Federal Housing Finance Agency

400 7th Street, SW, Washington, D.C. 20024 Telephone: (202) 649-3800 www.fhfa.gov

June 13, 2014

Honorable Tim Johnson Chairman Committee on Banking, Housing, and Urban Affairs United States Senate Washington, D.C. 20510

Honorable Jeb Hensarling Chairman Committee on Financial Services United States House of Representatives Washington, D.C. 20515 Honorable Mike Crapo Ranking Member Committee on Banking, Housing, and Urban Affairs United States Senate Washington, D.C. 20510

Honorable Maxine Waters Ranking Member Committee on Financial Services United States House of Representatives Washington, D.C. 20515

Dear Chairmen and Ranking Members:

I am pleased to transmit the Federal Housing Finance Agency's (FHFA's) 2013 Report to Congress. This report meets the requirements of the Federal Housing Enterprises Financial Safety and Soundness Act of 1992, as amended by the Housing and Economic Recovery Act of 2008 (HERA). It also meets FHFA's obligation under Section 1305 of the Dodd-Frank Wall Street Reform and Consumer Protection Act to report to Congress on the agency's plans to "continue to support and maintain the nation's vital housing industry, while at the same time guaranteeing that the American taxpayer will not suffer unnecessary losses."

The 2013 Report to Congress presents the findings of the agency's 2013 examinations of Fannie Mae and Freddie Mac (the Enterprises), the 12 Federal Home Loan Banks (FHLBanks), and the FHLBanks' Office of Finance. It also details FHFA's actions as conservator of Fannie Mae and Freddie Mac during 2013, as well as the agency's regulatory guidance, research and publications. During 2013, FHFA continued to serve as regulator and conservator of the Enterprises while supervising and regulating the 12 FHLBanks and the FHLBanks' joint Office of Finance to promote their safety and soundness and fulfillment of their housing missions.

Yours truly,

Delin L. hatt

Melvin L. Watt Director, Federal Housing Finance Agency

Federal Housing Finance Oversight Board Assessment

ection 1103 of the Housing and Economic Recovery Act (HERA) of 2008 requires that the Federal Housing Finance Agency (FHFA) Director's Annual Report to Congress include an assessment of the Federal Housing Finance Oversight Board or any of its members with

respect to:

- The safety and soundness of the regulated entities;
- Any material deficiencies in the conduct of the operations of the regulated entities;
- The overall operational status of the regulated entities; and
- An evaluation of the performance of the regulated entities in carrying out their respective missions.

FHFA's Annual Report provides a detailed review of the issues described above for Fannie Mae and Freddie Mac (the Enterprises) and the Federal Home Loan Bank (FHLBank) System as a basis for the assessment.

Enterprises

The Enterprises continue to operate under conservatorship, as they have since 2008. The U.S. Department of the Treasury (Treasury) provides the Enterprises with financial support through the Senior Preferred Stock Purchase Agreements (PSPAs) that were established at the same time the Enterprises entered conservatorship. Through year-end 2013, the Enterprises' cumulative draws under the PSPAs totaled \$187.5 billion, and the Enterprises had paid \$185.2 billion in cumulative cash dividends to Treasury. Under the terms of the PSPAs the payment of dividends does not offset or pay down prior draws from Treasury by the Enterprises.

While each Enterprise continues to have significant exposure to credit losses from mortgages originated in the several years prior to conservatorship, they had record amounts of net income in 2013 totaling \$132.7 billion. The Enterprises' 2013 levels of net income benefited from a number of nonrecurring items such as the reversal of the valuation allowance associated with deferred tax assets and various legal settlements. Other major contributors included the overall improvement in the housing market and income from the Enterprises' retained portfolios.

Given that the Enterprises have depleted all of their shareholders' equity, are operating with financial support from Treasury, and are not able to build their net worth, when considering safety and soundness, it is important to consider the risks associated with the Enterprises' new single-family guarantee book of business. The credit quality of new single-family guarantees in 2013 remained high by historical comparison. Higher-risk mortgages, such as no-income documentation or interest-only mortgages, have largely been eliminated from the Enterprises' new guarantees. The average loan-tovalue ratio of mortgages acquired in 2013 was similar to 2012 at about 76 percent, partly reflecting continued refinance transactions under the Home Affordable Refinance Program (HARP) and an increased percentage of purchase money mortgages. Excluding refinances under HARP, the average loan-to-value ratio was about 70 percent in 2013 compared to 68 percent in 2012. Average FICO credit scores on new guarantees in 2013 trended downward as the percentage of purchase money mortgages increased, and by the last quarter were in the 740s. More specifically, new guarantees with FICO scores less than 700 made up about 15 percent of new business in 2013 compared to 11 percent of new business in 2012. Average FICO credit scores at the end of 2013 were roughly 25 points higher than the average FICO scores prior to conservatorship.

The conservatorships of the Enterprises, combined with Treasury's financial support, have stabilized the Enterprises, but not restored them to a sound financial condition. The Enterprises remain exposed to credit, counterparty and operational risks. Credit risk management remains a key priority for both Enterprises given their substantial amount of remaining legacy distressed assets and ongoing stress in certain housing markets. In addition, counterparty risk remains an area of concern, especially given the evolving changes in the mortgage industry, and the greater prominence of new types of seller/servicers. For example, there have been significant transfers of mortgage servicing for Enterprise portfolios from banking organizations to non-depository institutions. While non-depository institutions often provide more effective servicing, they also represent a new type of counterparty risk. Operational risk also remains a focus because of challenges related to legacy systems, record keeping and ongoing concerns about human capital and key person dependencies. The Enterprises have made progress in addressing human capital and key person dependencies and are taking appropriate steps to resolve other risk management issues.

Consistent with their statutory missions, the Enterprises have continued providing liquidity in the secondary mortgage market during their conservatorships. This has helped ensure that mortgage credit remains available. However, as noted above, the credit quality of the Enterprises' new business remains elevated, which has limited the Enterprises' presence in some segments of the mortgage market such as first-time home buyers and traditionally underserved segments of the market. In that regard, FHFA and the Enterprises made progress on developing a new representation and warranty framework to provide greater certainty to lenders on their exposure, and additional refinements are under consideration. These changes are intended to reduce unnecessary constraints on lending.

Both Enterprises also continue to serve an important role in efforts to limit preventable foreclosures, both to mitigate Enterprise losses as well as to enhance stability in housing markets and local communities. These efforts are essential to improving the financial performance and risk profile of the Enterprises. The Enterprises completed 448,000 foreclosure alternative actions in 2013, including 243,000 loan modifications. Since conservatorship, the Enterprises have completed 3.1 million foreclosure alternative actions, including over 1.6 million permanent loan modifications. In addition, while increases in mortgage rates have slowed refinance activity, refinances under HARP totaled 900,000 in 2013, which brought the total number of refinances under HARP to 3.1 million.

The Enterprises cannot remain in conservatorship permanently. FHFA and the Enterprises made good progress on achieving the goals set out in FHFA's Strategic Plan for the Enterprises as further specified in the 2013 Conservatorship Scorecard. In particular, expanding private sector participation is essential for the long-term health of the mortgage market, and the 2013 goal of executing multiple risk-sharing transactions on \$30 billion of mortgages for each Enterprise was met or exceeded. Progress was also made on developing common data standards, reducing the Enterprises' retained portfolios, and developing the Common Securitization Platform.

Directing the Enterprises' operations as the conservatorships lengthen presents its own set of challenges for FHFA. In particular, it is critical that the Enterprises dedicate appropriate resources to maintaining safe and sound operations in the face of uncertainty regarding the long-term prospects of the Enterprises' operations and charters.

FHLBanks

As of December 31, 2013, all 12 FHLBanks exceeded the minimum 4 percent leverage ratio. The weighted average regulatory capital-to-assets ratio for the FHLBank System was 6.0 percent at yearend 2013, as compared to 6.8 percent at the end of 2012. All FHLBanks were profitable for the year. The FHLBanks' advance business continues to operate with no credit losses. The quality of the FHLBanks' investments in private-label mortgage-backed securities had been a heightened supervisory concern, but as these securities have paid down and market conditions improved, that concern has abated.

As of year-end 2013, one FHLBank remained under an FHFA enforcement action. In November 2013, FHFA amended a consent order originally executed with the FHLBank of Seattle in 2010. Although the Seattle FHLBank's overall financial performance continued to improve during 2013, weaknesses persist due to deteriorated value of the institution's private-label mortgage-backed securities, elevated operational risk, poor earnings, and insufficient retained earnings. The revised consent order requires FHFA's non-objection before the Seattle FHLBank pays dividends or repurchases or redeems capital stock. In recognition of steady quarterly earnings, improved market value of equity

position, and improved private-label mortgage-backed securities values, FHFA allowed the Seattle FHLBank to repurchase and redeem a small amount of excess capital stock and mandatorily redeemable capital stock, respectively, and pay minimal dividends during 2013.

The overall scale of the FHLBanks' advance operations increased during 2013, with \$498.6 billion of advances outstanding at year-end 2013, an increase of \$72.9 billion from year-end 2012. Much of this increase, or about \$56.2 billion, was from increased advance borrowing from large member institutions. Despite this increase, advances remain low from a historical perspective.

Even in an environment of relatively weak advance demand, the FHLBanks met their mission of providing liquidity to their members. Typically, advance demand is cyclical. It falls when funding market conditions are robust or deposit growth is strong, as is the case today, and increases when market conditions are weak and liquidity is constrained in the banking system. The FHLBanks' also met their mission through their support of the Affordable Housing Program (AHP), which is a source of funds to support local affordable housing initiatives. The FHLBanks provided \$296 million in AHP funds in 2013.

As can be seen from the discussion above, 2013 was a critical year in FHFA's oversight of the Enterprises and FHLBanks. While many challenges remain, the accomplishments of the past year provide a solid foundation for continued progress in 2014. The framework presented in FHFA's 2014 Strategic Plan for the Conservatorships of Fannie Mae and Freddie Mac builds off that foundation, and adjusts the goals of the conservatorships to reflect changes that have occurred over the last five years.

Conservatorships of the Enterprises

The Federal Housing Finance Agency (FHFA) was established by the Housing and Economic Recovery Act of 2008 (HERA) and is responsible for the effective supervision, regulation, and housing mission oversight of the Federal National Mortgage Association (Fannie Mae), the Federal Home Loan Mortgage Corporation (Freddie Mac), and the Federal Home Loan Bank System, which includes 12 Banks and the Office of Finance. The agency's mission is to ensure that these regulated entities operate in a safe and sound manner so that they serve as a reliable source of liquidity and funding for housing finance and community investment.

s part of HERA, Congress granted the Director of FHFA the discretionary authority to appoint FHFA as conservator or receiver of Fannie Mae, Freddie Mac (together, the "Enterprises"), or any of the Federal Home Loan Banks upon determining that specified criteria had been met. On September 6, 2008, FHFA exercised this authority and placed Fannie Mae and Freddie Mac into conservatorships. Since they were placed into conservatorships, Fannie Mae and Freddie Mac together have received \$187.5 billion in taxpayer support under the Senior Preferred Stock Purchase Agreements executed with the U.S. Department of the Treasury. FHFA continues to oversee these conservatorships.

In 2013, FHFA focused the activities of Fannie Mae and Freddie Mac on the needs of the secondary mortgage market. Two documents detail FHFA's overall conservatorship objectives for the Enterprises in 2013. First, FHFA issued a Strategic Plan for Enterprise Conservatorships on February 21, 2012. Second, FHFA issued a 2013 Scorecard for Enterprise Conservatorships on March 4, 2013. The 2013 Conservatorship Scorecard set measurable goals and targets toward achieving three strategic goals – Build, Contract and Maintain – and preparing the Enterprises for any transition policymakers set forth. During the course of 2013, FHFA also issued two progress reports concerning the agency's 2013 conservatorship objectives. On April 30, 2013, FHFA released "A Progress Report on the Common Securitization Infrastructure." On November 25, 2013, FHFA released "A Progress Report on the Implementation of FHFA's Strategic Plan for Enterprise Conservatorships."

2013 Strategic Initiatives

In 2013, FHFA worked to implement three goals set forth in the 2012 Strategic Plan and the 2013 Scorecard for Enterprise Conservatorships:

- **1. Build.** Build a new infrastructure for the secondary mortgage market.
- **2. Contract.** Gradually contract the Enterprises' dominant presence in the marketplace while simplifying and shrinking their operations.
- **3. Maintain.** Maintain foreclosure prevention activities and credit availability for new and refinanced mortgages.

BUILD.

Build a new infrastructure for the secondary mortgage market.

FHFA made progress on a variety of projects designed to ensure Fannie Mae and Freddie Mac will meet the needs of a future housing finance system. Three elements included as part of the 2013 Conservatorship Scorecard are the Common Securitization Platform, the Uniform Mortgage Data Program and the Contractual and Disclosure Framework.

Common Securitization Platform

Throughout 2013, FHFA worked with Fannie Mae and Freddie Mac on the development of a Common

1

Securitization Platform (CSP) to perform major aspects of the securitization process. As part of this effort, FHFA and the Enterprises worked toward developing five modules – data validation, security issuance, disclosure, master servicing and bond administration functions – to implement core securitization functions.

Following FHFA's October 2012 White Paper, *Building a New Infrastructure for the Secondary Mortgage Market*, FHFA included the CSP in the Enterprises' 2013 Conservatorship Scorecard. The 2013 Scorecard expressed FHFA's expectation that the Enterprises would, in conjunction with FHFA, continue the foundational development of the CSP. Additionally, the 2013 Conservatorship Scorecard required that each Enterprise develop a plan to integrate with the CSP.

The Enterprises made significant progress on these goals throughout the year. To highlight ongoing work toward developing the CSP in 2013, FHFA released progress reports addressing CSP efforts on April 30, 2013 and November 25, 2013. Achievement of the longer-term objectives of the CSP remains a significant undertaking, as implementation of the CSP encompasses both a complex technology project and significant changes in Enterprise business processes.

Uniform Mortgage Data Program and Contractual and Disclosure Framework

During 2013 FHFA also continued efforts with the Uniform Mortgage Data Program, which the agency launched in 2010. Developing and implementing mortgage data standards is essential to improving accuracy, increasing transparency, effectively assessing risk, and creating efficiencies for the Enterprises and mortgage industry participants. Improved data collection in the earliest stages of the mortgage process will help the Enterprises identify potential problems and improve the quality of the mortgages they purchase.

FHFA began work with the Enterprises to create a Uniform Closing Dataset in 2013 in anticipation of the Consumer Financial Protection Bureau's final Integrated Mortgage Disclosure requirements, which will go into effect in August 2015. The Uniform Closing Dataset involves creating standard data fields to collect the information on this disclosure and identifying how market participants should collect and submit this data to the Enterprises.

In consultation with FHFA and other Federal agencies, the Enterprises also began the process of updating the Uniform Loan Application Dataset. In 2013, this effort worked to identify new data fields to be collected on the Uniform Residential Loan Application, as well as some data fields that are no longer needed.

Finally, as part of the 2013 Scorecard's Build objective, the Enterprises also worked toward development of a Contractual and Disclosure Framework intended to more closely align Fannie Mae and Freddie Mac and potentially serve as a model for the future of the mortgage market.

CONTRACT.

Gradually contract the Enterprises' dominant presence in the marketplace while simplifying and shrinking their operations.

In the 2013 Conservatorship Scorecard, FHFA placed the highest weight (50 percent of the total Scorecard) on the contract goal. To move this goal forward, FHFA set forth three priorities in 2013: 1) executing credit risk transfers for single-family mortgage credit guarantee businesses, 2) reducing the Enterprises' retained portfolios, and 3) reducing the Enterprises' multifamily portfolios.

Credit Risk Transfers

Throughout 2013, the Enterprises worked to develop and execute transactions that transfer single-family mortgage credit risk to private investors. The 2013 Conservatorship Scorecard expressed FHFA's expectation that each Enterprise would demonstrate the viability of multiple types of risk transfer transactions involving single-family loans with an unpaid principal balance (UPB) of at least \$30 billion. In preparation for these transactions, FHFA directed the Enterprises to release historical data on the credit performance of relevant mortgages. The Enterprises made this data available during the first half of 2013. During the year, each Enterprise executed multiple transactions and met the \$30 billion UPB goal.

During 2013, most of the risk transferred occurred through pre-funded capital markets transactions. This included Freddie Mac completing two Structured Agency Credit Risk (STACR) transactions and Fannie Mae completing one Connecticut Avenue Securities (CAS) transaction. These debt securities pay investors premiums sufficient to account for their risk of losing principal should there be credit losses on the reference pool of mortgages otherwise guaranteed by an Enterprise. In buying the debt, investors fully fund potential credit losses up front, which results in no counterparty risk for the Enterprises. These risk transfer transactions attracted a large number and variety of investors.

Both Enterprises also transferred mortgage credit risk in separate transactions with insurers. Fannie Mae executed a pool insurance policy with National Mortgage Insurance. Freddie Mac executed a transaction that transferred to Arch Reinsurance, a global reinsurer, a portion of the residual credit risk that the Enterprise had retained on the reference pool of mortgages underlying the first STACR transaction.

The Enterprises made major steps in 2013 in executing risk transfers that advance scalability and have the potential to be viable means to lessen taxpayers' exposure to credit risk both currently and in a post-conservatorship world.

Reducing Retained Portfolios

Reducing the Enterprises' retained portfolios is required by the Senior Preferred Stock Purchase Agreement (PSPA) between each Enterprise and the U.S. Department of the Treasury. In August 2012, the U.S. Department of the Treasury modified the PSPAs to accelerate the required rate of reduction in each Enterprise's retained portfolio to 15 percent per year. The PSPAs also require that each Enterprise reduce its retained portfolio to \$250 billion by the end of 2018. For 2013, the PSPA required that each retained portfolio be reduced to no more than \$553 billion. By the end of 2013, each Enterprise's retained portfolio was below the target amount. Within the retained portfolio reduction target, FHFA set a further sub-goal of reducing less liquid asset balances by 5 percent from their December 31, 2012 levels. Both Enterprises also met this sub-goal.

Reductions in Enterprise Multifamily Portfolios

In addition, the 2013 Conservatorship Scorecard established the expectation that each Enterprise would reduce the volume of its new multifamily business during 2013. The goal of this contraction was to attract private capital into the market and reduce the Enterprises' footprint. Each Enterprise implemented a plan and reduced their multifamily volume by 10 percent during 2013.

MAINTAIN.

Maintain foreclosure prevention activities and credit availability for new and refinanced mortgages.

Representation and Warranty Framework

The 2013 Conservatorship Scorecard required the Enterprises to address the uncertainty surrounding preconservatorship representation and warranty claims, as well as moving the industry to a state of enhanced transparency for the resolution of future claims. Both Enterprises took significant actions to achieve these objectives by year's end. On January 1, 2013, Fannie Mae and Freddie Mac implemented a new seller Representation and Warranty Framework (Framework) for conventional loans. Instead of conducting most quality control reviews on the back-end after a loan has defaulted, the new Framework moves the Enterprises toward a more upfront process that selects loan samples for review soon after the loans are delivered to the Enterprises. Additionally, under this new Framework:

- Lenders are relieved of certain repurchase obligations when there are 36 consecutive and on-time monthly payments made by the borrower beginning at the point an Enterprise acquires the loan.
- HARP loans are eligible for relief after an acceptable 12-month payment history beginning at the point an Enterprise acquires the loan.
- Early feedback is provided to lenders on the quality control results of each reviewed loan, not just those loans that resulted in a repurchase request.
- The Enterprises provide enhanced tools to assist lenders to improve loan quality.

Home Affordable Refinance Program

The Home Affordable Refinance Program (HARP), introduced in April 2009, is a key way in which Fannie Mae and Freddie Mac ensure credit availability for refinanced mortgages. HARP gives borrowers whose mortgages are owned or guaranteed by Fannie Mae or Freddie Mac and who have loan-to-value ratios greater than 80 percent and are current on their mortgages the opportunity to refinance into mortgages with more affordable payments. From April 2009 through November 2013, over 3 million loans have refinanced through HARP.

