U.S. House Prices Rise 2.9 Percent Year over Year; Unchanged Quarter over Quarter

Washington, D.C. – U.S. house prices rose **2.9 percent** between the second quarter of 2024 and the second quarter of 2025, according to the U.S. Federal Housing (FHFA) House Price Index (FHFA HPI®). House prices for the second quarter of 2025 remained unchanged compared to the first quarter of 2025. FHFA’s seasonally adjusted monthly index for June was down **0.2 percent** from May.

Significant Findings

- Nationally, the U.S. housing market has experienced positive annual appreciation each quarter since the start of 2012.
- House prices rose in 46 states between the second quarter of 2024 and the second quarter of 2025. The five states with the highest annual appreciation were 1) **New York**, 8.0 percent; 2) **Connecticut**, 7.8 percent; 3) **New Jersey**, 7.5 percent; 4) **Mississippi**, 7.3 percent; and 5) **Illinois**, 6.7 percent. House prices were down in four states and District of Columbia. District of Columbia experienced the most significant price decline at 7.6 percent.
- House prices rose in 81 of the 100 largest metropolitan areas over the previous four quarters. The annual price increase was the greatest in **Rochester, NY** at 10.3 percent. The metropolitan area that experienced the most significant price decline was **North Port-Bradenton-Sarasota, FL** at 11.2 percent.
- All nine census divisions had positive house price changes year-over-year. The **Middle Atlantic** division recorded the strongest appreciation, posting a 6.7 percent increase from the second quarter of 2024 to the second quarter of 2025. The **Pacific** division recorded the smallest four-quarter appreciation, at 0.9 percent.
- Trends in the Top 100 Metropolitan Statistical Areas are available in our interactive dashboard: <https://www.fhfa.gov/data/dashboard/fhfa-hpi-top-100-metro-area-rankings>. The first tab displays rankings, and the second tab offers charts.

The FHFA HPI is a comprehensive collection of publicly available house price indexes that measure changes in single-family home values based on data that extend back to the mid-1970s from all 50 states and over 400 American cities. It incorporates tens of millions of home sales and offers insights about house price changes at the national, census division, state, metro area, county, ZIP code, and census tract levels. FHFA uses a fully transparent methodology based upon a weighted, repeat-sales statistical technique to analyze house price transaction data.

FHFA releases HPI data and reports quarterly and monthly. The flagship FHFA HPI uses seasonally adjusted, purchase-only data from Fannie Mae and Freddie Mac. Additional indexes use other data including refinances, mortgages insured by the Federal Housing Administration, and real property records. All the indexes (including their historic values) and information about future HPI release dates are available on FHFA's website: <https://www.fhfa.gov/HPI>.

Tables and graphs showing home price statistics for metropolitan areas, states, census divisions, and the United States are included on the following pages.

