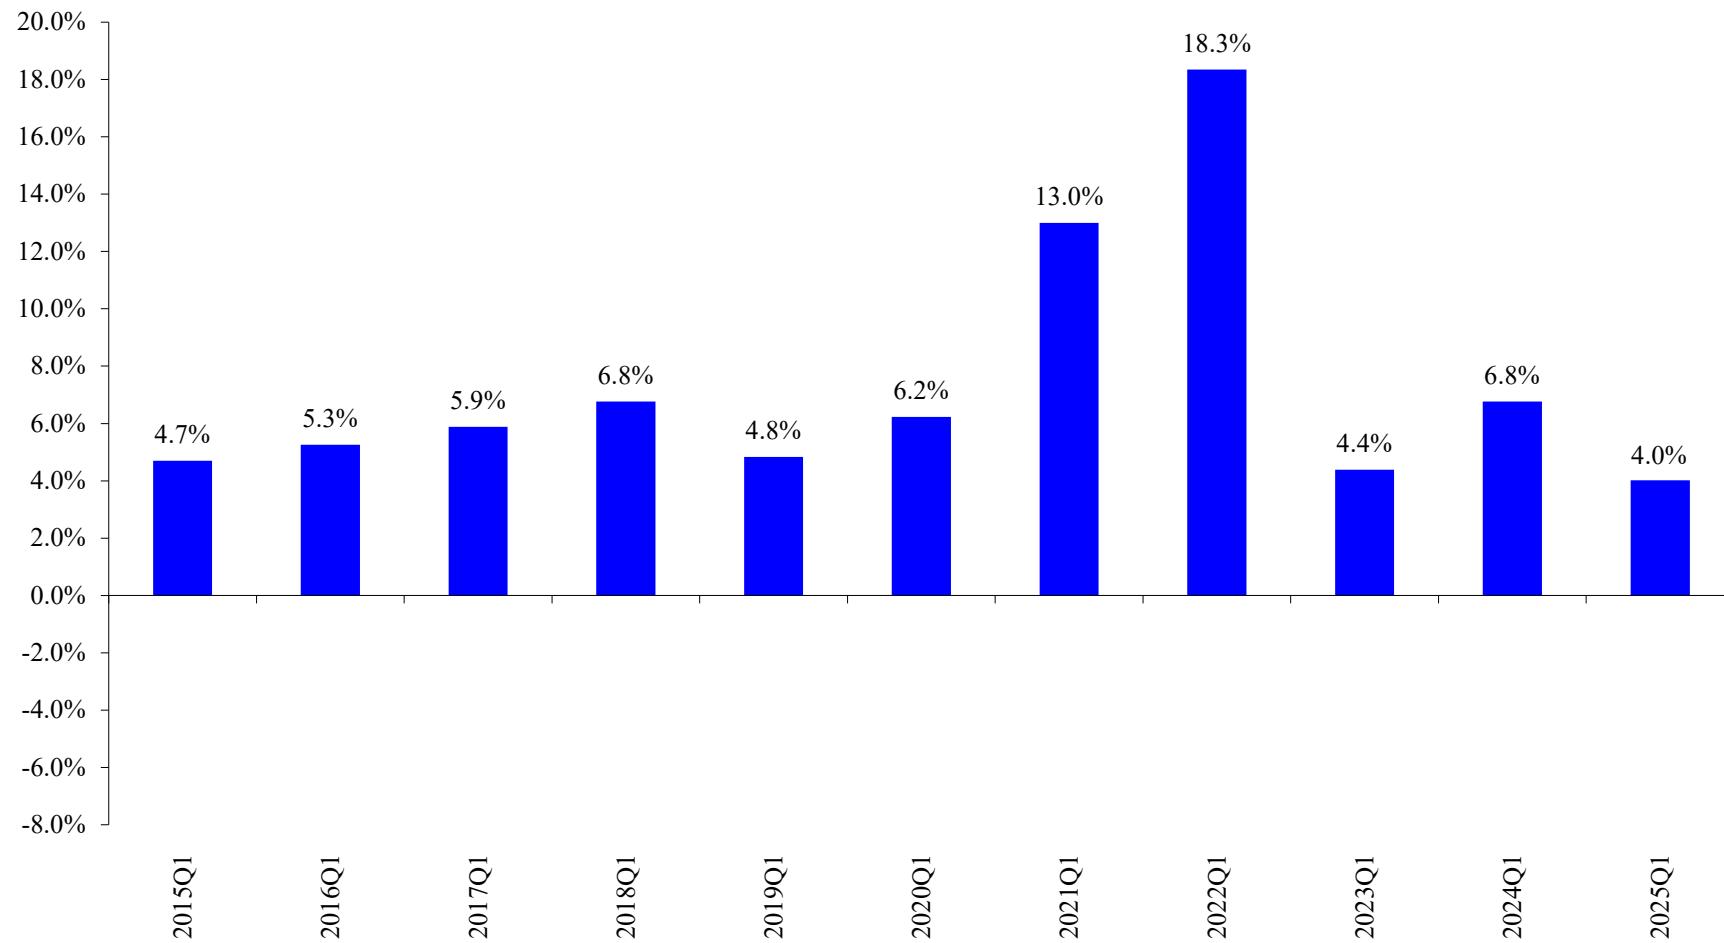

- As announced in the previous quarterly report, FHFA adopted the new metropolitan area definitions starting with this release. The set of studied metropolitan areas adheres to the new delineations released by Office of Management and Budget (OMB) in July 2023 (Bulletin No.23-01). These changes will continue to be reflected in future HPI reports. More details can be found from the Technical Note in this report, and the report also provides Additional Highlights that discusses a few examples.
- FHFA will release the next monthly HPI report (including data through April 2025) on June 24, 2025, and the next quarterly report (including data for the second quarter of 2025 and monthly data for June 2025) on August 26, 2025.
- Beginning with the June 2025 HPI release, Excel tables in the .xls format will be published in the .xlsx format. Tables currently released as .txt or .csv will continue be published in those formats.
- FHFA posts release dates for the remainder of 2025 at <https://www.fhfa.gov/data/hpi#ReleaseDates>.
- Follow @FHFA on X, LinkedIn and Facebook for more HPI news.

The Federal Housing Finance Agency regulates Fannie Mae, Freddie Mac, and the 11 Federal Home Loan Banks. These government-sponsored enterprises provide more than \$8.5 trillion in funding for the U.S. mortgage markets and financial institutions.

Technical Note

Transitioning to the New OMB 2023 Metropolitan Area Definitions

The U.S. Federal Housing FHFA (Federal Housing Finance Agency or FHFA) has adopted new definitions for metropolitan areas established in 2023 by the Office of Management and Budget (OMB) to reflect results of the 2020 decennial United States census.¹ FHFA will use these new definitions in this and future quarterly house price index (FHFA HPI®) reports.²

The OMB definitions contain names and numerical codes that identify metropolitan areas. The definitions are typically updated every five years to coincide with a decennial census or the American Community Survey and Census Bureau population estimates. A metropolitan area is defined as one or more contiguous counties that contain an urban core and adjacent areas associated economically and socially with the core.³ As populations change over time, the Census Bureau tracks urban expansions and contractions and, in turn, forms the basis for updates to these geographic definitions.

The following key questions and answers are intended to clarify how the new definitions will affect the HPIS.

What is the impact of the new definitions on the number of metropolitan areas?

The metropolitan-area HPIS will follow the new OMB delineations. HPI users will see changes to codes, names, and the counties that comprise each metropolitan area.⁴ The number of metropolitan areas represented in the All-Transactions indexes grew by six to 410. The total number of places tracked in the Purchase-Only and Expanded-Data indexes, however, did not change. The developmental Distress-Free indexes, previously covering 12 metropolitan areas, will now cover 14 metropolitan areas. All four indexes contain changes in numerical codes and metropolitan names. Table 1 provides an overview for each index. Few numerical code changes occurred and, when they did, they also involved a name change. Overall, most of the metropolitan areas either kept identical names or had minor changes so that their numerical codes are unchanged.

