## Dear Chairs and Ranking Members:

I am pleased to transmit the Federal Housing Finance Agency's (FHFA's) Report to Congress covering the activities of FHFA and its regulated entities in 2020. The Federal Housing Enterprises Financial Safety and Soundness Act of 1992 (Safety and Soundness Act), as amended by the Housing and Economic Recovery Act of 2008 (HERA), requires the Director to submit an annual report to Congress addressing several topics related to the fulfillment of FHFA's statutory responsibilities and the financial condition of the regulated entities: Fannie Mae and Freddie Mac (the Enterprises) and the Federal Home Loan Banks (FHLBanks). This report meets all such requirements applicable as of December 31, 2020.

2020 was a difficult year for our country. The outbreak of the COVID-19 pandemic upended the lives of millions of American homeowners and renters.

I am proud to report that FHFA rose to the historic challenges of COVID-19 while continuing to fulfill our Agency's long-term statutory responsibilities.

## COVID-19 Response

FHFA responded to COVID-19 swiftly and prudently, issuing its first policies before the national emergency declaration. As detailed in this report beginning on page 13, FHFA designed and executed a historic policy response that helped borrowers and renters stay safe in their homes while ensuring mortgage markets continued to function. These policies were developed through extraordinary efforts by Agency staff navigating the pandemic's disruptions of their own lives.

## Building a World-Class Regulator

While developing and executing its COVID-19 response, FHFA continued taking important steps to strengthen itself as a world-class prudential regulator for years to come. As a result, FHFA exited 2020 even stronger than we entered it.

In January 2020, FHFA realigned its internal organization to ensure each part of the Agency has the resources it needs to fulfill our mission. We established a new Division of Research and Statistics (DRS) to build on and strengthen the Agency's research and analysis capabilities. We organized the Division of Accounting and Financial Standards to elevate accounting expertise into an Agency-wide resource. We created the Office of Equal Opportunity and Fairness to consolidate and elevate FHFA's Equal Employment Opportunity, anti-harassment, and alternative dispute resolution functions.

FHFA updated its official mission, vision, values, and Strategic Plan through Agency-wide collaboration and employeedriven processes. I have been encouraged by the Agency's strongly positive response to these ongoing efforts to build ourselves up as a world-class prudential regulator.

In the 2020 Federal Employee Viewpoint Survey (FEVS), FHFA saw year-over-year increases of roughly 20 points across questions measuring respect for senior leadership, senior leadership generating high levels of motivation and commitment, and senior leadership maintaining high standards of integrity and honesty. Similar increases were recorded for questions around performance recognition and accountability. FHFA personnel also reported a 10 point increase, to 91 percent, in respondents affirming, "My agency is successful at accomplishing its mission."

FHFA's work continues as we strengthen our capacities and understanding around significant emerging issues, such as climate and natural disaster risk and appraisal modernization.

FHFA has recognized that our mortgage finance system may be exposed to climate and natural disaster risk. As a safety and soundness regulator, FHFA is actively working to ensure we are accounting for these risks in our prudential supervision of Fannie Mae, Freddie Mac, and the Federal Home Loan Banks.

FHFA has already developed a strong framework for our regulated entities to respond to the impacts of natural disasters on borrowers and renters. That work served as the foundation for many of the Agency's COVID relief policies. These successful disaster responses positioned FHFA to look forward.

We are now focused on strengthening our capabilities to identify and assess the current and future exposure of our regulated entities to climate and natural disaster risk. And we are exploring ways to potentially enhance our supervisory and regulatory approach. To help coordinate FHFA's many efforts on climate and natural disaster risk, last year we established an Agency-wide working group made up of representatives from every major office and division.

In January 2021, FHFA released a Request for Input on climate and natural disaster risk management at the regulated entities. The RFI requested information on a range of topics, including disproportionate impact on low-income and minority communities, closing important data, modeling and research gaps, and enhancing FHFA's supervision and regulation.

In November 2020, the Agency finalized a regulatory capital framework for Fannie Mae and Freddie Mac that recognizes that the risks that climate change could pose are difficult to quantify but potentially material. Loss-absorbing capital, particularly in the form of common equity, is the strongest protection for financial institutions against any negative shock, including those from natural disasters or abrupt repricing. FHFA's first priority is thus building capital at the Enterprises.

## Preparing to Responsibly End the Conservatorships

FHFA continued to take the steps necessary to prepare the Agency and the Enterprises to responsibly exit conservatorship as required by law.

FHFA's finalized regulatory capital framework for Fannie Mae and Freddie Mac sets out the capital standards the Enterprises must meet in order to pass the crucial safety and soundness threshold of being able to fulfill their mission through a downturn on the scale of the 2008 financial crisis.

In its historic activities-based review of the secondary mortgage market, the Financial Stability Oversight Council found that risk-based capital and leverage ratio requirements materially less than those in the proposed rule would likely not adequately mitigate the potential stability risk posed by the Enterprises.

FHFA worked with Treasury to allow the Enterprises to build up capital until they reach the level required under the rule. Treasury in turn requested a series of policy provisions in order to protect the taxpayers' investment in Fannie and Freddie. These agreements represent significant progress in strengthening the Enterprises and preparing them for a responsible exit from conservatorship. But more work is still needed.

Fannie and Freddie continue to lack the capital to survive a serious housing downturn. Newly allowed retained earnings allowed them to build a thin cushion that kept them from failing under the COVID shock. However, retained earnings alone are unlikely to build capital quickly enough for the Enterprises to survive the next downturn in the housing cycle.

FHFA is committed to continuing to work with Treasury to enable the Enterprises to raise enough private capital to protect the borrowers and renters who depend on a stable mortgage market from the consequences of the Enterprises failing in a downturn.

FHFA also continues to build its regulatory capabilities to fulfill the mission and responsibilities Congress has charged the Agency with. At the end of 2020, FHFA released proposed rules around resolution planning and liquidity standards. The resolution planning rule was finalized in May 2021.

After the capital rule, the finalization of the resolution planning rule is one of the last major regulatory pieces needed to give effect to Congress' intent in HERA. Just as with other large financial institutions, these plans will provide Fannie Mae, Freddie Mac and FHFA with a roadmap for preserving business continuity should they fail again. This rule helps create a stronger, more resilient housing finance system by protecting taxpayers and the mortgage market from harm if either Enterprise fails.

Only Congress has the power to enact legislative reforms necessary to address the structural flaws in the current housing finance system. To that end, in this report, I reiterate my recommendation that Congress authorize FHFA to examine third parties that do business with the regulated entities. The Enterprises' exposure to non-bank seller/servicers has grown significantly since 2008. Non-banks, which operate outside the federal prudential regulatory system, are expected to service most of the Enterprises' portfolios in 2021. A limited and tailored grant of examination authority should position FHFA to achieve its statutory mandate to ensure the safe and sound operations of the regulated entities as housing finance continues to evolve.

I encourage you to review all of the extraordinary accomplishments that FHFA achieved in 2020. We are committed to continuing to fulfill our mission of ensuring the regulated entities fulfill their own mission to serve as a reliable source of liquidity and funding for the housing finance market throughout the economic cycle.

Sincerely,

MARK A. CALABRIA
Director, Federal Housing Finance Agency

## History of the Federal Housing Finance Agency

Fannie Mae and Freddie Mac (the Enterprises) and the Federal Home Loan Banks (FHLBanks) - collectively, the regulated entities - operate in the secondary mortgage market where they facilitate funding and liquidity for financial institutions or other lenders making residential mortgages. Congress created the FHLBank System (in 1932), Fannie Mae (in 1938), and Freddie Mac (in 1970) as private companies through authorizing statutes that contain mission directives, product authorizations and limitations, and corporate powers, and that establish their relationships to federal regulation, which has been entrusted to the Federal Housing Finance Agency (FHFA) since 2008.

In 2008, Fannie Mae and Freddie Mac faced financial crises. In the second half of 2007, the Enterprises reported a combined net loss of $\$ 8.7$ billion. ${ }^{1}$ By June 2008, as mortgage default rates and foreclosures continued to increase across the country, the Enterprises' combined capital totaled just 1 percent of their mortgage credit risk exposure, raising concerns about their financial viability. ${ }^{2}$ Congress passed bipartisan legislation enhancing the ability of the federal government to take control of Fannie Mae and Freddie Mac with taxpayer support, and on July 30, 2008, President George W. Bush signed into law the Housing and Economic Recovery Act of 2008 (HERA), amending the Federal Housing Enterprises Financial Safety and Soundness Act of 1992 (Safety and Soundness Act).

In the Safety and Soundness Act as amended by HERA, Congress established FHFA to supervise, regulate, and oversee the housing missions of the Enterprises and the FHLBank System. ${ }^{3}$ The creation of FHFA blended several former government entities: the Office of Federal Housing Enterprise Oversight (OFHEO), which previously regulated the Enterprises; the Federal Housing Finance Board, which previously regulated
the FHLBanks; and legal and regulatory staff from the Department of Housing and Urban Development that previously oversaw Enterprise compliance with their statutory missions and certain affordable housing goals. Congress also created a framework for the Department of the Treasury (Treasury) to provide emergency financial support to the Enterprises. Through the Senior Preferred Stock Purchase Agreements (PSPAs) and their subsequent amendments, Fannie Mae and Freddie Mac each were provided access to over \$200 billion of Treasury support. To date, the Enterprises together have received $\$ 191.5$ billion in taxpayerfunded draws under the PSPAs.

In addition to regulatory and supervisory authorities, Congress granted the director of FHFA the discretionary authority to appoint the Agency as conservator (which OFHEO possessed) or receiver of the regulated entities upon determining that any of these entities were in an unsafe or unsound condition or met other criteria. On September 6, 2008, the director of FHFA exercised this authority and placed Fannie Mae and Freddie Mac into conservatorships. Nearly 13 years later, both Enterprises remain in conservatorships.

Congress created FHFA to "be an independent agency of the Federal Government." ${ }^{4}$ FHFA's authorities related to safety and soundness supervision are modeled on those available to the nation's federal financial regulatory agencies, including the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation (FDIC), the Board of Governors of the Federal Reserve System, and the National Credit Union Administration. FHFA's authorities as conservator and receiver are modeled on those available to the FDIC.

[^0]
## Core Statutory Authorities and Duties

The Safety and Soundness Act provides that FHFA's director "shall have general regulatory authority over each regulated entity and the Office of Finance, and shall exercise such general regulatory authority . . . to ensure that the purposes of this Act, the authorizing statutes, and any other applicable law are carried out." ${ }^{5}$ Thus, the statute vests FHFA with the authorities, similar to those of other prudential financial regulators, to maintain the financial health of the regulated entities. FHFA is responsible for supervising the business and operations of the regulated entities to ensure that they are safe and sound and aligned with the missions set forth in their authorizing statutes. FHFA exercises these regulatory and supervisory authorities by issuing rules, policy guidance documents, and regulatory orders.

The Safety and Soundness Act requires FHFA to fulfill "two principal duties":
A. to oversee the prudential operations of each regulated entity; and
B. to ensure that-
i. each regulated entity operates in a safe and sound manner, including maintenance of adequate capital and internal controls;
ii. the operations and activities of each regulated entity foster liquid, efficient, competitive, and resilient national housing finance markets (including activities relating to mortgages on housing for low- and moderate-income families involving a reasonable economic return that maybe less than the return earned on other activities);
iii. each regulated entity complies with this chapter and the rules, regulations, guidelines, and orders issued under this chapter and the authorizing statutes;
iv. each regulated entity carries out its statutory mission only through activities that are authorized under and consistent with this chapter and the authorizing statues; and
v. the activities of each regulated entity and the manner in which such regulated entity is operated are consistent with the public interest. ${ }^{6}$

To carry out its duties related to prudential oversight and safety and soundness, FHFA establishes or implements standards for the regulated entities and examines them both on-site and through required reporting - to assess their financial condition and compliance with statutory and regulatory requirements. Based on its assessments, FHFA may require corrective actions, take enforcement actions, and, if certain criteria are met, place a regulated entity into conservatorship or receivership.

## Supervision and Examination: Safety and Soundness and Risk Management

Under the Safety and Soundness Act, FHFA is required to conduct annual on-site examinations of the Enterprises and the FHLBanks "to determine the condition of the regulated entity for purposes of ensuring its financial safety and soundness" and may conduct an examination whenever the director determines it to be necessary or appropriate. ${ }^{7}$ Under COVID-19, all examination activities have been conducted through FHFA's telework flexibilities as the Enterprises closed their headquarters and operated remotely.

For each regulated entity, FHFA prepares an annual Report of Examination (ROE) that assigns examination ratings and identifies weaknesses, deficiencies, and violations of rule or regulation. The 2020 ROEs were delivered to the directors and management of the Enterprises in March 2021 and to the FHLBanks periodically throughout the year based on FHFA's examination schedule. ${ }^{8}$

[^1]For each regulated entity, FHFA uses a risk-based approach to identify existing and emerging risks, evaluate the effectiveness of risk management systems and controls, and assess compliance with applicable laws and regulations. FHFA assesses the remediation of Matters Requiring Attention (MRA) previously identified by FHFA examiners and whether and to what extent the board of directors and management of each regulated entity have responded to deficiencies and weaknesses identified by internal audit departments and external auditors.

FHFA's supervisory activities also include ongoing monitoring. FHFA conducts continuous monitoring of Enterprise activities to identify significant matters that may affect an Enterprise's risk profile or financial condition, and targeted examinations that typically focus on a discrete business or functional area, program, product, model, process, or internal controls.

FHFA also conducts examinations and ongoing monitoring of the FHLBanks and the Office of Finance (OF). These examinations cover several areas and are risk focused and tailored to each institution's risk profile. The FHLBanks are also monitored on an ongoing basis, which supports examination activity and helps identify emerging risks between annual examinations.

FHFA uses the Capital, Asset quality, Management, Earnings, Liquidity, Sensitivity to market risk, and Operational risk (CAMELSO) rating system to report its safety and soundness examination findings and supervisory views. ${ }^{9}$ Each regulated entity receives a composite rating on its overall condition and individual ratings for each of the framework's seven components, which are related to the regulated entity's financial condition and risk management. ${ }^{10}$

## Conservatorship and Receivership Statutory Authorities and Duties

FHFA's authority as both conservator and regulator of the Enterprises is based upon statutory mandates, which include the following conservatorship authorities granted by HERA:
(D) ...take such action as may be-
i. necessary to put the regulated entity in a sound and solvent condition; and
ii. appropriate to carry on the business of the regulated entity and preserve and conserve the assets and property of the regulated entity. ${ }^{11}$

Continuing the business of the Enterprises in conservatorships also incorporates the above-referenced responsibilities that are enumerated in 12 U.S.C. $\mathbb{\$}$ 4513(a)(1).

Additionally, under the Emergency Economic Stabilization Act of 2008, FHFA has a statutory responsibility in its capacity as conservator to "implement a plan that seeks to maximize assistance for homeowners and use its authority to encourage the servicers of the underlying mortgages, and considering net present value to the taxpayer, to take advantage of... available programs to minimize foreclosures." ${ }^{12}$

HERA granted FHFA receivership authorities and duties as well. FHFA can initiate a receivership for any of the same 12 discretionary reasons a conservatorship can be initiated. FHFA is required to place an Enterprise into receivership if
i. the assets of the regulated entity are, and during the preceding 60 calendar days have been, less than the obligations of the regulated entity to its creditors and others; or

[^2]ii. the regulated entity is not, and during the preceding 60 calendar days has not been, generally paying the debts of the regulated entity (other than debts that are the subject of a bona fide dispute) as such debts become due. ${ }^{13}$

As receiver, FHFA shall place the regulated entity into liquidation and proceed to realize upon the assets of the regulated entity as FHFA deems appropriate. FHFA shall organize and operate a successor enterprise pursuant to the provisions of the Safety and Soundness act as amended by HERA.

## Background on the Regulated Entities

The Enterprises are not government agencies; rather they are private, shareholder-owned corporations and their common stock is traded in securities markets. The Enterprises were created by Congress to provide stability in the secondary housing finance market and promote access to mortgage credit throughout the United States by increasing the liquidity of mortgage investments and improving the distribution of investment capital available for residential mortgage financing. ${ }^{14}$

In the primary mortgage market, lenders loan money to borrowers to finance the purchase of a single-family home or a multifamily property (a residential building with five or more units). Mortgage servicers, sometimes the same entity as the lender, collect monthly mortgage payments from borrowers and manage the loans. The Enterprises transform bundles of single-family mortgages into collateral for financial instruments called mortgage-backed securities (MBS), and sell to investors a portion of the cash flows that come, via the servicers, from the loans underlying the MBS. The Enterprises guarantee the principal and interest payments to investors on behalf of mortgage borrowers and charge lenders a guarantee fee for taking on the credit risk associated with the purchased mortgages. The Enterprises also purchase multifamily mortgages.

[^3]The Federal Home Loan Bank Act of 1932 (Bank Act) established the FHLBank System. The current system includes 11 district FHLBanks, each serving a designated geographic area of the United States, and OF, which issues consolidated obligations to fund the FHLBank operations. Each FHLBank is a private, member-owned cooperative that provides a reliable source of liquidity to member financial institutions by making loans, known as advances, to member institutions and housing associates. The FHLBanks secure these advances with eligible collateral, which consists primarily of single-family mortgages, multifamily mortgages, government and agency securities, and commercial real estate loans.

## Values and Organization of the Federal Housing Finance Agency

In 2020, FHFA updated the Agency's official values through an employee-driven process. FHFA's culture is built on a foundation of promoting diversity and inclusion in our internal practices and those of our regulated entities. As such, we expect all FHFA employees to emulate four core values. Fairness: We value varied perspectives and thoughts and treat others with impartiality. Accountability: We are responsible for carrying out our work with transparency and professional excellence. Integrity: We are committed to the highest ethical and professional standards to inspire trust and confidence in our work. Respect: We treat others with dignity, share information and resources, and collaborate.

FHFA's workforce includes highly skilled examiners, economists, financial and policy analysts, attorneys, and subject matter experts in banking, housing, insurance, technology, accounting, and the law. The director sets the course for the Agency, which is organized into divisions and offices.

In January 2020, FHFA realigned its structure to strengthen the Agency's regulatory capabilities and prepare both the Agency and the Enterprises to responsibly exit and operate safely outside of conservatorship. Below is a summary of FHFA's principal organizational units and the key changes implemented in January 2020, including the creation of two new divisions and one new office.

The Office of the Director provides overall leadership and strategic direction for the Agency. The Office of Congressional Affairs and Communications resides in the Office of the Director and is responsible for all external and internal communications.

The Office of the Chief Operating Officer oversees FHFA's day-to-day support operations, including financial planning and budgeting, human resource management, information technology, facilities management, continuity of operations, contracting, quality assurance, program management, and audit follow-up functions. The office leads FHFA's efforts related to strategic planning and performance management and reporting.

The Division of Enterprise Regulation (DER) supervises the Enterprises and evaluates the safety and soundness of their financial condition and operations. World-class supervision of the Enterprises is critical to fulfilling the Agency's mission of fostering competitive, liquid, efficient, and resilient (CLEAR) national housing finance markets, and to preparing the Enterprises to responsibly exit the conservatorships. Using a risk-based supervisory approach, DER examiners conduct oversight through targeted examinations, ongoing monitoring and analysis activities, and issuing supervisory guidance to the Enterprises. DER prepares annual ROEs, which communicate DER's supervisory assessments of the Enterprises. The ROE assigns composite and component ratings in accordance with FHFA's supervisory rating system and communicates the principal examination conclusions and findings for the supervisory cycle. The division also provides support and advice to the Agency on supervisory issues, development of FHFA policy, and internal FHFA management activities.

## The Division of Federal Home Loan Bank

Regulation (DBR) supervises the FHLBanks and OF to ensure their safe and sound operation. DBR oversees and directs FHLBank examination activities, develops examination findings, and prepares ROEs. DBR monitors and assesses the financial condition and performance of the FHLBanks and OF and tests their compliance with laws and regulations through annual examinations, periodic visits, and off-site monitoring and analysis. The division establishes supervisory policy and regulation for the FHLBanks and conducts FHLBank-focused assessments. DBR also conducts Affordable Housing Program (AHP) examinations of each FHLBank annually to assess compliance with program regulations and policies and to evaluate the effectiveness of each FHLBank's AHP.

## The Division of Housing Mission and Goals

(DHMG) develops and oversees FHFA's housing and regulatory policy and the mission of the Enterprises and the FHLBanks. DHMG develops regulations for and oversees implementation of affordable housing goals and duty to serve requirements by the Enterprises, as well as affordable housing goals and the Affordable Housing Programs, Community Investment Programs, Community Investment Cash Advances programs, and Community Support Programs, of the 11 FHLBanks.

DHMG also monitors the Enterprises and FHLBanks for fair lending risk and conducts fair lending risk assessments and compliance reviews on the policies, programs, and activities of the regulated entities. In January 2020, DHMG created an Office of Multifamily Analytics and Policy to focus on policy development and analysis related to multifamily markets and realigned its Office of Housing and Regulatory Policy to be dedicated to single-family housing finance activities. DHMG coordinates FHFA activities related to policy development and analysis affecting housing finance and financial markets, and in support of FHFA's mission and the director's responsibilities as a member of the Federal Housing Finance Oversight Board, the Financial Stability Oversight Board, and the Financial Stability Oversight Council.

The Division of Conservatorship (DOC) was renamed the Division of Resolutions (DOR) in January 2020 to reflect its primary and long-run function and to align FHFA with other safety and soundness regulators. The division assists the director, as conservator, in carrying out conservatorship obligations and preparing the Enterprises to responsibly exit conservatorship. DOR work will continue this work begun by DOC, which involves facilitating communication between the Enterprises and FHFA as conservator to ensure that emerging issues are identified and resolved in a prompt and timely manner. It also involves working with the Enterprises' boards of directors and senior management to accomplish the goals of the conservatorships. DOR also oversees FHFA's receivership and resolution responsibilities, such as developing living wills and other contingency plans that will enable the Agency to resolve in a safe, sound, and timely manner issues related to financial stress, instability, and insolvency at the regulated entities.

## The Office of Minority and Women Inclusion

(OMWI) leads FHFA's efforts to advance diversity and inclusion (D\&I) in all business and activities of the Agency, including among its workforce, at all levels, and supervises and examines the regulated entities' D\&I programs. OMWI is responsible for increasing the participation of minority-, women-, and disabledowned businesses in FHFA programs and contracts. This includes establishing and upholding standards for coordinating technical assistance to such businesses and evaluating the good faith efforts of FHFA contractors to promote diversity and ensure inclusion in their own workforce. OMWI's D\&I Examinations branch conducts examinations of the Enterprises and FHLBank System to assess the D\&I policies and practices of the regulated entities, issue supervisory guidance and communicate examination findings such as MRAs, violations, and recommendations, to ensure their compliance with D\&I laws and regulations and adherence to D\&I policies, strategic goals and objectives, and best practices.