In April 2013, FHFA extended HARP through 2015 and launched a public outreach campaign to increase HARP awareness and encourage borrowers to take advantage of the program. The campaign was initiated in and around Chicago, Cleveland, Detroit, Southern California/Riverside, Las Vegas, Atlanta, Miami, Tampa, and Orlando. In addition, the new campaign includes a HARP website (www.harp.gov), a series of virtual events in targeted markets that were covered extensively by local media, customizable tools to help lenders promote HARP, and a working relationship with Zillow.

Loss Mitigation and Foreclosure Prevention Efforts

In 2013, FHFA and the Enterprises announced enhancements to the Servicing Alignment Initiative (SAI), including a Streamlined Modification Initiative. This new modification option was added to the home retention tools offered by the Enterprises to provide severely delinquent borrowers another path to avoid foreclosure. This modification addresses the challenges many delinquent homeowners experienced in obtaining loan modifications by eliminating administrative barriers associated with document collection and evaluation by servicers. Eligible borrowers must demonstrate a willingness and ability to pay by making three scheduled trial payments, after which the mortgage will be permanently modified.

Further loss mitigation and foreclosure prevention actions taken in 2013 included extending the Home Affordable Modification Program (HAMP) through the end of 2015 to align with the extension announced by the U.S. Department of the Treasury. Additionally, the Enterprises adjusted certain servicer incentives in support of successful modification outcomes. FHFA also required the Enterprises to update their servicing requirements – including early intervention, foreclosure alternatives, referrals, suspension, and error resolution provisions – to be consistent with the Consumer Financial Protection Bureau's (CFPB) Servicing Regulations that became effective on January 10, 2014.

Mortgage Insurance

The Enterprises also continued efforts that began in 2012 to align master policy requirements and require mortgage insurer counterparties to the Enterprises to modify their master policies to reflect the requirement changes. During 2013, the Enterprises approved each insurer's master policy and directed the insurers to file the master policies and any related endorsements with the insurance regulators in the states in which they do business.

Other Conservatorship Activities

Pre-Conservatorship Representation and Warranty Resolutions

The 2013 Conservatorship Scorecard indicated that each Enterprise should complete its review of pre-conservatorship loan acquisitions and demand repayment for representation and warranty selling violations to eliminate uncertainties for lenders, as well as focus resources on current and future issues.

The Enterprises used two strategies to achieve this objective, and resolution of legacy loan representation and warranty demands returned more than \$20 billion to the Enterprises during 2013. The first strategy was identifying selling breaches and issuing repurchase or make-whole demands to lenders based on loan-by-loan file reviews. The Enterprises received a combined \$4.2 billion in legacy loan recoveries through this individual loan repurchase request process.

The Enterprises' second strategy provided certainty in future dealings with some lenders through resolution of pending and future legal loan repurchase demands in exchange for lump sum payments. During 2013, Fannie Mae executed this type of agreement with nine large lenders and 10 smaller entities, recovering approximately \$13.6 billion. During the same period, Freddie Mac also concluded similar agreements with nine large lenders, representing recoveries totaling approximately \$2.4 billion.

Private-Label Mortgage-Backed Securities

In 2013, FHFA continued work on lawsuits filed in 2011 against 18 financial institutions, certain of their officers and directors, and various unaffiliated lead underwriters. The suits allege violations of both federal securities laws and state laws in the sale of residential private-label mortgage-backed securities (MBS) to the Enterprises between 2005 and 2007. The complaints, filed under statutory authority granted by HERA, reflect FHFA's conclusion that the Enterprises incurred losses because of misrepresentations and other improper actions by the firms and individuals named in the suits.

Throughout 2013, FHFA recovered nearly \$8 billion on behalf of taxpayers through settlements with financial institutions in some of these matters. Settlement amounts result from a consideration of various factors, including statutory calculations, number of securities, unique circumstances of each matter, and litigation risks.

Enterprise Compensation

The 2013 Executive Compensation Plan incorporated the changes made in the 2012 plan. During 2013, FHFA also directed the Enterprises to terminate their defined benefit pension plans, which provide a predefined monthly annuity, to eliminate the risk in these plans. Freddie Mac and Fannie Mae currently offer defined contribution plans, which are market competitive and provide employees and future retirees with an appropriate level of retirement benefit.

Report of the Annual Examinations of Fannie Mae and Freddie Mac

Examination Authority

his report is based on the results and conclusions of the 2013 annual examinations of the Federal National Mortgage Association (Fannie Mae) and the Federal Home Loan Mortgage Corporation (Freddie Mac), which were performed by FHFA under authority of section 1317(a) of the Federal Housing Enterprises Financial Safety and Soundness Act of 1992, as amended (12 U.S.C. § 4517(a)).

A key component of FHFA's mission is to ensure that Fannie Mae and Freddie Mac (Enterprises) are operating in a safe and sound manner so they may continue to serve as a reliable source of liquidity and funding for housing finance and community investment.

Supervisory Program

In its annual examination, FHFA assesses the financial safety and soundness, i.e., financial performance, condition, and overall risk management practices of Fannie Mae and Freddie Mac. FHFA utilizes three approaches to carry out its supervisory responsibilities: ongoing monitoring, targeted examinations, and risk assessments. The assessments contained in this report are based on an examination of the books and records of the Enterprises, on statements made to examiners by directors, officers, employees, and agents of the Enterprise, and on information obtained from other sources.

2013 Examination Scope

In 2013, our examination activities included a series of targeted examinations and ongoing monitoring. In addition, we assessed the Enterprise's remediation of previously identified Matters Requiring Attention (MRAs) and the responses of the Boards of Directors and management to deficiencies and weaknesses identified by the Enterprises' internal audit departments and external auditors.

Rating System

FHFA published a final notice in the Federal Register on November 13, 2012, and Advisory Bulletin 2012-03, *FHFA Examination Rating System*, on December 19, 2012, describing the CAMELSO rating system, which became effective with the 2013 annual Report of Examination.

The term CAMELSO is the acronym used to describe the following seven components:

- Capital Asset Quality
- Management
- Earnings
- Liquidity
- Sensitivity to market risk and
- Operational risk.

The CAMELSO rating system is the framework FHFA uses to report examination findings and conclusions to the Boards of Directors at Fannie Mae and Freddie Mac.

Report of the Annual Examination of Fannie Mae (Federal National Mortgage Association)

Overall Condition

The Board of Directors (Board) and management continued to make progress throughout 2013 to improve the Enterprise's risk profile and strengthen oversight. These efforts include continuing the reduction in problem loans, maintaining the quality of new mortgages acquired since 2009, developing plans to address legacy systems along with the accompanying operational risk, and remediating matters requiring attention (MRAs) and high priority audit matters.

Although progress has been made, significant challenges remain, including credit risk charge-offs arising from the legacy book of business¹, the need for stronger governance, the unsustainability of current earnings combined with the Enterprise's inability to retain earnings to augment capital given the terms of the PSPA and heightened operational risk related to a large number of active strategic initiatives.

Corporate Governance

In 2013, FHFA has increasingly held the Enterprise to heightened supervisory expectations that are commensurate with the size and nature of the risks taken by the Enterprise and reflective of the prominent role of the Enterprise in the mortgage market. However, the Enterprise is still striving to meet those expectations. Increased focus on strong governance throughout the Enterprise should be a top priority for the Board and senior management in 2014.

Credit Risk Management

The Enterprise has seen a significant positive trend in its credit risk profile, with the single-family portfolio experiencing a substantial improvement in credit quality. That improvement resulted largely from the adoption of more conservative underwriting; improvements in macroeconomic factors, as reflected by significant home price appreciation in recent years; and management's focus on reducing the level of problem assets through loan modifications, short sales, real estate owned (REO) dispositions and liquidation of assets in the retained mortgage portfolio.

Legacy Portfolio

In spite of improvements in overall credit quality, the burden of excessive problem assets will continue to weigh heavily on the firm. At year-end 2013, the Enterprise had a large portfolio of distressed assets composed primarily of troubled debt restructurings² and nonaccrual loans³. The Enterprise still has a significant volume of seriously delinquent loans (mortgages that are 90 days or more past due) and a large standing inventory of REO properties. Fannie Mae continues to feel the financial impact of its legacy book with the high level of credit losses and delinquencies associated with that portfolio. Nearly three-quarters of Fannie Mae's seriously delinquent mortgages have been past due for 180 days or longer. Resolving and minimizing the financial impact of these delinquencies will be one of the biggest challenges facing the Enterprise in 2014.

Information Systems

The level of operational risk at the Enterprise remains high and largely reflects the elevated risk associated with implementation of the Multi-Year Investment Plan

¹ Legacy Book includes mortgages originated prior to 2009.

² Troubled debt restructurings are mortgage loans in which concessions are granted.

³ Nonaccrual loans are defined as mortgages where the payment of principal and interest is 60 or more days past due.

(Plan)⁴, a large-scale project designed to upgrade and replace Fannie Mae's outdated and inflexible information systems. Management has made significant progress in stabilizing the current information technology environment, with improvements in the change management process, reductions in production outages, and establishment of an out-of-region data center, which is a critical component for supporting information systems and providing business continuity in the event of a disaster.

Fannie Mae's existing information systems require a high level of manual intervention, which may limit the Enterprise's ability to fully harness the information it needs to oversee and manage risk. Further, the increasing sophistication of external threats, including cybercrime and threats to data security will remain a concern as management implements the Plan.

Third-Party Relationships

FHFA is holding the Enterprise to rigorous standards for managing third party relationships, particularly in light of the operational risk associated with specialty servicers, which has placed added significance on the need to adopt higher standards for monitoring those relationships. FHFA has advised the Enterprise that it expects the application of new standards for monitoring third-party relationships to be appropriately inclusive and to capture other third parties engaged by the Enterprise. FHFA expects these standards to be designed to address the unique characteristics and risks posed by third-parties, especially in light of the diversity of relationships the Enterprise currently maintains. These standards should fully consider business continuity issues for both the third party and the Enterprise. The Enterprise has acknowledged FHFA's expectations and is working to meet them. Effective management oversight will require enhancements to existing practices, including additional due diligence on third parties, to minimize operational and financial risk arising from those relationships.

Mortgage Servicing Right Transfers

Heightened standards for third party relationships are of particular importance, as Fannie Mae's traditional large servicing counterparties, depository institutions, have been steadily reducing their mortgage servicing units and transferring mortgage servicing rights to a small number of specialty servicers. Specialty servicers have introduced a new level of risk to the Enterprise, as these counterparties may lack the financial strength and prudential regulatory oversight of depository institutions. Mortgage servicing transfers have fueled unprecedented growth of specialty servicers, which potentially exposes the Enterprise to an elevated level of operational and financial risk in the event that one of those firms is unable to fulfill its contractual obligations.

Retained Mortgage Portfolio

Under the terms of the PSPA, Fannie Mae cannot use its retained earnings to augment capital, and draws from the U.S. Department of the Treasury are the Enterprise's only source of additional capital. The PSPA also requires the Enterprise to achieve certain yearly reduction targets for the retained mortgage portfolio. However, the process of liquidating the retained mortgage portfolio may pose a significant risk to the Enterprise, as the portfolio contains many assets that are less marketable and difficult to price. As the retained mortgage portfolio contracts, the portion of assets that are less liquid and subject to significant price volatility will increase. The Enterprise should have a comprehensive strategy that incorporates likely alternative reduction strategies and accompanying financial implications in order for senior management to be fully informed when making decisions on liquidating assets.

Sustainability of Earnings

Although Fannie Mae's 2013 net income of \$84.0 billion reflects a considerable increase over the \$17.2 billion reported for 2012, the level of earnings is unsustainable, as it was largely driven by nonrecurring and volatile sources of income. Most notably, Fannie Mae recognized a nonrecurring net tax benefit and an

9

The Plan is a project designed to prioritize and sequence the Enterprise's strategic initiatives and align project work against Enterprise capabilities.

increase in credit-related income. Notwithstanding the benefit that credit-related income provided to 2013 earnings, high levels of problem assets are likely to continue to apply downward pressure on earnings. In addition, it is likely the Enterprise will see a reduction in future income from settlements from securities litigation and representation and warranty claims. Future earnings will also be adversely impacted by the mandated decrease in the size of Fannie Mae's retained mortgage portfolio. Finally, although earnings are expected to remain positive for the foreseeable future, the level of future earnings will be sensitive to macroeconomic conditions.

Affordable Housing Goals for Fannie Mae

Under HERA and FHFA regulations, Fannie Mae is subject to the following:

- 1. Low-income home purchase goal, for home purchase mortgages to families with incomes no greater than 80 percent of area median income.
- 2. Very low-income home purchase goal, for home purchase mortgages to families with incomes no greater than 50 percent of area median income.
- 3. Low-income areas home purchase subgoal, for mortgages to families living in census tracts with tract incomes no greater than 80 percent of area median income, or families with incomes no greater than 100 percent of area median income who live in census tracts with a minority population of 30 percent or more and a tract median income of less than 100 percent of area median income.
- 4. Low-income areas home purchase goal, which includes mortgages that meet the criteria under the low-income areas home purchase subgoal as well as mortgages to families with incomes no greater than 100 percent of area median income who live in a federally declared disaster area.

- 5. Low-income refinance goal, for refinance mortgages to families with incomes no greater than 80 percent of area median income.
- 6. Low-income multifamily goal, for rental units for families in multifamily properties with incomes no greater than 80 percent of area median income.
- 7. Very low-income multifamily subgoal, for rental units for families in multifamily properties with incomes no greater than 50 percent of area median income.

Figure 1 shows the goals FHFA established for 2012 and 2013 and official figures on Fannie Mae's goal performance in 2012. These results are based on FHFA's analysis of loan-level data Fannie Mae provided to FHFA in early 2013. It also shows the goal levels and preliminary figures on goal performance in 2013, based on information Fannie Mae submitted in its March 2014 Annual Housing Activities Report for 2013.

Since 2010, the single-family housing goals have included both preset benchmark levels and a comparison of goal performance with the corresponding figures on the goal-qualifying shares of conventional conforming mortgages in the primary mortgage market in each year. FHFA bases this later calculation on an analysis of mortgage origination data as reported by lenders in accordance with the Home Mortgage Disclosure Act (HMDA).

If Fannie Mae's performance on a single-family goal falls short of the benchmark, the Enterprise is still deemed to have met the goal if its performance meets or exceeds the corresponding share of mortgages originated in the primary mortgage market. These market-based figures are also shown for 2012 in Figure 1.

The market-based figures for 2013 will not be available until September 2014.

FHFA does not use the same process to look back at the multifamily goals because of the different nature of the goals, and because there are no data available on either the number or proportion of affordable multifamily units. Instead, FHFA relies on a variety of sources to estimate the size of the multifamily market.

| Classification | Definition |
|-----------------|---|
| Low income | Earning no more than 80 percent of area median income |
| Very low income | Earning no more than 50 percent of area median income |

Fannie Mae's goal performance in 2012 exceeded the benchmark levels for all of its single-family and multifamily goals. In some previous years, Fannie Mae's performance on one or more single-family goals fell short of the benchmark level, but it was deemed to have passed the goal because it met or exceeded the market performance for that year. The market figures for 2012 are shown for reference in Figure 1, though they are not relevant to Fannie Mae's passing any of the goals in that year. However, the market comparisons will be relevant for 2013, because Fannie Mae reported that its performance on the very low-income home purchase goal (6 percent) fell short of the benchmark level (7 percent).

In October 2013, FHFA notified Fannie Mae of its official performance figures for 2012 and also of the market-based figures for the single-family goals for 2012.

HERA also requires Fannie Mae to report on its financing of low-income units in multifamily properties of a limited size. In a September 2010 rule, FHFA defined multifamily properties of a limited size as those containing from 5 to 50 units. Fannie Mae financed 16,801 low-income rental units in small multifamily properties in 2012, and 13,827 units in 2013.

| Category | 2012 Benchmarks | 2012 Performance & Market | | 2013 | 2013 |
|--|--------------------|---------------------------|----------------------------|------------|--------------------------|

| MULTIFAMILY GOALS (units) | | | | | |
| Low-income goal | 285,000 | 375,924 | N/A | 265,000 | 326,597 |
| Very low-income goal | 80,000 | 108,878 | N/A | 70,000 | 78,071 |

Figure 1 • Fannie Mae Housing Goals and Performance for 2012-2013

Source: Federal Housing Finance Agency

^a Official performance in 2012 as determined by FHFA, based on analysis of Fannie Mae loan-level data.

^b Goal-qualifying shares of single-family home purchase or refinance conventional conforming mortgages originated in the primary mortgage market, based on FHFA analysis of 2012 Home Mortgage Disclosure Act (HMDA) data. Market performance for 2013 will be determined by FHFA later in 2014.

^c Performance as reported by Fannie Mae in its March 2014 Annual Housing Activities Report. Official performance on all goals in 2013 will be determined by FHFA after review of Fannie Mae loan-level data. Low-income refinance goal for 2012-13 included credit for qualifying permanent loan modifications.

^d Minimum percentages of all dwelling units financed by Fannie Mae's acquisitions of home purchase or refinance mortgages on owner-occupied properties.

^e Includes mortgages to borrowers with incomes no greater than median income in federally declared disaster areas.

Note: For the single-family goals, if an Enterprise's performance falls short of the benchmark, its performance is also measured against the goal-qualifying share of mortgages originated in the primary mortgage market, as determined by FHFA analysis of HMDA data.

Report of the Annual Examination of Freddie Mac (Federal Home Loan Mortgage Corporation)

Overall Condition

The Enterprise took positive steps during 2013 to improve and strengthen risk management and internal controls, augment management with key hires for senior positions, and improve asset quality. Despite these improvements, the Enterprise continues to operate with a high level of problem mortgage loans and privatelabel securities acquired from before conservatorship, and the current level of earnings is not sustainable because of non-recurring items and the planned reduction in the retained mortgage investment portfolio.

Under the terms of the PSPA with the U.S. Department of the Treasury, Freddie Mac does not have the ability to generate capital internally and its Applicable Capital Reserve Amount will shrink over the coming years. Operational risk, including information technology, remains a concern primarily because of insufficient business recovery capabilities and the complexities involved with a number of major strategic initiatives. Finally, external events outside of the control of the Board of Directors and management could drastically affect the Enterprise's future state.

Freddie Mac has benefitted from improving economic conditions and increasing housing prices. The Board and senior management have guided Freddie Mac to an improved, yet still elevated, risk profile. Moreover, significant incremental improvements in the risk profile may be difficult to achieve going forward. FHFA's supervisory focus for 2014 will be on the Board and senior management's ability to further address its legacy risk, demonstrate the sustainability of financial performance, and respond to an uncertain and changing environment.

Corporate Governance

The overall quality of corporate governance is satisfactory. The risk profile for the Enterprise has continued to decrease, due in part to steady oversight by the Board and executive management. The positive steps outlined in the prior report that the CEO has taken to address legacy control issues, specifically identifying risk and control deficiencies and establishing a framework to address the deficiencies, continue to advance.

These benefits, however, are difficult to identify and measure in the short term. Further management attention is required in the areas of single-family credit risk and operational risk, including information technology, to reduce the risk profile to acceptable levels.

Credit Risk Management

Despite loss mitigation efforts and robust home price appreciation, the seriously delinquent loan rate for the 2005-2008 single-family mortgage book remains a major source of credit risk. The increase in servicing by nontraditional servicers, especially those expanding into the loan origination business, highlights the importance of comprehensive credit analysis and strong contingency planning processes.

Asset quality remains a supervisory concern despite a year-over-year improvement in single-family credit metrics. The chief source of concern is the year-end 2013 single-family seriously delinquent mortgage rate, which is five times greater than the rate in 2006. Freddie Mac also has a high level of private-label mortgage-backed securities, residual risk from modifications and relief refinances, and ongoing counterparty credit risk. These risks are somewhat mitigated by the higher quality of the single-family book of business acquired since 2009, which represents a growing proportion of the total book.

Retained Mortgage Investment Portfolio

One likely impact on future earnings is the mandated decrease in size of the mortgage-related investments portfolio. This portfolio generates a relatively higher portion of net income compared to the single-family guarantee business at a fraction of the size; it must decrease by at least 15 percent per year. The current economic and business environment has reduced the efficacy of prepayment models, thereby compromising the reliability of interest rate risk metrics. The effect is more pronounced on distressed or illiquid assets, which are targeted for disposal but remain a substantial portion of the retained mortgage investment portfolio.

FHFA will continue to monitor Freddie Mac's initiatives to reduce illiquid assets in a well-controlled and economically sensible manner. Basis risk continues to be the largest risk in the retained mortgage investment portfolio.