¹ See <https://www.whitehouse.gov/wp-content/uploads/2023/07/OMB-Bulletin-23-01.pdf>. The last major announcement for delineation changes was in September 2018 to reflect American Community Survey and Census Bureau population estimates for 2015.

² For the purposes of FHFA HPIS, “metropolitan areas” are synonymous where Metropolitan Statistical Areas (MSAs) or Metropolitan Divisions where MSAs are large enough to be divided. No methodological changes are being made to the repeat-sales methodology used to calculate the FHFA HPIS.

³ Where a county is not the primary local government, the definitions may rely on places like cities, towns, boroughs, or parishes.

⁴ FHFA focuses on changes in CBSA codes (where “CBSA” stands for “Core-Based Statistical Areas”) and metropolitan names. Name changes occur where population shifts revise the central or outlying status of one or more counties, alter the principal city, or update the spelling of an already existing county. All the new official names are used in this report.

How did the metropolitan areas change?

A breakdown of metropolitan-area changes is shown in Table 2. The table shows previous definitions that FHFA had utilized, the new definitions going forward, changes to codes and names, and what type of HPI is affected as a result of each change.⁵ While many of the changes are modifications to names or constituent counties, there are a few new metropolitan areas that have been added as well as a few prior areas that have been removed.

Additions to the list include newly recognized areas within previously delineated metropolitan areas, such as *Amherst Town-Northampton, MA*, which was previously part of the *Springfield, MA*, Metropolitan Statistical Area (MSA). In other cases, an area was removed because it was merged into another area. For example, *Madera, CA* is now defined as a part of *Fresno, CA*. Notably, two MSAs — *Atlanta-Sandy Springs-Roswell, GA* and *Tampa-St. Petersburg-Clearwater, FL* — are further broken down into divisions for HPI purposes. This is because the new delineations now recognize Metropolitan Divisions (MSADs) within each MSA. In addition, All-Transactions indexes now include seven new MSAs that were elevated from Micropolitan Statistical Area (μ SA) status, and, conversely, no longer cover seven areas that were reclassified into μ SAs.

Also, all MSAs that consist of Connecticut counties were redefined. This is because the 2023 delineations adopted the state's nine planning regions as county-equivalents instead of legacy county designations.⁶

What determines the lists of metropolitan areas for different indexes?

The list of 410 All-Transactions indexes captures all MSAs except for one MSA (*Eagle Pass, TX*) where the sample size is too small. For MSAs large enough to be divided into MSADs, indexes are instead constructed for the underlying divisions. Purchase-Only indexes and Expanded-Data indexes, on the other hand, are published for the largest MSAs or MSADs based on Census Bureau population estimates for respective areas. Population estimates as of 2023 were used to reassemble the largest 100 areas⁷ for Purchase-Only indexes and 50 areas for Expanded-Data indexes. As such, some additions and removals from the two lists took place due to population changes in addition to changes in geographical delineations. The add/drop information for each area is shown in the last three columns of Table 2.

Is a list available to show all the new CBSA codes and metropolitan names?

The full set of metropolitan areas is presented in Table 3. An Excel file with all three tables is posted in the “Additional Data” section on the HPI Datasets page, or at <https://www.fhfa.gov/data/hpi/datasets?tab=additional-data>.

⁵ Metropolitan areas are omitted if there was no change to their code, name, or constituent counties.

⁶ For more background information on Connecticut planning regions, please see <https://www.federalregister.gov/documents/2022/06/06/2022-12063/change-to-county-equivalents-in-the-state-of-connecticut>.

⁷ *McAllen-Edinburg-Mission, TX* and *Urban Honolulu, HI* are excluded from the largest 100 areas list due to sample sizes being too small for Purchase-Only sample.

Further information about metropolitan areas can be found in the Frequently Asked Questions at <https://www.fhfa.gov/faqs/hpi?tab=coverage>. Comments, questions, and suggestions should be addressed to HPIQuestions@fhfa.gov.