The Office of General Counsel (OGC) supports the policy initiatives of the director within the framework of the statutes that the Agency is charged with administering and other applicable laws. OGC lawyers advise and support the director, executives, and FHFA staff on legal matters related to the functions, activities, and operations of FHFA and its regulated entities. The office provides support for regulations, enforcement actions, and supervision, conservatorship, and policy functions; brings and defends litigation; supports compliance with laws and regulations applicable to federal agencies; analyzes pending legislation and advises the director and Agency staff; and coordinates legal matters with other government agencies.

## The Division of Accounting and Financial Standards

(DAFS) was created in January 2020 to elevate the cross-agency roles of FHFA's Office of the Chief Accountant and Office of the Ombudsman. DAFS enables FHFA's accounting expertise to inform and support all Agency divisions and offices, identify financial institution trends and best practices, engage with external standard-setters, and provide guidance on fraud and related risks. It also assists with Federal Housing Finance Oversight Board responsibilities. The Office of the Ombudsman considers and helps resolve complaints and appeals from any regulated entity, OF, or any person who has a business relationship with a regulated entity or OF, concerning any matter relating to FHFA's regulation and supervision. Neither FHFA nor any of its employees may retaliate against a regulated entity, OF, or a person for submitting a complaint or an appeal to the Office of the Ombudsman.

The Division of Research and Statistics (DRS), created in January 2020, builds on and strengthens FHFA's economic research and data analytics functions, which are core competencies of effective regulators. DRS serves as a research, data, and statistical analysis center to support FHFA's divisions and offices engaged in oversight, supervision, rulemaking, and policy development. It examines trends and risks in housing
finance markets, advances modeling capabilities, develops and maintains data, and evaluates policy impacts. DRS also engages with research communities across the government, private, and philanthropic sectors.

## The Office of Equal Opportunity and Fairness (OEOF),

 created in January 2020, houses FHFA's Equal Employment Opportunity (EEO), anti-harassment, and alternative dispute resolution (ADR) functions, creating a specialized service center for employees dealing with harassment, bullying, discrimination, or retaliation in the workplace. In addition to complaint processing, compliance reporting, harassment prevention, and ADR, OEOF provides training, guidance, and analysis to foster a model EEO workplace free from discrimination and harassment.The Office of Inspector General (OIG) conducts independent audits, evaluations, and investigations to help FHFA achieve its mission and goals and guard against waste, fraud, and abuse. OIG informs the director, Congress, and the public of any problems or deficiencies relating to programs and operations. OIG activities assist FHFA staff and program participants by ensuring the effectiveness, efficiency, and integrity of FHFA's programs and operations.

## LEGISLATIVE RECOMMENDATIONS

In This Chapter
Chartering Authority ..... 9
Service Provider Examination ..... 10
Regulatory Capital ..... 10
Fostering Competitive National
Housing Finance Markets ..... 11

As detailed in this annual report, FHFA made progress in 2020 to ensure that each regulated entity operates in a safe and sound manner and that the operations and activities of each regulated entity foster liquid, efficient, competitive, and resilient national housing finance markets over the economic cycle, in particular during periods of financial stress. Notably, Fannie Mae and Freddie Mac (the Enterprises) reduced their combined leverage ratio from nearly 1,000 to 1 at the beginning of 2019 to approximately 160 to 1 by the end of 2020 . FHFA finalized a new regulatory capital framework for the Enterprises and continues to develop a roadmap, with clear and appropriate milestones, to responsibly end the conservatorships.

Notwithstanding FHFA's administrative actions, the nation's housing finance system remains in urgent need of comprehensive reform. Only Congress can address the structural flaws in the housing finance system that were at the root of the 2008 financial crisis and that continue to pose risk to taxpayers and financial stability. Reform remains overdue, and Congress should advance legislation to enhance the safety and soundness of the regulated entities and move our country toward a stronger and more resilient housing finance system.

To that end, FHFA needs to be strengthened with additional regulatory and supervisory authorities to prepare for an eventual post-conservatorship environment and to solidify itself, consistent with congressional intent, as a world-class regulator. To ensure the Enterprises are well-regulated and well-capitalized outside of conservatorship, FHFA's authorities should be on par with those of other independent federal financial regulators. Specifically, and pursuant to the statutory requirements related to this annual report, FHFA recommends that Congress consider the following legislative reforms.

## Chartering Authority

FHFA reiterates its recommendation that Congress provide FHFA with chartering authority, similar to that of other federal financial regulators such as the Office of the Comptroller of the Currency. Such authority would enable FHFA to charter competitors to the Enterprises. In the lead up to the financial crisis, the duopoly market structure, together with the Enterprises' congressional charters, size, and systemic importance, created a perception that the Enterprises were "too big to fail." Relying on that perception, each Enterprise was able to borrow at interest rates close to that of the debt of the federal government while maintaining unsafe and unsound levels of leverage. That and other regulatory advantages over private-sector competition fueled the Enterprises' rapid growth, while the Enterprises' leverage shifted risk to taxpayers, created moral hazard, and incentivized excessive risk taking.

Moving beyond the duopoly market structure is critical to ending taxpayer bailouts of "too big to fail" institutions. Chartering competitors would reduce the systemic importance of each Enterprise. That in turn would enhance FHFA's capacity to resolve an insolvent Enterprise, mitigate moral hazard, increase market discipline, and protect taxpayers against future bailouts. Newly chartered competitors also would increase efficiency and innovation within the national housing finance markets, driving down costs for borrowers and leading to new products and advances in underwriting.

To foster a level playing field, the congressional grant of chartering authority should permit FHFA to recharter each Enterprise on the same charter that would be available to newly chartered competitors. That generally available charter should continue to require the re-chartered Enterprises and their competitors to support equitable access to the secondary market. To enhance safety and soundness regulation, FHFA should, like the federal banking regulators, have the authority to revoke an FHFA-granted charter in the event of ongoing mismanagement or other limited circumstances that threaten safety and soundness.

## Service Provider Examination

The regulated entities rely on third-party service providers for a wide range of services, some of which are critical to their operations. These third-party relationships can pose risks related to information security, business continuity, and other safety and soundness issues. The Enterprises, for example, rely on non-bank servicers to collect payments from borrowers, advance some payments to investors in mortgagebacked securities, and perform loss mitigation on non-performing loans. FHFA expects each regulated entity to implement a program to manage these third-party risks. However, FHFA does not have the statutory authority to examine a regulated entity's service providers. As a result, FHFA must rely on provisions in the regulated entities' third-party contracts to obtain access to information about service providers that is necessary to fulfill FHFA's statutory safety and soundness responsibilities.

The Financial Stability Oversight Council and the Government Accountability Office each recommended that Congress authorize FHFA to examine third parties that do business with the regulated entities, and FHFA continues to concur with those recommendations. Specifically, FHFA recommends that Congress authorize FHFA to examine the records, operations, and facilities of each material service provider to a regulated entity for the limited purpose of identifying practices that could pose a safety and soundness risk to the regulated entity. A limited and tailored grant of examination authority should position FHFA to achieve its statutory mandate to ensure the safe and sound operations of the regulated entities.

## Regulatory Capital

In 2008, Congress amended FHFA's authorizing statute to give FHFA relatively broad authority to prescribe regulatory capital requirements for the Enterprises. The 2008 amendments, however, did not remove some of the outdated definitions of regulatory capital from the original authorizing statute. Unlike the U.S. banking framework, these statutory definitions do not expressly authorize FHFA to provide by regulation for deductions or other adjustments for deferred tax assets (DTAs) and other capital elements that tend to have less lossabsorbing capacity during a period of financial stress.

The shortcomings in the statutory definitions of capital could pose safety and soundness risks. During the financial crisis, market confidence in the Enterprises collapsed in mid-2008 even when Fannie Mae and Freddie Mac had total capital, as defined by statute, of $\$ 55.6$ billion and $\$ 42.9$ billion, respectively. Questions about the Enterprises' solvency likely arose in part due to their sizeable DTAs, which had less loss-absorbing capacity during a period of negative income but still counted toward regulatory capital. In fact, after deducting its DTAs, Freddie Mac would have had a negative net worth as of June 30, 2008.

FHFA's regulatory capital framework for the Enterprises, as set forth in FHFA's adopted final rule, mitigates the risk posed by the existing statutory definitions of capital by prescribing supplemental capital requirements based on definitions of regulatory capital used by the federal banking regulators. While these supplemental requirements should ensure that each Enterprise maintains adequate high-quality regulatory capital, the supplemental requirements introduce some added complexity to an already complex framework. If Congress gave FHFA the same flexibility as the federal banking regulators by amending or removing the statutory capital definitions, FHFA could simplify the capital rule.

## Fostering Competitive National Housing Finance Markets

Prior to their rapid growth in the 1980s and 1990s, the Enterprises' market share was historically much smaller than it is today. The Enterprises' footprint further increased during the 2008 financial crisis, as might have been expected. However, the Enterprises' role has not scaled back since, notwithstanding the more than 10 years of post-crisis economic expansion. This has left the housing finance system at risk of an even larger and more unprecedented role for the Enterprises in the event of another serious downturn.

As described in the Housing Reform Plan released by the Department of the Treasury in September 2019, FHFA agrees that a driver of the Enterprises' growth has been a regulatory framework that has become biased in favor of Enterprise-supported mortgage lending. FHFA's regulatory capital framework is an important step toward reducing the gap between the credit risk capital requirements of banking organizations and those that apply to the Enterprises with respect to similar mortgage exposures. FHFA will continue to support the efforts of the Consumer Financial Protection Bureau and other federal financial regulators to ensure that the special regulatory advantages afforded the Enterprises do not create opportunities for regulatory arbitrage or otherwise confer undue competitive advantages on the Enterprises. A congressional grant of chartering authority would significantly reduce any competitive advantage arising out of the perception that the Enterprises are "too big to fail." To further level the playing field with private-sector sources of capital, Congress should also consider other legislative reforms to remove unnecessary statutory exemptions and other special treatments afforded the Enterprises.

FHFA continues to stand ready to assist Congress in furthering these legislative recommendations. In the meantime, FHFA will work within its existing statutory authorities to address vulnerabilities in the housing finance system where possible.

## CONSERVATORSHIPS OF THE ENTERPRISES

In This Chapter
The State of the Market Leading Up to the COVID-19 Crisis ..... 13
Federal Housing Finance Agency and Enterprise 2020 Conservatorship Activities ..... 17
Enterprise Leadership and Compensation ..... 21

Since 2008, FHFA has served as conservator of Fannie Mae and Freddie Mac. These are the longest financial institution conservatorships in American history, as the longest bank conservatorship lasted 18 months.

FHFA entered 2020 with a renewed commitment to fulfilling its statutory obligation to restore the Enterprises to safe and sound condition and responsibly end the conservatorships. Despite the historic disruptions that the COVID-19 national emergency imposed on the housing market and the broader economy, FHFA continued making significant progress on its core goals for the conservatorships, as discussed in the second half of this chapter, while managing the conservatorships to protect American families and support the functioning of the mortgage markets.

## The State of the Market Leading Up to the COVID-19 Crisis

At the start of 2020, the American housing market was in a strong position. A low interest rate environment and stable labor markets drove robust demand and price appreciation. Home price growth in the first quarter of 2020 outpaced annual growth from the same period a year before as falling interest rates and shrinking inventories for sale led prices higher just prior to the COVID-19 crisis. Nationwide, house prices increased 1.7 percent in the first quarter of 2020, a 5.7 percent increase from the first quarter of 2019. FHFA's seasonally adjusted monthly index for March was up 0.1 percent from February.

Since early 2019, existing home sales had been on a steady upward trajectory after declining throughout 2018 due to rising rates. The National Association of Realtors' months' supply of existing homes for sale in February 2020 reached its lowest level since the series started in 1999, driving home prices upward at a faster rate in the first quarter. Single-family housing starts in February 2020 reached the highest three-month rate since November 2006, on a seasonally adjusted basis, after more than 10 years of slow, steady increases.

In response to COVID-19, financial markets endured a severe dislocation in March. Uncertainty over the public health and the economic impacts of the pandemic constrained financial liquidity, significantly disrupting the financing, lending, and hedging activities of mortgage lenders and many other market participants. Spreads between the 30 -year fixed mortgage rate and the 10 -year Treasury yield widened. Treasuries experienced rising yields as a market-wide demand for cash led investors to sell off their most liquid assets in response to redemption demands.

## FHFA's Policy Response: Supporting Borrowers and Renters

From the beginning of the crisis, FHFA's conservatorship, policy, and research teams worked together to produce forecasts and estimates of the future impact of COVID-19 on the mortgage market based on key indicators such as unemployment insurance claims and house prices. They also developed models to support decision making regarding loan modifications, servicing, and other issues. This internal research, monitoring, and analysis informed and guided FHFA's policy actions.

One of FHFA's top priorities was to support renters and homeowners struggling to pay for housing because of COVID-19. To do this, FHFA directed the Enterprises to put in place certain protections. The Enterprises own or guarantee approximately half the American residential mortgage market. That includes about 43 percent of multifamily units, about 8.6 million households, and more than half of single-family mortgages. FHFA's policies apply to all single-family homeowners and multifamily property owners with an Enterprise-backed mortgage. FHFA's policies also help to set workable standards for the entire market.

To protect borrowers facing delinquency and foreclosure during the COVID-19 pandemic, FHFA suspended all single-family foreclosures and foreclosuredriven evictions through the end of 2020. This policy protected more than 28 million homeowners and enabled roughly 200,000 families already facing foreclosure pre-COVID to stay in their homes.

FHFA also allowed borrowers affected by COVID-19 to take a timeout from mortgage payments through forbearance for up to 12 months. The Enterprises refined existing loss mitigation products and introduced Payment Deferral, ensuring borrowers had access to meaningful home retention solutions and could remain safely in their homes.

Through Payment Deferral, FHFA allowed borrowers in forbearance who return to making monthly payments to repay what they missed when they sell their home or refinance their loan. Payment Deferral simplified options for borrowers and provided an additional tool for mortgage servicers.

From the beginning of the pandemic, FHFA emphasized that those who could make their mortgage payments should continue doing so. FHFA directed the Enterprises to extend refinancing eligibility to borrowers who remained current while on forbearance, a new phenomenon during COVID-19, as well as borrowers on forbearance who reinstate or perform by making three timely payments.

FHFA's policies were built on the lessons learned from the failures of the 2008 financial crisis, focusing particularly on improving the process for borrowers and renters in need of assistance. As a result, borrowers during COVID-19 did not have to navigate excessive and often confusing rounds of paperwork with their servicers, such as those that resulted from the Home Affordable Modification Program (HAMP) during the post-housing crash foreclosure crisis.

FHFA also took action specifically to protect renters struggling to pay rent because of COVID-19. The Enterprises have a contractual relationship with multifamily property owners or landlords, not a property's tenants. Therefore, if a multifamily loan is performing and the property owner does not seek forbearance, the Enterprises cannot impose requirements on the landlords.

On March 23, FHFA announced the Enterprises' policies providing a forbearance option for multifamily property owners with an Enterprise-backed mortgage. Importantly, these policies prohibit tenants from being evicted for the nonpayment of rent during a property owner's forbearance period. In late June, FHFA
allowed multifamily property owners in forbearance to extend for an additional three months on the condition that they adopt stronger renter protections. And in August, FHFA announced that multifamily landlords with new or modified forbearance must notify tenants of their rights under the forbearance agreement.

While the single-family forbearance program was modeled on prior disaster response efforts, the nationwide multifamily forbearance programs with tenant protections were developed from the ground up. After putting these programs in place, FHFA directed the Enterprises to create online lookup tools that allow renters to determine whether an Enterprise owns or guarantees the mortgage on the property where they live and therefore whether they are eligible for eviction protection or forbearance.

FHFA also helped clarify consumers' options. The Agency directed the Enterprises to update the scripts that servicers use when talking to borrowers about forbearance with a common script to help ensure all borrowers received consistent and accurate information. Those scripts and the associated forbearance application were translated into the top five languages of borrowers with Limited English Proficiency: Spanish, Chinese, Vietnamese, Korean, and Tagalog. FHFA emphasized to servicers and the public that no lump sum repayment is required at the end of forbearance. FHFA partnered with the Consumer Financial Protection Bureau (CFPB) to launch the Borrower Protection Program, which allowed FHFA to leverage CFPB's consumer complaint database to identify problematic servicing practices. And FHFA helped develop a website that consolidates federal information about mortgage relief options, renter protections, and how to avoid scams.

To help ensure that borrowers qualify for mortgages they can afford, FHFA is sharing with the CFPB aggregated data on loans that enter forbearance before delivery to the Enterprises. This will allow FHFA to fulfill its obligation under the Qualified Mortgage (QM) Patch to ensure that loans sold to the Enterprises are complying with the intent of Dodd-Frank's ability to repay provisions.

Early in the crisis, there were a wide variety of predictions about the future effects of COVID-19 on housing markets. Given the unprecedented nature of
the pandemic and the high degree of uncertainty about the economic impact, FHFA carefully monitored the data generated internally and the data received from the Enterprises and market participants. This ensured FHFA developed and updated our policies in response to the facts on the ground.

After rising precipitously in April, the rate of forbearance uptake slowed during the last few weeks of May and then began to consistently decline week over week. According to data released by the Mortgage Bankers Association, as of May 24, 6.4 percent of total Enterprisebacked mortgages were in forbearance, compared to 11.8 percent of mortgages backed by Ginnie Mae. By the end of December, the Enterprise single-family mortgage forbearance rate had fallen to 3.2 percent, compared to 7.9 percent of Ginnie Mae loans. FHFA's internal analysis shows that renters in approximately 170,000 units of multifamily housing have been eligible for eviction protection because they live in properties receiving forbearance from Fannie Mae or Freddie Mac. This represented about 1.9 percent of outstanding multifamily mortgage balances at the Enterprises.

## FHFA's Policy Response:

 Ensuring the Proper Functioning of the Mortgage MarketFHFA has also taken several steps to ensure the mortgage market continues to function properly both during and after this crisis.

To ensure the safety of market participants, FHFA authorized several loan-closing, employmentverification, and appraisal flexibilities. The changes include allowing desktop and exterioronly appraisals, providing alternative methods to demonstrate construction completion and satisfy borrower documentation requirements, allowing renovation disbursements, and expanding the use of power of attorney, appraisal waivers, and remote online notarization.

In April, FHFA recognized that non-bank servicers needed clarity to serve the market through the crisis. In response, FHFA instituted a four-month limit on servicers' obligations to advance principal and interest payments on loans in forbearance. With respect to
mortgage loans in MBS, prior to COVID-19, Fannie Mae servicers with a scheduled payment remittance had been responsible for advancing the principal and interest payment regardless of borrower payments. Freddie Mac servicers, who are generally responsible for advancing scheduled interest, are only obligated to advance four months of missed borrower interest payments. FHFA's policy established a four-month advance obligation limit for Fannie Mae scheduled servicing, which is consistent with the current policy at Freddie Mac.

To keep the mortgage market working for current and future borrowers, and to help originators continue lending, FHFA also enabled the Enterprises for a limited period of time to purchase certain single-family mortgages in forbearance that otherwise met their criteria.

## Assessing FHFA's Policy Response

FHFA's response to COVID-19 has significantly helped borrowers, renters, and the housing market deal with this crisis.

Following some contraction in mortgage market activity in March and April, the purchase market rebounded in a strong V-shaped recovery through June before settling down for the rest of the year. By the end of December, purchase mortgage applications had increased by 25 percent year-over-year. Existing home sales (EHS) during the last quarter of 2020 reached their highest level since December of 2006, averaging at 6.7 million, according to the National Association of Realtors. Housing starts showed a strong recovery, returning to pre-COVID levels.

House prices were supported by this rebound in market activity in the second half of the year. House prices rose by 1.2 percent in December, which was the 7th consecutive month of over 1 percent growth. Nationwide, house prices increased 3.9 percent in the fourth quarter of 2020, a 10.9 percent increase from the fourth quarter of 2019 and the largest year-overyear gain on record.

Based on the Enterprises' acquisitions of purchase mortgages in 2019 and 2020, loan risk factors such as average credit scores, debt-to-income (DTI), and loan-to-value (LTV) ratios have changed only slightly in 2020 compared to 2019. Refinance acquisitions in 2020 had higher credit scores, lower DTIs and lower LTVs. The Enterprises, at the direction of FHFA, continue to take measured and responsible steps to maintain a prudent risk profile and address layered risks.

## Cost of COVID-19 Response

FHFA's response to this pandemic helped homeowners, renters, and the housing market deal with the COVID-19 national emergency. But those policies have also had significant costs.

Conservative estimates initially priced COVID-19 related costs for the Enterprises at roughly $\$ 6$ billion. As reported on the Enterprises' 10-Q disclosure forms, $\$ 4$ billion was from expected loan losses due to projected forbearance defaults. The expected losses associated with the foreclosure moratorium amounted to at least $\$ 1$ billion. Other forbearance-related expenses and fees, such as the $\$ 500$ fee the Enterprises pay to servicers for loss mitigation, accounted for another $\$ 1$ billion. The Congressional Budget Office (CBO) projected the Enterprises' annual earnings in 2020 to be reduced by $\$ 10$ billion as a result of the coronavirus pandemic. ${ }^{15}$

To cover these projected losses, on December 1, the Enterprises began adding an adverse market fee of 0.5 percent when purchasing select refinance mortgages. The fee applies to refinance mortgages and does not impact new purchase mortgages, including first-time homebuyers - a key element FHFA required of the Enterprises. Additionally, the fee was expected to have minimal impact on low-income borrowers, as nearly 95 percent of recent refinance acquisitions had credit scores at or above 700 and nearly 80 percent had loan-to-value ratios at or below 80 percent.

FHFA tailored the fee to ensure low-income borrowers could continue accessing record-low rates to reduce their monthly mortgage payments. Exempt from the fee are borrowers with loan balances of $\$ 125,000$ or less, nearly half of whom are at or below 80 percent of area median income (AMI). Also exempt are affordable refinance products, Home Ready and Home Possible.

The losses this fee covers are the result of policies that have helped millions of Americans stay safe in their homes during a global pandemic. The Enterprises' congressional charters require that expenses must be recovered via income. The fee increase was originally scheduled to go into effect September 1. After listening to feedback, FHFA delayed implementation until December 1.

Delaying this fee helped provide certainty to the market and borrowers; however, the total amount raised through the fee is unlikely to cover the cost of Enterprise assistance to borrowers and renters during the pandemic. Low mortgage rates had already significantly elevated the rate of Enterprise refinance acquisitions, and delaying the fee reduced the number of transactions the cost could be spread over.

The experience of the COVID-19 pandemic underscores the fragile financial condition of the Enterprises. They were able to initially fund COVID-19 policies from their balance sheets in significant part because of risk reductions and capital increases achieved in the second half of 2019, just months before the pandemic began. Had their positions been any weaker, they could have been at imminent risk of failure.

[^4]
## Federal Housing <br> Finance Agency and Enterprise 2020 Conservatorship Activities

Even as FHFA developed and executed its significant COVID-19 response, the Agency continued fulfilling its statutory responsibilities related to the conservatorships of Fannie Mae and Freddie Mac. HERA authorizes FHFA as conservator to take "such action as may be (i) necessary to put the regulated entity in a sound and solvent condition; and, (ii) appropriate to carry on the business of the regulated entity and preserve and conserve the assets and property of the regulated entity."