Notes

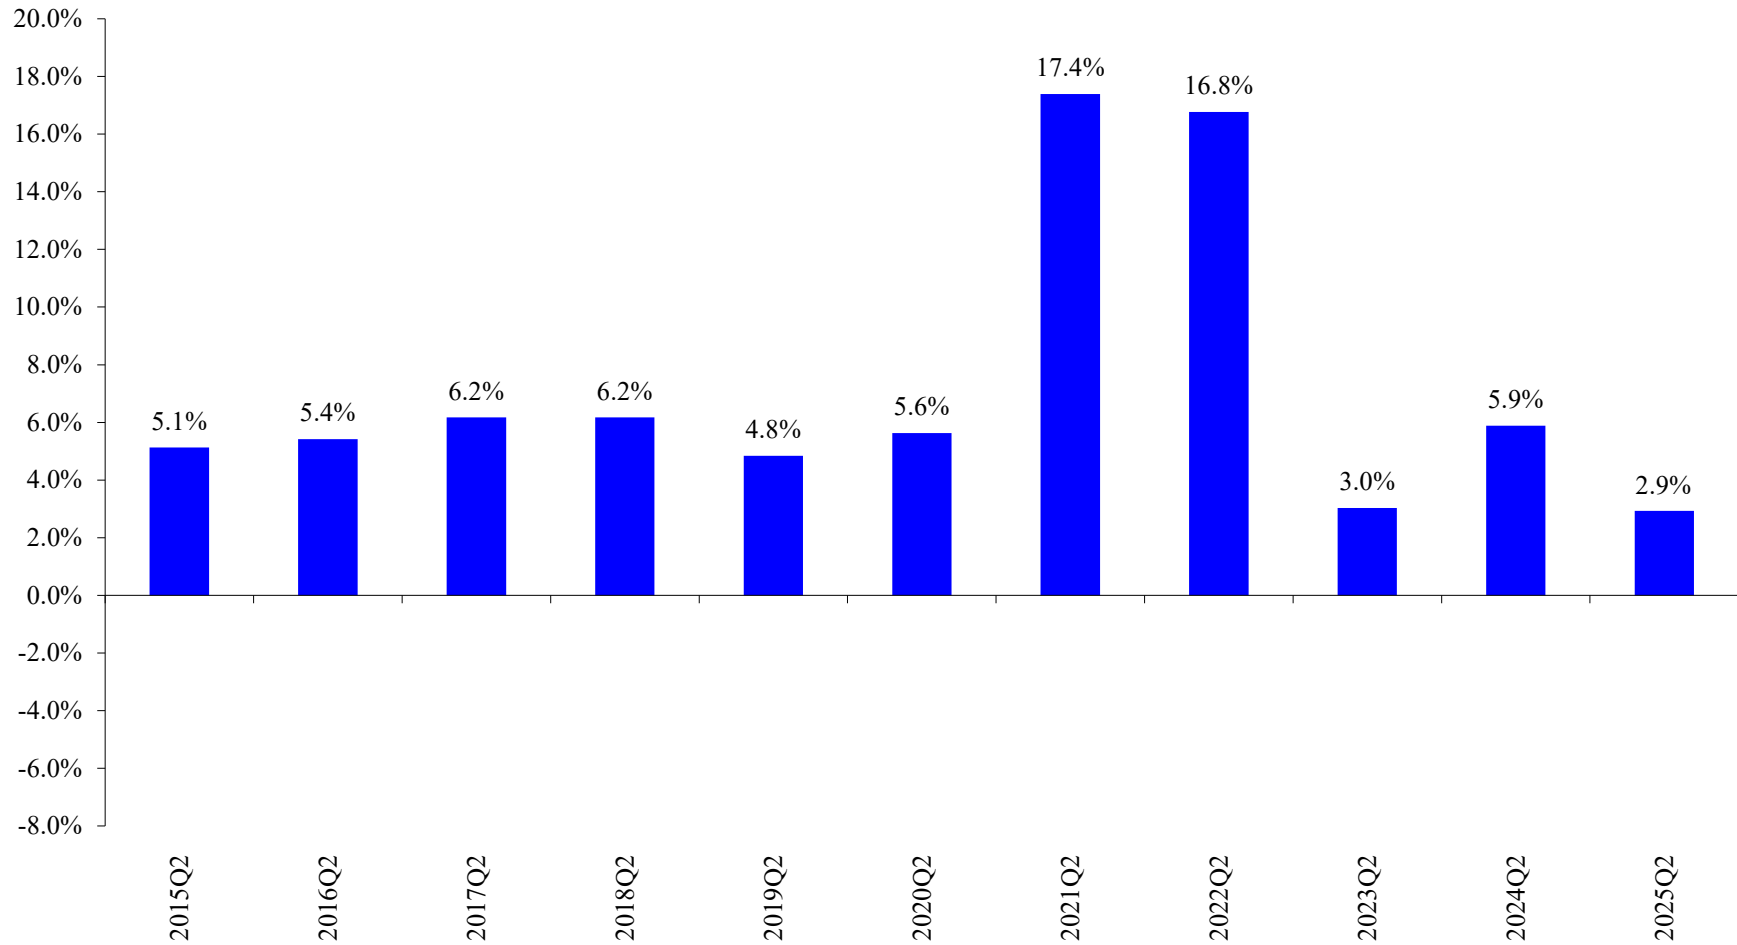

- FHFA will release the next monthly HPI report (including data through July 2025) on September 30, 2025, and the next quarterly report (including data for the third quarter of 2025 and monthly data for September 2025) on November 25, 2025.
- FHFA posts release dates for the remainder of 2025 and all of 2026 at <https://www.fhfa.gov/data/hpi#ReleaseDates>.