Table 1: Changes to Metropolitan Statistical Areas (MSAs) covered by the FHFA HPIs

Type of change	Type of HPI			
	All-Transactions	Purchase-Only	Expanded-Data	Distress-Free
Prior number of CBSA codes	404	100	50	12
Removed CBSA codes	15	11	5	2
Added CBSA codes	21	11	5	4
Total new number of CBSA codes	410	100	50	14
Prior number of Metropolitan names	404	100	50	12
Removed Metropolitan names	12	11	5	2
Added Metropolitan names	18	11	5	4
Modifications of Metropolitan names	23	6	4	2
Total new number of Metropolitan names	410	100	50	14

Notes: "CBSA" stands for "Core-Based Statistical Area" and is a geographic area defined by the Office of Management and Budget (OMB). CBSAs can include both Metropolitan Statistical Areas and Micropolitan Statistical Areas. FHFA, though, only releases HPIs for Metropolitan Statistical Areas, which are commonly referred to as "MSAs". Certain MSAs are further divided into Metropolitan Divisions and, in those cases, FHFA produces HPIs for each Division rather than the MSA as a whole.

Source: FHFA's calculations are based on comparisons of existing MSAs where HPIs are produced and new delineations as outlined in OMB Bulletin No. 23-01 released in 2023 and available for download at <https://www.whitehouse.gov/wp-content/uploads/2023/07/OMB-Bulletin-23-01.pdf>.

Notes: "Old definitions" show what FHFA had been using prior to its 2025Q1 HPI report and the "New definitions" denote what will be used going forward (beginning May 2025). Highlighted cells indicate changes.

Source: FHFA's calculations are based on comparisons of existing MSAs where HPIs are produced and new delineations as outlined in OMB Bulletin No. 23-01 released in 2023 and available for download at <https://www.whitehouse.gov/wp-content/uploads/2023/07/OMB-Bulletin-23-01.pdf>.

Notes: This is the complete list showing what MSAs are included in each type of FHFA's HPIs going forward (beginning May 2025).

Source: FHFA's calculations are based on comparisons of existing MSAs where HPIs are produced and new delineations as outlined in OMB Bulletin No. 23-01 released in 2023 and available for download at <https://www.whitehouse.gov/wp-content/uploads/2023/07/OMB-Bulletin-23-01.pdf>.

Additional Highlights: Comparing House Price Indexes of Select Metropolitan Areas with Delineation Changes

Before producing the current index estimates for this report (2025Q1 HPI) based on the newly adopted OMB delineations, FHFA performed a test using the newly delineated list of metropolitan areas with the preexisting source data batches for the 2024Q4 HPI report. As noted in the earlier Technical Note, there were various delineation changes to many of the existing metropolitan areas. The resulting impact on indexes for respective areas varied depending on the nature of changes. In this section, we highlight a few examples where those changes contributed to changes in the indexes.

1. *Hartford-West Hartford-East Hartford, CT* (CBSA Code 25540, formerly named as *Hartford-East Hartford-Middletown, CT*)

All CBSAs within Connecticut had boundary adjustments. The new 2023 OMB delineations recognized Connecticut's planning regions as county-equivalent entities instead of legacy counties. For example, *Hartford-East Hartford-Middletown, CT* was previously an MSA defined over the boundary of Fairfield County. Under the changes, it has been replaced with a similarly named MSA, *Hartford-West Hartford-East Hartford, CT*, that now consists of two planning regions: Western Connecticut and Greater Bridgeport. While the resulting geographical area largely overlaps with its predecessor, it now excludes the City of Shelton proper of Fairfield County/Northwest Hills Planning Region and added two municipalities from Litchfield County/Greater Bridgeport Planning Region (See Figure 1).