FHFA periodically releases a Strategic Plan for the conservatorships of Fannie Mae and Freddie Mac that establishes a multi-year framework for how the Agency, as conservator and in accordance with its statutory mandates, intends to guide the Enterprises while they remain in conservatorships. In addition, FHFA releases an annual Scorecard that sets forth the Agency's tactical priorities and aligns execution by the Enterprises and Common Securitization Solutions, LLC, to those priorities and to the Strategic Plan.

On October 28, 2019, FHFA released the 2019 Strategic Plan for the Conservatorships of Fannie Mae and Freddie Mac, effective upon release, and the 2020 Scorecard for the Enterprises and Common Securitization Solutions for calendar year 2020. The new Strategic Plan and Scorecard were built around three core areas of focus.

## Focus Area \#1: Foster Competitive, Liquid, Efficient, And Resilient (CLEAR) National Housing Finance Markets

Foster national housing finance markets that protect taxpayers, promote liquidity through the cycle, and support sustainable homeownership and affordable rental housing, while ensuring the Enterprises fulfill all statutory mandates.

## Focus Area \#2: Ensure Safety and Soundness

Operate the Enterprises with heightened focus on safety and soundness to enable them to provide mortgage market liquidity through the economic cycle with a prudent risk profile. Maintain effective risk management systems necessary and appropriate for entities in conservatorship with limited capital buffers.

## Focus Area \#3: Prepare for a Transition Out of Conservatorship

Support the development and implementation of a responsible transition plan to exit the conservatorships, with appropriate readiness by the Enterprises.

These three focus areas aligned the conservatorships with FHFA's commitment to carry out its statutory responsibility to responsibly end the conservatorships.

FHFA is legally bound, as conservator or receiver, to direct its supervision and regulation of the Enterprises toward one of three outcomes: (1) reconstitute the Enterprises into a successor entity or entities, (2) restore the Enterprises to a state of financial solvency and shareholder control, or (3) place the Enterprises into liquidation and organize limited-life regulated entities. Removing the Enterprises from government control, either as conservator or receiver, is both a statutory authority and a statutory duty under HERA.

FHFA's end-state vision is for the Enterprises to return to operating as fully-private companies within a competitive, liquid, efficient, and resilient housing finance system, while a strengthened and independent FHFA ensures they have the capital reserves, risk management capabilities, corporate governance, and regulatory oversight that are appropriate for their size, risk, and systemic importance outside of conservatorship.

Successfully exiting from conservatorship after more than a decade of operating under government control continues to require changes to the Enterprises across a number of fronts. A significant challenge for the Enterprises is to operate appropriately while still under conservatorship and simultaneously rehabilitate the commercial mindset and capabilities that will be critical to their success outside of conservatorship.

The Enterprises must demonstrate the commitment to utilize capital efficiently and effectively, earning returns sufficient to attract investors in private capital markets. The Enterprises will need to avoid the imprudent practices of the past and instead focus on their core mission of fostering a competitive, liquid, efficient, and resilient secondary mortgage market that supports sustainable homeownership and affordable rental housing. A mission-focused, safer, and simpler business model in which the Enterprises' risk levels are prudent and supported adequately by their capital levels will facilitate their exit from conservatorship.

Importantly, going forward the Enterprises should serve a countercyclical role in the market, consistent with their statutory mission to "provide stability to the
secondary market for residential mortgages" and to "respond appropriately to the private capital market" without crowding it out.

A strong capital base, prudent credit standards, and robust risk management form the foundation from which the Enterprises should provide countercyclical support to the market.

## A Strong Capital Base

The Enterprises continue to be inarguably undercapitalized for their size, risk, and systemic importance. The conservatorships were initiated in 2008 because Enterprise credit losses were exceeding their stock of loss-absorbing private capital.

When passing HERA, Congress created a temporary framework for Treasury to provide emergency financial support to the Enterprises in 2008. Through the Senior Preferred Stock Purchase Agreements (PSPAs) and their subsequent amendments, Fannie Mae and Freddie Mac each were ultimately provided access to over $\$ 200$ billion of Treasury support to keep the Enterprise's net worth positive. To date, the Enterprises together have received $\$ 191.5$ billion in taxpayer-funded draws under the PSPAs.

In exchange, Treasury received senior preferred shares in the Enterprises that entitle it to a 10 percent dividend as well as a liquidation preference equal to the amount drawn under the Agreement. Under the terms of the agreement, dividends paid to the senior preferred shares do not count as repayments. These Treasury senior preferred shares and their associated liquidation preference render the Enterprises' regulatory capital calculations significantly negative. For clarity, "capital" in this discussion will be understood to mean GAAP net worth unless a specific regulatory capital definition is identified.

In 2012, the Third Amendment to the PSPAs required the Enterprises to pay out any excess capital beyond a combined $\$ 6$ billion as a dividend to the senior preferred shares, a provision also known as the net worth sweep. As a result, the Enterprises went into 2019 with just $\$ 6$ billion of capital backing their nearly $\$ 6$ trillion balance sheets, resulting in a combined leverage ratio of almost 1,000 to 1 .

Capital is the foundation of financial safety and soundness. Therefore, building capital is one of the most important steps in restoring each Enterprise to a safe and sound condition in which it can responsibly exit its conservatorship.

In September 2019, FHFA and Treasury signed a letter agreement increasing the amount of capital the Enterprises could retain to a new combined limit of $\$ 45$ billion. Allowing the Enterprises to retain additional earnings began the necessary capital-building process.

In 2020, FHFA re-proposed and finalized a new capital rule that set out the conditions for a postconservatorship Enterprise to meet the essential safety and soundness threshold of being able to fulfill its mission through a downturn on the scale of the last housing crash.

The rule calculates that minimum necessary level of capital to be approximately 4 percent of Adjusted Total Assets as defined in the rule, equivalent to a leverage ratio of 25 to 1 . This will ensure that Fannie Mae and Freddie Mac have the capital to absorb the lifetime unexpected losses on the mortgages they own and guarantee in the event of another severe house price shock.

In January 2021, FHFA and Treasury effectively ended the net worth sweep by allowing the Enterprises to retain capital up to the level required in the final capital rule. Without this amendment, at least one of the Enterprises would have hit its capital limit from the 2019 agreement. This would have forced the Enterprise to resume remitting its capital as dividends to Treasury while it was still severely undercapitalized.

Treasury requested a series of policy provisions to be included in the agreement to protect its investment. Many of these provisions substantially codified existing FHFA rules and conservatorship restrictions. FHFA and Treasury both recognized that the January 2021 changes were a significant positive step forward but that more work would be needed to restructure Treasury's stake before necessary private capital could be raised.

## Prudent Credit Standards

The core purposes of the Enterprises, outlined in their charters, are to provide stability and ongoing assistance to the secondary market for residential mortgages, increase the liquidity of mortgage investments, improve the distribution of investment capital, and promote access to mortgage credit throughout the nation.

Congress also gave them specific obligations to serve designated underserved communities and to support affordable housing by fulfilling their statutory housing goals.

The Enterprises have an obligation to conduct their business through sustainable and responsible practices backed by prudent credit standards. Any shortcut or inappropriate underwriting supported by an Enterprise can encourage private actors to originate unsustainable loans that irresponsibly endanger their borrowers.
While undercapitalized Enterprises operate under conservatorship, they must take special care to make efficient use of their limited capital to fulfill their mission. The core binding constraint on Enterprise activities is their capital.

Therefore in 2020, FHFA continued to direct the Enterprises to review their risk profiles across all business activities and to reduce risk and complexity to levels appropriate for entities operating under conservatorship and with such limited capital.

Since 2014, FHFA has also set caps on the volume of multifamily business an Enterprise can purchase. This policy is intended to ensure that the Enterprises provide appropriate support to the multifamily sector, especially mission-driven affordable housing, without displacing private capital.

2020 was the first full calendar year that the Enterprises conducted their multifamily business under an updated system of multifamily caps. The Enterprises stayed below their five-quarter volume cap of $\$ 100$ billion. At least 37.5 percent of those multifamily purchases were mission-driven affordable housing, in keeping with the minimum threshold FHFA established.

FHFA also issued new multifamily caps for the four quarters of calendar year 2021. The new caps are $\$ 70$ billion for each Enterprise, of which at least 50 percent must be mission-driven affordable housing. Twenty percent of the $\$ 70$ billion must be affordable to residents at or below 60 percent of area median income. And FHFA simplified the applicable definitions of mission-driven affordable housing. Like the previous caps, the 2021 caps apply to all multifamily business without any carve-outs.

FHFA also continued to direct the Enterprises to provide equitable market access to small lenders by prohibiting volume-based discounts. FHFA's policy implements the principle of the same rate of return for the same risk, regardless of size. A central reason for the existence of Fannie Mae and Freddie Mac is to provide small lenders with access to capital markets, access that large financial institutions already have through Wall Street relationships. This policy further aligns Enterprise activities with their core mission.

## Robust Risk Management

Fannie Mae and Freddie Mac were chartered by Congress to be counter-cyclical sources of stability for housing finance markets. This stands in contrast to the structure of depository institutions, which tend to increase their lending during economic expansions and tighten credit to get through downturns.

To fulfill their mission, the Enterprises must be ready to expand their business in times of general financial stress. This requires the Enterprises to prepare the resources they will deploy in a downturn while conditions are still strong.

New Enterprise activities during conservatorship should be limited and clearly aligned to core guaranty activities, to reducing risk, and to supporting the objective of exiting conservatorship. Competition between the Enterprises during conservatorship, or between the Enterprises and government-supported lending programs, must be limited and responsible in order to protect taxpayers, borrowers, and underserved communities.

Their counter-cyclical mission and their ongoing undercapitalization mean the Enterprises must place a premium on robust risk management capabilities and
practices. Risk at the Enterprises must be appropriately calibrated to the thin capital cushions currently in place in order to protect taxpayers and our nation's entire financial system.

The 2008 financial crisis demonstrated substantial weaknesses in the liquidity positions of the Enterprises. Liquidity and funding challenges were a significant contributing factor to establishment of the conservatorships in September 2008. Unlike banks, the Enterprises do not have access to Federal Reserve emergency liquidity facilities such as the discount window. Their only sources of liquidity are their own accounts and private funding markets.

In 2020, FHFA directed the Enterprises to adopt more robust liquidity standards. By the end of the year, FHFA issued a notice of proposed rulemaking to establish these liquidity requirements in regulation. The proposed rule creates four quantitative liquidity requirements that address the short, intermediate, and long-term liquidity needs of the Enterprises in order to secure their ability to fulfill their mission in times of economic stress.

Also, the Enterprises must ensure the resilience of their core operational and technology capabilities and systems with respect to weather- and climate-related events. In an era of heightened cyber risks, it must be a priority to protect the confidentiality of the extensive consumer and other data held by the Enterprises and to ensure their integrity for the purposes of risk management, financial reporting, and other essential business activities.

At the end of 2020, FHFA released a notice of proposed rulemaking around Enterprise resolution planning requirements. This is the next critical component of FHFA's commitment to protecting the mission of the Enterprises and the millions of families who depend on a stable mortgage market.

Credible resolution plans, also called living wills, provide the clear rules of the road needed in times of stress when large financial institutions can fail. FHFA's rule requires each Enterprise to develop plans to facilitate their rapid and orderly resolution without disrupting housing finance markets. These plans will be designed to protect the mission of the

Enterprise throughout the restructuring process of any receivership. FHFA's rule implements the receivership authorities Congress gave the Agency in 2008 in order to make clear how they would work. FHFA finalized its resolution planning rule in 2021.

With its resolution planning rule, FHFA is preparing an important tool for a world-class financial regulator to hold in case of a crisis. But the surest path to avoiding Enterprise receiverships runs through raising enough capital to keep Fannie and Freddie strong through a downturn.

## Enterprise Leadership and Compensation

## Board of Directors

As conservator, FHFA reviews the appointment of new directors serving on the board of directors of each Enterprise. In 2020, FHFA reviewed the election of Mark Grier, Paul Schumacher and Alan Merrill to serve on Freddie Mac's board of directors. One Freddie Mac board member, Steve Kohlhagen, fully completed his term and rotated off the board in 2020. This increased the number of members of the board of directors to twelve members as of December 31, 2020. Subsequently, in early January 2021, former CEO David Brickman, resigned and left the board. Paul Schumacher was not nominated for re-election to the board for 2021.

With respect to Fannie Mae in 2020, one director, Brian Brooks, resigned in 2020 leaving the board with 12 members as of December 31, 2020. FHFA approved the appointment of Sheila Bair as board chairwoman effective November 20, 2020. In early 2021, Ryan Zanin and Jonathan Plutzik resigned from the board. FHFA reviewed and elected Simon Johnson and Chris Brummer to the board in February 2021.

## Management

FHFA, as conservator, worked closely with Freddie Mac to replace its CEO. In May 2021, FHFA approved Michael DeVito as the new Freddie Mac CEO.

## Enterprise Compensation

In August 2019, FHFA directed the Enterprises to limit base salaries for all employees to $\$ 600,000$ and increase the deferral period of at-risk compensation earned by executive officers from one year to two years. Many financial institutions defer a portion of executive compensation, a policy that can increase retention and aid in recovery of compensation if necessary, for example, in the event of executive misconduct or financial statement error. The two-year deferral period became effective for compensation earned in 2020 for new hires and will go into effect in 2022 for executives hired prior to 2020. No other changes were made to the Enterprises' Executive Compensation Plans.

FHFA continues to require the Enterprises to submit for Agency approval any proposed increase in compensation for an employee or any new hire's compensation if the target total direct compensation equals or exceeds $\$ 600,000$. FHFA has instructed the Enterprises that compensation for executive officers should target the 25 th percentile of market compensation for similar positions at peer companies. Compensation for the Enterprises' CEOs is maintained at the statutory limit. ${ }^{16}$ FHFA continues to closely examine all compensation requests by the Enterprises and maintains an active dialogue with each Enterprise about current and future compensation actions.

## REPORTS OF ANNUAL EXAMINATIONS: FANNIE MAE AND FREDDIE MAC

In This Chapter
Financial Safety and Soundness Supervision and Examination ..... 23
Financial Condition ..... 23
Overview of Annual Examination Results. ..... 27
Serving the Underserved ..... 30

## Financial Safety and Soundness Supervision and Examination

In 2020, the Federal Housing Finance Agency (FHFA) performed examination activities in the areas of credit, market, model, and operational risk, as well as governance, compliance, accounting, auditing, and financial disclosure.

## The Enterprises

Examinations are led by an Examiner-in-Charge and are carried out by an examination team stationed onsite at each Enterprise, supported by subject-matter experts at FHFA's headquarters. Under COVID-19, all examination activities have been conducted through FHFA's telework flexibilities as the Enterprises closed their headquarters and operated remotely. Any adverse examination findings are communicated in writing to each regulated entity, and a corrective action plan must be submitted by the entity to remediate the findings. The Enterprise's internal audit function or an independent third party validates the completion of remediation, and FHFA reviews corrective action through its examination activities. Each year, FHFA issues an ROE that assigns examination ratings and communicates the principal examination conclusions and findings for the supervisory cycle. The annual ROE is signed by the Examiner-inCharge and issued to the Enterprise's board of directors.

## Financial Condition

## Income

Fannie Mae reported annual net income of $\$ 11.8$ billion and comprehensive income of $\$ 11.8$ billion in 2020 , down from $\$ 14.2$ billion and $\$ 14.0$ billion, respectively, in 2019. ${ }^{17}$ Freddie Mac reported annual net income of $\$ 7.3$ billion and annual comprehensive income of $\$ 7.5$ billion in 2020 , as compared to $\$ 7.2$ billion and $\$ 7.8$ billion, respectively, in 2019. Fannie Mae reported lower income while Freddie Mac's income
remained relatively flat in 2020 compared to 2019, both primarily due to the shift from credit-related income to credit-related expenses resulting from higher than expected credit losses from the COVID-19 pandemic. These credit-related expenses were partially offset by higher net interest income, which was positively impacted by the record low interest-rate environment.

The Enterprises have two primary sources of revenue: guarantee fees on mortgages underlying Enterprise mortgage-backed securities (MBS) held by consolidated trusts, and the spread between the interest income earned on the assets in the Enterprises' retained mortgage portfolios and the interest expense paid on the debt that funds those assets. In 2020, as in prior years, the Enterprises earned a greater proportion of net income from guarantee fees than from interest income from the retained portfolio. Figure 1 shows changes in the level and composition of the Enterprises' net interest income since 2016.

Historically, the Enterprises' investment portfolios exposed them to a significant amount of interest-rate risk that was mitigated using derivatives. In the absence of hedge accounting, derivatives are marked to market through earnings, but most of the Enterprises' other financial assets and liabilities (which the derivatives economically offset) are not. As a result, interest rate fluctuations drive changes in the fair values of derivatives but not the corresponding hedged items, leading to earnings volatility. Freddie Mac uses fair value hedge accounting to reduce earnings volatility. Hedge accounting decreased Freddie Mac's net interest income in 2020 by approximately $\$ 2.2$ billion. Fannie Mae implemented fair value hedge accounting in the first quarter of 2021.

[^6]Figure 1: Enterprises' Net Interest Income 2016-2020 ${ }^{18}$

a For comparison purposes, here Freddie Mac's net interest income is calculated by including multifamily guarantee fee income and excluding the impact of hedge accounting.

## Total Mortgage Portfolios

The Enterprises' total mortgage portfolios ${ }^{19}$ increased approximately 13 percent in 2020, as the record low interest-rate environment resulted in significantly higher single-family new business acquisition volumes, of which approximately 70 percent were refinance activity. In 2020, Fannie Mae purchased $\$ 1.359$ trillion of single-family mortgages, an increase of approximately 128 percent from $\$ 596$ billion in 2019. Freddie Mac purchased $\$ 1.091$ trillion of single-family mortgages in 2020, an increase of approximately 141 percent from $\$ 453$ billion in 2019.

Multifamily purchase volumes increased slightly in 2020, compared to 2019. Fannie Mae's multifamily new purchase volume in 2020 was $\$ 76$ billion, an increase of approximately 8 percent from $\$ 70$ billion in 2019. Freddie Mac's multifamily new purchase volume in 2020 was $\$ 83$ billion, an increase of approximately 6 percent from $\$ 78$ billion in 2019. Figure 2 shows changes between 2006 and 2020 in the Enterprises' mortgage portfolios, which includes mortgages, mortgage-related securities held as investments, and mortgages pooled into MBS.

[^7]Figure 2: Total Mortgage Portfolios 2003-2020

## Revisions to the Preferred Stock Purchase Agreements

In the Housing and Economic Recovery Act of 2008, Congress granted the FHFA director the authority to appoint FHFA as conservator or receiver of any of its regulated entities upon determining that a regulated entity is in an unsafe or unsound financial condition or meets other criteria. On September 6, 2008, FHFA placed both Fannie Mae and Freddie Mac into conservatorship, a statutory process designed to preserve and conserve the Enterprises' assets and property and put them in a sound and solvent condition. As conservator, FHFA has broad authority over the Enterprises including reconstituting Fannie Mae's and Freddie Mac's boards of directors and charging them with the responsibility to ensure that normal corporate governance practices and procedures are in place, subject to FHFA review and approval on critical matters. To further support the Enterprises and the market given their precarious financial condition at the time, the Department of the Treasury (Treasury) provided Fannie Mae and Freddie Mac each with access to over $\$ 200$ billion of support through the Senior

Preferred Stock Purchase Agreements (PSPAs) and subsequent amendments, in exchange for quarterly dividends paid to Treasury. To date, the Enterprises together have received $\$ 191.5$ billion in taxpayerfunded draws under the PSPAs and paid approximately $\$ 301$ billion in dividends on Treasury's senior preferred stock. Under the terms of the PSPAs, an Enterprise's dividend payments do not offset the amounts drawn from Treasury.

In September 2019, FHFA and Treasury announced modifications to the PSPAs that permitted the Enterprises to retain more of their earnings and thus build up more capital (Net Worth Amount) - a critical element of safety and soundness and an important step toward preparing for a responsible end to the conservatorships. Previously, a 2012 amendment to the PSPAs had required the Enterprises to pay out any excess capital beyond a combined $\$ 6$ billion as a dividend to the senior preferred shares, a provision also known as the net worth sweep. The modifications allowed Fannie Mae and Freddie Mac to accumulate up to $\$ 25$ billion and $\$ 20$ billion, respectively, in applicable capital reserves. In January 2021, FHFA and

Treasury again amended to PSPAs to effectively end the net worth sweep through a Letter Agreement that further increased the amount of retained earnings each Enterprise could keep as of October 1, 2020, to the amount of adjusted total capital necessary to meet the capital requirements and buffers set forth in the final capital rule. ${ }^{20}$ The January 2021 Letter Agreement ${ }^{21}$ made a number of significant changes to the covenants in the senior preferred stock purchase agreement, as well as the terms of the senior preferred stock.

## Implementation of the Current Expected Credit Loss Accounting Standard

In June 2016, the Financial Accounting Standards Board issued Accounting Standard Update 2016-13 (ASU), which became effective for FHFA's regulated entities on January 1, 2020. The ASU requires companies to measure the allowance for credit losses based on the current expected credit losses (CECL). This is a change from the incurred-loss methodology used previously. The objective of this change is to address concerns, which arose from the 2008 global financial crisis, that Generally Accepted Accounting Principles (GAAP) required companies to provide for credit losses for loans meeting a "probable," not an expected, threshold. The adoption of CECL on January 1, 2020, resulted in a reduction of retained earnings of $\$ 1.1$ billion and $\$ 0.2$ billion on an after-tax basis for Fannie Mae and Freddie Mac, respectively. ${ }^{22}$

## COVID-19 Impact on Serious Delinquency Rate

The Enterprises' ownership of seriously delinquent single-family loans, defined as loans that are more than 90 days overdue, increased significantly in 2020 due to the economic dislocation caused by the COVID-19 pandemic. As a result, this increased
borrower participation in forbearance plans. As of December 31, 2020, Fannie Mae had approximately 525,000 loans in forbearance or approximately 3.03 percent of the single-family guarantee portfolio, of which approximately 385,000 loans were seriously delinquent. Freddie Mac had approximately 324,000 loans in forbearance or 2.70 percent of the single-family guarantee portfolio, of which 230,000 loans were seriously delinquent. The significant increase in forbearance activity drove Fannie Mae's and Freddie Mac's single-family serious delinquency rates to jump to 2.87 percent and 2.64 percent in 2020 from 0.66 percent and 0.63 percent in 2019, respectively. At their height, Fannie Mae and Freddie Mac had approximately 972,000 and 426,000 loans in forbearance, which were approximately 5.7 and 3.8 percent of the single-family guarantee portfolios, respectively.