Sustainability of Financial Performance

Financial performance continues to improve. Net income of \$48.7 billion in 2013, though the highest ever recorded for Freddie Mac, is unsustainable due to numerous one-time items and business imperatives. The largest single contributor was a nonrecurring tax benefit. Other meaningful supplements to net income that are unlikely to recur in the amounts seen in 2013 include legal settlements from securities litigation and representation and warranty claims and a net benefit, or negative provision, for the allowance for loan losses.

Business Continuity and Information Security

Business continuity and disaster recovery capabilities, while being addressed, currently do not protect the Enterprise fully from business disruption. In addition, FHFA will continue to monitor the operational risk management framework, particularly changes to processes for identifying, aggregating, measuring, and tracking operational risk. Other factors contributing to the inherently high quantity of risk include changing information security, cybercrime threats and vulnerabilities, the magnitude of data and privacy management requirements necessary to maintain vast amounts of mortgage data, and limited systems flexibility.

Strategic Initiatives and Compliance

The mandate for the Enterprise to develop and interface with the Common Securitization Platform and other FHFA strategic initiatives could increase operational risk due to finite resources and the need for new business processes. These factors, along with uncertainty over the Enterprise's future state and related external events beyond the control of management, will continue to elevate operational risk and may increase the likelihood of operational incidents. In addition, areas requiring compliance controls and reviews – FHFA regulations, supervisory guidance, policy initiatives, and directives, and the PSPA, among others – are expanding and could strain the Enterprise's ability to manage compliance risk appropriately.

Affordable Housing Goals for Freddie Mac

Under HERA and FHFA regulations, Freddie Mac is subject to the following:

- **1. Low-income home purchase goal,** for home purchase mortgages to families with incomes no greater than 80 percent of area median income.
- **2. Very low-income home purchase goal,** for home purchase mortgages to families with incomes no greater than 50 percent of area median income.
- **3. Low-income areas home purchase subgoal,** for mortgages to families living in census tracts with tract incomes no greater than 80 percent of area median income, or families with incomes no greater than 100 percent of area median income who live in census tracts with a minority population of 30 percent or more and a tract median income of less than 100 percent of area median income.

- **4. Low-income areas home purchase goal,** which includes mortgages that meet the criteria under the low-income areas home purchase subgoal as well as mortgages to families with incomes no greater than 100 percent of area median income who live in a federally declared disaster area.
- **5. Low-income refinance goal,** for refinance mortgages to families with incomes no greater than 80 percent of area median income.
- **6. Low-income multifamily goal,** for rental units for families in multifamily properties with incomes no greater than 80 percent of area median income.
- **7. Very low-income multifamily subgoal,** for rental units for families in multifamily properties with incomes no greater than 50 percent of area median income.

Figure 2 shows the goals FHFA established for 2012 and 2013 and official figures on Freddie Mac's goal performance in 2012. These results are based on FHFA's analysis of loan-level data Freddie Mac provided to FHFA in early 2013. It also shows the goal levels and preliminary figures on goal performance in 2013, based on information Freddie Mac submitted in its March 2014 Annual Housing Activities Report for 2013.

Since 2010, the single-family housing goals have included both preset benchmark levels and a comparison of goal performance with the corresponding figures on the goal-qualifying shares of conventional conforming mortgages in the primary mortgage market in each year. FHFA bases this process on an analysis of mortgage origination data, as reported by lenders in accordance with the Home Mortgage Disclosure Act (HMDA).

If Freddie Mac's performance on a single-family goal falls short of the benchmark, the Enterprise is still deemed to have met the goal if its performance exceeds the corresponding goal-qualifying share of mortgages originated in the primary mortgage market. These market-based figures are also shown for 2012 in Figure 2.

| Classification | Definition |
|-----------------|---|
| Low income | Earning no more than 80 percent of area median income |
| Very low income | Earning no more than 50 percent of area median income |

The market-based figures for 2013 will not be available until September 2014.

FHFA does not use the same process to look back at the multifamily goals because of the different nature of the goals, and because there are no data available on either the number or proportion of affordable multifamily units. Instead, FHFA relies on a variety of sources to estimate the size of the multifamily market.

Freddie Mac's goal performance in 2012 exceeded the benchmark levels for all of its single-family and multifamily goals. In some previous years, Freddie Mac's performance on one or more single-family goals fell short of the benchmark level, but it was deemed to have passed the goal because it exceeded the market performance for that year. The market figures for 2012 are shown for reference in Figure 2, though they are not relevant to Freddie Mac's passing any of the goals in that year. However, the market comparisons will be relevant for 2013, because Freddie Mac reported that its performance on the very low-income home purchase goal (5.5 percent) fell short of the benchmark level (7 percent), its performance on the low-income home purchase goal (21.8 percent) fell short of the benchmark level (23 percent), and its performance on the low-income areas home purchase goal (20 percent) fell short of the benchmark level (21 percent).

In October 2013, we notified Freddie Mac of its official performance figures for 2012 and also of the marketbased figures for the single-family goals for 2012.

HERA also requires Freddie Mac to report on its financing of low-income units in multifamily properties of a limited size. In a September 2010 rule, FHFA defined multifamily properties of a limited size as those containing from 5 to 50 units. Freddie Mac reported that it financed 829 low-income rental units in small multifamily properties in 2012, and 1,128 such units in 2013.

^b Goal-qualifying shares of single-family home purchase or refinance conventional conforming mortgages originated in the primary mortgage market, based on FHFA analysis of 2012 Home Mortgage Disclosure Act (HMDA) data. Market performance for 2013 will be determined by FHFA later in 2014.

^c Performance as reported by Freddie Mac in its March 2014 Annual Housing Activities Report. Official performance on all goals in 2013 will be determined by FHFA after review of Freddie Mac loan-level data. Low-income refinance goal for 2012-13 included credit for qualifying permanent loan modifications.

^d Minimum percentages of all dwelling units financed by Freddie Mac's acquisitions of home purchase or refinance mortgages on owner-occupied properties.

e Includes mortgages to borrowers with incomes no greater than median income in federally declared disaster areas.

Note: For the single-family goals, if an Enterprise's performance falls short of the benchmark, its performance is also measured against the goal-qualifying share of mortgages originated in the primary mortgage market, as determined by FHFA analysis of HMDA data.

Special Accounting Considerations

Summary

n 2013, several accounting events had significant impacts on the Enterprises' reported financial results. Fannie Mae and Freddie Mac reported levels of 2013 net income are greater than at any prior time in their respective histories. Their historically high net income was driven by reversals of previously accrued losses associated with deferred tax assets (DTA) and their allowance for loan and lease losses (ALLL)—plus revenue from legal settlements of representation and warranties claims and lawsuits regarding private-label securities that the Enterprises purchased as investments. FHFA does not expect benefits of this nature to be repeated in future years and does not expect the 2013 levels of net income to be approached anytime in the foreseeable future.

The benefit amounts are summarized below, followed by a discussion of the underlying accounting guidance and its implementation. (This section is limited to a discussion of the two unique drivers of income. For a discussion of the financial condition of the Enterprises, see separate discussions in the sections in the Annual Exam Results for Fannie Mae and Freddie Mac.) The unique benefits to net income discussed in this section are as follows:⁵

Release of the Deferred Tax Asset Valuation Allowance

Both Enterprises have historically reported large net DTAs on their balance sheets. DTAs are recognized based upon the expected future tax consequences of existing temporary differences between the financial reporting and the tax-reporting basis of assets and liabilities. For example, a loss is recorded in GAAP income Fannie Mae and Freddie Mac reported 2013 net income greater than any prior time in their respective histories. These historically high amounts of net income were largely driven by certain unique and very large benefits to income. FHFA does not expect benefits of this nature to be repeated in future years.

when it is deemed probable and reasonably estimable, while the tax deduction for a defaulted loan may be taken on the federal tax return within the tax year of foreclosure.

The applicable accounting standard requires entities to reduce DTAs using a valuation allowance (VA) if, based on all available evidence, it is more likely than not that some or all of the DTAs will not be realized. The VA reduces the DTA to the amount that is more likely than not to be realized based on management's expectation that the entity will earn sufficient future otherwise taxable income to apply the DTA. When they entered into conservatorships in 2008, both Enterprises determined it was more likely than not that the DTAs would not be realized and, accordingly, established VAs against their net DTAs. Changes in the VA, which occurred during the years following Q3 2008, resulted in corresponding effects upon the draws on the U.S. Treasury under the PSPA.

⁵ On pages 73 and 90 (Tables 3 and 12), the net income and credit expense figures for 2009 include \$20.6 billion and \$4.8 billion, respectively, for Fannie Mae and Freddie Mac, for losses recognized principally on acquired credit-impaired loans. Under GAAP, in years subsequent to 2009, such losses are not recognized due to the consolidation of formerly off-balance sheet GSE-guaranteed MBS trusts.

During 2013, both Enterprises concluded that the weight of all available evidence, both positive and negative, indicated their VAs were no longer necessary. Enterprise management considered updated estimates of future taxable income, which indicated that it was more likely than not that the DTA would be realized in the future. The VA release amounted to over half of 2013 net income for both Enterprises. However, if a similar credit crisis were to occur, a VA may have to be re-established against the DTA account then on the balance sheet, which could substantially reduce net income (or increase in net loss) at that time.

Reversal of Credit Expenses Provisioned in Prior Years

Under GAAP, loan losses are recognized in net income when they are "probable and estimable." Loss provisions are based upon the incurred default rate adjusted for current trends and conditions, and the loss severity rate. Early in the credit crisis home prices declined rapidly and delinquency rates rose dramatically—ultimately resulting in great increases in both Enterprises' ALLLs. Freddie Mac's ALLL peaked at the end of 2010 and Fannie Mae's ALLL peaked at the end of 2011. In the last two years, the converse has occurred as the factors that characterized the early stages of the credit crisis have changed dramatically: the economy is improving and strategies to resolve delinquent loans, like FHFA's servicing alignment initiative, are taking hold.

In their 2013 Forms 10-K, both Enterprises indicated they expect this turnaround to continue, but at a flattened pace. Therefore, the recent large reductions in credit expense and their contribution to net income are not expected to continue. In their respective releases on 2013 earnings results, the Enterprises stated the following:

Page 1, Fannie Mae release, February 21, 2014: Introduction

While Fannie Mae expects to be profitable for the foreseeable future, the company does not expect to repeat its 2013 financial results, as those results were positively affected by the release of the company's valuation allowance against its deferred tax assets, a significant increase in home prices during the year, and the large number of resolutions the company reached relating to representation and warranty matters and servicing matters.

Page 3, Freddie Mac release, February 27, 2014: Sustainability of Earnings

The level of earnings Freddie Mac has experienced in recent periods is not sustainable over the long term. Freddie Mac's recent financial results, particularly the level of loan loss provisioning, have benefited significantly from strong homeprice appreciation, which is beginning to moderate.

From the height of the crisis to 2013 Fannie Mae credit expenses fell \$85 billion -- from a 2009 high of \$73.5 billion in expense to an \$11.8 billion contribution to net income. Freddie Mac credit expenses fell \$32.4 billion -- from a 2009 high of \$29.8 billion in expense to a \$2.6 billion contribution to net income. Moreover, in 2013 credit expense reversals contributed 14 percent of net income for Fannie Mae and 5.3 percent for Freddie Mac. The Enterprises attribute the large change to home price increases, declining newly delinquent loans and representation and warranty settlements for loans purchased pre-conservatorship. In their respective releases on 2013 earnings results, the Enterprises stated the following:

Page 1, Fannie Mae release, February 21, 2014:

Fannie Mae's strong 2013 pre-tax results were driven by continued stable revenues, credit-related income, and fair value gains. Credit-related income was positively affected by an increase in home prices, a decline in serious delinquency rates, and updated assumptions and data used to estimate the company's allowance for loan losses in 2013. Fannie Mae's 2013 financial results also were positively affected by the release of the company's valuation allowance against its deferred tax assets and the large number of resolutions the company entered into during the year relating to representation and warranty matters and servicing matters.

Page 1, Freddie Mac release, February 27, 1014:

Financial results were positively impacted by the following significant items:

- Full-year tax benefit of \$23.3 billion driven by release of deferred tax asset valuation allowance
- Pre-tax benefit of legal settlements of \$6.0 billion for fourth quarter and \$7.7 billion for full year
- Continued improvement in home prices which contributed to reduced loan loss provisioning
- Fair value gains on derivative portfolio and non-agency mortgage-related securities
- Recent level of earnings is not sustainable over the long term

Report of the Examinations of the Federal Home Loan Banks

Examination Authority and Scope

ection 20 of the Federal Home Loan Bank Act (12 U.S.C. § 1440) requires FHFA to examine each Federal Home Loan Bank (FHLBank) at least annually. FHFA's Division of FHLBank Regulation is responsible for carrying out on-site examinations and ongoing supervision of the FHLBank System. The FHLBank System includes the 12 FHLBanks (Boston, New York, Pittsburgh, Atlanta, Cincinnati, Indianapolis, Chicago, Des Moines, Dallas, Topeka, San Francisco, and Seattle) and the Office of Finance, which is a joint office of the FHLBanks.

The Division of FHLBank Regulation's oversight of FHLBanks promotes both safe and sound operation and achievement of their housing finance and community investment mission. In 2013, FHFA examined all FHLBanks and the Office of Finance. An examinerin-charge and a team of examiners conduct each annual examination with support from financial analysts, economists, and accountants.

In addition, FHFA examiners visit the FHLBanks between examinations to follow up on examination findings and discuss emerging issues. The agency designates a separate examiner-in-charge for each FHLBank and the Office of Finance who serves as the principal point of contact for the management of examinations at the assigned FHLBank.

FHFA examiners use a risk-based approach to supervision. Risk-based supervision is designed to:

- Identify existing and potential risks that could harm a regulated entity;
- Evaluate the overall integrity and effectiveness of each regulated entity's risk management systems and controls; and
- Determine compliance with laws and regulations applicable to the regulated entity.

The FHLBanks saw substantial asset growth in 2013 driven by advances to members. They also recorded strong net income of \$2.5 billion. Each of the FHLBanks was profitable in each quarter of 2013.

Examiners communicate all findings to FHFA management and any matters requiring attention to the FHLBank's Board of Directors and management. In addition, examiners obtain a commitment from the Board and management to correct significant deficiencies in a timely manner and then verify the effectiveness of corrective actions. Examiners collaborate with FHFA analysts, modelers, economists, accountants, and attorneys in carrying out the supervision of the FHLBanks. FHFA's Division of Supervision Policy and Support provides some staff to augment the Division of FHLBank Regulation's supervision.

The Division of FHLBank Regulation maintains an off-site monitoring program that reviews monthly and quarterly financial reports and other information, such as FHLBank board and committee minutes, data on FHLBank investments, and information related to member activity. The Division monitors debt issuances by the Office of Finance and tracks financial market trends. The Division and other FHFA groups review FHLBank documents, such as the Board of Directors' compensation packages for each FHLBank, and analyze responses to a wide array of periodic and ad hoc information requests, including an annual survey of FHLBank collateral and collateral management practices, unsecured credit data, liquidity, advances, and periodic data on certain FHLBank investment holdings.

Financial Overview

The FHLBanks saw substantial asset growth in 2013 driven by advances to members. They also recorded

Figure 3 • Historical Portfolio Composition of the Federal Home Loan Banks

Source: Federal Housing Finance Agency

strong net income of \$2.5 billion. Each of the FHLBanks was profitable in each quarter of 2013.

Total assets increased by \$71.9 billion, or 9 percent, in 2013 to \$834.5 billion – the first annual increase in total assets since 2008. At the end of the year, aggregate assets were at their highest quarter-end level since March 31, 2011 (Figure 3). Advances increased by 17 percent, investments increased by less than 2 percent, and mortgages decreased by 10 percent. At year-end 2013, advances were 60 percent of total assets, investments 35 percent, and mortgages 5 percent.

In 2013, advances increased by \$72.9 billion to \$498.6 billion. This was the second consecutive year in which advances increased following three years of declines. At year-end 2013, advances were at their highest quarter-end level since March 31, 2010. The increase in advances in 2013 was the largest since 2007, when the liquidity crisis led to significant member borrowing. During 2013, 10 of the 12 FHLBanks reported

gains in advances. The increase in aggregate advances was heavily concentrated among several members and several FHLBanks. Affiliates of four large bank holding companies – Bank of America, Citigroup, JP Morgan Chase, and Wells Fargo – increased their advances by a combined \$56.2 billion and accounted for 27 percent of outstanding FHLBank advances at the end of 2013 (Figure 4).

Investments represented 35 percent of the aggregate balance sheet at the end of 2013. Total investments increased by less than 2 percent during the year to \$289 billion as of December 31, 2013. Private-label mortgage-backed securities (MBS) continued to run off, while agency MBS and cash and liquidity investments increased slightly. The aggregate investment portfolio of the FHLBanks consists of 35 percent cash and liquidity, 41 percent agency and Ginnie Mae MBS, 7 percent private-label MBS, and 17 percent other investments (principally agency debt securities and federally-backed student loan asset-backed securities).

| Holding Company | 2010 Q4 | 2011 Q4 | 2012 Q4 | 2013 Q4 |
|-----------------------------|---------|---------|---------|---------|
| Bank of America Corporation | 43.8 | 26.6 | 14.4 | 28.9 |
| Citigroup Inc. | 28.7 | 15.8 | 20.4 | 25.2 |
| JP Morgan Chase & Co. | 25.2 | 17.8 | 42.0 | 61.8 |
| Wells Fargo & Company | 7.9 | 2.6 | 2.2 | 19.1 |

| Aggregate Advances | 463.9 | 403.2 | 413.4 | 492.4 |
| Top 4 Share | 22.8% | 15.6% | 19.1% | 27.4% |

Figure 4 • Total FHLBank Advance Holdings (par value, \$ Billions)

Mortgages declined by 10 percent during 2013 to \$44.4 billion at year-end. Eight FHLBanks purchased mort-gages from their members in 2013.

The FHLBanks reported aggregate net income of \$2.5 billion in 2013, the second most profitable year since 2007 and down only slightly from \$2.6 billion in 2012.

For the fourth consecutive year, all 12 FHLBanks were profitable. Earnings were relatively stable despite a reduction in net interest income, as gains on derivatives and legal settlements were offsetting factors (Figure 5).

Poor performance of private-label MBS had a much smaller effect on the FHLBanks in 2013 than it had

Figure 5 • Quarterly Net Interest Income and Net Income

from 2009 to 2012. In 2013 the FHLBanks recorded impairment charges on these securities of only \$15 million, down from \$113 million in 2012 and down from a high of \$2.4 billion in 2009. Private-label MBS now account for 2.5 percent of assets.

The FHLBanks continued to build their retained earnings in 2013. Aggregate retained earnings totaled \$12.1 billion, or 1.45 percent of assets, at the end of 2013. This represents significant growth from the immediate aftermath of the financial crisis. At year-end 2008, the FHLBanks held \$2.9 billion of aggregate retained earnings, representing 0.22 percent of assets (Figure 6).

Until the third quarter of 2011, the FHLBanks were required to use 20 percent of pre-assessment income to pay the interest on bonds issued by the Resolution Funding Corporation (REFCORP), the proceeds from which were used to resolve the savings and loan crisis of the late 1980s. After satisfying the total obligation with the July 2011 payment, the FHLBanks entered into the Joint Capital Enhancement Agreement, which requires each FHLBank to direct the funds previously paid to REFCORP into a restricted retained earnings account. The agreement prevents the FHLBanks from using restricted retained earnings to pay dividends and requires that they continue to build the retained earn ings account until it equals 1 percent of the FHLBanks' consolidated obligations. At year-end 2013, the aggre gate balance of restricted retained earnings was \$1.2 billion, or 0.16 percent of total consolidated obligations outstanding.

In 2013, the FHLBanks contributed \$293 million to fund their Affordable Housing Programs. The FHLBanks will commit these funds to assist in the purchase, construction, or rehabilitation of low-income housing in 2014. Since the inception of the Affordable Housing Program in 1989, the FHLBanks have contributed a total of \$4.6 billion.