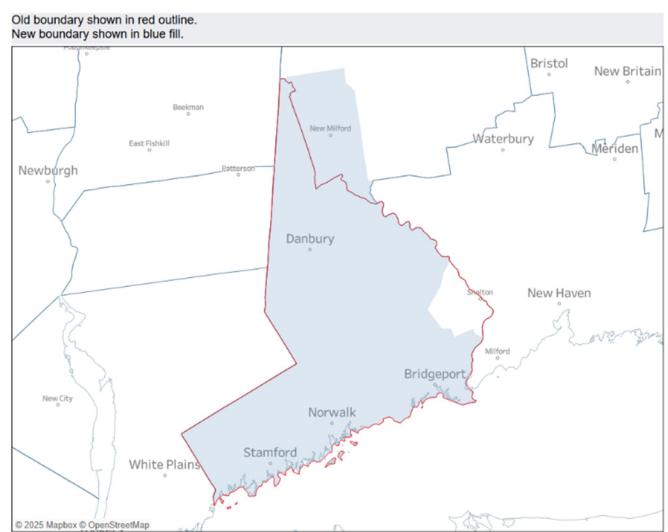

Figure 1. Old and New Boundaries of MSA containing Hartford, CT

The HPI series for this metropolitan area has changed very little with this definition update since the geographical scope of change in the sample was minor. Figure 2 shows seasonally adjusted time series for Purchase-Only indexes where the two series based on different

delineations almost overlap with each other. The invariability may also reflect housing market trends that have not significantly differed across these adjacent geographical segments.

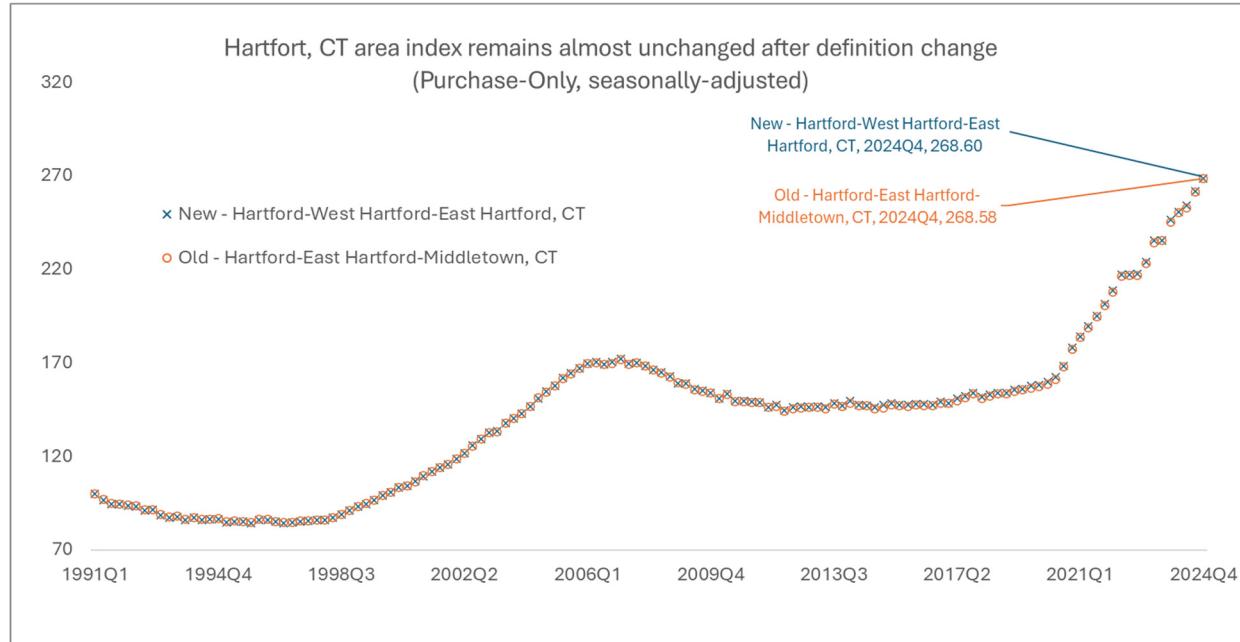

Figure 2. Index Comparison between the Old and New Definitions of MSA containing Hartford, CT

2. Tampa, FL (MSAD, 45294) and St. Petersburg-Clearwater-Largo, FL (MSAD, 41304) split from Tampa-St. Petersburg-Clearwater, FL (MSA, 45300)

Tampa-St. Petersburg-Clearwater, FL was one of the MSAs that was split into new divisions. The MSA itself continues to consist of four counties (Hernando, Hillsborough, Pasco and Pinellas), but Pinellas County now forms a new Metropolitan Division named *St. Petersburg-Clearwater-Largo, FL*, and the remaining three counties constitute another division, *Tampa, FL*.