Future Enterprise earnings may be negatively impacted by the number of loans that are seriously delinquent. While the total number of forborne loans has trended downward, the number of forborne loans in seriously delinquent status remains significantly higher than pre-pandemic levels. The Enterprises recognized interest income on forborne loans because they believe that collection of principal and interest is reasonably assured. However, in the first quarter of 2021, the Enterprises ceased to accrue interest income on certain forborne loans that became more delinquent as the collection of principal and interest on these loans was no longer reasonably assured.

The Enterprises' earnings will continue to be highly sensitive to fluctuations in macroeconomic conditions, housing prices, and interest rates. Future earnings could be constrained by a high or rising interest-rate environment, the continued reductions in income from the decreasing and lower yielding mortgage investment portfolios, mark-to-market volatility from the Enterprises' derivatives portfolio, and future legislative and regulatory actions.

[^8]
## Common Securitization Solutions LLC

Common Securitization Solutions (CSS) is a joint venture formed by the Enterprises to develop and operate a Common Securitization Platform (CSP) in support of the Enterprises' single-family mortgage securitization activities. The CSP enables the issuance of a common mortgage-backed security called the Uniform Mortgage Backed Security (UMBS). CSS acts as each Enterprise's agent to facilitate issuance of single-family MBS, to release related disclosures, and to administer the securities post-issuance.

FHFA conducts the same examination process for CSS as it conducts for the Enterprises. FHFA issues an ROE that assigns examination ratings and communicates the principal examination conclusions and findings for the supervisory cycle. The annual ROE is signed by the Point of Contact and issued to CSS's Board of Managers (BOM).

## Overview of Annual Examination Results

CAMELSO is the examination framework that FHFA uses to report its examination findings. This section is organized according to the framework's seven components: Capital, Asset quality, Management, Earnings, Liquidity, Sensitivity to market risk, and Operational risk. Areas of concern cited in the ROEs include deficient capital levels (Capital), accelerated asset growth driving required capital to grow faster than retained earnings (Capital, Asset quality, and Management), COVID-19 crisis forbearance driving increases in delinquencies (Asset quality), structural liquidity risk of non-bank seller/servicers (Asset quality), weaknesses in Enterprise-wide risk management and model risk governance (Management), deficiencies in volatility risk monitoring (Sensitivity to market risk) and challenges associated with third-party risk oversight (Operational risk). The composite rating of CSS is based primarily on an evaluation of two components: Management and Operational risk.

## Capital

When reviewing a regulated entity's capital, FHFA examiners determine whether the regulated entity has sufficient capital relative to the entity's risk profile. By any measure of risk, the Enterprises remain significantly undercapitalized. Further, due to rapid asset growth during 2020, the Enterprises' capital deficit widened as required capital charges on new assets outpaced retained earnings.

On January 14, 2021, FHFA as conservator and Treasury announced an amendment to the PSPAs that ends the Enterprises' required dividends to Treasury until the capital requirements and buffers set forth in the final capital rule are met. The agreement also increases the liquidation preference of the Senior Preferred Stock by the amount of any increase in the Enterprises' net worth each quarter. This change in requirement will allow the Enterprises to continue to build a capital buffer, decreasing the potential for further PSPA draws and increasing their risk capacity over time.

The agreement further limits each Enterprise's ability to independently manage its financial condition, restricting certain assets within the retained portfolio cap and implementing new business restrictions for: annual multifamily acquisitions; single-family cash purchases; high-risk single-family risk layered mortgages; and acquisition of single-family second home and investment properties.

As of December 31, 2020, Fannie Mae's net worth was $\$ 25.3$ billion and Freddie Mac's net worth was $\$ 16.4$ billion, as compared to $\$ 14.6$ billion and $\$ 9.1$ billion, respectively, on December 31, 2019. While this significantly improved the Enterprises' combined ratio of GAAP net worth as a percentage of total assets, the ratio remained unsustainably low at approximately 0.63 percent. The liquidation preference ${ }^{23}$ amounts were $\$ 142.2$ billion and $\$ 86.5$ billion for Fannie Mae and Freddie Mac, respectively.

[^9]
## Asset Quality

When reviewing asset quality, FHFA examiners evaluate the quantity of existing and potential credit risk associated with loan and investment portfolios, as well as management's ability to identify, measure, monitor, and control credit risk.

COVID-19 had a significant negative impact on overall credit quality for single-family and multifamily lines of business at both Enterprises. While the quality of recent acquisitions improved in terms of certain credit characteristics including credit scores, debt-toincome ratio, and loan-to-value ratio, the overall asset quality worsened significantly due to a sharp increase in delinquencies in the immediate aftermath of the pandemic. The Enterprises quickly implemented significant flexibilities in underwriting, forbearances, and loans sales to help borrowers and lenders struggling with the impact of the pandemic. The majority of delinquent mortgages have since been refinanced, reinstated, or enrolled in modified payment programs in part due to flexibilities offered by the Enterprises. However, a significant number of borrowers remain increasingly and seriously delinquent and continue to remain in forbearance.

The economic uncertainty following the initial COVID-19 outbreak highlighted the risk concentrated in non-bank seller/servicers. While the economic stress affected all market participants, liquidity concerns led to significant stress among some non-banks. Although a subsequent increase in refinances improved nonbanks' financial condition, the structural risks that surfaced in the initial stress period have not been fixed. The Enterprises' exposure to non-banks continues to grow, with non-banks expected to service most of their portfolios in 2021, further exposing the Enterprises to the risk of these counterparties. Continued focus is needed to strengthen standards for these counterparties to limit potential exposure of the Enterprises and avoid borrower disruption in times of stress.

Both Enterprises made some progress in reducing high-risk legacy assets from their retained portfolios. However, loans repurchased out of securities due to COVID-19 related delinquencies will again increase high-risk assets in coming quarters. Management
continued to make progress in reducing other sources of credit risk by increasing the adoption of automated underwriting tools, restricting the purchase of loans with multiple risk layers, and transferring risk to other market participants where economically reasonable.

## Management

FHFA examiners assess the effectiveness of efforts by each Enterprise and CSS to identify, measure, monitor, and control the risks of its activities, and to evaluate the safety and soundness of its operations and its compliance with applicable laws and regulations.

The Enterprise boards and senior management teams continue to respond to the COVID-19 crisis, including requirements of the Coronavirus Aid, Relief, and Economic Security (CARES) Act and their own flexibilities. While crisis response took precedence throughout 2020, the Enterprises must balance this with their corporate needs, specifically the need to restore capital to an acceptable level. Balancing the needs of borrowers, the housing market ecosystem, and the Enterprises specifically will require difficult tradeoffs and a shift in traditional Enterprise strategic thinking. Continued balance sheet growth, as seen in 2020, would be detrimental to the Enterprises' efforts to achieve required levels of capital necessitating strong board and senior management action.

Both Enterprises also face modeling challenges presented by the COVID-19 crisis, government intervention, and pandemic-driven demand shifts. Additionally, as the Enterprises continue to implement the ERCF, they must shift their risk limit frameworks to incorporate this new standard.

While Fannie Mae has made substantial progress in improving its corporate governance framework, it must continue work to address weaknesses in its model risk management practices, risk governance framework and system, the control environment of its Internal Audit function, and fully implement an effective internal trading compliance program.

Freddie Mac requires additional work to improve operational risk components within its overall enterprise-wide risk-management framework.

Although management has made progress in its third-party risk management, business resiliency, and compliance programs, additional concerted efforts are necessary to resolve some legacy issues. The board made progress in addressing significant vacancies in the executive ranks by selecting the general auditor, the president, and the non-executive chairman.

The CSS Operating Agreement was amended in January 2020 to create the position of chairman, provide the chief executive officer a seat on the BOM, and create three additional seats for independent directors. Fannie Mae and Freddie Mac each retain their two current BOM seats. Thus, there will be up to nine BOM members in total. In 2020, CSS also approved a Strategic Plan incorporating the expectation that it will become an independent entity. As such, it is developing a revenue model and exploring expanding the products and services it offers. In the meantime, CSS plans to focus on hardening and optimizing the Common Securitization Platform (CSP), the technology solution that CSS employs to administer the Enterprises' portfolios of single-family mortgagebacked securities and the issuance of the UMBS.

## Earnings

When reviewing Enterprise earnings, FHFA examiners consider the quantity, trend, sustainability, and quality of earnings (e.g., the adequacy of provisions to maintain the allowance for loan losses and other valuation allowance accounts).

Fannie Mae's comprehensive income of $\$ 11.8$ billion in 2020 exceeded 2019 forecasted results by $\$ 1.0$ billion despite the COVID-19 crisis but was lower than the $\$ 14.0$ billion in 2019 and $\$ 15.6$ billion in 2018. The $\$ 2.2$ billion year-over-year decrease was due to the impact of the COVID-19 pandemic and change from credit-related income to expense and lower investment gains from the lower volume of re-performing loan sales. Record-high acquisitions and refinances during 2020 driven by historically low interest rates offset these downward trends.

Freddie Mac's comprehensive income of $\$ 7.5$ billion in 2020 showed a slight decline from $\$ 7.8$ billion in 2019. The COVID-19 pandemic, related borrower
support programs, and historic easing of monetary policy impacted the company's financial performance. Freddie Mac recorded $\$ 1.45$ billion in provisions for credit losses in 2020 versus a reduction in allowance of $\$ 746$ million in the prior year. On the other hand, total revenues increased $\$ 2.58$ billion as a result of rapid refinances driven by historically low interest rates and higher initial pricing margin within the multifamily business segment.

## Liquidity

Review of liquidity includes assessing the current level and prospective sources of liquidity compared to funding needs, as well as the adequacy of funds management practices relative to the Enterprise's size, complexity, and risk profile.

In 2020, both Enterprises experienced increased funding costs immediately following the market dislocation caused by the COVID-19 pandemic. However, investor appetite for agency debt remained strong, and the Enterprises maintained sufficient liquidity to meet current and anticipated funding needs. In June 2020, FHFA directed the Enterprises to implement more stringent liquidity risk requirements in order to minimize liquidity risk and improve their ability to continue to support the market in times of stress. Both Enterprises were in compliance with these requirements by year-end. In December 2020, FHFA issued a proposed rule for comment based on these new liquidity standards, which it expects to finalize in 2021.

## Sensitivity to Market Risk

Examination of sensitivity to market risk includes assessing the ability of management to identify, measure, monitor, and control exposure to market risk given the Enterprise's size, complexity, and risk profile.

At Fannie Mae, market value-based interest rate exposures remained within board-approved risk appetite limits. However, exposures were elevated and some thresholds, which serve as early warning indicators, were exceeded. Management developed a measure of earnings sensitivity to interest rates and implemented it as part of the Enterprise's risk limit framework. In addition, management worked toward establishing
a hedge accounting program, which is intended to reduce earnings volatility resulting from mark-tomarket exposures.

At Freddie Mac, portfolio duration gap, convexity, and volatility measures remained within board limits. The Enterprise managed exposures to minimum levels, even during the market volatility resulting from the COVID-19 pandemic. In addition, the Enterprise's implementation of hedge accounting reduced the earnings impact of rate movements on its mark-to-market exposures. However, the Enterprise's prepayment modeling was challenged due to heightened refinances during the second quarter. Management implemented model enhancements and performance improved by year-end.

## Operational Risk

When assessing operational risk management, FHFA examiners consider exposures to loss from inadequate or failed internal processes, people, and systems, including internal controls and information technology.

The Enterprises and CSS have high inherent operational risk because of complex business processes and financial operations, reliance on information technology to manage and process large amounts of data, continually evolving information security and cybersecurity threats, and relationships with counterparties, vendors, and other third parties. Risks related to business resiliency, disaster recovery, data management, and modeling remain key management concerns for both Enterprises, though progress has been made.

Third-party risk management remains a significant challenge for both Enterprises as demonstrated by supply chain issues such as the sophisticated SolarWinds cyberattack and several data breaches affecting third and fourth-party vendors. Notification requirements and fourth-party risks will have to be points of emphasis as the Enterprises work to improve their requirements and processes.

Fannie Mae continues to migrate information technology systems to third-party cloud-based platforms while continuing to address gaps in cloud security and resiliency control capabilities.

Management improved the change management process for technology changes to ensure applications migrating to the cloud meet control requirements, but this process was not fully implemented until Q4 2020. Fannie Mae continued work to improve its operational risk-management capabilities, but continued management attention is needed.

Freddie Mac made progress to stabilize information technology (IT) operations, modernize application development and delivery, and transform its technology infrastructure. Management met several important milestones in transitioning its IT and other systems to third-party cloud-based platforms. Cloud-based capabilities prepare the Enterprise for greater business resiliency, improve information security and facilitate more agile Modern Delivery programs. While additional work is needed, management also made progress with data, identity, and access management.

CSS focused on strengthening the CSP through increased automation and improved efficiency. Operating the CSP involves storing, processing, and transmitting large volumes of data, as it acts as agent for the Enterprises to facilitate issuance of mortgage securities and related disclosures, as well as to administer the securities post-issuance.

## Serving the Underserved Housing Goals

The Federal Housing Enterprises Financial Safety and Soundness Act of 1992 (Safety and Soundness Act) requires FHFA to establish targets for both singlefamily and multifamily mortgages (housing goals) that the Enterprises are expected to meet every year. In determining whether an Enterprise has met a singlefamily housing goal, FHFA assesses the percentage of its total mortgage purchases that meet the goal in light of a benchmark level established in advance and a market level determined retrospectively using Home Mortgage Disclosure Act (HMDA) data. FHFA evaluates whether an Enterprise has met a multifamily goal by comparing the number of units in properties secured by a mortgage purchased by an Enterprise that meet the goal to a benchmark level that is established in advance.

In 2020, FHFA evaluated the mortgage purchases of the Enterprises based on the following eight housing goals, which were established by FHFA in February 2018 and remained in effect through the end of 2020. ${ }^{24}$

1. Low-income home purchase goal: Home purchase mortgages to families with incomes no greater than 80 percent of area median income (AMI).
2. Very low-income home purchase goal: Home purchase mortgages to families with incomes no greater than 50 percent of AMI.
3. Low-income areas home purchase subgoal: Home purchase mortgages to families living in census tracts with tract median incomes no greater than 80 percent of AMI, or families with incomes no greater than 100 percent of AMI who live in census tracts with a minority population of at least 30 percent and a tract median income of less than 100 percent of AMI.
4. Low-income areas home purchase goal: Home purchase mortgages that meet the criteria of the lowincome areas home purchase subgoal or that are to families with incomes no greater than 100 percent of AMI who live in designated disaster areas.
5. Low-income refinance goal: Refinance mortgages to families with incomes no greater than 80 percent of AMI.
6. Low-income multifamily goal: Rental units in multifamily properties that are affordable to families with incomes no greater than 80 percent of AMI.
7. Very low-income multifamily subgoal: Rental units in multifamily properties that are affordable to families with incomes no greater than 50 percent of AMI.
8. Small multifamily low-income subgoal: Rental units in multifamily properties with 5 to 50 units that are affordable to families with incomes no greater than 80 percent of AMI.

Figure 3 summarizes Enterprise housing goals performance in 2019 and 2020. Enterprise 2019 performance figures are derived from FHFA's analysis of loan-level data provided by the Enterprises in 2020. In December 2020, FHFA finalized its determinations of Enterprise performance in 2019.

FHFA determined that both Enterprises met all five single-family housing goals in 2019, as the performance of each Enterprise exceeded the benchmark level for all five goals. Both Fannie Mae and Freddie Mac's performance also exceeded the market level for three of the single-family goals. FHFA also determined that both Enterprises exceeded the benchmark levels for each of the three multifamily goals in 2019.

In December 2020, FHFA issued a final rule on the 2021 housing goals for Fannie Mae and Freddie Mac. Due to the economic uncertainty related to the COVID-19 pandemic, FHFA established benchmark levels for 2021 only and maintained the same levels from the previous rulemaking cycle, 2018-2020. FHFA will propose new benchmark levels covering 2022-2024 in 2021.

FHFA's assessment of the Enterprises' 2020 housing goals performance is currently underway. Figure 3 shows the goal levels and preliminary performance figures for 2020 based on information released in March 2021 in each Enterprise's Annual Housing Activities Report and Annual Mortgage Report. Later in 2021, FHFA will make final determinations on Enterprise housing goals performance and market levels for 2020.

[^10]Figure 3: 2019 and 2020 Enterprise Housing Goals Performance

a Goal-qualifying shares of single-family home purchase or refinance conventional conforming mortgages originated in the primary mortgage market, based on FHFA analysis of 2019 HMDA data. Market performance for 2020 will be determined by FHFA later in 2021.
${ }^{\text {b }}$ Official performance in 2019 as determined by FHFA, based on analysis of Enterprise loan-level data.
c Performance as reported by the Enterprises in their March 2021 Annual Housing Activities Reports. Official performance on all goals in 2020 will be determined by FHFA after analysis of Enterprise loan-level data is completed.
${ }^{d}$ Benchmark levels for single-family goals are minimum percentages of all mortgages financed by Enterprise acquisitions of home purchase or refinance mortgages on owner-occupied properties.

## Duty to Serve

The Safety and Soundness Act provides that the Enterprises have a "duty to serve underserved markets." The law specifies that the Enterprises "shall provide leadership to the market in developing loan products and flexible underwriting guidelines" to improve the distribution and availability of mortgage financing in a safe and sound manner and "to facilitate a secondary market for mortgages for very low-, low-, and moderate-income families with respect to the following underserved markets:" manufactured housing, affordable housing preservation, and rural housing. ${ }^{25}$ The statute directs FHFA every year to evaluate each Enterprise's compliance with this duty to serve (DTS) and to evaluate and rate the extent of such compliance.

In December 2016, FHFA issued a final rule implementing the DTS statutory requirements. ${ }^{26}$ The regulation requires each Enterprise to develop an Underserved Markets Plan detailing the key objectives and activities in its effort to meet its DTS obligations over a three-year period; establishes a framework for FHFA to evaluate and rate the Enterprises' compliance, which is further developed in separate FHFA Evaluation Guidance; lists specific activities eligible for DTS credit; and allows the Enterprises to propose additional activities that FHFA will consider for DTS credit eligibility. The regulation does not mandate any particular activities; rather, it requires the Enterprises to consider ways to better serve families in the three underserved markets.

FHFA's process for evaluating and rating the Enterprises' DTS performance consists of three parts. First, FHFA conducts a quantitative assessment to determine whether each Enterprise achieved the objectives in its Underserved Markets Plan. Second, FHFA conducts a qualitative assessment of each Enterprise's impact on affordable housing in the underserved markets. Third, FHFA evaluates extra credit-eligible activities undertaken by each Enterprise.

On January 1, 2018, the Underserved Markets Plan for 2018-2020 (Plan) of each Enterprise went into effect. In March 2020, the Enterprises submitted annual reports detailing their efforts to achieve the objectives in their Plans in 2019. In all three underserved markets, FHFA determined that each Enterprise complied with its DTS requirements and performed satisfactorily in increasing the liquidity and distribution of available capital in 2019. FHFA had issued revised Evaluation Guidance in the spring of 2020 that included changes to the evaluation process and rating scale for Enterprise performance, based on experience in the initial years of the program. As a result, FHFA did not release marketlevel ratings for 2019. ${ }^{27}$

On July 17, 2020, FHFA instructed the Enterprises to extend their 2018-2020 Plans to include activities and objectives for 2021 due to the ongoing uncertainty around the impacts of COVID-19 on the economy. The Enterprises submitted proposed 2021 Plans to FHFA for review on September 15, 2020 and FHFA issued a Non-Objection determination for each market in the proposed 2021 Plans on December 23, 2020.

In 2020, the third year of the Enterprises' Plans, FHFA monitored implementation by reviewing the Enterprises' quarterly reports and proposed Plan modifications. There are two methods by which a Plan can be modified. First, under certain circumstances, FHFA may require one or both Enterprises to enact Plan modifications, such as significant changes in market or regulatory conditions or safety and soundness concerns. Second, an Enterprise may propose to modify its Plan when events affect its ability to achieve the Plan's original objectives.

In 2020, Fannie Mae and Freddie Mac submitted a number of proposed Plan modifications. FHFA sought public input on several of these proposed modifications. Following consideration of the public input, FHFA issued Non-Objections to each Enterprise's modified underserved market in its Plan. ${ }^{28}$ Many of the modification requests submitted by the

[^11]Enterprises referred to the COVID-19 pandemic as being a special circumstance that influenced the need for a modification. Although the Enterprises proposed to eliminate or reduce loan purchase targets or remove planned outreach activities, many of these activities were either replaced with other activities or moved to 2021.

An Enterprise may request that FHFA declare an objective infeasible and, if the request is approved, FHFA will disregard the objective in its annual evaluation of the Enterprise's performance. Under FHFA's Evaluation Guidance, an Enterprise may make such a request if market conditions or other extenuating circumstances outside of an Enterprise's control substantially interfere with its accomplishment of an objective. Five objectives were determined to be infeasible in 2020, including three from Fannie Mae and two from Freddie Mac. In December 2020, FHFA published the modified Plans for both Enterprises. The final revised Plans are available on the DTS page of FHFA's website, including redline versions that show the modifications.

In March 2021, the Enterprises submitted annual reports on their efforts in 2020 to achieve their Plans' objectives in all three underserved markets, which will inform FHFA's evaluation of each Enterprise's performance. Noteworthy items from these annual reports are summarized below and in Figures 4 and 5.

In 2020, both Enterprises exceeded their Plans' loan purchase targets in the manufactured housing market. Fannie Mae and Freddie Mac have maintained pricing incentive programs for manufactured housing communities that provide tenant pad lease protections identified in FHFA's DTS regulation. ${ }^{29}$ Both Enterprises expanded outreach for their pilot programs tailored to the financing needs of resident-owned manufactured housing communities.

In the affordable housing preservation market, the Enterprises' Plans include objectives to support the Department of Housing and Urban Development's (HUD) Section 8 program, the HUD Rental Assistance Demonstration (RAD) program, Low-Income Housing Tax Credit (LIHTC) properties, small multifamily properties, shared equity homeownership programs, energy efficiency for single-family and multifamily properties, and residential economic diversity. In 2020, both Enterprises took steps to meet these objectives.

Freddie Mac continued to exceed its loan purchase goals by purchasing loans on over 400 properties which also receive support from the Section 8 program. Fannie Mae continued its support of HUD's Section 202 program by purchasing five Section 202 loans, a 67 percent increase over its Section 202 loan purchases in 2019 and a larger number of Section 202 loans than in any year since Fannie Mae began tracking this metric. Fannie Mae also purchased 10 loans to promote residential economic diversity under the DTS-eligible activity of purchasing loans under a state or local affordable housing program, an increase of 25 percent.

In the rural housing market, Fannie Mae and Freddie Mac exceeded their Plans' loan purchase targets in high-needs rural regions. ${ }^{30}$ Both Enterprises made LIHTC investments in Middle Appalachia, the Lower Mississippi Delta, and rural persistent poverty counties. ${ }^{31}$ In November 2020, Freddie Mac held its second annual rural research symposium to better understand the needs and effectiveness of mortgage products, services, and financing in rural markets.