At the end of 2013, the FHLBanks had a total of 7,504 members. The membership consisted of 934 savings associations, 5,052 commercial banks, 1,215 credit

Figure 6 • Retained Earnings of the Federal Home Loan Banks

Source: Federal Housing Finance Agency
unions, 285 insurance companies, and 18 community development financial institutions. Approximately 57 percent of FHLBank members were active borrowers.

Capital

An FHLBank must hold sufficient regulatory capital to meet the greater of the total capital requirement or the risk-based capital requirements. All FHLBanks met these requirements at year-end 2013. All FHLBanks met the minimum regulatory capital ratio of 4 percent of assets. Regulatory capital ratios ranged from 4.6 percent to 9.6 percent and averaged 6.0 percent.

The FHLBanks' regulatory capital generally consists of the amounts paid by member institutions for FHLBank capital stock and the retained earnings of the FHLBank. The regulatory capital of FHLBanks at December 31, 2013, was \$50.5 billion, consisting of \$33.4 billion of capital stock, \$12.1 billion of retained earnings, and \$5 billion of other regulatory capital, which is principally mandatorily redeemable capital stock arising out of capital stock redemption requests by members or any capital stock held by a nonmember.

Asset Quality

Asset quality was adequate at most FHLBanks, though a few FHLBanks exhibited higher than average levels of risk or had risk-management practices that were of greater concern. Examiners determined the FHLBanks of Boston, Chicago, Pittsburgh, San Francisco, and Seattle have relatively higher credit risk exposure, principally as a result of legacy exposures to private-label MBS that have been declining over time.

While generally improving, private-label MBS continues to be the most significant credit risk associated with the FHLBanks. Private-label MBS are a relatively low proportion of aggregated FHLBank assets, though several FHLBanks still have significant exposures. Credit losses on these securities are highly dependent on the level and direction of housing prices. With improvements in the national economy during 2013, credit losses on private-label MBS declined, but the securities remain sensitive to risk.

Poor performance of privatelabel MBS had a much smaller effect on the FHLBanks in 2013 than it had from 2009 to 2012.

The credit risk of the advances portfolio is low. The FHLBanks require members to fully secure advances with eligible collateral before borrowing from the FHLBank. No FHLBank has ever had a credit loss from advances to a member. The quality and value of collateral are fundamental in protecting the FHLBanks from credit losses on advances. The FHLBanks apply a discount to the market value of the collateral, known as a "haircut," based on the FHLBank's assessment of the risk of the asset.

Notwithstanding the low overall risk of advances, some FHLBanks exhibit business concentrations to a few large borrowers and some have large exposures to insurance company members. Lending to insurance companies presents different risks relative to lending to insured depository institutions, in part because each state has its own laws and regulatory framework for insurance companies, though there is some similarity of these laws among states.

The FHLBanks had mortgage holdings of \$44.4 billion at the end of 2013, down from \$49.4 billion at the end of 2012. The mortgage holdings are fixed-rate, written to sound underwriting standards to qualified borrowers, and most are well seasoned. The originating members or supplemental mortgage insurance provide credit enhancement for the mortgages. Delinquency rates have been low relative to the market as a whole. The serious delinquency rate of all mortgage loans held by the FHLBanks was 1.9 percent at year-end 2013.

In 2013, examiners found that some FHLBanks needed to improve their credit analytics of members or of member collateral. Examiners also found issues with privatelabel MBS analyses and the quality control processes for mortgage loans purchased from member institutions. Asset quality was adequate at most FHLBanks, though a few FHLBanks exhibited higher than average levels of risk or had risk-management practices that were of greater concern.

Management

The effective management of an FHLBank involves engaged, capable, and experienced directors and senior management, a coherent strategy and business plan, clear lines of responsibility and accountability, and appropriate risk limits and controls.

Overall, governance of the FHLBanks was adequate in 2013, though examiners identified several areas where the FHLBanks could improve. Examiners noted problems with internal risk assessments, policies, and limits at some FHLBanks. Examiners also identified issues with internal audit, strategic planning, and some violations of FHFA regulations. Notably, the FHLBanks addressed many examination issues found in previous examinations, including issues related to board governance, compliance, and management reporting.

Earnings

The FHLBanks reported aggregate net income of \$2.5 billion in 2013 – the second most profitable year since 2007 and down only slightly from \$2.6 billion in 2012. Return on assets was 32 basis points in 2013 and return on equity was 5.86 percent – down from 34 basis points and 6.44 percent in 2012. The metrics, however, remain strong given the current environment of low interest rates, which tends to depress FHLBank income. Many FHLBanks continue to benefit from robust spreads on mortgages and MBS.

While earnings have generally been strong, some FHLBanks relied on non-mission related assets to generate income. Approximately 35 percent of FHLBank assets were not mission-related, and at individual FHLBanks the percentage was as high as 63 percent at year-end 2013.

Liquidity

At year-end 2013, the FHLBanks held \$101 billion of cash and liquidity investments, representing 12 percent of assets. The aggregate liquidity portfolio of the FHLBanks consisted of 46 percent cash, 30 percent federal funds sold, 20 percent reverse repurchase agreements, and 4 percent negotiable certificates of deposit. The year-end cash balance was atypical. Cash increases and federal funds sold decrease on the last day of each quarter due to muted demand and low returns in the federal funds market. Average cash balances are much lower and average federal funds sold much higher over the quarter.

In 2013, all FHLBanks consistently met their liquidity requirements. Additionally, the FHLBanks maintain ready access to the agency debt markets at favorable rates.

Sensitivity to Market Risk

Mortgage assets continue to be the greatest source of market risk for the FHLBanks. Mortgage assets are typically longer-dated instruments than most other FHLBank assets, have less predictable cash flows, and, in the case of private-label MBS, have experienced the greatest swings in market value. Mortgage assets were \$184.7 billion or 22.1 percent of total assets at the end of 2013, down slightly from \$187.9 billion or 24.6 percent at the end of 2012. These assets were composed of mortgage loans purchased from member institutions and MBS.

Some FHLBanks with significant mortgage holdings hedge the market risk by extensive use of callable bonds to fund those assets. Some FHLBanks use a more complicated hedging strategy that involves interest-rate swaps, swaptions (options to enter into interest-rate swaps), and options. FHLBanks with floating-rate MBS with embedded rate caps tend to use interest-rate caps (a type of derivative) to hedge these positions.

The FHLBanks are also exposed to some "basis risk," which can arise when the index for a floating-rate asset does not move identically with the index for the supporting floating-rate liability. Different movements of the two index rates will lead to a widening or narrowing of the spread or "basis" between the yield on the asset and the cost of the associated liability.

| Parallel Interest Rate Change in Basis Points | -200 | -100 | -50 | Base | 50 | 100 | 200 |
|--|------|------|------|------|------|------|------|
| Boston | 1.21 | 1.20 | 1.20 | 1.19 | 1.19 | 1.18 | 1.15 |
| New York | 1.24 | 1.24 | 1.23 | 1.21 | 1.20 | 1.20 | 1.18 |
| Pittsburgh | 1.30 | 1.30 | 1.30 | 1.28 | 1.27 | 1.26 | 1.24 |
| Atlanta | 1.35 | 1.35 | 1.35 | 1.35 | 1.34 | 1.33 | 1.27 |
| Cincinnati | 1.09 | 1.08 | 1.06 | 1.05 | 1.04 | 1.02 | 1.00 |
| Indianapolis | 1.55 | 1.62 | 1.68 | 1.71 | 1.72 | 1.72 | 1.69 |
| Chicago | 2.69 | 2.64 | 2.62 | 2.60 | 2.59 | 2.59 | 2.61 |
| Des Moines | 1.15 | 1.20 | 1.22 | 1.21 | 1.20 | 1.19 | 1.16 |
| Dallas | 1.77 | 1.77 | 1.78 | 1.76 | 1.72 | 1.67 | 1.56 |
| Topeka | 1.72 | 1.71 | 1.69 | 1.69 | 1.69 | 1.68 | 1.65 |
| San Francisco | 1.49 | 1.47 | 1.46 | 1.45 | 1.44 | 1.42 | 1.39 |
| Seattle | 1.04 | 1.06 | 1.07 | 1.08 | 1.07 | 1.06 | 1.04 |

Figure 7 • Market Value of Equity-to-Par Value of Capital Stock by Various Interest-Rate Changes

The System's market value of equity, which is the estimated market value of the System's assets less the market value of its liabilities, is an important indicator of the FHLBanks' ability to redeem stock at par. Because all stock transactions occur at the par value of \$100 per share, the market value of an FHLBank's equity should equal or exceed the par value of aggregated FHLBank shares of capital stock. The FHLBanks' market value of equity to the par value of capital stock ratios continued to improve in 2013, demonstrating improved financial condition, reduced risk and balances of private-label MBS, and increased retained earnings. The ratio at yearend 2013 was 1.35, up from 1.24 at the end of 2012, and up from 0.54 at the end of 2008. All FHLBanks reported a ratio greater than 1.00 by the end of 2013.

Figure 7 shows the ratio at each FHLBank at year-end 2013 and the estimated change to the ratio in certain interest rate change scenarios, which are based on model results provided by the FHLBanks. Most FHLBanks show only modest changes in these interest rate scenarios. The largest changes are a decline of 0.16 in a down 200 basis point scenario at the FHLBank of Indianapolis, and a decline of 0.20 in the up 200 basis point scenario at the FHLBank of Dallas. Despite these and other negative sensitivities, the FHLBanks report ratios above 1.00 for all 6 rate-change scenarios.

Uncertainty about private-label MBS adjustments related to market risk metrics, prepayment speeds, and the effects of extremely low interest rates at short maturities all continue to increase model risk.

Operational Risk

The FHLBanks engage in financial transactions that require financial models, technological resource systems, ledger accounting systems, and other processes that inherently expose them to operational risks.

Operational risk management is generally adequate, though examiners found several areas in need of attention in 2013 and expressed concern with operational risk at certain FHLBanks, as some internal FHLBank programs require additional deliberation, planning, or resources. In 2013, FHFA offered recommendations for improvements for IT, security, and the FHLBanks' administration of the Affordable Housing Program (AHP).

Mission Orientation of the FHLBanks

FHFA has a Core Mission Activities (CMA) regulation (12 C.F.R. § 1265.2) that describes the mission of the FHLBanks as providing financial products and services to members and housing associates (principally state housing finance agencies) that assist and enhance those institutions' financing of housing and community lending. Advances have historically been the primary mission asset of the FHLBanks, although the CMA regulation includes some other types of assets, such as mortgage loans that qualify as Acquired Member Assets (AMA), in the definition of core mission activities.

With growth in system advances, the overall mission orientation of the FHLBanks' balance sheet improved somewhat during 2013. Advances represented 60 percent of FHLBank assets at the end of 2013, up from 56 percent at the end of 2012, although below the recent peak of 71 percent reached in September 2008. The proportion of investments to assets decreased slightly during 2013, from 37 percent to slightly less than 35 percent. At year-end 2013, advances were less than 50 percent of total assets at three FHLBanks.

FHLBank Affordable Housing Program

The Federal Home Loan Bank Act requires each of the 12 FHLBanks to establish an Affordable Housing Program (AHP) to help finance the construction, purchase, or rehabilitation of housing. AHP funds two programs – a competitive application program and a homeownership set-aside program.

Eligible rental housing projects must have at least 20 percent of housing units occupied by, and affordable to, households with incomes at or below 50 percent of the area median income. Eligible owner-occupied housing must be occupied by households with incomes at or below 80 percent of the area median income.

From 1990, when AHP funds were first awarded, through year end 2013, the FHLBanks have awarded nearly \$4.5 billion in AHP subsidies and assisted 724,186 households.

The AHP differs from other housing programs in the following ways:

1. The applicant for the subsidy is a FHLBank member financial institution that passes the subsidy through to an eligible beneficiary in the form of subsidized advances or grants.

Source: Federal Housing Finance Agency

2. Each FHLBank annually funds its AHP with 10 percent of its preceding year's net earnings, subject to a minimum \$100 million contribution by the FHLBank System as a whole.

The AHP catalyzes private financing for affordable housing.

In 2013, the FHLBanks made more than \$296 million in AHP subsidies available nationwide (see Figure 8).

The amount of AHP funding available to FHLBank members varies according to FHLBank earnings. Beginning in 1995, the FHLBanks have been required to collectively contribute a minimum of \$100 million to their AHP. If an FHLBank does not have earnings in a given year, it is not required to make contributions to its AHP for the following year. The FHLBanks have always exceeded the minimum \$100 million threshold.

Additional Sources of Financing

The Federal Home Loan Bank Act specifically requires FHFA to coordinate AHP with other federal affordable housing programs. AHP is unique because it subsidizes private financing from FHLBank members that is then used in combination with federal, state and local, and charitable grant and loan programs.

In 2013, projects funded by AHP also relied on a number of other sources of funding. The most frequently Figure 9 • Number of 2013 Approved AHP Projects Receiving Federal Funds

| Community Development Block Grant Program | 70 |
|--|-----|
| HOME Investment Partnerships Program | 208 |
| Low-Income Housing Tax Credit Program | 292 |

Data as of December 31, 2013, excluding withdrawn projects. The numbers add up to more than the total number of projects (607) because some projects receive federal funding from more than one source.

used source of funding with AHP was the low-income housing tax credit, which supported 292 (approximately 48 percent) of the 612 projects approved for AHP funds. The HOME Investment Partnerships Program and the Community Development Block Grant Program were among the other programs used with AHP funds. Sixtyseven percent of AHP projects received additional funding from federal programs (see Figure 9).

Data as of December 31, 2013, withdrawn projects. Dollars have been rounded

^a Very low-income is defined as households with incomes at or below 50 percent of the area median.

AHP Competitive Application Program

The AHP competitive program accepts applications from members on behalf of project sponsors, typically nonprofit corporations or housing finance agencies. More than three quarters of all of the units funded under the competitive program in 2013 were rental housing units (see Figure 10).

AHP Homeownership Set-Aside Program

In addition to the competitive program, an FHLBank may set aside up to the greater of \$4.5 million or 35 percent of its AHP annual contributions to fund homeownership programs. In 2013, the combined total of the FHLBanks' set-aside program was \$68 million. At least one-third of an FHLBank's aggregate set-aside contribution must be allocated for first-time homebuyers. FHLBank members may also use set-aside funds to assist low- or moderate-income households to purchase or rehabilitate a home.

The maximum permissible amount of subsidy per household is \$15,000. In 2013, the average subsidy for all households participating in the set-aside was \$6,835. The most common use of set-aside assistance has been for down payment and closing cost assistance to borrowers. Since 2007 the number of set-aside grants used for owner-occupied home rehabilitation (such as leadbased paint removal, weather proofing, and accessibility retrofits) has trended up, from 215 to 1642 in 2012. In 2013, 1483 grants were used for home rehabilitation.

Figure 11 • 2013 Non-Depository CDFI Members of the Federal Home Loan Bank System

Source: Federal Housing Finance Agency.

Data as of December 31, 2013.

FHLBank Community Investment and Community Investment Cash Advance Programs

The FHLBanks' Community Investment Program (CIP) offers specialized advances to FHLBank members at the cost of the FHLBanks' consolidated obligations of comparable maturities, taking into account reasonable administrative costs. CIP funds can provide housing for households with incomes at or below 115 percent of area median income. CIP funds also may be used for economic development projects in low- and moderate-income neighborhoods or to benefit low- and moder-ate-income households. In 2013, the FHLBanks issued almost \$2.7 billion in CIP advances for housing projects and \$26 million for economic development projects.

The Community Investment Cash Advance Program (CICA) offers low-cost, long-term advances for members and housing associates, such as state and local housing finance agencies and economic development finance authorities, to finance economic development projects. In 2013, the FHLBanks issued approximately \$2.7 billion in CICA advances for community development projects such as commercial, industrial, manufacturing, social services, and public facilities.

CDFI Membership in FHLBanks

Community Development Financial Institutions (CDFIs) certified by the U.S. Department of the Treasury are eligible to become members of the FHLBank System in two ways. Those CDFIs that are insured depositories, such as federally insured banks, thrifts, and credit unions, are eligible to apply for membership as federally insured depositories.

HERA authorized non-depository CDFIs, such as community development loan funds, to also apply for membership in an FHLBank. At the end of 2013, there were 18 non-depository CDFI members of the FHLBank System. (See Figure 11.)

FHLBank Housing Goals

In December 2010, FHFA published a final rule establishing housing goals for the FHLBanks in the Federal Register. The FHLBanks' housing goals performance is based on single-family whole loans purchased from their members through their acquired member assets programs. FHLBanks may elect whether to participate in an acquired member assets program. In 2013, 8 of the 12 FHLBanks purchased whole loans through these programs. The housing goals measure the extent that these programs are serving low- and very low-income families residing in low-income areas.

In 2013, the FHLBanks made more than \$296 million in AHP subsidies available nationwide.

The housing goals for the FHLBanks are consistent with the single-family housing goals for Fannie Mae and Freddie Mac (according to the statutory intent of the HERA), but they take into account the unique characteristics of the FHLBanks.

To be subject to housing goals, the total unpaid principal balance of loans purchased through the acquired member asset programs held by an FHLBank must exceed \$2.5 billion in a given year. This volume threshold ensures that an FHLBank has sufficient mortgage purchase volume for a housing goals program. However, mortgage purchase volumes did not individually exceed \$2.5 billion at any of the FHLBanks, so none of the FHLBanks were subject to housing goals in 2013.

Director Compensation

The FHLBanks are governed by Boards of Directors ranging in size from 14 to 18. The majority of directors are officers or directors of member institutions with the remaining (at least 40 percent) being independent directors. Independent directors must reside in the FHLBank district but are not officers of an FHLBank or directors, officers or employees of a member of the FHLBank on which they serve as directors.

Before HERA, FHLBank Directors' compensation had statutory caps. In 2009, with the implementation of HERA, the caps were lifted, and the FHLBanks were With growth in system advances, the overall mission orientation of the FHLBanks' balance sheet improved somewhat during 2013. Advances represented 60 percent of FHLBank assets at the end of 2013, up from 56 percent at the end of 2012.

allowed to pay reasonable compensation for the time required of their Board of Directors and necessary expenses, subject to FHFA review.

The 12 FHLBanks and the Office of Finance (OF) provide FHFA with their Director Compensation Policy (the "Policy"), which establishes the maximum compensation for directors, the criteria each director needs to meet to receive that compensation, and the timing of payments for the upcoming year. FHFA reviews each Policy to ensure the FHLBank withholds compensation if the director does not participate in a sufficient number of meetings or is found not to be a contributing member of the Board. All of the FHLBanks and the OF have provisions for withholding compensation if a director's attendance falls below a certain level. Based on the attendance reports and compensation paid report that each of the entities submitted, FHFA found that all FHLBanks and the OF complied with their policies and that four banks reduced director compensation paid to individual directors based on attendance.

The following table (Figure 12) shows the maximum compensation available to the directors at each FHLBank and the OF for 2013.

The individual FHLBanks have taken different approaches to compensating their Boards. Some moved their directors swiftly to the market median; others have taken a more measured approach. The FHLBanks did contract with a compensation consulting firm to provide market data on directors compensation. All of the FHLBanks are within the range of comparable compensation levels that firm provided.

The FHLBanks and the OF must also report all compensation paid and expenses reimbursed or incurred by the FHLBank in support of the Board. As shown in Figure 13, director compensation and expenses incurred varied considerably across FHLBanks. Expenses included in the total expenses reported also varied significantly from FHLBank to FHLBank. In 2014 FHFA will require more detailed and consistent reporting on board expenses.

The composition of the OF Board of Directors is significantly different from the FHLBanks. The OF Board consists of 5 independent directors plus the 12 FHLBank Presidents. The FHLBank Presidents are not compensated for their role on the OF Board.

| | Chair | Vice Chair | Audit Com Chair | Other Committee Chairs | All Other Directors |
|-------------------|-----------|------------|--------------------|------------------------------|------------------------|
| Atlanta | \$70,000 | \$65,000 | \$65,000 | \$60,000 | \$55,000 |

District 1 • The Federal Home Loan Bank of Boston⁶

t year-end, the FHLBank of Boston was the eighth largest FHLBank with \$44.6 billion of total assets. At its July 2013 examination, FHFA had supervisory concerns about the FHLBank. The level of credit risk in the private-label MBS portfolio, although declining, remained elevated. Other factors affecting FHFA's assessment of the FHLBank included deficiencies in corporate governance, including key management turnover, and operational risk issues. The number of deficiencies cited at the 2013 examination was lower than at the prior examination, which reflected favorably on management and the board.