Across all HPI index types, these two areas moved largely in tandem throughout the published index window. Still, the index levels differ considerably between the two since there had been notable historical episodes where the price appreciation was significantly steeper in *St. Petersburg-Clearwater-Largo, FL* than in *Tampa, FL*. Figure 3 highlights two five-year periods with such divergence: 1) Between the fourth quarters of 1998 and 2003, and 2) between the fourth quarters of 2014 and 2019. Because these two geographic areas make up a combined MSA, they were previously covered by a single common price index. Going forward, there will be a separate MSAD-level price index for each area.

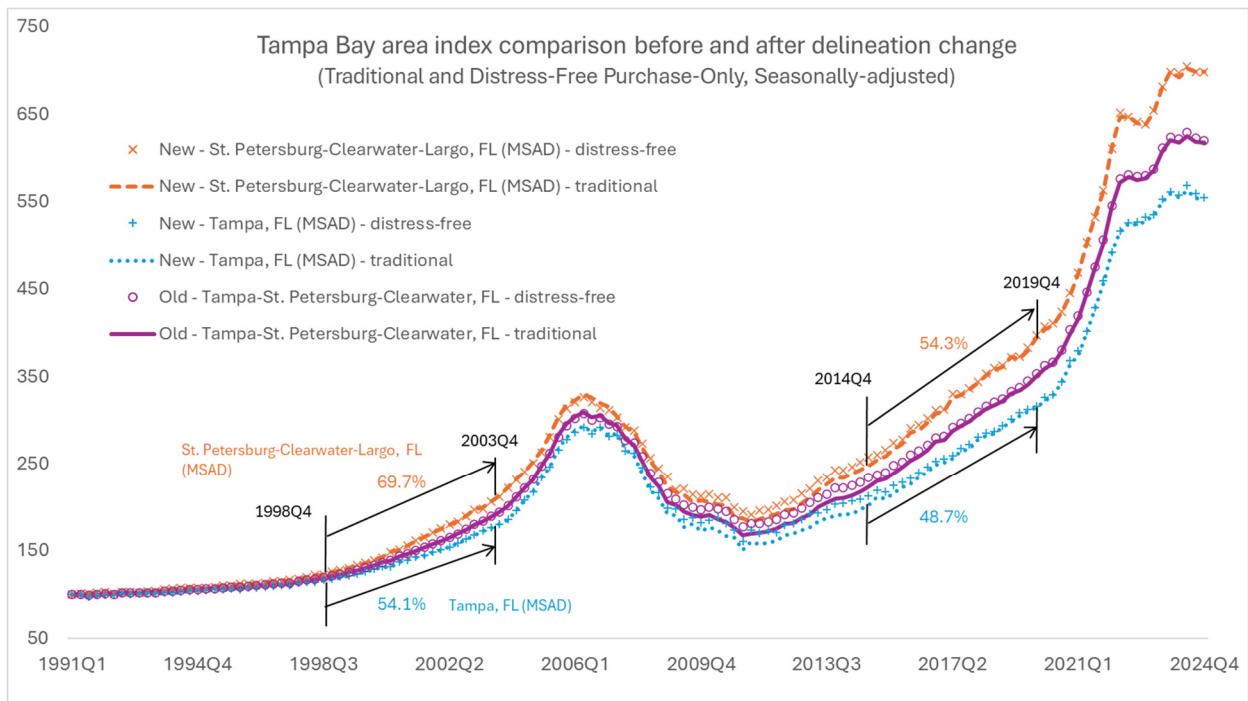

Figure 3. Index Comparisons between New MSADs in the Tampa-St. Petersburg-Clearwater, FL Area

Tampa Bay was among the areas of interest in our effort to estimate an alternative Purchase-Only index that isolates away potential noise from distressed home sales.⁹ With the new Metropolitan Divisions for the area, both divisions are now included in this developmental index (Distress-Free HPI) that FHFA continues to publish.¹⁰ Figure 3 additionally plots Distress-Free version of the new division-level series.