The Federal Housing Finance Agency regulates Fannie Mae, Freddie Mac, and the 11 Federal Home Loan Banks. These government-sponsored enterprises provide more than \$8.5 trillion in funding for the U.S. mortgage markets and financial institutions.

Overview of FHFA HPI

The FHFA House Price Index® (FHFA HPI®) is a broad economic measure of the movement of single-family house prices in the United States. While FHFA produces the HPI by statutory mandate (12 U.S.C. 4542), it began in 1995 with predecessor agency, the Office of Federal Housing Enterprise Oversight. The initial reports only contained information about regional and national house price movements. But sample coverage has expanded with better access to new data sources and technological improvements for processing such information. Today, indexes cover all 50 states and over 400 American cities with information extending back to the mid-1970s.

FHFA constructs several indexes for different market geographies and periods. The entire suite is often referenced as the “FHFA HPI” to reflect that we create all indexes in the same technical manner. The flagship FHFA HPI is the Purchase-Only Index, which uses seasonally adjusted, purchase-only data. This index is the most common choice for press releases, news stories, and social media. FHFA created additional indexes to address questions about house price changes in other market segments such as refinances, Federal Housing Administration (FHA) mortgages, or the entire single-family property market. Data constraints preclude the production of some kinds of indexes in certain geographic areas, but multiple index types (flavors) are generally available. Quarterly reports usually contain index flavors such as:

- “Purchase-Only” HPI: Tracks changes in transaction prices for conforming, conventional mortgages that are purchased or securitized
- “All-Transactions” HPI: Adds appraisal values from refinance mortgages to the Purchase-Only HPI data sample
- “Expanded-Data” HPI: Adds sales price information sourced from county recorder offices and FHA-backed mortgages to the Purchase-Only HPI data sample. We use this index to adjust the conforming loan limits, which establishes the dollar amount of loans that Fannie Mae and Freddie Mac can acquire.
- “Distress-Free” HPI: Removes sales of bank-owned properties and short sales from the Purchase-Only dataset
- “Annual” HPI. Uses the All-Transactions data but constructs indexes on a yearly basis to provide data for very small geographic areas like counties, ZIP codes, and census tracts
- “Manufactured Housing” HPI. We use data on conventional mortgages for single-family detached manufactured homes acquired by the Enterprises. Personal property loans are removed from the dataset. This index should be considered developmental.

The summary table below details the frequency and geography of the available indexes.

	National	Census Division	States	MSAs or Cities	ZIP3, Non-metro	ZIP Codes	Counties	Census Tracts
Monthly	✓	✓						
Quarterly	✓	✓	✓	✓	✓			
Annual	✓	✓	✓	✓	✓	✓	✓	✓

FHFA builds the HPI suite on tens of millions of home sales and offers insights about house price fluctuations at various geographic levels. For more information, see the [HPI Frequently Asked Questions](#).

FHFA HPI Release Dates for 2025

Public FHFA HPI® releases occur at 9AM ET and include a press release, tables, figures, and associated data.

Date	Release Type	Latest Included Data
Tuesday, January 28	Monthly Index	November 2024
Tuesday, February 25	Quarterly Index (with Monthly Tables)	December 2024 and 2024Q4
Tuesday, March 25	Monthly Index	January 2025
Tuesday, April 29	Monthly Index	February 2025
Tuesday, May 27	Quarterly Index (with Monthly Tables)	March 2025 and 2025Q1
Tuesday, June 24	Monthly Index	April 2025
Tuesday, July 29	Monthly Index	May 2025
Tuesday, August 26	Quarterly Index (with Monthly Tables)	June 2025 and 2025Q2
Tuesday, September 30	Monthly Index	July 2025
Tuesday, October 28	Monthly Index	August 2025
Tuesday, November 25	Quarterly Index (with Monthly Tables)	September 2025 and 2025Q3
Tuesday, December 30	Monthly Index	October 2025

All data are freely available for download from the FHFA HPI website at