Notwithstanding examination concerns, gradual improvement in condition has continued. Net income totaled \$212 million in 2013 – the fourth consecutive year of positive earnings. In 2013, several earnings metrics exceeded averages for the FHLBank System. The FHLBank's net interest spread was 56 basis points and the return on assets was 54 basis points during 2013.

The FHLBank paid dividends at an average rate of 0.38 percent in 2013 while boosting retained earnings by \$201 million to \$789 million or 1.77 percent of assets at year-end 2013, up from 1.46 percent at year-end 2012. The level of retained earnings exceeded the amount the FHLBank's internal retained earnings model indicated to be sufficient for the risks in the FHLBank's operations. The FHLBank had regulatory capital of

\$4.38 billion at December 31, 2013, an increase of \$38 million from year-end 2012. This exceeded the \$1.8 billion requirement (4.0 percent of assets) by \$2.5 billion. GAAP capital declined in 2013, primarily from the loss of one of the FHLBank's largest shareholders and the reclassification of capital stock held by that former member to a GAAP liability.

Advances totaled \$27.5 billion, representing 62 percent of assets. No borrower held more than 15 percent of the FHLBank's advances. The private-label MBS portfolio totaled \$1.2 billion in carrying value, or 2.7 percent of assets, with 85 percent of the portfolio rated below investment grade.

This summary reflects conclusions made at the time of FHFA's 2013 examination of the FHLBank of Boston supplemented by year-end financial information.

District 2 • The Federal Home Loan Bank of New York⁷

t year-end, the FHLBank of New York was the largest FHLBank with \$128 billion of total assets. At its July 2013 examination, FHFA found the overall condition of the FHLBank to be satisfactory and that the FHLBank continued its pattern of strong earnings and low overall risk. However, FHFA also found that the FHLBank needed to enhance transparency in its risk limit structure, improve its oversight of home equity lines of credit pledged as collateral and related processes, and improve its procedures related to the testing of new products prior to implementation.

Significant factors affecting the FHLBank's financial condition and performance include high profitability, strong capital levels, and a low-risk balance sheet. Advances of \$90.8 billion represent 71 percent of total assets – the third highest ratio in the FHLBank System. The FHLBank of New York's advance portfolio has been greater than 70 percent of assets since 2001. The FHLBank holds the third smallest portfolio of privatelabel MBS relative to total assets in the System at 0.3 percent. As a result, credit-related losses have been infrequent and minimal.

Profitability at the FHLBank of New York remains strong. Net income totaled \$305 million in 2013. Net interest income, however, continued a gradual downward trend, declining from \$506 million in 2011 and \$466 million in 2012 to \$421 million in 2013. The decline resulted from less advantageous funding spreads and declining yields on its advances and investment portfolios. Advance yields were lower as higher-yielding advances prepaid and higher-yielding investments in MBS paid down. Despite challenges related to tighter funding spreads and declining yields, the FHLBank consistently generated strong earnings, which drove growth in retained earnings. Retained earnings totaled \$999 million, or 0.78 percent of assets, as of December 31, 2013. The FHLBank maintains a relatively strong risk-adjusted capital position.

Insurance companies represent a small number of the FHLBank's members but accounted for a significant proportion of total outstanding advances. The FHLBank has seven life insurance company members with a total of \$16.5 billion of advances outstanding, representing 19 percent of total advances. Lending to insurance companies involves risks that are different than those involved in lending to depository institutions.

This summary reflects conclusions made at the time of FHFA's 2013 examination of the FHLBank of New York supplemented by year-end financial information.

District 3 • The Federal Home Loan Bank of Pittsburgh[®]

t year-end, the FHLBank of Pittsburgh was the sixth largest FHLBank with \$70.7 billion in total assets. At its April 2013 examination, FHFA had supervisory concerns about the FHLBank. The FHLBank had weaknesses in asset quality related to legacy investments in private-label MBS, subpar earnings, and compliance problems. Positive trends noted at the examination included a marked slowdown in credit impairment charges on private-label MBS, a declining private-label MBS portfolio, an improving level of retained earnings, and a satisfactory market value of equity relative to the par value of the FHLBank's capital stock. FHFA cited considerably fewer deficiencies at the 2013 examination relative to the 2012 examination, reflecting favorably on the FHLBank's management and board.

The FHLBank's financial condition continued to improve during 2013. The FHLBank earned \$197 million of net interest income and \$148 million of net income. The FHLBank generated a net interest spread of 0.28 percent (the second lowest in the FHLBank System), a return on assets of 0.24 percent (third-lowest in the System), and a return on equity of 4.32 percent (second lowest in the System). The FHLBank's lowerthan-average profitability resulted from a relatively high level of advances, which generally are less profitable than other investments, and from legacy higher-cost debt. A portion of this debt matured in the second half of 2013. The FHLBank's regulatory capital ratio was 5.16 percent, and it held \$686 million in retained earnings, which represented 0.97 percent of total assets. At year-end, the FHLBank's market value of equity was 128 percent of the par value of its member capital stock. The FHLBank held \$50.2 billion of advances (71 percent of total assets, second highest percentage in the System), \$17 billion of investments (24 percent of total assets), and \$3.2 billion of mortgages (5 percent of total assets), which compared with aggregate FHLBank averages of 60 percent advances, 35 percent investments, and 5 percent mortgages. During 2013, advances growth added \$6.1 billion, or 9 percent, to the FHLBank's balance sheet.

The FHLBank had 297 members at year-end 2013. Of these, 179 were commercial banks, 78 were thrifts, and the remaining 40 members were credit unions and insurance companies. Though the FHLBank benefited from growth in advance borrowing by its largest members, its advance lending was also highly concentrated among large members. The FHLBank's four largest borrowers held 74 percent of total advances, and its 10 largest held 84 percent of total advances – the highest concentrations in the System.

This summary reflects conclusions made at the time of FHFA's 2013 examination of the FHLBank of Pittsburgh supplemented by year-end financial information.

District 4 • The Federal Home Loan Bank of Atlanta⁹

t year-end, the FHLBank of Atlanta was the second largest FHLBank with \$122.3 billion of total assets. At its January 2013 examination, FHFA found the overall condition of the FHLBank to be satisfactory. The key factors contributing to the FHLBank's overall satisfactory condition included its mission-oriented balance sheet, continued growth in retained earnings, and declining credit risk due to a shrinking portfolio of private-label MBS. Though declining, credit risk remained a moderate concern. FHFA had concerns about the FHLBank's monitoring of assets that posed heightened credit risk, as well as deficiencies related to managerial or executive oversight of information technology.

The financial condition and performance of the FHLBank compared satisfactorily with other FHLBanks. While performance metrics have been below FHLBank averages, they reflect the FHLBank's business model, which emphasizes providing low-cost advances to its members. The FHLBank's advances represent 70 percent of total assets – the highest ratio in the FHLBank System. Though the FHLBank has a large and diverse membership base, advances are concentrated among its 10 largest borrowers, which represent approximately 75 percent of total borrowings. The concentration has contributed to volatility in advance balances at the FHLBank. Credit risk is declining as the private-label MBS portfolio runs off, but remains a concern because this portfolio is still relatively large. Credit impairment on private-label MBS has slowed, allowing the FHLBank to generate consistently positive income and grow retained earnings. During 2013, the carrying value of the private-label MBS portfolio declined by 22 percent to \$4.2 billion, representing 3 percent of total assets.

Net income totaled \$338 million in 2013, up from \$270 million in 2012. The increase reflects a one-time gain from the settlement of a private-label MBS lawsuit, as well as lower credit impairment charges on privatelabel MBS. Consistent earnings allowed Atlanta to increase its retained earnings by \$221 million in 2013. At year-end, retained earnings were 1.35 percent of assets, up from 1.16 percent at year-end 2012.

⁹ This summary reflects conclusions made at the time of FHFA's 2013 examination of the FHLBank of Atlanta supplemented by year-end financial information.

District 5 • The Federal Home Loan Bank of Cincinnati¹⁰

t year-end, the FHLBank of Cincinnati was the third largest FHLBank with \$103.2 billion in total assets. At its January 2013 examination, FHFA found the overall condition of the FHLBank to be satisfactory but that the FHLBank needed to enhance operational risk management, increase the transparency of its strategic initiatives, implement income sensitivity limits, document and support internal audit reports, and fill unexpected staff vacancies. The FHLBank satisfactorily resolved or made progress on each of the findings from the 2012 examination.

Throughout the year, the FHLBank's financial condition and performance were satisfactory, and its net income ranked fifth in the FHLBank System. As a result, the FHLBank provided a strong dividend return to members.

Total assets at the FHLBank grew \$21.6 billion during 2013, driven primarily by a net increase in advances of \$11.4 billion. At year-end, the FHLBank had \$103.2 billion in assets and \$65.3 billion in advances. Also during 2013, advances to the FHLBank's largest borrower increased from \$26 billion to \$42 billion. Concentration of advances to this member intensified, reaching 64 percent of the advance portfolio at year-end. Retained earnings rose to \$621 million, up from \$538 million at the end of 2012. The FHLBank's balance sheet at year-end 2013 was 63 percent advances, 30 percent investments (including cash), and 7 percent mortgage loans.

The FHLBank reported net income of \$261million in 2013, up from \$235 million in 2012. The higher net income resulted from increases in earning assets and occurred despite declines in key profitability metrics. Return on equity declined to 5.10 percent in 2013 from 6.20 percent in 2012; and return on assets fell to 0.28 percent from 0.35 percent. The declining measures resulted from the FHLBank's increased proportion of advances to assets, as advance margins are narrow relative to some alternative FHLBank investments. The FHLBank paid an average annual dividend of 4.18 percent, the highest in the FHLBank System for 2013.

¹⁰ This summary reflects conclusions made at the time of FHFA's 2013 examination of the FHLBank of Cincinnati supplemented by year-end financial information.

District 6 • The Federal Home Loan Bank of Indianapolis¹¹

t year-end, the FHLBank of Indianapolis was the ninth largest FHLBank with \$37.8 billion of total assets. At its September 2013 examination, FHFA found the overall condition of the FHLBank to be satisfactory and that the FHLBank's credit risk profile was also satisfactory, with the private-label MBS portfolio declining, member credit risk improving, and acquired mortgage assets continuing to perform well. FHFA, however, did find that the FHLBank had elevated operational risk because of difficulties in implementing a new information technology core banking system, insufficient risk management, and inadequate information security independence. The FHLBank substantially remediated prior examination findings; however, it had not fully resolved some matters related to unsecured credit management.

The FHLBank's 2013 financial condition and performance was acceptable. Total assets declined during the year by 8 percent, driven by declines in its investment portfolio by 36 percent and its advances portfolio by 4 percent. Advances represented a relatively low proportion of assets at 46 percent. Acquired mortgage assets offset some of these declines, growing by 3 percent. The shrinking private-label MBS portfolio and improving housing market fundamentals contributed to further declines in impairment charges and improved earnings for 2013. Net income totaled \$218 million in 2013, up from \$143 million in 2012. The primary drivers of the increase in earnings were other non-interest income, which increased \$51 million; derivative gains of \$17 million compared to a \$13 million loss in the prior year; and net interest income, which increased \$8 million. Consistently positive income has driven growth in retained earnings, which represent 1.99 percent of assets as of December 31, 2013, greater than the FHLBank System average of 1.45 percent.

The FHLBank's private-label MBS portfolio, which has been the source of elevated credit risk in recent years, is shrinking. The carrying value of the portfolio declined by 29 percent during 2013 and finished the year at \$635 million. Contraction in the size of the portfolio, coupled with improvements in housing prices, resulted in lower credit impairment charges in 2013 than in previous years. Credit losses on private-label MBS totaled \$1.9 million in 2013, down from \$3.8 million in 2012, \$26.8 million in 2011, and \$69.8 million in 2010.

¹¹ This summary reflects conclusions made at the time of FHFA's 2013 examination of the FHLBank of Indianapolis supplemented by year-end financial information.

District 7 • The Federal Home Loan Bank of Chicago¹²

t year-end, the FHLBank of Chicago was the seventh largest FHLBank with \$68.8 billion of total assets. At its October 2013 examination, FHFA had supervisory concerns about the FHLBank because of lingering asset quality weaknesses related to legacy investments in private-label MBS. Management and operational risk challenges centered on enhancement and expansion of its information technology and business operations in Mortgage Partnership Finance[®]. While management and the board remediated all the 2012 examination findings, in some cases, such as findings addressing MPF quality control and income simulation, the Bank addressed the technical requirements of the remediation but not the full intent of the finding.

During 2013, the FHLBank's financial condition continued to improve with strong earnings (although driven primarily by non-traditional assets) and high retained earnings relative to total assets. Profitability was strong, largely because of profitable long-dated investments and associated funding that was favorable to the FHLBank. Net income totaled \$343 million with return on assets unchanged from the prior year at 53 basis points. Return on equity was high at 9.71 percent and return on capital stock was 21.83 percent. While advances increased by 62 percent to \$23.5 billion, advances as a percentage of total assets remained low at 34 percent. The FHLBank's balance sheet consisted of 53 percent investments, which were primarily longterm agency MBS and other long-term securities, and 11 percent whole loan mortgages. The FHLBank held \$44.1 billion in investments and mortgage loans at year-end 2013. The FHLBank's challenge is to transition from its current, investment-heavy configuration to an advancefocused institution.

The carrying value of the FHLBank's private-label MBS portfolio was \$1.3 billion, down 16 percent from yearend 2012. Despite this contraction, the size and credit quality of the private-label MBS portfolio remained substantial drivers of credit risk. Most of the carrying value of this portfolio was rated below investment grade.

The FHLBank's capital position was strong with significant, steady improvement in recent years resulting from its strong earnings coupled with a low percentage of earnings paid out in dividends. Retained earnings increased 20 percent to \$2 billion or 2.95 percent of total assets. Capital stock remained relatively unchanged in 2013 at \$1.7 billion.

¹² This summary reflects conclusions made at the time of FHFA's 2013 examination of the FHLBank of Chicago supplemented by year-end financial information.

District 8 • The Federal Home Loan Bank of Des Moines¹³

t year-end, the FHLBank of Des Moines was the fifth largest FHLBank with \$73 billion in total assets. At its January 2013 examination, FHFA found the overall condition of the FHLBank to be satisfactory and that its financial condition and performance remained strong. Even so, FHFA found that the FHLBank needed to enhance its market risk management practices and demonstrate the effectiveness of its hedging strategies. FHFA also found that the FHLBank's operational risk was elevated primarily because of the FHLBank's ongoing implementation of an information technology core banking system conversion. The FHLBank's high volume of insurance company advances requires continued diligence by its board and management to assess and mitigate potential credit risks with these members.

During 2013, the FHLBank of Des Moines remained profitable and maintained an adequate capital position for its risk profile. While the FHLBank had minimal credit risk exposure to its MBS portfolio due to its limited holdings in private-label MBS, it had substantial interest rate risk exposure to whole loan mortgages, which required increased monitoring and oversight.

The FHLBank had net income of \$110 million for 2013 – consistent with its \$111 million in net income for 2012 and up from \$78 million in 2011. Profitability, while stable, was somewhat below average compared with the other FHLBanks, which is primarily attributed to a higher percentage of lower yielding advances, a lower amount of MBS investments relative to total investments, and the lingering effects of legacy debt that was used to fund whole mortgage loans at less than advantageous spreads. The FHLBank's return on assets for 2013 was 0.20 percent compared with the FHLBank System average of 0.32 percent. At year-end, regulatory capital totaled \$3.4 billion or 4.6 percent of assets. The FHLBank's capital to assets ratio is below system average, but it has little excess redeemable stock. Retained earnings, which total \$678 million at December 31, 2013, remained adequate.

Advances increased substantially during 2013, increasing to \$45.7 billion, up from \$26.6 billion at year-end 2012. The increase in advances was primarily the result of significant borrowings by one large commercial bank member, which now has 42 percent of outstanding advances. The FHLBank's lending to insurance company members, which presents unique risks, is among the highest in the System. Investments in whole loan mortgages totaled \$6.6 billion or 9 percent of assets.

¹³ This summary reflects conclusions made at the time of FHFA's 2013 examination of the FHLBank of Des Moines supplemented by year-end financial information.

District 9 • The Federal Home Loan Bank of Dallas¹⁴

t year-end, the FHLBank of Dallas was the smallest of the 12 FHLBanks with \$30.2 billion of total assets. At the time of its April 2013 examination, FHFA found the overall condition to be satisfactory, though it had several operational risk events caused by human error and systemic non-adherence to policy. The FHLBank's overall financial risk profile remained low, and its capital position was strong. Declining advance volume remained the predominant financial long-term challenge for the FHLBank. Additionally, the FHLBank's operating expenses were the highest, relative to assets, in the FHLBank System. FHFA also found that the FHLBank had governance challenges in enterprise risk management and operational risk controls that it needed to address. The FHLBank has experienced significant turnover in the Chief Risk Officer position. Its Board of Directors and Chief Executive Officer must support the Chief Risk Officer's role and ensure access to the Board. Management has established a project team to strengthen processes, and the Board has committed to address operational and compliance failures.

Advances totaled \$16 billion, second lowest in the System and just 53 percent of total assets as of December 31, 2013. Advance volumes have declined steadily since 2008 and are currently at 1998 levels. In 2013, approximately \$2.4 billion in outstanding advances rolled off. The low advance activity has both structural and cyclical causes. Consolidation in the market has caused the FHLBank to lose some key members, and current members' advance demand is low. Operating expenses were 0.20 percent of assets in 2013, the highest ratio in the FHLBank System and nearly double the System average ratio of 0.11 percent. Though the FHLBank has reduced the absolute level of operating expenses by almost 10 percent in recent years, combined salary and other overhead expenses have not contracted apace with the FHLBank's balance sheet.

Reflecting the FHLBank's lower credit and market risk profiles, earnings metrics, such as return on assets at 0.27 percent and return on equity of 5.15 percent, are slightly less than System averages. Despite its lower earnings levels, the FHLBank maintains a strong reported risk-adjusted capital position. Retained earnings total \$655 million, or 2.17 percent of total assets. This ratio ranks third in the System and highlights the FHLBank's strong capital position relative to its low risk profile.

¹⁴ This summary reflects conclusions made at the time of FHFA's 2013 examination of the FHLBank of Dallas supplemented by year-end financial information.

District 10 • The Federal Home Loan Bank of Topeka¹⁵

ith total assets of \$34.0 billion, the FHLBank of Topeka is the second smallest FHLBank. The overall condition of the FHLBank is satisfactory. Topeka has stable core earnings, a strong capital position, and a low risk profile. However, the FHLBank's exposures to insurance company lending and whole loan mortgages are significantly greater than System averages.

The financial condition and performance of the FHLBank of Topeka compare favorably with other FHLBanks. The FHLBank has remained consistently profitable, with minimal credit losses on private-label MBS and a large portfolio of whole loan mortgages. As a result, Topeka has built a strong capital position. The FHLBank's generally low risk profile enhances capital adequacy. Management continues efforts to align the FHLBank's balance sheet with the housing mission focus of the System.

After declining the last two years, advances grew in 2013 by 5.1 percent to \$17.4 billion and now make up 51.3 percent of assets. Insurance companies hold 18.0 percent of the FHLBank's outstanding advances. Because of the size and unique risks of this portfolio, management must diligently monitor insurance company lending and mitigate potential risks.

Mortgages represent 17.5 percent of assets, the highest ratio in the System. However, after a period of significant growth, that trend has peaked, with the portfolio only growing by 0.15 percent in 2013. While the credit quality of the mortgage portfolio is high, the relative size of the portfolio and the elevated market risk associated with mortgage assets merit vigilant oversight.

Topeka reported net income of \$119.0 million in 2013, up from \$110.3 million in 2012 and \$77.3 million in 2011. The resulting return on average assets of 0.33 percent was consistent with the System mark of 0.32 percent. The FHLBank has generated consistent positive earnings, due in part to minimal credit losses on its small private-label MBS portfolio. A stable core earnings stream also contributes to Topeka's consistent income. Net interest income totaled \$215.8 million in 2013, down slightly from \$217.2 million in 2012.