[^12]Figure 4: 2020 Fannie Mae DTS Loan Purchase and Investment Performance Relative to Targets

c A loan purchase may qualify for DTS credit under multiple DTS objectives.

## Affordable Housing Allocations

To support affordable housing, the Safety and Soundness Act requires the Enterprises to set aside in each fiscal year an amount equal to 4.2 basis points ( 0.042 percent) for every dollar of unpaid principal balance on total new business purchases. Of the amount set aside, the Enterprises must transfer 65 percent to the Secretary of HUD to fund the Housing Trust Fund and 35 percent to the Treasury to fund the Capital Magnet Fund. ${ }^{32}$ The Housing Trust Fund is designed to assist states in meeting the housing needs of the lowest-income families. The Capital Magnet Fund is a special account within the Community Development Financial Institutions Fund designed to increase investment in affordable housing, economic development, and community development facilities in low-income or underserved rural areas. ${ }^{33}$

Under HERA, FHFA is statutorily authorized to temporarily suspend an Enterprise's affordable housing
allocations, generally based on the financial condition of the Enterprise. ${ }^{34}$ In November 2008, FHFA used this authority to suspend the allocations until further notice, finding that the amount of the contributions would have further contributed to the Enterprises' instability. The suspensions were lifted in December 2014 when FHFA directed each Enterprise to set aside amounts for allocation to the affordable housing funds, commencing with calendar year 2015. ${ }^{35}$

Figure 6 shows the total amounts paid into these funds each year from 2016 through 2021. In March 2021, Fannie Mae and Freddie Mac made, as directed by FHFA, a record total of $\$ 1.09$ billion in affordable housing allocation payments. These affordable housing allocation payments were calculated based on each Enterprise's total new business purchases in 2020, $\$ 1.4$ trillion at Fannie Mae and $\$ 1.2$ trillion at Freddie Mac. ${ }^{36}$

## Supervision and Examination

The FHFA Division of Bank Regulation (DBR) oversees the Federal Home Loan Bank (FHLBank) System. DBR's objective is to ensure that each entity operates in a safe and sound manner and achieves its housing finance and community investment mission. DBR performs annual examinations of each FHLBank and the Office of Finance (OF) and conducts ongoing supervision throughout the year. An Examiner-inCharge and a team of examiners, supported by financial analysts, economists, accountants, and attorneys, conduct the annual examination of each FHLBank. Outside of the annual examination period, FHFA examiners periodically meet with each of the FHLBanks to follow up on examination findings and to discuss emerging issues. Under COVID-19, all examination activities have been conducted using FHFA's telework flexibilities.

Examiners communicate all adverse findings to the FHLBank. In such cases, examiners obtain a commitment from the FHLBank to correct deficiencies in a timely manner and then verify the effectiveness of those corrective actions. On an ongoing basis, DBR monitors and reviews monthly and quarterly financial reports, data on FHLBank investments, FHLBank member activity, OF debt issuances, and financial market trends. Also, DBR and other FHFA offices review FHLBank documents and analyze FHLBank responses to information requests related to FHLBank collateral, unsecured credit, liquidity, and advances.

## COVID-19 Response

FHFA took several steps to ensure the FHLBank System could continue to support member liquidity and housing finance markets during the COVID-19 national emergency. FHFA relaxed liquidity requirements in a countercyclical fashion. FHFA reminded the FHLBanks of their obligation to offer advances up to 10 years in maturity to meet their members' needs and their ability under FHFA regulations to provide below-cost advances during disasters like the COVID-19 pandemic.

FHFA allowed the FHLBanks to accept Paycheck Protection Program loans as collateral when making loans to their members and allowed them to accept as
collateral loans that have been modified or that are in COVID-19 related forbearance. To avoid exacerbating potential liquidity problems, FHFA deferred certain deadlines related to the FHLBanks' transition from LIBOR-based exposures, while continuing efforts to prepare for the eventual end of LIBOR. To protect the safety and soundness of the FHLBanks, FHFA issued guidance related to collateral and pricing policies aimed at ensuring that all members are treated fairly and that every FHLBank can continue to provide liquidity to institutions and communities in its district.

The FHLBanks provided vital support to the market in response to the financial stress caused by the pandemic. A core function of the FHLBanks is to provide liquidity in times of stress. This support is critical for small and community banks that often do not have access to other sources of low-cost funding. When the COVID-19 crisis began, the FHLBanks stepped up to keep liquidity in the market, meeting unprecedented advance demand from their member financial institutions.

In March 2020, while other liquidity sources dried up, FHLBank System advances grew by $\$ 189.4$ billion - or 30.7 percent - at their peak. For the quarter ending March 31, FHLBank System advances increased 25.8 percent to $\$ 806.9$ billion. While access to long term debt markets was severely limited, the System was able to fund this increased advance demand largely through discount notes and floating rate bonds indexed to the Secured Overnight Financing Rate (SOFR). For the first quarter of 2020, outstanding debt increased to $\$ 1.18$ trillion, growing at the fastest pace in recent history.

As advances and assets grew in the first quarter of 2020, earnings decreased significantly because of reduced net interest spread and mark-to-market accounting effects. Compared to the fourth quarter of 2019, net interest income fell a substantial $\$ 350$ million ( 28.6 percent) to $\$ 872$ million, and net income decreased $\$ 262$ million (29.5 percent) to $\$ 627$ million. Nevertheless, for the first quarter of 2020, FHLBank System retained earnings grew $\$ 141$ million to $\$ 20.7$ billion, or 1.6 percent of total assets.

Following the injections of liquidity provided by the Federal Reserve and The Coronavirus Aid, Relief, and Economic Security Act, the FHLBanks' balance sheets - both advances and debt outstanding - fell to or below pre-crisis levels. This is exactly what the FHLBanks
are supposed to do as counter-cyclical providers of liquidity. And it is why FHFA is focused on protecting the System's safety and soundness. It is critical that the Banks remain capable of being a source of liquidity when their members and the economy need it most.

## Core Mission of the FHLBanks

The mission of the FHLBanks is to provide a source of liquidity for their members and housing associates, particularly in times of stress, and, as described in FHFA's Core Mission Activities (CMA) regulation, ${ }^{37}$ to provide financial products and services that enhance the financing of housing and community lending. In 2020, FHFA continued its supervision and oversight to ensure that the FHLBanks remain focused on their statutory housing finance and community development mission. Historically, short- and long-term advances (loans) to members and housing associates have been the principal mission asset of the FHLBanks, primarily collateralized by residential mortgage loans and government and agency securities. However, the CMA regulation also includes other types of assets, such as mortgage loans that qualify as Acquired Member Assets (AMA), in the definition of core mission activities. To ensure that the FHLBanks operate in a manner consistent with their housing finance mission, FHFA requires each FHLBank's board of directors to adopt, maintain, and periodically review a strategic business plan that describes "how the significant business activities of the regulated entity will achieve its mission and public purposes." ${ }^{\text {" }}$. Also, FHFA measures each FHLBank's core mission achievement by calculating the ratio of its Primary Mission Assets (advances plus AMA) to its outstanding consolidated obligations. ${ }^{39}$

- Ratios at or above 70 percent indicate that a FHLBank's activities are achieving core mission;
- Ratios between 55 percent and 70 percent indicate that an FHLBank's ratio is "evolving" and FHFA will further evaluate the FHLBank's mission achievement; and,
- Ratios below 55 percent indicate that more fundamental questions about the activities of the FHLBank need to be addressed.

FHFA calculates each FHLBank's core mission ratio using annual average par values, as reported by the FHLBanks. FHFA assesses each FHLBank's core mission achievement annually and expects any FHLBank markedly below 70 percent to include a thorough strategy for increasing its core mission ratio in its business plan.

As of December 31, 2020, the FHLBank System core mission ratio exceeded 70 percent. Nine of the FHLBanks had ratios of 70 percent or higher, the same as in 2019. The remaining FHLBanks had core mission ratios of 65.8 percent and 67.7 percent.

## FHLBank System Overview

## Financial Condition

Year-end total FHLBank assets were $\$ 820.9$ billion in 2020, down from $\$ 1.1$ trillion in 2019. The FHLBanks reported 2020 aggregate net income of $\$ 2.8$ billion, down $\$ 408$ million from 2019. Net interest income declined by $\$ 273$ million and non-interest expense increased by $\$ 152$ million year-over-year. The decrease in net interest income largely stemmed from a decline in earning assets.

Aggregate asset levels decreased substantially in 2020, driven by several asset classes. Advances decreased $\$ 218.9$ billion year-over-year as advance demand dropped precipitously with the Federal Reserve's expansionary policy in reaction to COVID-19. Cash and investments decreased $\$ 49.0$ billion, or 12.9 percent, as the FHLBanks reduced investments and liquidity. Mortgages decreased $\$ 9.7$ billion, or 13.3 percent, as yields on these investments deteriorated in 2020. At year-end, the FHLBanks held 51.5 percent of total assets as advances, 40.3 percent as cash and investments, and 7.7 percent as mortgages.

[^14]Figure 7: Historical Portfolio of the FHLBank System

The FHLBanks provide short- and long-term advances (loans) to their members. Advances are primarily collateralized by residential mortgage loans, commercial real estate loans, and government and agency securities. Community Financial Institutions may pledge small business, small farm, and small agri-business loans as collateral for advances. ${ }^{40}$

In 2020, FHLBank advances decreased by $\$ 218.9$ billion, from $\$ 641.5$ billion in 2019 to $\$ 422.6$ billion. In response to the onset of the COVID-19 pandemic, advances initially increased substantially to $\$ 806.9$ billion during the first quarter of 2020. Later, as financial markets calmed and member access to other sources of funds improved, advances declined by $\$ 384.3$ billion.

All FHLBanks reported decreases in advances in 2020.
The 2020 decrease marked the third consecutive year
with lower year-end balances following six years of growth that ended in 2017.

The FHLBanks operate both on-balance sheet and off-balance sheet programs through which members can sell mortgage loans. The Banks' AMA programs allow the FHLBanks to acquire and hold (on their balance sheet) conforming loans and loans guaranteed or insured by a department or agency of the U.S. government. The AMA programs are structured such that the FHLBanks manage the interest-rate risk and the participating member manages a substantial portion of the risks associated with originating the mortgage, including much of the credit risk. Through the three existing AMA programs, Mortgage Partnership Finance (MPF) and Mortgage Purchase Program (MPP), and Mortgage Asset Program, FHLBanks offer various products to members with differing credit risk-sharing structures.

[^15]As of December 31, 2020, the FHLBanks held on their balance sheets mortgages worth $\$ 62.9$ billion, down from $\$ 72.6$ billion at year-end 2019. This change was derived from mortgage purchases of $\$ 18.1$ billion and mortgage principal payments of $\$ 27.3$ billion. ${ }^{41}$

Under the off-balance sheet programs in operation through 2020, members of FHLBanks sell mortgages to the FHLBank of Chicago, which either concurrently sells the loan to either Fannie Mae (MPF Xtra) or an investor (MPF Direct), or pools the loans into securities guaranteed by the Government National Mortgage Association (MPF Government MBS). FHLBank members delivered $\$ 13.8$ billion of mortgages under MPF Xtra through the FHLBanks to Fannie Mae, up from $\$ 2.7$ billion in 2019. Members delivered $\$ 69$ million of jumbo mortgages under MPF Direct, however this program was paused in 2020 due to a lack of investors. Members also delivered $\$ 459$ million of mortgages to the FHLBank of Chicago to securitize through the MPF Government MBS program.

The aggregate investment portfolio of the FHLBanks consisted of 50.6 percent cash and liquidity, 39.8 percent mortgage-backed securities (MBS), and 9.6 percent other investments (principally agency debt securities and for the FHLBank of Chicago, federally-backed student loan asset-backed securities). The FHLBanks
held $\$ 131.8$ billion of MBS, primarily made up of MBS securitized by Freddie Mac and Fannie Mae. At year-end 2020, the FHLBanks held $\$ 167.5$ billion of cash and liquidity investments. ${ }^{42}$ The FHLBanks are significant participants in the federal funds market.

The FHLBanks' issuance of letters of credit to members had increased substantially over the past several years, but was down $\$ 13.9$ billion to $\$ 164.4$ billion by the end of 2020. Letters of credit are typically used by members to secure public unit deposits. If drawn, the FHLBank may issue an advance to cover the obligation of the member; however, letters of credit are rarely drawn.

Consolidated obligations totaled $\$ 748.6$ billion and consisted of $\$ 473.8$ billion of bonds ( 63.3 percent) and $\$ 274.8$ billion of discount notes ( 36.7 percent). ${ }^{43}$ Short-term funding (funding with a remaining maturity of less than one year) made up 78.1 percent of consolidated obligations at year-end 2020.

Net income was $\$ 2.8$ billion in 2020, and all FHLBanks were profitable. However, net income decreased $\$ 408$ million year-over-year because of fewer earning assets that drove a $\$ 273$ million decline in net interest income. Non-interest income decreased by $\$ 30$ million and non-interest expenses increased by $\$ 152$ million. See Figure 8.

Figure 8: Net Interest Income and Net Income

[^16]The aggregate return on assets ratio was 0.27 percent in 2020, down from 0.29 percent in 2019. The aggregate return on equity ratio was 5.19 percent, down from 5.71 percent. Sound profitability allowed the FHLBanks to continue to build retained earnings in 2020; aggregate retained earnings totaled $\$ 22.0$ billion,
or 2.7 percent of assets, at the end of 2020 , up from $\$ 20.6$ billion, or 1.9 percent of assets, the prior year. By contrast, at year-end 2008 during the housing crisis, the FHLBanks held only $\$ 3.0$ billion of aggregate retained earnings, which represented just 0.2 percent of assets (Figure 9).

Figure 9: Retained Earnings of the FHLBanks

Aggregate regulatory capital consisted of $\$ 27.4$ billion paid-in Generally Accepted Accounting Principles (GAAP) capital stock, $\$ 22.0$ billion in retained earnings, and $\$ 0.8$ billion of mandatorily redeemable capital stock as of December 31, 2020. ${ }^{44}$ At year-end 2020, all FHLBanks met both the minimum regulatory capital ratio of 4.0 percent of assets and their individual risk-based capital requirements.

[^17]
## Comparisons

The size and composition of FHLBank assets varies across the System. Individual FHLBanks ranged from total assets of $\$ 38.5$ billion to $\$ 137.0$ billion as of December 31, 2020. The ratio of advances to assets ranged from 38.8 percent to 67.2 percent. The ratio of
mortgage loans to assets was 7.7 percent overall, with one FHLBank exhibiting a ratio of 17.5 percent. The market value to par value of capital stock ratio was above 100 percent at each FHLBank.

Financial performance was adequate but not uniform across the FHLBanks in 2020. Net income ranged from $\$ 88$ million to $\$ 442$ million, while the return on equity ratio ranged from 2.67 percent to 6.69 percent.

At the aggregate level, FHLBank operating expenses made up 30.2 percent of net interest income.

## Membership

At the end of 2020, the FHLBanks had a total of 6,700 members, down from 6,738 in 2019, primarily due to mergers. Membership at each FHLBank ranged from 281 to 1,325 members. The aggregate membership consisted of 3,916 commercial banks, 1,560 credit unions, 530 insurance companies, 326 savings associations, 304 savings banks, and 64 non-depository Community Development Financial Institutions (CDFIs). Approximately 52.0 percent of FHLBank members were active borrowers. The top-10 largest
borrowers of each district accounted for more than 70 percent of advances at the FHLBanks of New York, Pittsburgh, Atlanta, and San Francisco. The decrease in advances in 2020 significantly affected the composition of advances by member type. Commercial banks accounted for 60.4 percent of advances at the end of 2019 and decreased to 42.8 percent of advances at the end of 2020. Conversely, advances to insurance companies increased from 17.9 percent to 30.4 percent of total advances over the same time period.

## Annual Examination Results

Capital - Capital management practices were strong or satisfactory at all of the FHLBanks in 2020. The FHLBanks have generally adequate levels of capital, including retained earnings, relative to their risk profiles. However, at certain FHLBanks, examiners identified areas for improvement, including complying with credit risk capital requirements, reducing reliance on excess stock and retained earnings, improving retained earnings methodology, and clarifying controls around excess stock management.

Asset Quality - Asset quality was strong or satisfactory at all but two FHLBanks. However, at all the FHLBanks, examiners identified areas for improvement of risk management practices, including model validation, collateral verification and pricing, collateral haircut methodology, counterparty designation and funding, and AMA policies and procedures.

In general, advances are low-risk loans, but they are subject to concentration risk. In 2020, the reduction in the concentration of advances to subsidiaries of large bank holding companies continued, declining for the fourth consecutive year. In 2019, the largest borrowers at the holding company level (Wells Fargo \& Company, J.P. Morgan Chase \& Co., Citigroup Inc., and BB\&T Corporation) represented $\$ 102.0$ billion or 16.0 percent of aggregate advances. In 2020, the largest aggregate borrowers at the holding company level (Metropolitan Life Insurance Company, Citigroup Inc., New York Community Bancorp Inc., and J.P. Morgan Chase \& Co.) accounted for just $\$ 58.7$ billion or 14.1 percent of aggregate advances, the lowest top four borrower concentration since at least 2010 (Figure 13).

Figure 13: Top 4 Holding Companies with Advances Outstanding
Percent of aggregate advances

The holding companies with the most advances outstanding to their subsidiaries change over time. Since 2010, Bank of America Corporation, Capital One, Citigroup Inc., Hudson City Bancorp, J.P. Morgan Chase \& Company, Metlife Inc., PNC Financial Services Group, Ally Financial, BB\&T Corporation, New York Community Bancorp Inc., and Wells Fargo \& Company have been among the top four borrowers at the end of the year.

Management - Examination conclusions were strong or satisfactory at nine of the FHLBanks in 2020. However, examiners identified areas of concern at most of the FHLBanks, including model risk oversight, data reporting, compliance with AHP regulations, advance pricing oversight, internal audit practices, and incorporation of FHFA guidance.

Earnings - Similar to previous years, while earnings and earnings quality continue to be strong or satisfactory at all FHLBanks, a few FHLBanks continued to rely on non-mission assets to support their earnings. Examiners also continue to monitor the potential effect of operating expenses on long-term profitability at several FHLBanks.

Liquidity - Liquidity risk management was strong or satisfactory at all FHLBanks. Examiners indicated few concerns, although they identified the need for improved documentation of liquidity practices and reporting of balances at some FHLBanks.

Sensitivity to Market Risk - Overall, the FHLBanks had moderate levels of market risk exposure. Market risk management was well controlled or satisfactory at all but two FHLBanks, and mortgage assets remained the greatest source of market risk. However, examiners identified enhancements several FHLBanks could make to their AMA programs, risk modeling, London Interbank Offered Rate (LIBOR) strategy, model documentation, and stress testing.

Operational Risk - The COVID-19 pandemic presented operational challenges to the FHLBanks, requiring most personnel to rapidly transition to full-time telework. Notwithstanding some initial challenges of operating remotely, overall, the FHLBanks continued to operate effectively and met member funding needs satisfactorily. While operational risk management was generally satisfactory, FHFA expressed supervisory concerns at one FHLBank, which continues to experience elevated operational risk due to a stressed internal control environment and a reliance on manual processes and controls. Across the other FHLBanks, examiners identified areas that exhibited or could exhibit unacceptable operational risks in business resiliency, information security, risk assessment, and existing backup support or "Buddy Bank" agreements. Several FHLBanks continue to have issues managing user access, data reporting, IT lifecycle management, and other IT matters.

## Examination Conclusions

## District 1: The Federal Home Loan Bank of Boston

At the time of its examination in October 2020, the overall condition and operations of the FHLBank of Boston were satisfactory. The FHLBank's balance sheet remained mission focused with the fourth highest advances to assets ratio among the FHLBanks. In addition, capital and liquidity levels were strong and earnings sufficiently covered operations. Primary examination concerns related to deficiencies in the FHLBank's IT policy and vulnerability management. Oversight and execution of the Affordable Housing Program (AHP) was satisfactory.

## District 2: The Federal Home Loan Bank of New York

At the time of its examination in April 2020, the overall condition and operations of the FHLBank of New York were satisfactory. Board and senior management oversight of the FHLBank remained sound, and financial condition was strong, as indicated by appropriate capital protection, effective provision of liquidity to members throughout the economic cycle, and consistently strong earnings results. Primary examination concerns related to long-term economic effects of the COVID-19 pandemic, updates to IT technology risk control practices, and enhancement of the retained earnings methodology. Oversight and execution of the AHP was satisfactory.

## District 3: The Federal Home Loan Bank of Pittsburgh

At the time of its examination in April 2020, the overall condition and operations of the FHLBank of Pittsburgh were satisfactory. The FHLBank continued to have strong capital and liquidity positions as well as satisfactory earnings that were both sufficient to support operations and pay a reasonable dividend to members. Further, the FHLBank exhibited satisfactory market, credit, and operational risk oversight and maintained a satisfactory mission orientation and conservative risk profile. Principal examination concerns related to concentrations in the advance and AMA portfolios, information security reporting, and reciprocal operating and back-up support agreements with another FHLBank and OF. Oversight and execution of the AHP was satisfactory.

## District 4: The Federal Home Loan Bank of Atlanta

At the time of the examination in January 2020, the overall condition and operations of the FHLBank of Atlanta were strong. The Bank had sound capital and liquidity positions with satisfactory earnings sufficient to support operations and retained earnings. Asset quality was strong with low credit risk. Oversight by the board of directors and management remained
effective. Primary examination concerns related to technology modernization and implementation, retained earnings policies and procedures, and a business component profitability analysis framework. Oversight and execution of the AHP was satisfactory.

## District 5: The Federal Home Loan Bank of Cincinnati

At the time of its examination in January 2020, the overall condition and operations of the FHLBank of Cincinnati were satisfactory. Sufficient levels of capital, liquidity, and earnings supported operations. Sensitivity to market risk was moderate. Oversight by the board of directors and management remained satisfactory as did operational risk management. Primary examination concerns related to the capital plan and structure, internal audit, Sarbanes-Oxley Act governance, and compliance with the AHP regulation. Oversight and execution of the AHP was generally satisfactory.

## District 6: The Federal Home Loan Bank of Indianapolis

At the time of its examination in September 2020, the overall condition and operations of the FHLBank of Indianapolis were satisfactory. The Bank had strong liquidity, satisfactory asset quality, sufficient capital and earnings, and acceptable operational risk. Oversight of operations by the board and senior management was satisfactory. Sensitivity to market risk continued to need improvement. Primary examination concerns related to market risk measurement, market and credit risk model governance, and credit risk management. Oversight and execution of the AHP was satisfactory.

## District 7: The Federal Home Loan Bank of Chicago

At the time of its examination in July 2020, the overall condition and operations of the FHLBank of Chicago were satisfactory. A strong capital position and adequate earnings supported moderate risk levels throughout FHLBank operations. Stressed, volatile economic and interest rate environments, at least partially caused by the COVID-19 pandemic, increased interest rate risk and challenged the FHLBank's market
risk measurement capabilities. However, the FHLBank continued to have a strong capital position to absorb adverse interest rate movements and adequate market risk management. In its role as MPF Provider, the FHLBank adequately managed the MPF program and collaborated with participating FHLBanks. Primary examination concerns related to the FHLBank's vulnerability management, information security controls, model risk management, calculation of riskbased capital, and its reciprocal operating and back-up support agreement with another FHLBank. Oversight and execution of the AHP was satisfactory.