3. Arlington-Alexandria-Reston, VA-WV (MSAD, 11694) and Washington, DC-MD (MSAD, 47764) split from Washington-Arlington-Alexandria, DC-VA-MD-WV (MSAD, 47894)

Some of the existing Metropolitan Divisions were also further split into more divisions, and *Washington-Arlington-Alexandria, DC-VA-MD-WV* was one such case. The geographical area is now covered by two different Metropolitan Divisions: *Arlington-Alexandria-Reston, VA-WV* and *Washington, DC-MD*.

The updated indexes that are now separately estimated for the two areas show that the house prices in these adjacent markets have moved differently. During the national housing market crash in the mid-2000s, price declines started earlier in *Arlington-Alexandria-Reston, VA-WV* from the fourth quarter of 2006 while the indexes continued to climb in *Washington, DC-MD* for four more quarters (Figure 4). The previously published indexes for *Washington-Arlington-*

⁹ For additional background, see https://www.fhfa.gov/sites/default/files/2023-10/2012Q2_HPIFocus_N508.pdf.

¹⁰ *Atlanta-Sandy Springs-Roswell, GA* (formerly Atlanta-Sandy Springs-Alpharetta, GA) is another MSA in the Distress-Free HPI list that is now published as two division-level indexes: *Atlanta-Sandy Springs-Roswell, GA (MSAD)* and *Marietta, GA (MSAD)*.

Alexandria, DC-VA-MD-WV tracked the prices from the broader sample and showed 2006Q4 peak as *Arlington-Alexandria-Reston, VA-WV* did.

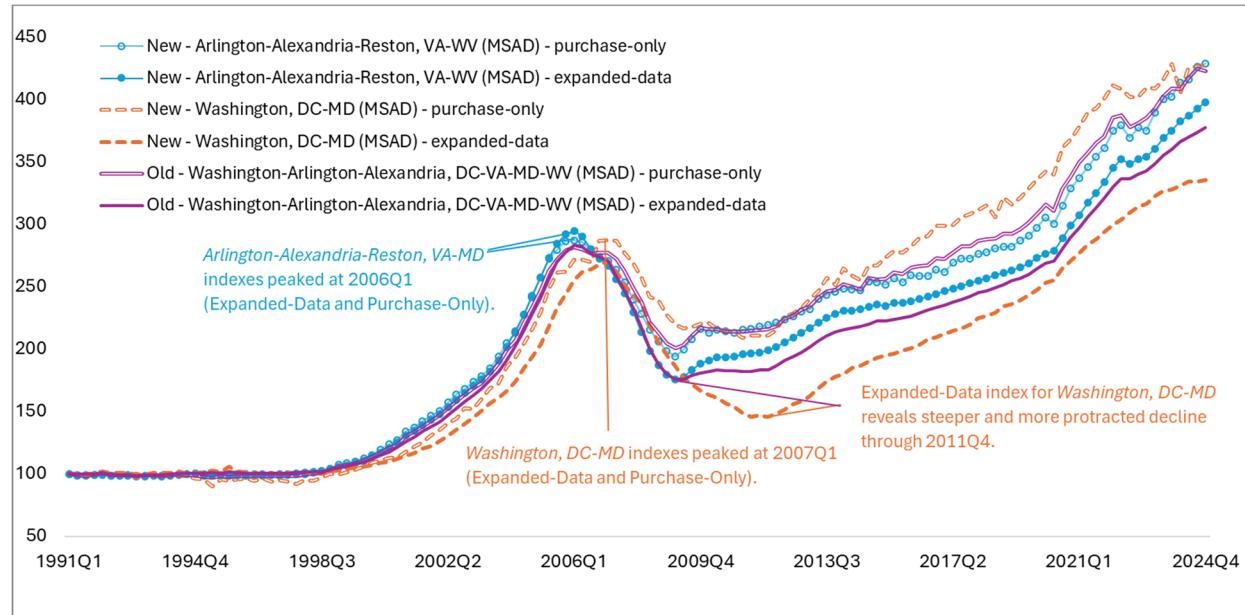

Figure 4. Index Comparisons between New and Old Metropolitan Divisions containing Washington, DC and Arlington-Alexandria, VA.