The stable earnings are driven by active debt management that lowers interest expense and the large portfolio of relatively high-yielding mortgages. The resulting net interest margin of 0.61 percent is well in excess of the System average of 0.44 percent. The FHLBank paid quarterly dividends at an average rate of 2.42 percent during 2013. Retained earnings grew by 17.9 percent in 2013 and represent 1.67 percent of total assets, compared to the System average of 1.45 percent.

Management should continue to monitor the FHLBank's exposure to whole loan mortgages and advances to insurance companies and large members. The FHLBank should also maintain its focus on improved AHP project administration and operational risk controls.

¹⁵ This summary reflects conclusions made at the time of FHFA's 2013 examination of the FHLBank of Topeka supplemented by year-end financial information.

District 11 • The Federal Home Loan Bank of San Francisco¹⁶

t year-end, the FHLBank of San Francisco was the fourth largest FHLBank with \$85.8 billion in total assets. At its July 2013 examination, FHFA found the FHLBank's overall condition to be satisfactory. Examiners identified the most significant issues for the FHLBank to include declining advances and exposure to below investment grade private-label MBS. FHFA also found that the FHLBank needed to enhance its credit risk model and its evaluation of member collateral. The board and management should continue to focus on strategic planning, particularly with regard to operating expenses and projected earnings as a result of a significantly smaller balance sheet and changes to overall asset composition.

The FHLBank's advances have declined dramatically since 2007. At year-end 2007, the FHLBank's advances totaled \$251 billion. By December 31, 2013, the FHLBank's advances totaled just \$44.4 billion. In addition to a decline in advance demand among members in general, the declining advance volume reflects the loss of some of the FHLBank's largest members resulting from member failures, mergers, and bank charter dissolutions.

Potential risk from the FHLBank's substantial privatelabel MBS portfolio remained a concern in 2013. Although credit losses on the private-label MBS portfolio declined substantially during the year, the ultimate repayment of the private-label MBS is uncertain particularly under adverse business, financial, and economic conditions. Although at year-end the FHLBank's retained earnings were among the highest in the FHLBank System, it had a need for higher retained earnings because of the risk of private-label MBS. The financial performance of the FHLBank has been strong in recent years, but significant changes in the composition of assets and projected declines in spreads will likely reduce future earnings. Return on assets was 35 basis points and a net interest spread was 52 basis points during 2013, which compares favorably to System averages. Strong earnings principally result from wide spreads realized on agency and private-label MBS holdings. The wide spreads, however, are expected to wane over the next several years. Furthermore, 64 percent of the Bank's total advances were concentrated in the FHLBank's six largest borrowers, and one former member will repay its advances of \$3 billion within the next three years.

The FHLBank's 2013 operating expenses on an absolute basis were the highest in the System. Although strong earnings helped to offset these expenses, further anticipated declines in income may reduce the FHLBank's ability to support its current cost structure. In response to these concerns, the FHLBank plans to increase participation in certain Mortgage Partnership Finance programs and to expand advances to insurance companies. The board and management must continue to evaluate potential risks from these activities.

¹⁶ This summary reflects conclusions made at the time of FHFA's 2013 examination of the FHLBank of San Francisco supplemented by year-end financial information.

District 12 • The Federal Home Loan Bank of Seattle¹⁷

t year-end, the FHLBank of Seattle was the third smallest FHLBank with \$35.9 billion of total assets. At its April 2013 examination, FHFA had supervisory concerns about the overall condition of the FHLBank and identified high credit and operational risks. The FHLBank's year-end retained earnings were not sufficient to support the overall risk profile, earnings continued to be low, and future earnings prospects appeared weak. FHFA found the state of the FHLBank's information technology infrastructure continued to create an unacceptable level of operational risk. Its information technology systems were deficient in architecture, infrastructure, information security, and applications, and the majority of business applications would not fit future business needs and did not have sustainable technical characteristics. Further, all data stores and several key operating systems had no support or were near the end of standard lifecycles. While management had stabilized some aspects of operations, these information technology weaknesses have been outstanding for many years and still require aggressive remedial actions. The FHLBank continues to merit heightened supervisory attention, and its future financial performance and condition remain vulnerable to adverse changes in the economic environment.

At year-end, the composition of the Bank's capital stock was not indicative of a healthy FHLBank. Also at year-end, 59 percent, or \$1.7 billion, of the FHLBank's member stock was under a redemption request or held by a non-member (known as mandatorily redeemable capital stock and counted as a liability under GAAP). Moreover, \$1.1 billion of that \$1.7 billion was past its contractual five-year redemption date. Although the FHLBank has had positive earnings in recent years and has experienced a significant increase in the market value of its equity, earnings declined in 2013 and future earnings may not be adequate to support needed enhancements to the FHLBank's operations. Net income totaled \$61 million in 2013, down from \$71 million in 2012 and \$84 million in 2011.

Earnings remain reliant on the leveraging of mandatorily redeemable capital stock into investments. FHFA remains concerned about the sustainability of earnings derived from the FHLBank's advance business. The proportion of interest income from advances remained low in 2013, and reliance on investment revenue remained high. Investments make up a greater portion of the FHLBank's balance sheet than any other FHLBank. Advances totaled \$10.9 billion at year-end. Although advances increased slightly during 2013, the FHLBank's advance portfolio remained the smallest in the FHLBank System. Advances represented just 30 percent of assets and generated only 25 percent of the FHLBank's interest income in 2013. Advances totaling \$3.8 billion to one inactive member will begin to pay down in 2015. The small scale of the advance business coupled with relatively high fixed operating expenses creates uncertainty around the FHLBank's ability to redeem its capital stock on a timely basis and eventually return to normal operations.

Although credit risk has recently declined, it remained elevated because of the poor credit quality of the FHLBank's private-label MBS portfolio. At year-end, approximately 89 percent of the carrying value of the \$1.8 billion private-label MBS portfolio was rated below investment grade, and the FHLBank remained exposed to possible credit losses if housing markets were to deteriorate.

¹⁷ This summary reflects conclusions made at the time of FHFA's 2013 examination of the FHLBank of Seattle supplemented by year-end financial information.

Office of Finance¹⁸

he FHLBanks' Office of Finance issues debt on behalf of the FHLBanks. Located in Reston, Virginia, the Office of Finance has no asset portfolio, balance sheet, or financial statements. Consequently, the institution has no credit or market risk. All debt issued on behalf of the FHLBanks is the joint and several liability of all the FHLBanks.

The Office of Finance's Board is composed of 17 members, including 5 independent directors and each of the 12 FHLBank presidents. One independent director serves as Chairman of the Board.

On behalf of the FHLBanks, the Office of Finance issued \$341 billion of bonds during 2013, reflecting a decrease in bond issuances since 2012 of 18 percent. A total of \$965 billion of term discount notes were issued in 2013, a decrease of 12 percent for the FHLBank System from the prior year. Overnight discount notes outstanding averaged \$8.5 billion or a decrease of 14 percent from the 2012 levels.

The Office of Finance prepares and distributes the combined financial reports for the FHLBanks. The Office of Finance also facilitates various System-wide initiatives. The Office of Finance's Board and management enhanced corporate governance and operational risk management processes during 2013. However, at its June 2013 examination, FHFA found weaknesses in the organization's risk control self-assessment. These weaknesess, along with ongoing changes to the senior management team, require the Board's continued attention. Additionally, FHFA determined that improvements to policies and procedures, dealer compliance, enterprise risk management, internal audit, and vendor management would enhance the organization's overall operation.

¹⁸ This summary reflects conclusions made at the time of examination supplemented by year-end financial information.

Regulations and Guidance

n 2013, FHFA issued 30 rules, proposed rules, final rules, and policy guidance documents. Many of the regulations met specific statutory requirements, but some were regulations FHFA determined to be necessary or appropriate to support its mission as regulator and conservator for some or all of the 14 regulated entities.

The following tables summarize the rules, proposed rules, final rules, and policy guidance documents, both

proposed and final, that the agency issued during 2013. The tables also indicate if a proposed rule or policy guidance has been adopted in final form since the proposal was published.

More extensive information about each of these items can be found on the agency's website at www.fhfa.gov. FHFA also has published the listed regulations in the Federal Register.

Regulations: All Regulated Entities (Enterprises and Federal Home Loan Banks)

| | Rule/Regulation Title | Reference | Date (2013) | Description/Explanation/Comments |
|----------|---|--|-----------------|---|
| | Credit Risk Retention | 78 FR 57928; 12 CFR Part 1234 | September 20 | This rule, proposed jointly by FHFA, the Comptroller of the Currency (OCC), Board of Governors of the Federal Reserve System (Board), Federal Deposit Insurance Corporation (FDIC), Securities Exchange Commission (SEC), and the U.S. Department of Housing and Urban Development (HUD), would implement the requirements of section 941 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act), requiring a securitizer to retain at least 5 percent of the credit risk of any asset that the securitizer, through the issuance of an asset-backed security (ABS), transfers to a third party, and prohibiting the securitizer from hedging or otherwise transferring the credit risk that the securitizer is required to retain. |
| Proposed | Appraisals for Higher-Risk Mortgage Loans— Supplemental Proposal | 78 FR 48547; 12 CFR Part 1222 | August 8 | See below; adopted in final form December 6, 2013. |
| | Parachute and 284 Indemnification 12 (| 78 FR 28452; May 12 CFR Part 1231 | , May 14 | This rule re-proposed the Golden Parachute proposed rule that was published in 2009. This re- proposal solicited comments on the appropriate treatment of golden parachute arrangements entered into before the effective date of the rule, and also responded to public comments received by FHFA on the golden parachute provisions, and provided clarification regarding cov- erage of retirement plans, which had been the subject of significant concern expressed in the comments. |
| | | | | The final rule was published on January 28, 2014 (79 FR 4394) and went into effect February 27, 2014. |
| Final | Appraisals for Higher-Priced Mortgage Loans— Supplemental Final | 78 FR 78520; 12 CFR Part 1222 | December 26 | This regulation implements a Dodd-Frank Act provision requiring a regulation. The supplemen- tal proposal, issued jointly by FHFA, the Bureau of Consumer Financial Protection (CFPB), OCC, the Board, FDIC, and National Credit Union Administration (NCUA), would amend Regulation Z, which implements the Truth in Lending Act (TILA). Because it applies only to institutions in the primary mortgage market that originate mortgage loans, and because FHFA's regulated enti- ties—Fannie Mae, Freddie Mac, and the Federal Home Loan Banks—operate in the secondary mortgage markets, it does not affect or change FHFA's regulation codified at 12 CFR part 1222. The regulation was published on December 26, 2013, and went into effect January 18, 2014. |

Regulations: All Regulated Entities (Enterprises and Federal Home Loan Banks), continued

| | Rule/Regulation Title | Reference | Date (2013) | Description/Explanation/Comments |
|-------|--|--|-----------------|--|
| | Suspended Counterparty Program | 78 FR 63007; 12 CFR Part 1227 | October 23 | This regulation, an interim final rule, codifies the procedures FHFA follows under its exist- ing Suspended Counterparty Program, established in June 2012. The interim final rule requires the regulated entities to submit reports to FHFA when they become aware that an individual or institution, and any affiliates thereof, with which they are doing or have done business has committed fraud or other financial misconduct. The interim final rule sets forth the procedures for FHFA issuance of proposed and final suspension orders. Proposed suspension orders include an opportunity for response by the affected individual or institu- tion and by the regulated entities. A final suspension order may be issued if FHFA determines that the covered misconduct is of a type that would likely cause significant financial or reputational harm to a regulated entity or otherwise threaten the safe and sound operation of a regulated entity. Final sus- pension orders direct the regulated entities to cease or refrain from doing business with the individuals or institutions for a specified period of time or permanently. The interim final rule went into effect October 23, 2013. |
| Final | Stress Testing of Regulated Entities | 78 FR 59219; 12 CFR Part 1238 | September 26 | This regulation implements a Dodd-Frank Act provision requiring certain financial compa- nies to conduct annual stress tests to determine whether the companies have the capital necessary to absorb losses as a result of adverse economic conditions. The final rule, adopted in coordination with the Board and the Federal Insurance Office, establishes the stress test framework, including the methodology, reporting, and publication require- ments. FHFA separately published the scenarios that are to be used by the regulated entities in applying the stress test methodology, and will continue to publish them on an annual basis. The final rule is comparable to rules adopted by the Board, OCC, and FDIC. The regulation went into effect on October 28, 2013. |
| | Executive Compensation | 78 FR 28442; 12 CFR Part 1230 | May 14 | This regulation, an interim final rule, sets forth requirements and processes with respect to compensation paid by the regulated entities to their executive officers. The Safety and Soundness Act requires FHFA to prohibit the payment of excessive compensation to the regulated entities' executive officers. The interim final rule went into effect on June 13, 2013. FHFA subsequently published a final rule on January 28, 2014 (79 FR 4389) which went into effect on February 27, 2014. |
| | Repeal of Disclosure Regulations | 78 FR 15869; 12 CFR Parts 998, 1730 | March 13 | This regulation repeals two obsolete regulations issued by FHFA's predecessor agen- cies, the Office of Federal Housing Enterprise Oversight (OFHEO) and the Federal Housing Finance Board (Finance Board) with respect to the entities regulated by OFHEO and the Finance Board. The regulations being repealed govern securities disclosures made by the entities. The applicable statutes have been amended so that no FHFA regulations are needed on the subject of the regulated entities' securities disclosure obligations. The repeal was effective April 12, 2013. |
| | Appraisals for Higher-Priced Mortgage Loans | 78 FR 10367; 12 CFR Part 1222 | February 13 | This regulation, jointly issued by the Board, CFPB, FDIC, FHFA, NCUA, and OCC, imple- ments a Dodd-Frank Act provision requiring appraisals for "higher-risk mortgages." For mortgages with an annual percentage rate that exceeds the average prime offer rate by a specified percentage, the final rule requires creditors to obtain an appraisal or appraisals meeting certain specified standards, provide applicants with a notification regarding the use of the appraisals, and give applicants a copy of the written appraisals used. The regulation went into effect January 18, 2014. |

Regulations: Federal Home Loan Banks

| | | Rule/Regulation Title | Reference | Date (2013) | Description/Explanation/Comments |
|------|-------|---|---|----------------|---|
| Proj | posed | Removal of References to Credit Ratings in Certain Regulations Governing the Federal Home Loan Banks | 78 FR 30784; 12 CFR Parts 1267, 1269, 1270 | May 23 | See below; adopted in final form November 8, 2013. |
| | | Information Sharing Among Federal Home Loan Banks | 78 FR 6045; 12 CFR Part 1260 | January 29 | See below; adopted in final form December 6, 2013. |
| | Final | Information Sharing Among Federal Home Loan Banks | 78 FR 73407; 12 CFR Part 1260 | December 6 | This regulation implements section 20A of the Federal Home Loan Bank Act, which requires FHFA to make available to each FHLBank information relating to the financial condition of all other Banks. The regulation went into effect January 6, 2014. |
| Fi | | Removal of References to Credit Ratings in Certain Regulations Governing the Federal Home Loan Banks | 78 FR 67004; 12 CFR Parts 1267, 1269, 1270 | November 8 | This regulation implements section 939A of the Dodd-Frank Act, under which Federal agencies must review regulations that require the use of an assessment of the creditwor- thiness of a security or money market instrument and any references to, or requirements in, such regulations regarding credit ratings issued by credit rating organizations regis- tered with the SEC as nationally recognized statistical rating organizations (NRSROs), and to remove such references or requirements. To implement this provision, FHFA removed a number of references and requirements in certain safety and soundness regulations affecting the FHLBanks. To replace the provisions that referenced NRSRO ratings, FHFA added requirements that the Banks apply internal analytic standards and criteria to determine the credit quality of a security or obligation, subject to FHFA oversight and review through the examination and supervisory process. The regulation went into effect May 7, 2014. |

Regulations: Enterprises

| | Rule/Regulation Title | Reference | Date (2013) | Description/Explanation/Comments |
|----------|--|--|----------------|--|
| Proposed | Enterprise Underwriting Standards (PACE); (Withdrawal of Proposed Rule) | 78 FR 46295; 12 CFR Part 1254 | July 31 | FHFA withdrew the proposed rule concerning underwriting standards for the Enterprises, relating to mortgage assets affected by Property Assessed Clean Energy (PACE) programs. The proposed rule, published June 15, 2012, (77 FR 3958) was withdrawn July 31, 2013. |

Regulations: Agency Operations

| | Rule/Regulation Title | Reference | Date (2013) | Description/Explanation/Comments |
|----------|--|--|----------------|--|
| Proposed | Production of FHFA Records, Information, and Employee Testimony in Legal Proceedings (Touhy) | 78 FR 9336; 12 CFR Part 1215 | February 8 | See below; adopted July 3, 2013. |
| | Availability of Non- Public Information | 78 FR 6042; 12 CFR Parts 911, 1214 | January 29 | See below; adopted July 3, 2013. |
| | Availability of Non- Public Information | 78 FR 39957; 12 CFR Parts 911, 1214 | July 3 | This regulation prohibits the unauthorized disclosure of FHFA non-public informa- tion. It replaces rules issued by FHFA's predecessor agencies, OFHEO and the Finance Board. The regulation went into effect August 2, 2013. |
| Final | Production of FHFA Records, Information, and Employee Testimony in Third-Party Legal Proceedings (Touhy) | 78 FR 39959; 12 CFR Part 1215 | July 3 | This regulation governs the production of FHFA records, information or employee testimony in connection with legal proceedings in which neither the United States nor FHFA is a party. This regulation establishes requirements and procedures for parties to submit demands or requests for FHFA information, and the factors for FHFA to consider in determining whether FHFA employees will provide records, information or testimony relating to their official duties. The regulation went into effect August 2, 2013. |
| | Rules of Practice and Procedure: Enterprise and Federal Home Loan Bank Housing Goals Related Enforcement Amendment | 78 FR 37101; 12 CFR Part 1209 | June 20 | This regulation amends the procedures that govern FHFA's enforcement proceed- ings to extend them to cases in which the regulated entities fail to submit or follow a housing plan, or an Enterprise fails to submit information on its housing activi- ties. The regulation went into effect July 22, 2013. |

Regulations: Housing Goals and Mission

| | Rule/Regulation Title | Reference | Date (2013) | Description/Explanation/Comments |
|-------|------------------------------|--|----------------|---|
| Final | Relocation of Regulations | 78 FR 2319; 12 CFR Parts 1201, 1225, 1228, 1229, 1231, 1233, 1235-1237, 1261, 1263-1267, 1269-1274, 1278, 1281, 1282, 1290- 1292; also removed and relocated 12 CFR Parts 952, 975, 977, 978, 995, 996 | January 11 | This regulation relocates six Finance Board regulations to new locations within the FHFA chapter of the Code of Federal Regulations without any substantive modification. The regulations relate to: Community Investment Cash Advance Programs (CICA); Federal Home Loan Bank (Bank) collection, settlement, and processing of payment instruments; miscellaneous Bank authorities; Bank requests for information from the federal banking regulators; Financing Corporation (FICO) operations; and Bank assistance for the Resolution Funding Corporation (RefCorp). This final rule also creates a general definitions section to be located at the beginning of the FHFA chapter to facilitate the use of common terms found throughout the chapter. The regulation went into effect February 11, 2013. |

Policy Guidance: Regulated Entities and the Office of Finance

| Policy Subject | Reference | Date (2013) | Description/Explanation/Comments |
|--|------------|----------------|---|
| Advisory Bulletin on Model Risk Management Guidance | AB-2013-07 | November 20 | Sets the minimum thresholds, based on the extent and scale of model development for each regulated entity and the Office of Finance, for FHFA's supervisory expecta- tions for model risk management by outlining the framework of baseline control and governance requirements. |
| Advisory Bulletin on FHFA Enforcement Policy | AB 2013-03 | May 31 | Disseminates the internal FHFA policy for taking enforcement actions, when deter- mined appropriate, to address compliance with laws, rules, or regulations; supervi- sory guidance, examination findings, or failure to comply with final agency orders; capital deficiencies; failure to meet prudential standards; and/or unsafe or unsound practices or conditions. |