## District 8: The Federal Home Loan Bank of Des Moines

At the time of its examination in September 2020, FHFA had supervisory concern about the FHLBank of Des Moines. While progress occurred under new executive leadership during 2020, management's oversight of key risks continued to need improvement. Operational risk remained high. While the level of credit risk was acceptable, the FHLBank of Des Moines needed to resolve many member credit risk management weaknesses. The FHLBank of Des Moines' financial condition was satisfactory because of its adequate capital position and earnings performance. Liquidity and sensitivity to market risk were adequate. FHFA maintained heightened oversight and supervision of the FHLBank of Des Moines. Primary examination concerns related to member collateral risk management, information technology project testing, and mortgage loan funding practices. Oversight and execution of the AHP was satisfactory.

## District 9: The Federal Home Loan Bank of Dallas

At the time of its examination in July 2020, the overall condition and operations of the FHLBank of Dallas were satisfactory. The Bank's financial condition was satisfactory, evidenced by adequate capitalization, strong liquidity, satisfactory earnings, and satisfactory asset quality. Oversight by the board and senior management remained effective overall; however, management of sensitivity to market risk needed improvement. Primary examination concerns related to market risk modeling and model risk management;
core mission achievement; credit risk management; and operational risk. Oversight and execution of the AHP was satisfactory.

## District 10: The Federal Home Loan Bank of Topeka

At the time of its examination in April 2020, the overall condition and operations of the FHLBank of Topeka were satisfactory. The FHLBank of Topeka had sufficient liquidity to meet members' advance demand and earnings to support operations and dividend strategies, but its capital position was marginally satisfactory. Oversight of operations by the board and senior management was adequate. Sensitivity to market risk and operational risk were moderate and credit risk was acceptable but increasing. Primary examination concerns related to the FHLBank of Topeka's advance pricing and governance; MPF valuation and pricing risk management; capital management practices; interest rate risk management and governance; and access management, exception management, and vulnerability reporting. Oversight and execution of the AHP was satisfactory.

## District 11: The Federal Home Loan Bank of San Francisco

At the time of its January 2020 examination, FHFA had supervisory concern about the FHLBank of San Francisco. The FHLBank of San Francisco's financial condition was satisfactory, evidenced by strong capital and liquidity positions, and adequate earnings. Sensitivity to market risk was controlled and operational risk was adequately managed. The FHLBank of San Francisco needed to improve credit risk management and overall board and senior management oversight. Primary examination concerns related to the FHLBank of San Francisco's MPF pricing and governance, model risk management, information security and data management, LIBOR transition operational readiness, and the retained earnings methodology. Oversight and execution of the AHP was satisfactory.

## Office of Finance

At the time of its examination in July 2020, the overall condition and operations of OF were satisfactory. Oversight by the board and senior management were effective. OF's operational risk position and management were satisfactory. Primary examination concerns related to operational resiliency, disaster recovery, modernization efforts, information technology controls, and business process mapping.

## Affordable Housing and Community Development

## Affordable Housing Programs

The Federal Home Loan Bank Act of 1932 (Bank Act) requires each of the FHLBanks to establish an Affordable Housing Program (AHP) to fund the purchase, construction, or rehabilitation of affordable housing for very low- and low- or moderate-income households. ${ }^{45}$ FHLBank member financial institutions can apply to their FHLBanks for AHP grants or subsidized advances, which the members pass on as grants or subsidized loans to eligible projects or grants to eligible households. Annually, each FHLBank is required by statute to fund its AHP with 10 percent of its net earnings from the prior year, provided that the entire FHLBank System meets its contribution minimum of $\$ 100$ million. In 2020, the FHLBanks made available more than $\$ 362.5$ million in AHP subsidies nationwide (Figure 14). From 1990, the AHP's first year, through 2020, the FHLBanks awarded approximately $\$ 7$ billion in AHP subsidies, assisting more than 990,000 households.

AHP subsidies must be used either to fund homeownership for households with incomes at or below 80 percent of area median income (AMI) or for the purchase, construction, or rehabilitation of rental housing in which at least 20 percent of the units will be occupied by, and affordable to, households with incomes at or below 50 percent of AMI.

[^18]FHFA's AHP regulation in effect in 2020 set forth requirements for the FHLBanks' implementation of their AHPs and provided for two distinct subsidy programs. ${ }^{46}$ First, under the mandatory competitive application program, the FHLBanks provided subsidized advances or grants to members on behalf of project sponsors for the purchase, construction, or rehabilitation of eligible projects. To evaluate the applications, each FHLBank adopted a competitive scoring process pursuant to parameters in the AHP regulation. Second, under the optional homeownership set-aside program, the FHLBanks disbursed grants through members to eligible homebuyers or homeowners for down payment or closing cost assistance, counseling, or rehabilitation in connection with the household's purchase or rehabilitation of an owner-occupied unit to be used as the household's primary residence.

In November 2018, FHFA issued a final rule amending the AHP regulation to provide the FHLBanks additional authority and flexibility over the use of their AHP funds and the selection of projects. The FHLBanks were required to comply with the final rule's owner-occupied retention agreement amendments by January 1, 2020, and with the rest of the final rule amendments by January 1, 2021. An FHLBank could choose, however, to comply with amended provisions prior to those compliance dates. In 2020, some FHLBanks chose to implement certain amended provisions prior to the applicable compliance dates, including streamlining monitoring requirements for rental projects funded by the AHP in conjunction with certain other federal programs.

Figure 14: Federal Home Loan Banks' AHP Statutory Contributions

## 

AHP Competitive Application Program - Under the AHP competitive application program, FHLBank members apply on behalf of project sponsors, typically nonprofit organizations or housing finance agencies, to their FHLBanks for AHP funds pursuant to a competitive application scoring process. In 2020, rental housing units made up approximately 90 percent
of all units funded under the competitive application program, a slight decrease from 91 percent in 2019 (Figure 15).

[^19]Figure 15: 2020 AHP Competitive Application Overviewa ${ }^{\text {a }}$

|  | Rental Housing Projects | Owner-Occupied <br> Housing Projects | Total Housing Projects |

a Data, which exclude withdrawn projects, are current as of December 31, 2020. Numbers expressed in dollars have been rounded to the nearest dollar.
b "Very low-income" is defined as households with incomes at or below 50 percent of AMI.

## AHP Homeownership Set-Aside Program - Each

 FHLBank is also authorized to set aside funds for grants to eligible households under homeownership set-aside programs. The limit that each FHLBank may allocate is the greater of either $\$ 4.5$ million or 35 percent of its statutorily required AHP annual contribution (10 percent of its net earnings for the prior year). All 11 FHLBanks offered homeownership set-aside programs in 2020, with total funding of approximately $\$ 101$ million. For 2020, at least one-third of an FHLBank's annual aggregate homeownership set-aside program allocation was required to be designated to assist lowor moderate-income first-time homebuyers.The 2018 amendments to the AHP regulation increased the maximum permissible homeownership set-aside program grant per household from $\$ 15,000$ to $\$ 22,000$, subject to annual adjustments upward in accordance with increases in FHFA's House Price Index. The compliance date for this provision was January 1, 2021. In 2020, as in 2019, one FHLBank opted to provide grants to households above $\$ 15,000$, prior to the compliance date. The average set-aside grant per household in 2020 was $\$ 6,705$. The most common use of set-aside grants was to defray borrowers' down payment and closing costs. In 2020, 777 set-aside grants also funded the rehabilitation of owner-occupied homes, a decrease from 1,298 set-aside grants in 2019 (see Figure 16).

Figure 16: Number of AHP Homeownership Set-Aside Grants Used for Rehabilitation Assistance (2007-2020)

AHP Subsidies Used in Conjunction with Other Sources of Funding - The AHP is designed to work with a variety of other funding sources and is frequently used in conjunction with funding from nonprofit organizations and housing programs at the federal, state, or local level. In 2020, approximately 66 percent of AHP projects received additional funding from federal programs (Figure 17), such as the HOME Investment Partnerships Program, the Community Development Block Grant Program, and the LowIncome Housing Tax Credit (LIHTC) Program. LIHTC was the most common source of funding, supporting about 67 percent of all approved AHP applications for rental housing.

## Community Investment Programs and Community Investment Cash Advance Programs

Each FHLBank, through its statutorily-mandated Community Investment Program (CIP), offers advances to its members at the cost of the FHLBanks' consolidated obligations of comparable maturities, taking into account reasonable administrative costs. ${ }^{47}$ CIP advances may assist the financing of housing for households with incomes at or below 115 percent of AMI. CIP funds also may be used for economic development projects in low- and moderate-income neighborhoods or that benefit low- and moderateincome households. In 2020, the FHLBanks issued approximately $\$ 2.9$ billion in CIP advances for housing projects and approximately $\$ 43.8$ million for economic development projects.

Each FHLBank may also offer optional Community Investment Cash Advance (CICA) programs, which are authorized under the CICA regulation and the Bank Act. ${ }^{48}$ Under these programs, FHLBanks may support the financing of targeted economic development projects by offering low-cost, long-term advances and grants through FHLBank members, as well as through housing associates such as state and local housing finance agencies and economic development finance authorities. In 2020, the FHLBanks provided approximately $\$ 3.6$ billion in CICA advances for economic development projects, such as commercial, industrial, and manufacturing projects, social services, and public facilities that met the requirements for qualifying as one of the specified targeted beneficiaries in the CICA regulation.

## Community Development Financial Institutions -

 Two types of CDFIs are eligible to become FHLBank members: federally insured depositories and nondepository CDFIs. As of December 31, 2020, 64 non-depository CDFIs were members of the FHLBank System, up from 60 such members in 2019.49[^20]
## FHLBank Housing Goals

The Bank Act requires that FHFA establish housing goals with respect to the purchase of mortgage loans, if any, by the FHLBanks, and that these goals be consistent with those established for the Enterprises, taking into account the FHLBanks' unique mission and ownership structure. FHFA's FHLBank housing goals regulation establishes housing goals for singlefamily loans purchased by the FHLBanks from their members through their Acquired Member Assets (AMA) programs. ${ }^{50}$ The housing goals measure the extent to which FHLBanks' AMA programs serve lowand very low-income families and families residing in low-income areas, as well as the extent to which these programs are used by small FHLBank members.

Until 2021, the housing goals applied only to a FHLBank that purchased more than $\$ 2.5$ billion, measured in unpaid principal balance, of loans through its AMA programs in a given year. For each FHLBank subject to the housing goals, the housing goals regulation imposed requirements with respect to four separate categories: low-income home purchase, very low-income home purchase, low-income areas home purchase, and low-income refinance. For each category, FHFA used Home Mortgage Disclosure Act (HMDA) data to develop a market comparison benchmark level and then evaluated whether the percentage share of the FHLBank's applicable AMA mortgage purchases met or exceeded that level.

In 2019, four FHLBanks exceeded the $\$ 2.5$ billion volume threshold: Chicago, Cincinnati, Des Moines, and Topeka. FHFA evaluated the FHLBanks' 2019 housing goals performance based on their AMA mortgage purchases and determined that the FHLBanks did not meet the housing goal levels for the four goal categories in 2019 (see figures 18-21).

In 2020, three FHLBanks exceeded the $\$ 2.5$ billion volume threshold: Chicago, Cincinnati, and Topeka. FHFA is in the process of evaluating their housing goals performance. FHFA's evaluation will be completed after the release of the 2020 HMDA data.

On June 4, 2020, FHFA published a final rule amending the FHLBank housing goals regulation. The rule, which applies to AMA loan purchases after 2020, eliminated the $\$ 2.5$ billion volume threshold, such that all FHLBanks are now subject to the housing goals. The regulation now includes a single, combined, prospective mortgage purchase housing goal, rather than four distinct housing goals measured retrospectively via market comparison. It also includes a new small member participation housing goal for participation by small institutions. The rule requires that 20 percent of a FHLBank's AMA purchases, measured in number of loans, be loans for some combination of low-income families, very low-income families, or families in low-income areas, provided that no more than 25 percent of the purchases that count towards achievement of this 20 percent level be for families with incomes above 80 percent of AMI. The rule also provides that, of all institutions that sell at least one AMA loan to a given FHLBank in a year, at least 50 percent of the institutions must have assets not in excess of $\$ 1,224,000,000$, as adjusted annually by FHFA (the limit for 2021 is $\$ 1,239,000,000$ ). Finally, the rule allows FHLBanks to propose different target levels for mortgage purchases and small member participation, other than 20 and 50 percent, respectively, subject to FHFA approval.

## Community Support Program

The Bank Act requires FHFA to adopt regulations establishing standards of community investment or service that FHLBank members must meet in order to maintain access to long-term advances. ${ }^{51}$ The Bank Act further states that the regulations shall take into account factors such as a member's performance under the Community Reinvestment Act of 1977 (CRA) and the member's record of lending to firsttime homebuyers. ${ }^{52}$ FHFA's Community Support Program regulation implements these statutory provisions by establishing standards and procedures for the submission and review of FHLBank members' performance. ${ }^{53}$ Under the regulation, every two years, members are required to submit to FHFA a community support statement describing their latest CRA ratings and activities supporting first-time homebuyers, if applicable.

Based on its review of each member's community support statement, FHFA determines whether the member has complied with the community support standards, which, in part, determines whether the member's access to long-term advances and its FHLBank's AHP, CIP, and CICA programs will be restricted. FHFA gives each FHLBank member one of three community support review results: compliance, probation, or restriction (Figure 22).

The 2021 biennial review period began April 1, 2021 and ends October 29, 2021.

[^23]Figure 22: FHFA Community Support Statement Review Results, Standards and Actions

| Results | Standard | Action |
| :---: | :---: | :---: |
| Compliance | Member institution complies with the requirements of FHFA's Community Support Program regulation. | Member maintains access to the FHLBank's long-term advances, and new participation in AHP, CIP, and CICA programs. |
| Probation | Member institution is placed on probation if: <br> - its most recent CRA rating was "Needs to Improve," and <br> - either the member has not received any other CRA rating or its second-most recent CRA rating was "Outstanding" or "Satisfactory." | If a member is placed on probation, the member may continue to obtain long-term FHLBank advances and access to AHP, CIP, and CICA programs during the probationary period. The probationary period runs until the member's next CRA rating. |
| Restriction | Member institution is placed on restriction if: <br> - it does not submit a community support statement; <br> - it has not demonstrated compliance with the first-time homebuyer standard; <br> - its most recent CRA rating was "Substantial Noncompliance;" <br> - its most recent CRA rating was "Needs to Improve" and its second-most recent CRA rating was "Needs to Improve;" or <br> - its most recent CRA rating was "Needs to Improve," its second-most recent CRA rating was "Substantial Noncompliance," and its third-most recent CRA rating was "Needs to Improve" or "Substantial Noncompliance." | If a member is placed on restriction, the member may not obtain long-term FHLBank advances and may not engage in new AHP, CIP, and CICA activity until the restriction is removed. |

## Directors' Compensation and Expenses

The FHLBanks are governed by boards of directors, which range in size from 14 to 22 members. Statute requires the majority of FHLBank board members to be Member directors, who are officers or directors of member institutions, and at least 40 percent to be Independent directors. Independent directors must reside in the district of the FHLBank where they serve as a board member and cannot be officers of a FHLBank or directors, officers, or employees of a member of the FHLBank where they serve. OF's board comprises 5 Independent directors and all 11 FHLBank presidents. The FHLBank presidents do not receive compensation for their service on the OF board.

The FHLBanks are permitted to provide reasonable compensation to their boards of directors for time required and necessary expenses, subject to FHFA review. Each of the 11 FHLBanks and OF provides FHFA with its Directors Compensation Policy (Policy), which establishes the maximum compensation for each director, the criteria for each director to receive that compensation, and the timing of payments for the upcoming year.

FHFA reviews each Policy to assess the reasonableness of the proposed maximum compensation considering third-party market data and to ensure that it includes a provision for reduced compensation of any director who does not attend a sufficient number of meetings or fails to be a contributing board member. In 2020, based on the reports of attendance and compensation paid submitted by OF and each FHLBank, FHFA found that OF and all the FHLBanks adhered to their Policies and reduced director compensation when required. Figure 23 shows the approved maximum compensation amounts available in 2020 for the listed board positions at each FHLBank and OF .

Included in director compensation are payments for certain expenses incurred by a director's spouse or guest. Spouse and guest payments include travel expenses reimbursed to the director and the cost per attendee of group events offered to directors and their guests in conjunction with a meeting. Figure 24 contains information on FHLBank directors' compensation in 2020 and its component parts: compensation paid in cash, compensation deferred, and amounts paid for spouse and guest expenses.

a At the FHLBank of Boston, a director was declared ineligible on March 17, 2020 and another director was declared ineligible on April 28, 2020. Neither vacancy was filled before the year-end.
b At the FHLBank of Dallas, a director died in February 2020 and another director died in June 2020.
c At the FHLBank of Topeka, a director filled a vacancy beginning on July 1, 2020.

In addition to information about director compensation, the FHLBanks and OF are required each year to submit to FHFA for review expenses incurred by the boards of directors, which are either paid directly by the FHLBank or reimbursed to the directors. Figure 25 summarizes this information. Board Expenses Attributable to Directors includes all travel-related expenses for which the directors are reimbursed, or which are billed directly to the FHLBank, including transportation, lodging, and food. Director Training Expenses includes the costs of external speakers at board meetings, board member attendance at training conferences, and educational materials. Other Director Expenses includes the costs of attendance at FHLBank-related events, such
as annual member meetings, chair and vice chair meetings, and Council of FHLBanks meetings. Group Expenses includes costs not directly attributable to individuals, such as food and beverages at meetings, audio-visual services, and meeting space rentals.
Figure 26 summarizes the average and total costs of the directors of each FHLBank and OF as the sum of compensation and expenses.

## DIVERSITY AND INCLUSION

In This Chapter
FHFA's Diversity and Inclusion Efforts and Statutory Responsibilities ..... 63
Promoting Diversity and Inclusion in FHFA's Workforce ..... 63
Supervision and Examination of the Regulated Entities' Diversity and Inclusion Program. ..... 64
Diversity and Inclusion Examination Results ..... 65

## FHFA's Diversity and Inclusion Efforts and Statutory Responsibilities

Pursuant to Section 342 of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (DoddFrank Act), ${ }^{54}$ FHFA's Office of Minority and Women Inclusion (OMWI) advances diversity and inclusion (D\&I) at the Agency and the regulated entities. This includes developing and implementing standards to ensure equal employment opportunity (EEO) within the Agency, and to promote the racial, ethnic, and gender diversity of FHFA's workforce and senior management; increasing participation of minorityand women-owned businesses in FHFA programs and contracts and providing technical assistance to such businesses; and assessing the D\&I policies and practices of the regulated entities through supervision, policy oversight, and annual on-site examinations. ${ }^{55}$ Led by a director, OMWI staff consists of an associate director, diversity and inclusion specialists, financial institution examiners, and policy, data, management, and program analysts.

FHFA is among seven federal financial agencies, often referred to as the Financial Institutions Reform, Recovery, and Enforcement Act (FIRREA) agencies, in addition to the U.S. Department of the Treasury, that the Dodd-Frank Act requires to submit an annual report to Congress providing an overview of its workforce demographics, contracting data, and D\&I program, strategies, and initiatives. FHFA delivered its 2020 OMWI Annual Report to Congress in March 2021. ${ }^{56}$ The report describes FHFA's progress in expanding its contracting opportunities within the Agency, and it summarizes OMWI's significant activities during calendar year 2020, including successes achieved and challenges to overcome. Select highlights from the report are summarized below.

[^25]FHFA is required by statute to promote diversity among all levels of the workforce, including management and executives. OMWI leads the Agency's efforts to meet this requirement. Between 2016 and 2020, FHFA saw a decrease in the proportion of women supervisors (from 48.4 percent to 39.7 percent), and minority women executives (from 18.8 percent to 13.0 percent). However, over that same time period, the number of women executives increased from 16 to 18 , the number of minority women supervisors increased from 14 to 16 , and the proportion of minority supervisors increased from 39.1 percent to 42.5 percent.

To foster a diverse workforce of the future, the Office of Human Resources Management (OHRM) and OMWI conduct outreach for FHFA's recruitment and internship activities. Each year the Agency typically sponsors its Pathways Summer Internship Program for college and graduate students, as well as recent college graduates. Last year brought unique challenges to the program as the Agency moved to mandatory telework in March, a posture that continued for the rest of 2020. Nevertheless, FHFA continued the internship program, providing each division and office the choice of participating virtually or not at all, given the inherent challenges of distance learning the entire duration of the program. Agency leaders and mentors adapted to a virtual format and accommodated a smaller group of interns. The program provides meaningful training and professional development opportunities for individuals interested in a career in financial services or the federal government, especially those pursuing degrees in economics, financial or business management, statistics, mathematics, accounting, and information technology. These internships are paid positions that offer students work experiences related to their field of study.

FHFA set a record 90.3 percent response rate in the 2020 Federal Employee Viewpoint Survey (FEVS). Some 83.4 percent of FHFA employees who participated in the survey viewed their supervisor as committed to a diverse workforce, which is an 8 -percentage point increase over the previous year
and the highest percentage since 2015. In response to related FEVS results and other feedback, OMWI collaborated with the Learning Academy to develop the Agency's first mentoring program in 2020 for employees interested in career development.

## Supervision and Examination of the Regulated Entities' Diversity and Inclusion Programs

The Enterprises and the FHLBanks are unique among federally regulated financial institutions in that they are required by law to establish an OMWI, or its functional equivalent, to promote diversity and ensure inclusion in all business activities, including employment, management, and contracting, in accordance with FHFA standards and requirements. ${ }^{59}$ FHFA's Minority and Women Inclusion regulation (MWI regulation) implementing the statute requires the regulated entities to "develop, implement, and maintain policies and procedures to ensure, to the maximum extent possible in balance with financially safe and sound business practices, the inclusion and utilization of minorities, women, individuals with disabilities, and minority-, women-, and disabled-owned businesses in all business and activities and at all levels" of the organization. ${ }^{60}$ FHFA's MWI regulation also requires each regulated entity to develop a D\&I strategic plan and report specific data to FHFA. In 2020, FHFA's director approved the issuance of an annual D\&I Report of Examination (ROE) for each regulated entity that includes a D\&I composite rating and performance reporting beginning with the 2021 examination cycle. A D\&I composite rating will more clearly inform FHFA's assessment of the regulated entities' programs and performance.

In 2020, OMWI's supervision and examination team completed its fourth year of examinations of each regulated entity's D\&I Program (Program). OMWI completed 14 examinations, surpassing its FY2021 Performance Measure target of 12 examinations.