The extent and duration of the subsequent housing market crash are also revealed to be sizably different for *Washington, DC-MD*. The Expanded-Data index further accentuates the contrast that was not as evident before the delineation split. In *Washington, DC-MD*, it took a cumulative Expanded-Data index decline of 46.1 percent for five years since the peak until the recovery started, whereas the rebound was just after a 37.9 percent, three-year period decline from the peak in the broader area *Washington-Arlington-Alexandria, DC-VA-MD-WV*. This pronounced disparity likely points to distinctive market behaviors that were concentrated specifically in Expanded-Data sample for the new and narrowly defined *Washington, DC-MD* area and thus potential selection issues concerning Purchase-Only index for the same area.¹¹

¹¹ Purchase-Only HPI sample is constructed from single-family house purchase mortgages that are backed by Fannie Mae and Freddie Mac. Expanded-Data sample additionally captures FHA-backed mortgages and public sales records from licensed county recorder offices.

Overview of FHFA HPI

The FHFA House Price Index® (FHFA HPI®) is a broad economic measure of the movement of single-family house prices in the United States. While FHFA produces the HPI by statutory mandate (12 U.S.C. 4542), it began in 1995 with predecessor agency, the Office of Federal Housing Enterprise Oversight. The initial reports only contained information about regional and national house price movements. But sample coverage has expanded with better access to new data sources and technological improvements for processing such information. Today, indexes cover all 50 states and over 400 American cities with information extending back to the mid-1970s.

FHFA constructs several indexes for different market geographies and periods. The entire suite is often referenced as the “FHFA HPI” to reflect that we create all indexes in the same technical manner. The flagship FHFA HPI is the Purchase-Only Index, which uses seasonally adjusted, purchase-only data. This index is the most common choice for press releases, news stories, and social media. FHFA created additional indexes to address questions about house price changes in other market segments such as refinances, Federal Housing Administration (FHA) mortgages, or the entire single-family property market. Data constraints preclude the production of some kinds of indexes in certain geographic areas, but multiple index types (flavors) are generally available. Quarterly reports usually contain index flavors such as:

- “Purchase-Only” HPI: Tracks changes in transaction prices for conforming, conventional mortgages that are purchased or securitized
- “All-Transactions” HPI: Adds appraisal values from refinance mortgages to the Purchase-Only HPI data sample
- “Expanded-Data” HPI: Adds sales price information sourced from county recorder offices and FHA-backed mortgages to the Purchase-Only HPI data sample. We use this index to adjust the conforming loan limits, which establishes the dollar amount of loans that Fannie Mae and Freddie Mac can acquire.
- “Distress-Free” HPI: Removes sales of bank-owned properties and short sales from the Purchase-Only dataset
- “Annual” HPI. Uses the All-Transactions data but constructs indexes on a yearly basis to provide data for very small geographic areas like counties, ZIP codes, and census tracts
- “Manufactured Housing” HPI. We use data on conventional mortgages for single-family detached manufactured homes acquired by the Enterprises. Personal property loans are removed from the dataset. This index should be considered developmental.

The summary table below details the frequency and geography of the available indexes.

	National	Census Division	States	MSAs or Cities	ZIP3, Non-metro	ZIP Codes	Counties	Census Tracts
Monthly	✓	✓						
Quarterly	✓	✓	✓	✓	✓			
Annual	✓	✓	✓	✓	✓	✓	✓	✓

FHFA builds the HPI suite on tens of millions of home sales and offers insights about house price fluctuations at various geographic levels. For more information, see the [HPI Frequently Asked Questions](#).

FHFA HPI Release Dates for 2025

Public FHFA HPI® releases occur at 9AM ET and include a press release, tables, figures, and associated data.

Date	Release Type	Latest Included Data
Tuesday, January 28	Monthly Index	November 2024
Tuesday, February 25	Quarterly Index (with Monthly Tables)	December 2024 and 2024Q4