Policy Guidance: Enterprises and the Federal Home Loan Banks

| Policy Subject | Reference | Date (2013) | Description/Explanation/Comments |
|---|------------|----------------|---|
| Advisory Bulletin on Clarification of Implementation for Advisory Bulletin 2012-02, Framework for Adversely Classifying Loans, Other Real Estate Owned, and Other Assets and Listing Assets for Special Mention | AB-2013-02 | May 13 | Clarifies that the implementation of the asset classification framework set forth in AB 2012-02 may occur in two phases. The asset classification provision to be implemented by January 1, 2014 and the charge-off provisions should be implemented no later than January 1, 2015. |
| Advisory Bulletin on Contingency Planning for High-Risk or High-Volume Counterparties | AB-2013-01 | April 1 | Establishes guidelines for contingency plans for high-risk or high-volume counterpar- ties at the regulated entities. The guidelines describe the criteria Fannie Mae, Freddie Mac and the FHLBanks should use to develop plans for managing counterparty credit risk exposures. |

Policy Guidance: Federal Home Loan Banks

| Policy Subject | Reference | Date (2013) | Description/Explanation/Comments |
|--|------------|----------------|--|
| Advisory Bulletin on Collateralization of Advances and Other Credit Products; Perfection and Control of Collateral | AB-2013-10 | December 23 | Communicates FHFA's expectations on credit risk management practices that ensure the FHLBank advances remain "fully secured," as required by statute, relative to the perfection and control of collateral, when accepting particular types of collateral. |
| Advisory Bulletin on Collateralization of Advances and Other Credit Products to Insurance Company Members | AB-2013-09 | December 23 | Provides guidance on credit risk management practices to ensure FHLBank advances remain fully secured when lending to insurance company members. |
| Advisory Bulletin on Guidance on On-Site Monitoring of Projects under the Affordable Housing Competitive Application Program | AB-2013-08 | December 13 | Provides guidance to the FHLBanks on incorporating site visits into their project monitoring policies and procedures for certain projects awarded funds under the competitive application program of the Affordable Housing Program (AHP). Describes the existing monitoring requirements of the AHP regulation and provides guidance to the FHLBanks on how they may meet those requirements by identifying risks and conditions that may warrant a visit to the project site. |
| Advisory Bulletin on Guidance on Scoring Tie- Break Methodologies in the Affordable Housing Competitive Application Program | AB-2013-06 | October 8 | Provides guidance under the AHP regulation, 12 CFR Part 1291, on how the FHLBanks may treat AHP competitive program applications in the event that two or more applications have identical scores in the same funding round and there is insufficient AHP subsidy to approve all of the tied applications. |
| Advisory Bulletin on Rescission of Division of Bank Regulation Advisory Bulletins | AB-2013-04 | July 16 | Rescinds 29 ABs issued between 1996 and 2007 by the Finance Board relating to the examination of the FHLBanks. |

Policy Guidance: Enterprises

| Policy Subject | Reference | Date (2013) | Description/Explanation/Comments |
|--|------------|-----------------|--|
| Advisory Bulletin on Management of Deficiency Balances | AB-2013-05 | September 16 | Establishes supervisory expectations for deficiency balance management at the Enterprises. Describes factors that should be considered when deciding whether to pursue recovery of deficiency balances as part of a deficiency balance management program. |

Policy Guidance: Agency Safety and Soundness Examination Manual

| Policy Subject | Reference | Date (2013) | Description/Explanation/Comments |
|-----------------------|-----------|----------------|--|
| FHFA Examination Manu | ıal | December 19 | The FHFA Examination Manual comprises an overview of the examination process and 25 modules that provide examination instructions and work programs organized by risk category or line of business or activity. The examination manual serves as a reference tool and describes standards and expectations for the examinations of the regulated entities and the Office of Finance. |

Research and Publications

During 2013, FHFA published annual reports required by statute as well as research papers related to housing and market conditions. Reports and publications are posted on the agency website (fhfa.gov).

Reports to Congress

Pursuant to requirements in HERA, FHFA submitted three annual Reports to Congress in 2013: the 2013 Guarantee Fee Study, 2013 Annual Housing Report and 2013 FHLBank Collateral Study.

Guarantee Fee Study

HERA requires FHFA to conduct an on-going study of the guarantee fees charged by Fannie Mae and Freddie Mac. In December 2013, FHFA released its fifth annual guarantee-fee study report, *Fannie Mae and Freddie Mac Single-Family Guarantee Fees in 2011 and 2012.* The report examines the fees charged by the Enterprises for guaranteeing conventional single-family mortgages, including the amount of these fees and the criteria used to determine them. The guarantee fee study utilized aggregated data collected from the Enterprises.

Annual Housing Report

FHFA submitted its fifth Annual Housing Report to Congress in October 2013, which detailed Enterprise housing goal performance in 2012. The report also included information on other aspects of FHFA and Enterprise activities.

FHLBank Advance Collateral Study

HERA requires FHFA to submit to Congress an annual report on the collateral pledged to the Federal Home Loan Banks to secure advances. In September 2013, FHFA released its fifth Report on Collateral Pledged to Federal Home Loan Banks, which included the results of FHFA's 2013 Collateral Data Survey.

House Price Index and Related Research

FHFA continued to publish its widely followed House Price Index (HPI) in 2013. As in prior years, FHFA expanded the number of indexes released for public use. Responding to strong public interest, FHFA also extended the number of cities covered in both its "purchaseonly" and "expanded-data" series. The number of cities covered by the purchase-only series, which is calculated using real estate sales prices from mortgages purchased or guaranteed by the Enterprises, was increased four-fold from 25 to 100. The expanded-data series, which adds FHA and county recorder data into the pool of information available for index calibration, was extended to cover 50 metropolitan areas. Previously, those indexes were only available for 25 cities.

The "Highlights" articles accompanying FHFA's 2013 HPI releases covered a number of topics. FHFA released an in-depth "Highlights" article about the transition to a new set of metropolitan statistical area (MSA) definitions announced by the Office of Management and Budget (OMB) in early 2013. This article provided summary and detailed information concerning the specific areas affected by the MSA reconfigurations. Other articles analyzed the magnitude of HPI revisions and the relative precision of indexes for newly covered metropolitan areas and evaluated differences in recent price trends measured across two of the HPI series.

Public Use Database

The Safety and Soundness Act requires FHFA to make available to the public loan-level data submitted by the Enterprises in the reports required under section 309(m) of Fannie Mae's Charter Act and section 307(e) of Freddie Mac's Charter Act, except for certain proprietary information and personally identifiable information. FHFA is required to make publicly available data elements required to be reported under HMDA at the census tract level. The Safety and Soundness Act also requires FHFA to make public certain high-cost securitized loan data it collects to compare the characteristics of high-cost loans the Enterprises purchase and securitize. FHFA is required to release the data by September 30 of the year following the year the mortgages were acquired by the Enterprises. FHFA has released this data to the public for 2012 through its Public Use Database (PUDB).

Historical Database (MIRS)

The Federal Housing Finance Agency conducts the Monthly Interest Rate Survey. To conduct this survey, FHFA asks a sample of mortgage lenders to report the terms and conditions on all single-family, fully amortized, purchase-money, non-farm loans that they close during the last five business days of the month. The survey excludes FHA-insured and VA-guaranteed loans, multifamily loans, mobile home loans, and loans created by refinancing another mortgage. FHFA collects and consolidates this data and then makes available to the public monthly information on interest rates, loan terms, and house prices by property type (all, new, previously occupied), and by loan type (fixed- or adjustable-rate), as well as information on 15-year and 30-year fixed-rate loans. In addition, quarterly information on conventional loans by major metropolitan area and by FHLBank district is also made available. FHFA's website provides annual and monthly data from 1973 to 2014.

Research Publications: Working Papers, Mortgage Market Notes, and Research Papers

Continuing FHFA's longstanding program of publishing stand-alone research, FHFA released three Working Papers in 2013. The first of these Working Papers, *Distressed Sales and the FHFA House Price Index*, was released in August 2013. In the paper, FHFA assessed the accuracy of its approach in identifying distressed sales which include short sales and sales of bank-owned properties—in current data sources. FHFA's methodology was benchmarked against independent data from Florida and it found that FHFA's approach evidenced strong reliability. The paper also set forth and evaluated a technique for measuring trends in price discounts for distressed sales.

FHFA released the second Working Paper, *Generating Historically-Based Stress Scenarios Using Parsimonious Factorization,* in October 2013. This paper describes a robust empirical approach to generating plausible, yet stressful, historically-based interest rate shocks, which can be applied to any market environment. These interest rate shocks can be readily linked to movements in other key risk factors and used to measure market risk on institutions with large fixed-income portfolios.

FHFA released the third Working Paper, *Impacts of Down Payment Underwriting Standards on Loan Performance -Evidence from the GSEs and FHA Portfolios*, in December 2013. The paper quantifies the relationship between down payment requirements and loan performance in terms of the cumulative rates of serious delinquency and foreclosure, controlling for borrower and loan characteristics and housing market conditions. The paper found that the lifetime delinquency and foreclosure rates increase monotonically and nonlinearly as original LTV rises. The magnitude of these impacts is sensitive to the borrower's credit score and debt-to-income levels.

In October 2013, FHFA released a Mortgage Market Note, *A Study of First-Time Homebuyers*, which estimated annual first-time homebuyer shares using 20 years of loan-level mortgage data from the Enterprises and FHA. It also compared mortgage and borrower characteristics of first-time and other homebuyers.

FHFA also published its annual synopsis of housing and mortgage market conditions in December 2013. This report evaluated 2012 data reflecting home prices, mortgage rates, mortgage delinquencies and other indicators of market conditions during the year.

FHFA Operations and Performance
A. Performance and Program Assessment

During FY 2013, the agency continued to operate under its *Strategic Plan for Fiscal Years 2013-2017* that was released in 2012. The plan sets four strategic goals:

- 1) Safe and sound housing GSEs.
- 2) Stability, liquidity, and access in housing finance.
- 3) Preserve and conserve Enterprise assets.
- 4) Prepare for the future of housing finance in the United States.

On December 16, 2013, FHFA published its annual *Performance and Accountability Report* (PAR), detailing the agency's performance and achievements for FY 2013. For the sixth consecutive year, the Association of Government Accountants awarded FHFA the Certificate for Excellence in Accountability Reporting (CEAR) for FY 2013. The CEAR award is presented to agencies that have demonstrated excellence in integrating performance and accountability reporting. Only agencies with unqualified opinions on their financial reports from an independent auditor are eligible to be considered.

For FY 2013, FHFA met or exceeded 17 (68 percent) out of 25 of its performance measures and did not meet seven (28 percent). Performance information for one measure was not available at the end of FY 2013. In FY 2012 FHFA met 92 percent of performance targets.

Also in FY 2013, FHFA reviewed its information security program through its internal audit function in compliance with the Federal Information Security Management Act (FISMA). An independent external audit firm, contracted by the FHFA-OIG, conducted the FY 2013 FISMA audit of the FHFA information security program. The independent auditor concluded that FHFA was generally compliant with FISMA, other Federal legislation, and applicable OMB guidance.

Also developed and released in FY 2013, was the agency's *FY 2014 Annual Performance Plan* (APP), which includes performance measures for monitoring progress toward meeting the strategic and performance goals described in the Strategic Plan. The measures in this APP were arrived at through an iterative review process with FHFA executive leaders.

Performance Highlights

Below are highlights of FHFA's key activities and accomplishments by strategic goal:

1 • Safe and Sound Housing GSEs

a) Uniform Examination Rating System – Initiated a new standardized examination rating system for Fannie Mae, Freddie Mac and the Federal Home Loan Banks. Effective January 2013, each regulated entity is now assigned a common composite rating based on Capital, Asset Quality, Management, Earnings, Liquidity, Sensitivity to market risk, and Operational risk (CAMELSO).

- **b)** Examiner Commissioning Program Launched the Housing Finance Examiner Commissioning Program. The main objective of the program is to provide examiners with broad-based knowledge to conduct successful risk-based examinations.
- c) Qualified Mortgage Rule Directed the Enterprises to adopt several new requirements established by the Consumer Financial Protection Bureau (CFPB) regulations

implementing certain provisions of the Dodd-Frank Act.

d) Derivatives Clearing – Consistent with the requirements of the Dodd-Frank Act, the FHLBanks began clearing certain types of their derivatives with a derivatives clearing organization (DCO) through a futures commission merchant (FCM). This action represents a marked change from the FHLBanks' historical practice of entering into derivatives in the over-the-counter (OTC) market directly with each counterparty.

2 • Stability, Liquidity, and Access in Housing Finance

- a) Representations and Warranties Introduced a new program that provides lenders with representations and warranties relief on the credit underwriting of the borrower, property, and project as early as 36 months after acquisition. The intent of this new framework is to provide lenders with greater certainty around repurchase exposure and liability to help improve the availability of credit.
- **b)** Force-Placed Insurance Directed the Enterprises to align their lender-placed insurance policies and restrict practices that create incentives for servicers to seek out higherpriced coverage.
- c) New Streamlined Modification Initiative Directed the Enterprises to offer a simplified loan modification option (with reduced paperwork requirements and lower mortgage payments) to help struggling borrowers stay in their homes.
- d) National Education Campaign for Home Affordable Refinance Program (HARP) – Launched a nationwide media campaign, which is supported by a new website, www.HARP.gov, designed to educate and inform homeowners about the benefits of refinancing through HARP.

3 • Preserve and Conserve Enterprise Assets

- a) Enterprises Infrastructure Worked to update the Enterprises' outmoded securitization infrastructures by replacing them with a common and more efficient securitization model.
- **b) Conservator's Scorecard** Published the 2013 Conservator's Scorecard, setting forth performance goals for the Enterprises in furtherance of the Conservatorship Strategic Plan.
- c) Litigation Developments Continued to pursue numerous legal actions that sought to recover losses or avoid liability for the Enterprises. The FHFA filed 18 lawsuits in 2011 against financial institutions over privatelabel mortgage-backed securities sold to the Enterprises. As of October 2013, four of these lawsuits have been settled out of court. These settlements have resulted in payments of more than \$4.8 billion from financial institutions to the Enterprises, which are then passed on to the Treasury Department. By pursuing such legal actions when practical and cost-effective, the FHFA will be able to minimize taxpayer losses during the Enterprises' conservatorships.
- **d) Risk-Sharing** Worked with the Enterprises to investigate and develop several transaction structures to share the Enterprises' single-family mortgage credit risk with the private sector. In July 2013, Freddie Mac completed a credit risk transaction, known as the Structured Agency Credit Risk (STACR) transaction. Fannie Mae executed a similar transaction in October and Freddie Mac closed a second STACR transaction in November. Together, each Enterprise met FHFA's scorecard target for \$30 billion in risksharing transactions using multiple types of transactions.

4 • Prepare for the Future of Housing Finance in the U.S.

- a) Common Securitization Infrastructure -Contined to develop a Common Securitization Infrastructure for housing finance to include a Common Securitization Platform and a Contractual and Disclosure Framework (CDF). Throughout 2013, FHFA worked with Fannie Mae and Freddie Mac on the development of a Common Securitization Platform to perform major aspects of the securitization process. As part of this effort, FHFA and the Enterprises worked toward developing five modules data validation, security issuance, disclosure, master servicing and bond administration functions - to implement core securitization functions. Additionally, the Enterprises also worked toward development of a Contractual and Disclosure Framework intended to more closely align Fannie Mae and Freddie Mac and potentially serve as a model for the future of the mortgage market.
- b) Data Standardization Worked with the Mortgage Industry Standards Maintenance Organization (MISMO) to ensure that mortgage data points are accurately defined and specified for industry adoption.

| | 2013 | 2012 | Increase |
|--|--------|--------|----------|
| Total Budgetary Resources | \$ 324 | \$ 305 | 6% |
| Assessments | \$ 225 | \$ 224 | 0% |

B. Financial Operations

Financial Highlights

HERA authorizes FHFA to collect annual assessments from its regulated entities to pay its costs and expenses and maintain a working capital fund. Under HERA, annual assessments are levied against the Enterprises and the FHLBanks to cover the cost and expenses of the agency's operations for supervision of the regulated entities.

In FY 2013, FHFA had \$324.1 million in total budgetary resources. These budgetary resources were composed of \$225.4 million in assessments, \$45.5 million in unobligated balance brought forward from FY 2012, and \$11.5 million in recoveries of prior year unpaid obligations and \$41.6 million in spending authority from offset-ting collections. Obligations incurred increased \$25.6 million to \$284.7 million in FY 2013. Gross outlays increased \$15.3 million to \$277.6 million in FY 2013.

Federal Management System and Strategy

HERA requires FHFA to implement and maintain financial management systems that comply substantially with federal financial management systems requirements, applicable federal accounting standards, and the U.S. Government General Ledger at the transaction level.

FHFA, including FHFA-OIG, uses the Treasury Department's Bureau of the Fiscal Service for its accounting services and financial management system. FHFA is responsible for overseeing the Bureau of the Fiscal Services' performance of accounting services for the agency. Additionally, FHFA uses the National Finance Center, a service provider within the Department of Agriculture, for its payroll and personnel processing. The agency has streamlined accounting processes by electronically interfacing data from charge cards, investment activities, the GovTrip travel system, the PRISM procurement system, and the National Finance Center payroll system to FMS.

Management Report on Final Action

FHFA must report information on final actions taken by management on certain audit reports as required by the Inspector General Act of 1978. FHFA-OIG identified \$256,343 in disallowed costs and \$105,000 for funds that could be put to better use for FY 2013.

Unqualified Audit Opinions in FY 2013

For the fifth consecutive year, FHFA has received an unmodified (clean) opinion on its financial statements from the U.S. Government Accountability Office (GAO). FHFA had no material internal control weaknesses, and our FY 2013 financial and performance data were reliable and complete in accordance with Office of Management and Budget Circular A-123 and A-136.

^a Adoption of accounting guidance related to transfers of financial assets and consolidation of variable interest entities effective, January 1, 2010, significantly changed presentation of these line items in the financial statements. Financial results for 2010 and later years are not directly comparable to previous years. Effective January 1, 2010, guarantee fee income associated with the securitization activities of consolidated trusts is reflected in net interest income.

^b Interest income net of interest expense.

^C Credit-related expense (income) includes provision (benefit) for loan losses and guarantee losses (collectively, credit losses) and foreclosed property expense (income).

^d Net income (loss) available to common stockholders divided by average outstanding common equity.

- ^a Adoption of accounting guidance related to transfers of financial assets and consolidation of variable interest entities, effective January 1, 2010, significantly changed presentation of these line items in the financial statements. Financial results for 2010 and later years are not directly comparable to previous years. Adoption of this guidance resulted in the consolidation of the substantial majority of mortgage-backed securities (MBS) trusts and recognition of the underlying assets and debt of the trusts in the consolidated balance sheet.
- b Beginning in 1998, the guarantee liability for Fannie Mae MBS held for investment was classified as a liability.

^C Gross mortgage assets net of unamortized purchase premiums,

discounts, cost-basis adjustments, fair-value adjustments on securities and loans. Beginning in 2002, amounts include fair-value adjustments on available-for-sale and trading securities, as well as impairments on available-for-sale securities. Excludes allowance for loan losses on loans held for investment. Amounts for 1999 through 2001 include certain loans held for investment previously classified as nonmortgage investments.

- ^d Data reflect unpaid principal balance net of unamortized purchase premiums, discounts, cost-basis adjustments, fair-value adjustments and impairments on available-for-sale and trading securities. Since 2005, advances to lenders have not been included. Amounts for periods before 2005 may include or consist of advances to lenders.
- e Amounts for 2010 and later meet the definition of mortgage assets in the Treasury Senior Preferred Stock Purchase Agreement for the purpose of determining the maximum amount of mortgage assets that may be held. The amount for 2009 includes consolidation of variable interest entities. The 2009 amount would have been \$772.5 billion excluding consolidation of variable interest entities.

As defined in the Treasury Senior Preferred Stock Purchase Agreement for 2009 and later years.

Source : Fannie Mae

a Unpaid principal balance of Fannie Mae mortgage-backed securities (MBS) held by third-party investors. Includes guaranteed whole loan real estate mortgage investment conduits (REMICs) and private-label wraps not included in grantor trusts. The principal balance of resecuritized Fannie Mae MBS is included only once. ^b FHA stands for Federal Housing Administration. RD refers to loans guaranteed by the U.S. Department of Agriculture Rural Development (RD) loan programs. VA stands for Department of Veterans Affairs.