[^26]Leveraging the results from previous examinations (2017-2019), OMWI provided further guidance to the regulated entities in the areas of workforce, contracting, and finance. Also, OMWI continued to enhance its standards and systems that support standardized data reporting under the MWI regulation. These enhancements facilitate OMWI's continued development and assessment of D\&I standards and regulatory compliance across the regulated entities.

In alignment with the requirements of FHFA regulation and the guidance in the 2020 Conservatorship Scorecards for each of the Enterprises and Common Securitization Solutions, LLC (CSS) (2020 Scorecard), in 2020 both Enterprises and CSS continued to implement a formalized process to assess and, where appropriate, integrate $\mathrm{D} \& \mathrm{I}$ across programs and initiatives. They also identified measurable D\&I goals aligned with the objectives in the 2020 Scorecard.

FHFA's OMWI supervises and performs annual on-site examinations of the Enterprises' and FHLBank System's Programs. An OMWI Senior Examination Specialist leads and carries out D\&I examination activities, and continuous monitoring and ongoing supervision throughout the year. Consistent with the requirements of FHFA regulation, in 2020, the Enterprises, CSS and the FHLBank System developed strategies to ensure the consideration and integration of D\&I in all their businesses and activities. Both Enterprises, CSS and each of the 11 FHLBanks and the Office of Finance established $\mathrm{D} \& \mathrm{I}$ goals and measurable targets. FHFA's OMWI worked with the chairs and vice chairs of the FHLBank System's boards of directors to identify D\&I competencies, which should be considered when assessing and selecting board members across the FHLBank System. As a result, in 2020, OMWI issued an Advisory Bulletin on Board Diversity, which applies to the FHLBank System and provides guidance on the D\&I program oversight responsibilities of the FHLBank System's boards of directors.

## Diversity and Inclusion Examination Results

The scope of the examinations changes from year to year. The results summarized below are based on the aspects of each regulated entity's Program that were examined in 2020: Board Oversight, Compliance, Finance, Enterprise Risk Management (ERM), and Regulatory Reporting Governance.

## Fannie Mae

At the time of its examination in 2020, the Program needed improvement. Although the Enterprise established D\&I policies, procedures, processes, and practices to govern its Program, continued enhancement of those documents and practices was necessary. FHFA issued a finding requiring the Enterprise to develop written procedures to evidence the process for overseeing the Program. Management adequately remediated the finding. FHFA also found that while Fannie Mae reported timely D\&I data, the Enterprise needed to refine its regulatory reporting policies, procedures, and practices to enable full compliance with the Agency's quarterly regulatory reporting requirements. FHFA's data management review was carried over to the 2021 D\&I examination. Board oversight was adequate and the OMWI Officer provided sufficient updates to the board. In 2020, the Enterprise named the executive vice president (EVP) and chief administrative officer (CAO) as the OMWI Officer and the Enterprise also hired a new vice president, D\&I. The OMWI reporting structure conformed to the MWI regulation.

## Freddie Mac

At the time of its examination in 2020, the Program was satisfactory given FHFA's scope of review, which focused on remediation activities to implement foundational elements of the Program. The Enterprise continued to dedicate resources to implement and execute its Program, although it encountered challenges specifically related to the implementation of corrective action to satisfactorily remediate the 2017 finding regarding Program governance, which it succeeded in doing in 2020. Board oversight and the governance
framework were adequate and the OMWI Officer was actively engaged in D\&I activities. In December 2020, the Enterprise's OMWI Officer resigned and management appointed an interim OMWI Officer to lead the Program. Management also submitted a remediation package for the closure of the 2017 internal audit (IA) finding, which FHFA will assess during the $2021 \mathrm{D} \& \mathrm{I}$ examination.

## Common Securitization Solutions, LLC

In 2020, CSS developed and continued working to implement Program strategies with particular focus on ensuring the consideration of diverse candidates at various levels of the workforce and identifying and utilizing diverse suppliers in its contracting. During the year, CSS collaborated with FHFA's OMWI to improve its 2020 Scorecard ratings, including by restating its D\&I Policy and Strategic Plan and validating data submission procedures. CSS identified three 2020 Scorecard performance metrics/targets for workforce diversity for which FHFA rated CSS "complete"; however, FHFA encouraged CSS to continue collaborating with FHFA's OMWI to ensure all opportunities to embed D\&I were identified, D\&I strategies executed, and all D\&I goals and targets met.

## District 1: The Federal Home Loan Bank of Boston

At the time of the examination in October 2020, the Program was satisfactory, although the Compliance program for D\&I and the finance diversity strategic planning process needed improvement not withstanding the Bank's establishment of D\&I policies, processes, and procedures. Board oversight was satisfactory and the OMWI Officer provided adequate updates to the board. The Bank's D\&I organizational structure was appropriate with the OMWI Officer leading OMWI and acting as a member of the Bank's executive team. The Bank adequately remediated the finding from the previous examination. At this examination, FHFA issued findings in the areas of compliance, finance, and ERM. Management concurred with the findings and agreed to remediate them timely.

## District 2: The Federal Home Loan Bank of New York

At the time of the examination in April 2020, the Program was satisfactory. Management adequately remediated the findings from the previous examination. Board oversight was effective and the OMWI governance processes for regulatory reporting were adequate. Generally, policies, procedures, and practices governing D\&I were acceptable and allowed the OMWI Officer to effectively implement and oversee the Program. During the strategic planning process, the Capital Markets Group, in consultation with the OMWI, established financial transactions targets, although the supporting analysis and rationale supporting targets, which deviated from the Bank's strategic posture, were not well documented, prior to their submission to management and the board for review and approval. FHFA issued a finding requiring corrective action in the area of D\&I strategic planning.

## District 3: The Federal Home Loan Bank of Pittsburgh

At the time of the examination in April 2020, the Program was satisfactory. Management adequately remediated the findings from the previous examination. Board oversight was effective and the OMWI governance processes for regulatory reporting were sufficient. Generally, policies, procedures, and practices governing D\&I were acceptable and allowed OMWI, under the leadership of the OMWI Officer, to implement and oversee the Program. Capital Markets performed outreach activities to provide business opportunities for new and existing diverse broker-dealers but did not document such activities. While the ERM department completed a periodic gap analysis against the MWI Rule, it did not complete an analysis that included a review of all OMWI regulatory guidance, and internal D\&I policies and procedures. FHFA issued findings requiring corrective action in the areas of D\&I compliance and Capital Markets outreach.

## District 4: The Federal Home Loan Bank of Atlanta

At the time of the examination in January 2020, the Program needed improvement. Board oversight was adequate and the OMWI regulatory reporting practices were acceptable. The ERM department adequately identified D\&I risks. Generally, policies, procedures, and practices governing $\mathrm{D} \& \mathrm{I}$ were acceptable and allowed the OMWI Officer and OMWI to implement and oversee the Program. In 2019, the Compliance department (Compliance) performed a compliance review and a gap analysis against the MWI regulation and did not identify any deficiencies, although FHFA noted opportunities for improvement in the D\&I Compliance program and the need for OMWI to adequately evidence its management and oversight of the strategic planning process. As a result, FHFA issued findings requiring corrective action in the areas of D\&I strategic planning and compliance.

## District 5: The Federal Home Loan Bank of Cincinnati

At the time of the examination in January 2020, the Program needed improvement although management successfully remediated prior examination findings. Board oversight was effective; Compliance performed effective and timely reviews of the Program; ERM adequately considered D\&I risks and mitigating controls when performing the risk assessment process; and the finance governance framework was adequate. FHFA found deficiencies in the areas of D\&I strategic planning and regulatory reporting governance where the goals, initiatives, and action plans used to develop and achieve metrics and targets were not adequately communicated. Management's process for establishing strategic D\&I goals for financial D\&I activities was inadequate and the Bank did not evidence OMWI's oversight responsibilities during the goal-setting process. The Program's regulatory reporting governance framework did not include adequate policies, procedures, and processes and OMWI did not perform and document adequate quality control reviews prior to its submission of regulatory reporting to the Agency. As a result, FHFA issued findings requiring corrective action in the areas of D\&I strategic planning and regulatory reporting governance.

## District 6: The Federal Home Loan Bank of Indianapolis

At the time of the examination in October 2020, the Program was satisfactory. The Bank established adequate $\mathrm{D} \& \mathrm{I}$ policies, procedures, processes, and practices. Management successfully remediated findings from the prior examination and FHFA did not issue any findings at this examination. Board oversight was satisfactory and the OMWI Officer provided adequate updates to the board. The Bank's D\&I organizational structure was appropriate. The OMWI Officer led OMWI and was a member of the Bank's Executive Management Committee.

## District 7: The Federal Home Loan Bank of Chicago

At the time of the examination in July 2020, the Program needed improvement. While the Bank established D\&I policies and procedures, certain processes, practices, and procedures required improvement. FHFA issued findings in the areas of regulatory reporting, ERM, compliance, and strategic planning. Management concurred with the findings and agreed to remediate them timely. Board oversight was effective and the OMWI Officer provided adequate updates to the board. The Bank's D\&I organizational structure was appropriate with the OMWI Officer leading OMWI and acting as a member of the Bank's Executive Team. The Bank incorporated D\&I into its processes, practices, and procedures, and adequately remediated the 2019 examination finding.

## District 8: The Federal Home Loan Bank of Des Moines

At the time of the examination in September 2020, the Program needed improvement. While the Bank had established D\&I policies and procedures, certain processes, practices, and procedures required improvement. FHFA issued findings in the areas of regulatory reporting, compliance, and finance.
Management concurred with the findings and agreed to remediate them timely. Board oversight was satisfactory and the OMWI Officer provided adequate updates to the board. The Bank's D\&I organizational structure was appropriate with the OMWI Officer leading

OMWI and acting as a member of the Bank's executive team. Management adequately remediated all the findings from the previous examination.

## District 9: The Federal Home Loan Bank of Dallas

At the time of the examination in July 2020, the Program was satisfactory. Management successfully remediated findings from the prior examination and implemented sound policies, procedures, and processes which allowed for adequate implementation and oversight of the Program. The OMWI Officer and OMWI Management Committee had primary accountability and responsibility for Program governance. FHFA did not issue any findings at this examination.

## District 10: The Federal Home Loan Bank of Topeka

At the time of the examination in April 2020, the Program was unsatisfactory. Board oversight was adequate. However, FHFA identified several deficiencies in the Bank's Program and, as a result, issued findings requiring corrective action in the areas of D\&I regulatory reporting, organizational framework, strategic planning, compliance, ERM, finance, and regulatory reporting governance.

## District 11: The Federal Home Loan Bank of San Francisco

At the time of the examination in January 2020, the Program needed improvement. While we saw corrective action since the 2019 examination and management successfully remediated findings from that examination, given that most of the Program improvements were the result of relatively newly implemented processes, the Bank needs a period of performance to demonstrate the sustainability of such corrective action. We will evaluate those efforts at the next examination to conclude on the adequacy and effectiveness of such processes. Generally, policies, procedures, and practices governing D\&I were sound and allowed for adequate implementation and oversight by OMWI. Management remained diligent and focused on fully implementing a sustainable program. FHFA did not issue any findings at this examination.

## Office of Finance

At the time of the examination in July 2020, the Program was satisfactory. Management successfully remediated findings from the prior examination. Management implemented sound policies, procedures, and processes, which allowed for adequate implementation and oversight of the Program. The OMWI Officer and OMWI had primary accountability and responsibility for Program governance and implementation of the D\&I strategies. FHFA did not issue any $\mathrm{D} \& I$ findings at this examination.

## REGULATORY ACTIVITIES

Regulatory activities of FHFA support FHFA's mission as regulator of the Enterprises and the FHLBanks. In 2020, FHFA issued 23 proposed rules, final rules, policy guidance documents, and regulatory orders, which are summarized in the following tables. FHFA has published the listed rules in the Federal Register.

The tables also indicate if a proposed rule has been adopted in final form since the proposal was published. More information about FHFA's regulatory activities is available on FHFA's website.

|  |  |  | Proposed Rules: Regulated Entities |
| :---: | :---: | :---: | :---: |

## Final Rules: Regulated Entities

| Rule/Regulation Title | Reference | Date (2020) | Description/Explanation/Comments |
| :---: | :---: | :---: | :---: |
| 2021 Enterprise Housing Goals Final Rule | $\begin{gathered} 85 \text { FR 82881; } \\ 12 \text { CFR Part } \\ 1282 \end{gathered}$ | December 21 | Amends FHFA's regulation on the annual housing goals for mortgages purchased by the Enterprises. The housing goals include separate categories for single-family and multifamily mortgages on housing that is affordable to low-income and very low-income families, among other categories. The final rule established benchmark levels for each of the housing goals and subgoals for 2021 that are the same as those for the immediately preceding years. <br> The rule went into effect on February 19, 2021. |
| Enterprise Regulatory Capital Framework Final Rule | $\begin{gathered} 85 \text { FR 82150; } \\ 12 \text { CFR Part } \\ 1240 \end{gathered}$ | December 17 | Establishes risk-based and leverage capital requirements for the Enterprises. The final rule also makes conforming amendments to definitions in FHFA's regulations governing assessments and minimum capital and removes the Office of Federal Housing Enterprise Oversight's (OFHEO) regulation on capital for the Enterprises. <br> The rule went into effect on February 16, 2021. There are deferred compliance deadlines for specified parts of the rule. |
| Margin and Capital Requirements for Covered Swap Entities Joint Final Rule | 85 FR 39754; 12 CFR Part 1221 | July 1 | FHFA adopted a joint final rule with the OCC, the Board of Governors of the Federal Reserve System (Federal Reserve Board), the Federal Deposit Insurance Corporation (FDIC), and the Farm Credit Administration (FCA) - collectively, the agencies - to amend the Swap Margin Rule, which requires regulated entities to exchange margin with their counterparties for swaps that are not centrally cleared. The Swap Margin Rule as adopted in 2015 takes effect under a phased compliance schedule spanning from 2016 through 2020, and the entities covered by the rule continue to hold swaps in their portfolios that were entered into before the effective dates of the rule. Such swaps are grandfathered from the Swap Margin Rule's requirements until they expire according to their terms. The final rule permits swaps entered into prior to an applicable compliance date (legacy swaps) to retain their legacy status in the event that they are amended to replace an interbank offered rate (IBOR) or other discontinued rate, modifies initial margin requirements for non-cleared swaps between affiliates, introduces an additional compliance date for initial margin requirements, clarifies the point in time at which trading documentation must be in place, permits legacy swaps to retain their legacy status in the event that they are amended due to technical amendments, notional reductions, or portfolio compression exercises. In addition, the final rule addresses comments received in response to the agencies' publication of the interim final rule that would preserve the status of legacy swaps meeting certain criteria if the United Kingdom withdraws from the European Union (Brexit) without a negotiated settlement agreement. <br> The final rule went into effect on August 31. |

## Final Rules: Regulated Entities

| Rule/Regulation Title | Reference | Date (2020) | Description/Explanation/Comments |
| :---: | :---: | :---: | :---: |
| Margin and Capital Requirements for Covered Swap Entities Joint Interim Final Rule | 85 FR 39464; 12 CFR Part 1221 | July 1 | FHFA adopted a joint interim final rule with the OCC, the Federal Reserve Board, the FDIC, and the FCA - collectively, the agencies - to amend the Swap Margin Rule (described immediately above). Due to the COVID-19 pandemic, the Agencies are extending by one year the phases 5 and 6 implementation deadlines for initial margin requirements from September 1, 2020, to September 1, 2021 (for phase 5) and from September 1, 2021, to September 1, 2022 (for phase 6). The Agencies' objective is to give covered swap entities additional time to meet their initial margin requirements under the rule so as not to hamper any efforts underway to address exigent circumstances caused by COVID-19. <br> The interim final rule went into effect on September 1. |
| Federal Home Loan Bank Housing Goals Final Rule | $\begin{gathered} 85 \text { FR 38031; } \\ 12 \text { CFR Part } \\ 1281 \end{gathered}$ | June 25 | Replaces the previous regulation's four separate retrospective housing goals with a single prospective mortgage purchase housing goal with a target level of 20 percent. The final rule also establishes a separate small member participation housing goal with a target level of 50 percent. The final rule provides that a FHLBank may request FHFA approval of alternative target levels for either or both of the goals. The final rule also establishes that housing goals apply to each FHLBank that acquires any Acquired Member Assets (AMA) mortgages during a year, eliminating the $\$ 2.5$ billion volume threshold that previously triggered the application of housing goals for each FHLBank. Enforcement of the final rule will phase in over three years. <br> The rule went into effect on August 24. The enforcement phase-in period applies to calendar years 2021, 2022, and 2023. |
| Stress Testing of Regulated Entities Final Rule | 85 FR 16528; 12 CFR Part 1238 | March 24 | Amends FHFA's regulatory stress testing requirements, consistent with section 401 of the Economic Growth, Regulatory Relief, and Consumer Protection Act (EGRRCPA). These amendments adopt the proposed amendments without change to modify the minimum threshold for the regulated entities to conduct stress tests increased from $\$ 10$ billion to $\$ 250$ billion; removal of the requirements for FHLBanks subject to stress testing; and removal of the adverse scenario from the list of required scenarios. These amendments align FHFA's rule with rules adopted by other financial institution regulators that implement the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) stress testing requirements, as amended by EGRRCPA. <br> The rule went into effect on March 24. |
| Civil Money Penalty Inflation Adjustments Final Rule | $\begin{gathered} 85 \text { FR 4903; } \\ 12 \text { CFR Parts } \\ 1209,1217 \text {, and } \\ 1250 \end{gathered}$ | January 28 | Amends FHFA's Rules of Practice and Procedure and other agency regulations to adjust each civil money penalty within its jurisdiction to account for inflation, pursuant to the Federal Civil Penalties Inflation Adjustment Act of 1990, as amended by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015. <br> The rule went into effect on January 28 and is applicable beginning January 15. |

## Policy Guidance: Regulated Entities and the Office of Finance

| Policy Subject | Reference | Date (2020) | Description/Explanation/Comments |
| :---: | :---: | :---: | :---: |
| Advisory <br> Bulletin on Enterprise Risk Management Program | AB 2020-06 | December 11 | Communicates to the Enterprises FHFA's guidance for an effective enterprise risk management (ERM) program to maintain safe and sound operations. The ERM program establishes the foundation and sets the framework for an Enterprise's enterprise-wide risk management practices and processes. This Advisory Bulletin (AB) applies to all risk management activities undertaken by the Enterprises and is consistent with risk area-specific guidance. The sophistication of the ERM program should be commensurate with the Enterprise's capital structure, risk appetite, size, complexity, activities, and other appropriate riskrelated factors. |
| Advisory Bulletin on Enterprise Cybersecurity Incident Reporting | AB 2020-05 | August 21 | Communicates to the Enterprises FHFA's supervisory expectations for cybersecurity incident reporting to maintain safe and sound operations at the Enterprises. |
| Advisory Bulletin on Financial Reporting and Disclosure and External Audit | AB 2020-04 | August 20 | Communicates to the regulated entities FHFA's supervisory expectations for oversight and management of financial reporting and disclosures and of the external audit function. |
| Advisory Bulletin on Guidance on the Use of Proxies for Determining the Income of Subsequent Purchasers of Owner-Occupied Units Sold by AHP-Assisted Households during the AHP Retention Period | AB 2020-03 | July 20 | Communicates FHFA's guidance to the FHLBanks, pursuant to the Affordable Housing Program (AHP) regulation, on the FHLBanks or their designees' use of proxies for determining whether the subsequent purchaser of an owner-occupied unit sold, transferred, or assigned by an AHP-assisted household during the AHP five-year retention period is low- or moderate-income (LMI). Specifically, the guidance provides for the use of a proxy based on the U.S. Department of Housing and Urban Development's HOME Investment Partnerships Program (HOME) and Housing Trust Fund homeownership value limits for existing housing. The AB also discusses the option for FHLBanks to adopt an alternative proxy or proxies that are reliable indicators that the subsequent purchaser is LMI. In addition, the AB provides guidance on documentation requirements as well as content of a FHLBank's AHP Implementation Plan. |
| Advisory Bulletin on Board Competencies for Diversity and Inclusion Program Oversight | AB 2020-02 | July 9 | Communicates FHFA's guidance to the System regarding the D\&l program oversight responsibilities of the boards of directors. To meet oversight responsibilities, each board should become familiar with the legal concepts related to D\&l, its administration by the System, and the role of FHFA related to statutory and regulatory authorities and expectations about D\&l. |
| Advisory Bulletin on Acquired Member Assets Risk Management | AB 2020-01 | January 31 | Communicates FHFA's guidance to the FHLBanks regarding risk management of Acquired Member Assets (AMA), including FHFA's expectations that Bank boards of directors establish certain limits. The FHLBanks should be able to demonstrate their progress toward adherence to this guidance by September 30, 2020 and should have final limits in place by December 31, 2020. |

# Policy Guidance: Federal Housing Finance Agency 

| Policy Subject | Reference | Date (2020) | Description/Explanation/Comments |
| :---: | :---: | :---: | :---: |
| FHFA Diversity and Inclusion Examination Manual |  | December | The FHFA Diversity and Inclusion Examination Manual's (Manual) purpose is to document $D \& l$ examination objectives and procedures to provide guidance to the FHFA OMWI D\&I Examiners, and to facilitate an effective, efficient and consistent examination process. The Manual also serves as a general resource for the public on matters involving D\&I examinations, including examination scope, process, policies, and procedures. <br> The Manual contains standards and expectations for the examination of the Enterprises, Common Securitizations Solutions LLC (CSS), an affiliate of the Enterprises, and the FHLBank System. The effective date of the Manual is December 2020. |

## Regulatory Orders

| Subject | Reference | Date (2020) | Description/Explanation/Comments |
| :---: | :---: | :---: | :---: |
| Designation of Federal Home Loan Bank Directorships for 2021 | 2020-OR-B-1 | June 10 | The director is required by statute to establish annually the size and composition of the board of directors of each FHLBank for the following year. This Director's Order maintains the current size and composition of the boards of directors of the FHLBanks for 2021, with the exception of the Boston, Cincinnati, and Topeka FHLBanks. |
| Revisions to Data Requirements for Enterprise Public Use Database to Include New Home Mortgage Disclosure Act Data Elements | $\begin{gathered} 85 \text { FR } 34196 \\ \text { (June 3); } \\ \text { 2020-0R- } \\ \text { FNMA-2; } \\ \text { 2020-OR- } \\ \text { FHLMC-2 } \end{gathered}$ | May 27 | The Order responds to the mortgage data disclosure requirements in the Safety and Soundness Act (12 U.S.C. 4543) and revises the data requirements for the Enterprise Public Use Database (PUDB) to include new Home Mortgage Disclosure Act (HMDA) data elements added by the Consumer Financial Protection Bureau's (CFPB) amendments to Regulation C, which implements HMDA. |

|  | 85 FR 23219 |  |
| :---: | :---: | :---: |
| Reporting by | (April 27); |  |
| Regulated | 2020-OR- | March 10 |
| Entities of Stress | FNMA-1; and |  |
| Testing Results | 2020-OR- |  |
|  | FHLMC-1 |  |

Stress tests pursuant to the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 are designed to determine whether the regulated entities have the capital necessary to absorb losses under adverse economic conditions.