^c Beginning in 2005, consists of securities guaranteed by Fannie Mae and backed by Ginnie Mae collateral, grantor trusts, and REMICs, as well as stripped MBS backed by Fannie Mae certificates.

Table 5. Fannie Mae Mortgage Assets Held for Investment Detail^a

Source: Fannie Mae

^a Beginning in 2010, excludes effect of accounting guidance related to transfers of financial assets and consolidation of variable interest entities, effective, January 1, 2010. Amounts for 2010 have been revised from amounts previously reported to reflect this exclusion.

^b Unpaid principal balance.

C Amounts for 2002 to 2009 include mortgage-related securities consolidated as loans at period end. For 1999 through 2001, includes certain loans held for investment classified as nonmortgage investments. d Amounts for 2002 to 2009 exclude mortgage-related securities consolidated as loans at period end.

e Includes mortgage revenue bonds.

f

Amounts for 2010 and later meet the definition of mortgage assets in the Treasury Senior Preferred Stock Purchase Agreement for the purpose of determining the maximum amount of mortgage assets that may be held. Amounts prior to 2010 include consolidation of variable interest entities. Mortgage assets as defined under the Senior Preferred Stock Purchase Agreement for 2009 totaled \$772.5 billion excluding consolidation of variable interest entities.

Source: Fannie Mae

^a Data reflect unpaid principal balance net of unamortized purchase premiums, discounts and cost- basis adjustments, fair-value adjustments, and impairments on available-for-sale and trading securities.

b Since 2005, advances to lenders have not been included in the data. Amounts for years before 2005 may include or consist of advances to lenders. Includes tri-party repurchase agreements.
 d Includes Treasury and age

^C Includes commercial paper, floating-rate notes, taxable auction notes, corporate bonds, and auction-rate preferred stock. Starting with 2006, medium-term notes previously reported in "Other" are included in commercial paper.

 $^{\rm d}$ $\,$ Includes Treasury and agency securities, Yankee Bonds, and domestic certificates of deposit.

Source: Fannie Mae

^a Single-family loans are seriously delinquent when the loans are 90 days or more past due or in the foreclosure process. Rate is calculated using the number of conventional single-family loans owned and backing Fannie Mae mortgage-backed securities (MBS). Includes loans referred to foreclosure proceedings but not yet foreclosed. Prior to 1988, data included all seriously delinquent loans for which Fannie Mae had primary risk of loss. Beginning in 1998, data include all seriously delinquent conventional loans owned or backing Fannie Mae MBS with and without primary mortgage insurance or credit enhancement. Data prior to 1992 include loans and securities in relief or bankruptcy, even if the loans were less than 90 days delinquent, calculated based on number of loans.

^b Before 1998, data include multifamily loans for which Fannie Mae had primary risk of loss. Beginning in 1998, data include all multifamily loans and securities 60 days or more past due. Beginning in 2002, rate is calculated using the unpaid principal balance of multifamily loans owned by Fannie Mae or underlying Fannie Mae guaranteed securities as the denominator. For the period 1998 to 2001, the denominator also includes other credit enhancements Fannie Mae provides on multifamily mortgage assets and multifamily non-Fannie Mae mortgage-related securities held for investment.

^C Credit losses are charge-offs, net of recoveries and foreclosed property expense (income). Average balances used to calculate ratios subsequent to 1994. Quarterly data are annualized. Beginning in 2005, credit losses exclude the impact of fair-value losses of credit impaired loans acquired from MBS trusts. Beginning in 2008, credit losses also exclude the effect of HomeSaver Advance program fair-value losses.

^d Guarantee book of business refers to the sum of the unpaid principal balance of mortgage loans held as investments, Fannie Mae MBS held as investments, Fannie Mae MBS held by third parties, and other credit enhancements Fannie Mae provides on mortgage assets. It excludes non-Fannie Mae mortgage-related securities held for investment that Fannie Mae does not guarantee. Before 2005, the ratio was based on the mortgage credit book of business, which consists of the guarantee book of business plus non-Fannie Mae mortgage-related securities held as investments not guaranteed by Fannie Mae.

^e Beginning in 2000, the credit-enhanced category was expanded to include loans with primary mortgage insurance. Amounts for periods before 2000 reflect the proportion of assets held for investment with additional recourse from a third party to accept some or all of the expected losses on defaulted mortgages.

Sources: Fannie Mae and FHFA

N/A = not applicable N/M = not meaningful

- ^a On October 9, 2008, the Federal Housing Finance Agency (FHFA) suspended capital classifications of Fannie Mae. As of the fourth quarter of 2008, neither the existing statutory nor the FHFA-directed regulatory capital requirements were binding and will not be binding during conservatorship.
- b The sum of the stated value of outstanding common stock (common stock less treasury stock), the stated value of outstanding noncumulative perpetual preferred stock, paid-in capital, and retained earnings (accumulated deficit). Core capital excludes accumulated other comprehensive income (loss) and senior preferred stock.
- ^c Beginning in the third quarter of 2005, FHFA required Fannie Mae to maintain an additional 30 percent capital in excess of the statutory minimum capital requirement. The regulator reduced the requirement to 20 percent as of the first quarter of 2008 and to 15 percent as of the second quarter of 2008. The minimum capital requirement and minimum capital surplus numbers stated in this table do not reflect these additional capital requirements.
- d Minimum capital surplus is the difference between core capital and minimum capital requirement.
 e Total capital is core capital plus the total allowance for loan losses and guarantee liability for mortgage-backed securities (MBS), less any specific loss allowances.
- f Risk-based capital requirement is the amount of total capital an Enterprise must hold to absorb projected losses flowing

from future adverse interest rate and credit risk conditions and is specified by the Federal Housing Enterprises Financial Safety and Soundness Act of 1992. For 2004 through 2006, the requirements were calculated based on originally reported, not restated or revised, financial results.

9 The difference between total capital and the risk-based capital requirement. For 2004 through 2006, the difference reflects restated and revised total capital, rather than total capital originally reported by Fannie Mae and used by FHFA to set capital classifications. FHFA is not reporting on risk-based capital levels during conservatorship.

^h Stock price at the end of the period multiplied by the number of outstanding common shares.

i Adoption of accounting guidance related to transfers of financial assets and consolidation of variable interest entities, effective January 1, 2010, significantly changed presentation of this item in the financial statements. Financial results for 2010 and beyond are not directly comparable to previous years.

j Unconsolidated MBS are those held by third parties.

^k Common dividends declared during the period divided by net income available to common stockholders for the period. As a result of conservatorship status and the terms of the Senior Preferred Stock Purchase Agreement with Treasury, no amounts are available to distribute as dividends to common or preferred stockholders (other than to Treasury as holders of the Senior Preferred Stock).

Source: Freddie Mac

b Consists of loans purchased from lenders, as well as those loans covered under other guarantee commitments.

^C Not included in total mortgages. From 2002 to 2013, amounts include non-Freddie Mac mortgagerelated securities as well as repurchased Freddie Mac mortgage-backed securities (MBS) held for investment. Before 2002, amounts exclude Freddie Mac real estate mortgage investment conduits and other structured securities backed by Ginnie Mae MBS. Amounts in 2010 through 2013, include purchases of Freddie Mac MBS, most accounted for as debt extinguishments under Generally Accepted Accounting Principles rather than as investment in securities.

^a Based on unpaid principal balances. Excludes mortgage loans and mortgage-related securities traded but not yet settled.

Table 10a. Freddie Mac Mortgage Purchases Detail by Type of Loan

Source: Freddie Mac

a Based on unpaid principal balances. Excludes mortgage loans and mortgage-related securities traded but not yet settled. Activity includes issuances of other guarantee commitments for loans held by third parties.

^b From 2002 to 2013, includes loans guaranteed by U.S. Department of Agriculture Rural Development (RD) loan programs.

^c From 2001 to 2012, includes balloon/reset mortgages. Freddie Mac discontinued purchase of balloon/reset mortgages on January 1, 2013.

 $^{
m d}~$ FHA stands for Federal Housing Administration. VA stands for Department of Veterans Affairs.

a Based on unpaid principal balances. Excludes mortgage loans and mortgage-related securities traded but not yet settled.

^b Includes Alt-A and option ARM private-label mortgage-related securities purchased for other guarantee transactions. ARM stands for adjustable-rate mortgage.

C Includes non-Freddie Mac mortgage-related securities purchased for other guarantee transactions, including Ginnie Mae mortgage-backed securities, as well as non-agency securities held for investment. Purchases for 2009 and 2010 include amounts related to housing finance agency bonds acquired and resecuritized under a bond initiative program.

Table 11. Freddie Mac MBS Issuances

Source: Freddie Mac

^a Based on unpaid principal balances. Excludes mortgage loans and mortgage-related securities traded but not yet settled. Includes issuance of other guarantee commitments for mortgages not in the form of a security.

b Includes mortgage-backed securities (MBS), real estate mortgage investment conduits (REMICs), other structured securities, and other guarantee transactions. From 2002 to 2013, includes Freddie Mac REMICs and other structured securities backed by Ginnie Mae MBS. Before 2002, excludes Freddie Mac REMICs and other structured securities backed by Ginnie Mae MBS. Amounts are not included in total MBS issuances if the activity represents a resecuritization of Freddie Mac MBS.

^c Includes activity related to multiclass securities, primarily REMICs, but excludes resecuritizations of MBS into single-class securities. Amounts are not included in total MBS issuances if the activity represents a resecuritization of Freddie Mac MBS.

N/M = not meaningful

^a Adoption of accounting guidance related to transfers of financial assets and consolidation of variable interest entities, effective January 1, 2010, significantly changed presentation of these items in the financial statements. Consequently, financial results for 2010 and later are not directly comparable to previous years. Effective January 1, 2010, guarantee fee income associated with the securitization activities of consolidated trusts is reflected in net interest income.

b For years 2002 through the current period, defined as provision/benefit for credit losses and realestate owned operations income/expense. For years 2000 and 2001, includes only provision for credit losses.

^C Ratio computed as annualized net income (loss) available to common stockholders divided by the simple average of beginning and ending common stockholders' equity (deficit).

b Excludes allowance for loan losses.

^a Adoption of accounting guidance related to transfers of financial assets and consolidation of variable interest entities, effective January 1, 2010, significantly changed the presentation of these items in the financial statements. Consequently, financial results for 2010 and later are not directly comparable to previous years. ^C Amounts for 2009 and later meet the definition of mortgage assets in the Treasury Senior Preferred Stock Purchase Agreement for the purpose of determining the maximum amount of mortgage assets that may be held.

 $^{\rm d}~$ As defined in the Treasury Senior Preferred Stock Purchase Agreement for 2009 and later years.

N/A = not available

^a Based on unpaid principal balances.

^C Excludes allowance for loan losses.

b Includes premiums, discounts, deferred fees, impairments of unpaid principal balances, and other basis adjustments on mortgage loans and mortgage-related securities plus unrealized gains or losses on available-for-sale mortgage-related securities. Amounts prior to 2006 include mortgage-backed securities residuals at fair value.

^d Amounts for 2009 and later meet the definition of mortgage assets in the Treasury Senior Preferred Stock Purchase Agreement for the purpose of determining the maximum amount of mortgage assets that may be held.

^e Maximum allowable mortgage assets under the Treasury Senior Preferred Stock Purchase Agreement.

Table 16. Freddie Mac Nonmortgage Investments

Source: Freddie Mac

^a Adoption of accounting guidance related to transfers of financial assets and consolidation of variable interest entities, effective January 1, 2010, changed presentation of nonmortgage investments. Values for 2010 and later are not directly comparable to previous years.

^b Beginning in 2009, amounts include Treasury bills and Treasury notes. For 2004 through 2006,

amounts include obligations of states and municipalities classified as available-for-sale securities. For 2003 and previous years, amounts include nonmortgage-related securities classified as trading, debt securities issued by the U.S. Treasury and other federal agencies, obligations of states and municipalities, and preferred stock.

Table 17. Freddie Mac Mortgage Asset Quality

Source: Freddie Mac

- ^a Based on the number of mortgages 90 days or more delinquent or in foreclosure. Excludes modified loans if the borrower is less than 90 days past due under the modified terms. Rates are based on loans in the single-family credit guarantee portfolio, which excludes that portion of Freddie Mac real estate mortgage investment conduits (REMICs) and other structured securities backed by Ginnie Mae mortgage-backed securities (MBS). Rates for years 2005 and 2007 also exclude other guarantee transactions. Single-family delinquency rates for 2008 and later include other guarantee transactions.
- ^b Before 2008, rates were based on the net carrying value of mortgages 60 days or more delinquent or in foreclosure and exclude other guarantee transactions. Beginning in 2008, rates were based on the unpaid principal balance of loans 60 days or more delinquent or in foreclosure and include other guarantee transactions.
- ^c Credit losses equal to real estate owned operations expense (income) plus net charge-offs and

exclude other market-based valuation losses. Calculated as credit losses divided by the average balance of mortgage loans in the total mortgage portfolio, excluding non-Freddie Mac MBS and the portion of REMICs and other structured securities backed by Ginnie Mae MBS.

- d Calculated based on the balance of mortgage loans in the total mortgage portfolio excluding non-Freddie Mac MBS and the portion of REMICS and other structured securities backed by Ginnie Mae certificates. Since 2004, the credit enhanced percentage of the total mortgage portfolio has been rounded to the nearest whole percent.
- ^e Includes loans with a portion of the primary default risk retained by the lender or a third party who pledged collateral or agreed to accept losses on loans that default. In many cases, the lender's or third party's risk is limited to a specific level of losses at the time the credit enhancement becomes effective. Also includes credit enhancement coverage, such as through Structured Agency Credit Risk (STACR) debt notes or other risk transfer transactions that were completed by the end of each period.

Sources: Freddie Mac and FHFA

N/M = not meaningful N/A = not applicable

- a On October 9, 2008, the Federal Housing Finance Agency (FHFA) suspended capital classifications of Freddie Mac. As of the fourth quarter of 2008, neither the existing statutory nor the FHFA-directed regulatory capital requirements are binding and will not be binding during conservatorship.
- ^b The sum of the stated value of outstanding common stock (common stock less treasury stock), the stated value of outstanding noncumulative perpetual preferred stock, paid-in capital, and retained earnings (accumulated deficit). Core capital excludes accumulated other comprehensive income (loss) and senior preferred stock.
- ^c Beginning in the fourth quarter of 2003, FHFA directed Freddie Mac to maintain an additional 30 percent capital in excess of the statutory minimum capital requirement. On March 19, 2008, FHFA announced a reduction in the mandatory target capital surplus from 30 percent to 20 percent above the statutory minimum capital requirements. The minimum capital requirement and minimum capital surplus (deficit) numbers stated in this table do not reflect the additional capital requirement. Minimum capital surplus i (deficit) is the difference between core capital and the minimum capital requirement.

d Total capital includes core capital and general reserves for mortgage and foreclosure losses.

е The risk-based capital requirement is the amount of total capital an Enterprise must hold to absorb projected losses flowing from future adverse interest rate and credit risk conditions and is specified by the Federal Housing Enterprise Financial Safety and Soundness Act of 1992. f

The difference between total capital and risk-based capital requirement.

^g Stock price at the end of the period multiplied by the number of outstanding common shares.

Adoption of the changes in the accounting guidance related to transfers of financial assets and consolidation of variable interest entities changed presentation of total assets on the balance sheet. Financial results for 2010 and later are not directly comparable to years before 2010.

Includes unconsolidated MBS held by third parties. Before 2010, Freddie Mac MBS held by third parties were not consolidated.

Common dividends paid as a percentage of net income available to common stockholders.

a Before 2000, the Federal Home Loan Banks charged a \$300 million annual capital distribution to the Resolution Funding Corporation (REFCORP) directly to retained earnings.

b The Federal Home Loan Banks made their final payment satisfying the REFCORP obligation on July 15, 2011 based on income earned in the second quarter of 2011.

^a Conforming loan limits are 50 percent higher in Alaska, Hawaii, Guam, and the U.S. Virgin Islands.

^b The Housing and Economic Recovery Act of 2008 prescribed the formula used to set maximum loan limits for mortgages acquired in 2012, 2013 and 2014.

^C Public Law 111-242 set maximum loan limits for mortgages originated through September 30, 2011 at the higher of the limits established by the Economic Stimulus Act of 2008 or those determined under a formula prescribed by the Housing and Economic Recovery Act of 2008. Loans originated after September 30 were subject to the Housing and Economic Recovery Act limits, which had a ceiling of \$625,500 in the contiguous U.S.

^d Public Law 111-242 set maximum loan limits for mortgages originated in 2010 at the higher of the limits established by the Economic Stimulus Act of 2008 or those determined under a formula prescribed by the Housing and Economic Recovery Act of 2008. For all areas, the resulting 2010 limits were the same as those in effect for 2009.

^e Loan limits for mortgages originated in 2009 were initially set under provisions of the Housing and Economic Recovery Act of 2008, which allowed for highcost area limits of up to \$625,500. In February 2009, however, the American Recovery and Reinvestment Act of 2009 restored the \$729,750 maximum loan limit for mortgages originated in 2009.

The Economic Stimulus Act of 2008 allowed Fannie Mae and Freddie Mac to raise the conforming loan limits in certain high-cost areas to a maximum of \$729,750 to nou-unit homes in the continental United States. Higher limits applied to two-, three-, and four-unit homes. Alaska, Hawaii, Guam, and the Virgin Islands have higher maximum limits. The limits applied to loans originated between July 1, 2007, and December 31, 2008.

Source: Federal Housing Administration

- ^a HUD loan limit authority given by Congress in the Economic Stimulus Action of 2008 and extended by the Consolidated and Further Continuing Appropriations Act of 2012 (PL. 112-55) expired at the end of December 2013. The Federal Housing Administration single-family loans limits for 2014 were established using the permanent authority under section 2030/(2) of the National Housing Act, as amended by the Housing Economic Recovery Act of 2008. This shift in legal authority resulted in changes in loan limits for 2014.
- ^b Public Law 111-242 set the maximum loan limits for mortgages with credit approvals issued in Fiscal Year 2011 (October 1, 2010 - September 30, 2011) at the higher of the limits established by the Economic Stimulus Act

of 2008 and those determined under a formula prescribed by the Housing and Economic Recovery Act of 2008. The maximum limit for loans with case numbers assigned between November 18, 2011 and December 31, 2013 were set pursuant to Public Law 112-55 at the higher of the limits established by the Economic Stimulus Act of 2008 and those determined under a formula prescribed by the Housing and Economic Recovery Act of 2008.

С

Public Law 111-88 set maximum loan limits for mortgages with credit approvals issued in 2010 at the higher of the limits established by the Economic Stimulus Act of 2008 or those determined under a formula prescribed by the Housing and Economic Recovery Act of 2008. For all areas, the resulting 2010 limits were the same as those in effect for 2009.

^d Loan limits for mortgages with credit approvals issued in 2009 were initially set under provisions of the Housing and Economic Recovery Act of 2008, which allowed for high-cost area limits of up to \$625,500. In February 2009, however, the American Recovery and Reinvestment Act of 2009 restored the \$729,750 maximum loan limit for mortgages with credit approvals issued in 2009.

² The Economic Stimulus Act of 2008 allowed the Federal Housing Administration to increase the single-family insurable limits to a maximum of \$729,750 for one-unit homes in the continental United States. Higher limits applied to two-, three-, and four-unit homes. Alaska, Hawaii, Guam, and the Virgin Islands have higher maximum limits. The limits applied to loans with credit approvals issued between July 1, 2007, and December 31, 2008.

Table 27. Weighted Repeat Sales House Price Index (Annual Data)^a

Source: Federal Housing Finance Agency

a Figures reported are four-quarter percentage price changes. Changes are calculated from fourth quarter of the prior year to fourth quarter of year denoted. Estimates use FHFA's "purchase-only" index for 1992 through the most recent period and the "all-transactions" index for prior years.

New England: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont

Mid-Atlantic: New Jersey, New York, Pennsylvania

South Atlantic: Washington, D.C., Delaware, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, West Virginia

East North Central: Illinois, Indiana, Michigan, Ohio, Wisconsin

West North Central: Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota

East South Central: Alabama, Kentucky, Mississippi, Tennessee

West South Central: Arkansas, Louisiana, Oklahoma, Texas

Mountain: Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, Wyoming

Pacific: Alaska, California, Hawaii, Oregon, Washington

Federal Housing Finance Agency