FHFA's stress testing regulation (12 CFR Part 1238) requires annual stress testing and reporting of results for the Enterprises. The Orders, effective immediately, directed the regulated Enterprises to report their 2019 stress testing results (based on portfolios as of December 31, 2019), in the form and content required by the regulation and the summary instructions and guidance issued on March 5, 2020. (As noted above, on March 24, FHFA published final amendments to its stress testing regulation.) The requirement for the Enterprises to publish a summary of the severely adverse results of the 2020 stress tests was waived on August 13, 2020, so the Enterprises could have additional time to consider alternative scenarios issued by the Federal Reserve Board, taking the impact of COVID-19 into consideration.

National Mortgage Database Program ..... 78
Trademarks, Econ Summits and Research Publications ..... 79

## Reports to Congress

In 2020, pursuant to Federal law, including HERA and the Dodd-Frank Act, FHFA submitted all required annual reports to Congress and all required monthly reports on the number of loan modifications and other foreclosure prevention activities of Fannie Mae and Freddie Mac (the Enterprises).

Guarantee Fee Study - The Safety and Soundness Act requires FHFA to study the guarantee fees charged by the Enterprises, and in December 2020, FHFA released its 12th annual Guarantee Fee Study Report. The report examines the fees charged by the Enterprises for guaranteeing conventional single-family mortgages in 2019, including the amount of these fees and the criteria used to determine them. The report utilized aggregated data collected from the Enterprises.

Annual Housing Report - FHFA submitted its 12th Annual Housing Report to Congress in October 2020. This report details the Enterprises' performance in 2019 under their housing goals and Duty to Serve, as well as other information on the Enterprises' activities to support affordable housing.

FHLBank Advance Collateral Study - The Federal Home Loan Bank Act requires FHFA to submit to Congress an annual report on the collateral pledged to the FHLBanks. In November 2020, FHFA released its 12th Report on Collateral Pledged to the Federal Home Loan Banks based on the results of the FHLBank Collateral Data Survey, conducted quarterly by FHFA's Division of Bank Regulation.

No FEAR Act Report - The Notification and Federal Employee Antidiscrimination and Retaliation Act of 2002 (No FEAR Act) requires federal agencies to be publicly accountable for violations of antidiscrimination and whistleblower protection laws. Federal agencies must publish on their public websites quarterly and annual data related to federal-sector Equal Employment Opportunity (EEO) complaints, reimburse the Treasury Department Judgment Fund for any payments made, and notify employees and applicants for employment about their rights under the federal antidiscrimination and whistleblower laws. In March 2021, FHFA filed the Fiscal Year (FY) 2020 No FEAR Act Annual Report to Congress, covering fiscal years 2016 through 2020.

OMWI Annual Report - The Dodd-Frank Act requires most federal financial regulators to establish an Office of Minority and Women Inclusion (OMWI). FHFA's OMWI is responsible for leading efforts to advance diversity and inclusion and developing standards for: 1) EEO and the racial, ethnic, and gender diversity of the workforce and senior management; 2) increased participation of minority- and women-owned businesses in FHFA programs and contracts; and 3) assessing the diversity policies and practices of entities regulated by FHFA. Also, Section 1116(f) of HERA requires FHFA to seek diversity at all levels of its workforce, consistent with the demographic diversity of the United States. In March 2021, FHFA submitted its annual OMWI Report to Congress detailing the activities of FHFA's OMWI during the previous calendar year.

Interest Rate Disparities Analysis - FHFA is required to report to Congress annually on "the actions taken, and being taken, by the Director to carry out" 12 U.S.C. $\$ 4561$ (d), which authorizes FHFA to require the Enterprises to submit information from which FHFA may assess whether loan pricing by lenders results in disparities for minority borrowers compared with non-minority borrowers of similar creditworthiness. If FHFA makes a preliminary finding that a pattern of disparities exists for a lender, FHFA must refer that finding to the appropriate regulatory or enforcement agency for further review. FHFA's Office of Fair Lending Oversight (OFLO), in collaboration with the Office of General Counsel, currently leads FHFA's effort to implement 12 U.S.C. $\$$ 4561(d).

In response to improvements in the quality and availability of Enterprise data, during 2020 FHFA substantially advanced its efforts to implement this statutory provision. OFLO engaged with peer financial regulators and other agencies that could be "appropriate regulatory or enforcement agencies" to review an exploratory statistical analysis of Enterprise loan purchases designed to establish a baseline for pricing disparity by lender, refined its statistical analysis and developed policy options and inter-agency coordination arrangements to fully implement 12 U.S.C. $\$ 4561$ (d). FHFA plans to finalize its policy approach and begin referring its preliminary findings to regulatory or enforcement agencies with jurisdiction to conduct examinations or investigations into potential pricing discrimination in 2021.

## House Price Index

In 2020, FHFA continued its regular publication of house price indexes (HPI), including all transactions and purchase-only indexes using data obtained from the Enterprises, and expanded-data indexes using data obtained from the Enterprises and Federal Housing Administration and county recorder data. Such measures are estimated using different underlying datasets, and all provide indications of house price movements for various geographic areas. These standard indexes are produced quarterly and monthly.

FHFA also unveiled a new data visualization tool which displays house price trends for the 100 largest metro areas. The tool allows users to select between metro rankings based upon year-over-year growth and a series of comparison charts which provide high-level house price trends for a selected metro versus the nation. A dropdown menu allows for further customization allowing a user to compare any two metro areas against each other.

## Public Use Databases

The Safety and Soundness Act requires FHFA to make available to the public loan-level data submitted by the Enterprises in the reports required under Section 309(m) of Fannie Mae's Charter Act and Section 307(e) of Freddie Mac's Charter Act, except for certain proprietary information and personally identifiable information. FHFA is required to make publicly available Enterprise data elements analogous to those required to be reported by mortgage originators under the Home Mortgage Disclosure Act (HMDA) at the census tract level. The Safety and Soundness Act also requires FHFA to make public certain high-cost securitized loan data it collects to compare the characteristics of high-cost loans the Enterprises purchase and securitize. FHFA is required to release the data by September 30 of the year following the year the mortgages were acquired by an Enterprise. For 2020, FHFA released the required 2019 data to the public through its Public Use Database. The Public Use Database contains census tract- and national-level data by Enterprise, for both single-family and multifamily mortgages.

FHFA also maintains a similar Public Use Database with respect to the FHLBanks, required by HERA Section 1212. The data are at the census tract level and are reported directly by the FHLBanks to FHFA.

## National Mortgage Database Program

The National Mortgage Database (NMDB) program is jointly funded and managed by FHFA and the Consumer Financial Protection Bureau (CFPB) and is designed to provide a rich source of information about the U.S. mortgage market. It has three primary components:

1. The National Mortgage Database (NMDB*)
2. The National Survey of Mortgage Originations (NSMO)

## 3. The American Survey of Mortgage Borrowers (ASMB)

Pursuant to requirements of the Safety and Soundness Act, the NMDB program conducts a monthly mortgage market survey to collect data on the characteristics of individual mortgages and the credit history of borrowers. The survey covers mortgages that are and are not eligible for purchase by Fannie Mae and Freddie Mac, including subprime and nontraditional mortgages. ${ }^{61}$

NMDB and its components collect data for a nationally representative sample of mortgages. In 2020, the quarterly NSMO survey was administered four times and a public use file with data for 2013 to 2017 originations was released in February 2020. The ASMB survey focusing on borrowers with mortgage forbearance entered the field in October 2020. Each quarter, FHFA also updated two national statistics datasets that are derived from the NMDB: National Statistics for New Residential Mortgages in the United States and National Delinquency Rates in the United States.

[^27]
## Trademarks, Econ Summits and Research Publications

Trademarks - In October 2020, The U.S. Patent and Trademark Office approved two new federally registered trademarks: "FHFA House Price Index" ${ }^{\text {" }}$ and "FHFA HPI". The marks cover the entire suite of FHFA HPIs and are intended to help the Agency protect its branding, usage, and intellectual property.

Economic Summits - In 2020, FHFA hosted its first two Economic Summits, on Thursday, January 30th and Tuesday, September 29th. These summits bring external perspectives from experts and researchers working in areas relevant to FHFA's mission. The first summit included presentations of research on affordability, borrower mobility, and filtering of the housing stock. Speakers were from the Federal Reserve, Fannie Mae, Freddie Mac, and FHFA. The second summit's theme was natural disaster risk and COVID-19 impacts on housing. Due to the COVID-19 pandemic, the second summit was held virtually. Speakers were from academia, Fannie Mae, Freddie Mac, the Federal Emergency Management Agency, the Federal Reserve, FHFA, and private industry.

Research Publications - In 2020, FHFA published two working papers and staff received several research awards from the American Real Estate Society. The original research in these working papers provides substantial scholarly contributions to the academic, practitioner, and policy communities in the areas of housing finance and regional and urban economics. Working papers prepared by FHFA staff are preliminary products circulated within various professional communities to generate discussion and receive feedback. The analysis and conclusions of these products belong exclusively to the authors and should not be interpreted as conveying an official FHFA position, policy, analysis, opinion, or endorsement.

## Working Paper 20-01: Land Valuation using Public

 Records and Kriging: Implications for Land versus Property Taxation in Cities - This paper uses a novel administrative dataset containing the universe of land sales and parcel records in Maricopa County, Arizona, from 2000 through 2018 and compares residential land values constructed using the vacant land sales to thesame constructed using land under existing structures. Estimated land values for developed parcels are on average, 14 percent higher when estimated using vacant land but growth rates are similar. Results demonstrate a source of risk of dependence on public revenues from land value taxes versus a base-period revenue-neutral property tax.

## Working Paper 20-02: Nowcasting Unemployment

 Insurance Claims in the Time of COVID-19 - This paper explores the performance of models with different information sets and data structures in order to best nowcast U.S. initial unemployment claims in spring of 2020 in the midst of the COVID-19 pandemic. The best model, particularly near the structural break in claims, is a state-level panel model that includes dummy variables to capture the variation in timing of state-of-emergency declarations.
# OPERATIONS AND PERFORMANCE 

In This Chapter
Performance and Program Assessment ..... 81
Financial Operations ..... 81

## Performance and Program Assessment

FHFA publishes a strategic plan for the Agency (FHFA Strategic Plan) to set forth its priorities as regulator of the Federal Home Loan Bank System and as regulator and conservator of Fannie Mae and Freddie Mac. The Strategic Plan in effect for fiscal year (FY) 2021 was published in October 2020 and has three strategic goals: 1) Ensure Safe and Sound Regulated Entities Through World-Class Supervision; 2) Foster Competitive, Liquid, Efficient, and Resilient National Housing Finance Markets, and 3) Position the Agency as a Model of Operational Excellence by Strengthening the Workforce and Infrastructure.

On November 16, 2020, FHFA published its annual Performance and Accountability Report (PAR), summarizing performance and achievements during Fiscal Year 2020. The PAR evaluated FHFA's performance against 22 measures and assessed FHFA's progress toward its strategic goals. In FY 2020, FHFA met annual performance targets for 16 of the measures (73 percent), did not meet annual performance targets for 5 (23 percent) of the performance measures and lacked the data to assess performance for one measure. ${ }^{62}$ Data for the measure became available in the subsequent year showing that FHFA had met the target.

In March 2021, the Association of Government Accountants awarded FHFA its 13th consecutive Certificate for Excellence in Accountability Reporting (CEAR), for fiscal year 2020. The CEAR is presented to agencies that have demonstrated excellence in integrating performance and accountability reporting. Agencies must receive unmodified opinions on their financial reports from an independent auditor to be eligible for the award.

## Financial Operations

## Financial Highlights

The Safety and Soundness Act authorizes FHFA to collect annual assessments from its regulated entities to pay its expenses and maintain a working capital fund. In FY 2020, FHFA assessed the regulated entities a total of $\$ 311.4$ million, including $\$ 49.9$ million to support the Office of Inspector General. FHFA issues assessment notices to the regulated entities semiannually, with the collections occurring on October 1 and April 1. The Financial Summary for FY 2020 can be found in FHFA's PAR on pages 24-26, with the full set of audited financial statements on pages 67-87.

In accordance with HERA, FHFA is authorized to retain a working capital fund for unforeseen or emergent requirements, which can be funded through a special assessment to the entities or through retention of unobligated balances at the end of the fiscal year. At the end of FY 2020, the FHFA working capital fund had a balance of $\$ 34.3$ million, up from $\$ 24.0$ million in FY 2019.

## FEDERAL HOUSING Finance Oversight BOARD ASSESSMENT

## Federal Housing Finance Oversight Board Assessment

## June 2021

Section 1103 of the Housing and Economic Recovery Act (HERA) of 2008 requires that the Federal Housing Finance Agency (FHFA) Director's Annual Report to Congress (Annual Report) include an assessment of the Federal Housing Finance Oversight Board or any of its members with respect to:

- The safety and soundness of FHFA's regulated entities, Fannie Mae and Freddie Mac (the Enterprises) and the Federal Home Loan Banks (FHLBanks);
- Any material deficiencies in the conduct of the operations of the regulated entities;
- The overall operational status of the regulated entities; and
- An evaluation of the performance of the regulated entities in carrying out their respective missions.

As a basis for this assessment, FHFA's Annual Report provides a review of these matters related to the Agency's regulated entities. The assessment of the Federal Housing Finance Oversight Board follows:

## The COVID-19 National Emergency

At the beginning of 2020, a strong labor market and sustained house price appreciation supported liquidity in the housing finance system. Starting in March 2020, the effects of the COVID-19 national emergency significantly disrupted economic activity, including the primary and secondary mortgage markets. In response, FHFA implemented a range of policies to provide relief to renters and borrowers with a single-family or multifamily mortgage owned or guaranteed by the Enterprises and to support the proper functioning of the mortgage market both during and after this crisis.

To protect borrowers facing delinquency and foreclosure during the COVID-19 pandemic, FHFA suspended all single-family foreclosures and foreclosuredriven evictions through the end of 2020. FHFA also allowed borrowers affected by COVID-19 to take a timeout from mortgage payments through forbearance.

FHFA's response to COVID-19 significantly helped borrowers, renters, and the housing market navigate this crisis. Following contraction in mortgage market activity in March and April, the purchase market rebounded. House prices were supported by this rebound in market activity in the second half of the year. House prices rose by 1.2 percent in December, which was the 7 th consecutive month of over 1 percent growth. Nationwide, house prices increased 3.9 percent in the fourth quarter of 2020 , a 10.9 percent increase from the fourth quarter of 2019 and the largest year-over-year gain on record.

Two million homeowners with Enterprise-backed mortgages received a forbearance in 2020. FHFA provided Enterprise servicers clarity by instituting a four-month limit on servicers' obligations to advance principal and interest payments on loans in forbearance. These policies resulted in costs to the Enterprises. To cover these costs, on December 1, the Enterprises began adding an adverse market fee of 0.5 percent when purchasing select refinance mortgages.

FHFA continues to monitor new and evolving challenges facing the regulated entities and the nation's housing finance system. For example, in 2021 FHFA solicited public input on current and future natural disaster and climate risks to the housing finance system and to the regulated entities; the Agency is currently reviewing the responses. FHFA continues to coordinate its policy response efforts with government counterparts, including members of the Federal Housing Finance Oversight Board.

## Enterprises

The Enterprises continue to operate in conservatorships under FHFA, as they have since 2008. The conservatorships were not meant to be permanent. Under the Senior Preferred Stock Purchase Agreements (PSPAs), as amended, ending the conservatorships is dependent on the Enterprises meeting key milestones, chief among which is retaining or raising sufficient equity capital.

In 2008, the Enterprises entered into the PSPAs with the U.S. Department of the Treasury (Treasury). Under the PSPAs, Treasury committed to maintain the Enterprises' solvency by making a quarterly advance of funds to each Enterprise in an amount equal to any excess of the Enterprise's total liabilities over its total assets. In return for its commitment, Treasury received equity instruments, dividends, and other rights. Under the PSPAs, the Enterprises have cumulatively drawn $\$ 191.5$ billion of support through year-end 2020. The Enterprises have paid approximately $\$ 301$ billion in cumulative cash dividends to the Treasury. Under the terms of the PSPAs, the payment of dividends does not offset or pay down the Enterprises' prior draws from the Treasury. The Enterprises continue to benefit from the support provided by Treasury through the PSPAs. Today, $\$ 254$ billion of Treasury's funding commitment remains available to the Enterprises.

Treasury and FHFA have amended the PSPAs multiple times. Most recently, in January 2021, FHFA and Treasury executed letter agreements that, among other changes, allow the Enterprises to continue to retain capital up to their regulatory minimums, including buffers, as prescribed in the FHFA Enterprise capital rule finalized in December 2020, and imposed additional restrictions on the types and volume of Enterprise business activities.

In 2020, FHFA re-proposed and finalized the Enterprise Regulatory Capital Framework rule, which set out the conditions for a post-conservatorship Enterprise to meet the safety and soundness threshold of being able to fulfill its mission through a downturn on the scale of the 2008 financial crisis. The rule requires a minimum level of capital of approximately 4 percent of Adjusted Total Assets, as defined in the rule, equivalent to a leverage ratio of 25 to 1 . As of December 31, 2020, the Enterprises' combined leverage ratio was approximately 160:1. FHFA determined that the capital level described in the rule will ensure that the Enterprises have the capital to absorb the lifetime unexpected losses on the mortgages they own and guarantee in the event of another severe house price shock. ${ }^{63}$

FHFA took several steps in 2020 to fulfill its statutory responsibilities as conservator to implement reforms that will strengthen the Enterprises' financial condition. Selected financial and operational results of the Enterprises are summarized below.

The Enterprises were chartered by Congress to provide stability in the secondary housing finance market, promote access to mortgage credit, and increase the liquidity of mortgage investments. In 2020, the Enterprises purchased single-family mortgages with a combined unpaid principal balance (UPB) of $\$ 2.449$ trillion compared to $\$ 1.049$ trillion UPB in 2019. The Enterprises purchased a combined volume of multifamily mortgages with a UPB of $\$ 159$ billion in 2020, compared to $\$ 148$ billion in 2019, while increasing their focus on affordable multifamily mortgages. As of December 31, 2020, the Enterprises owned or guaranteed approximately $\$ 6.4$ trillion in single-family and multifamily mortgages, representing nearly half the market. As of December 31, 2020, Fannie Mae's net worth was $\$ 25.3$ billion and Freddie Mac's net worth was $\$ 16.4$ billion.

[^29]In 2020, the Enterprises generated combined net income of $\$ 19.3$ billion, down from $\$ 21.4$ billion in 2019. Each Enterprise continues to have a significant but declining exposure to credit losses from mortgages originated in the several years prior to conservatorship. Both Enterprises are subject to quarterly volatility in their financial results primarily as a result of accounting-driven gains and losses on the derivatives they use to manage their interest-rate risk. To minimize the impact of interest rate fluctuation and mitigate the accounting volatility in its financial results, Freddie Mac implemented fair value hedge accounting in 2017. Fannie Mae implemented fair value hedge accounting in the first quarter of 2021.

Prudent credit standards and robust risk management remain a priority for both Enterprises. In 2020, FHFA continued to direct the Enterprises to review their risk profiles across all business activities and to reduce risk and complexity to levels aligned with their limited capital and status in conservatorship. FHFA also continued to direct the Enterprises to provide equitable market access to small lenders by prohibiting volumebased discounts. FHFA's policy implements the principle of the same rate of return for the same risk, regardless of size.

Since 2014, FHFA has also set caps on the volume of multifamily business an Enterprise can purchase to ensure that the Enterprises provide appropriate support to the multifamily sector, especially missiondriven affordable housing, without displacing private capital. Calendar year 2020 was the first full year that the Enterprises conducted their multifamily business under an updated system of multifamily caps. The Enterprises stayed below their volume cap of \$100 billion for the five-quarter period ended December 31, 2020. At least 37.5 percent of those multifamily purchases were mission-driven affordable housing, in keeping with the minimum threshold FHFA established. In November 2020, FHFA announced new multifamily caps for the four quarters of calendar year 2021. The 2021 caps are $\$ 70$ billion for each Enterprise, of which at least 50 percent must be mission-driven affordable housing. Additionally, at
least 20 percent of the multifamily business must be affordable to residents at or below 60 percent of Area Median Income. FHFA also simplified the applicable definitions of mission-driven affordable housing.

The 2008 financial crisis demonstrated substantial weaknesses in the liquidity positions of the Enterprises. In 2020, FHFA directed the Enterprises to adopt more robust liquidity standards. In December, FHFA issued a notice of proposed rulemaking on liquidity requirements to secure these standards going forward. The proposed rule establishes quantitative liquidity requirements that address the short-, intermediate-, and long-term liquidity needs of the Enterprises in order to secure their ability to fulfill their mission in times of economic stress.

In December 2020, FHFA released a notice of proposed rulemaking on Enterprise resolution planning requirements. Developing a credible resolution framework for the Enterprises is the next component of FHFA's commitment to protecting the critical mission of the Enterprises. Credible resolution plans, also called living wills, establish ex-ante the mechanism for an orderly resolution of a large financial institution during a period of sustained financial stress without jeopardizing market functioning. FHFA's resolution rule requires each Enterprise to develop plans to facilitate its rapid and orderly resolution without disrupting housing finance markets. FHFA finalized this resolution planning rule in 2021.

The Enterprises are subject to annual affordable housing goals covering their purchases of single-family mortgages and multifamily mortgages. In 2020, FHFA determined that Fannie Mae and Freddie Mac met each single-family goal requirement for 2019. The Enterprises also met each of their multifamily goal requirements for 2019. In December 2020, FHFA issued a final rule on the 2021 housing goals for Fannie Mae and Freddie Mac. Due to the economic uncertainty related to the COVID-19 pandemic, FHFA established benchmark levels for 2021 only and maintained the same levels from the previous three-year rulemaking cycle, 2018-2020.

In support of the Enterprises' statutory duty to serve three underserved markets - manufactured housing, affordable housing preservation, and rural housing the Enterprises entered into Duty to Serve plans (the Plans) for 2018-2020. In July 2020, FHFA instructed the Enterprises to extend their 2018-2020 Plans to include activities and objectives for 2021 due to the ongoing uncertainty around the impacts of COVID-19 on the economy. In March 2021, the Enterprises submitted annual reports on their efforts in 2020 to achieve their Plans' objectives in all three underserved markets, which will inform FHFA's evaluation of each Enterprise's performance. In 2020, both Enterprises exceeded their Plans' loan purchase targets in the manufactured housing market. Fannie Mae and Freddie Mac have maintained pricing incentive programs for manufactured housing communities that provide tenant pad lease protections identified in FHFA's Duty to Serve regulation. Both Enterprises expanded outreach for their pilot programs tailored to the financing needs of resident-owned manufactured housing communities.

The Enterprises also made statutorily required contributions to the National Housing Trust Fund and the Capital Magnet Fund in 2020 to support affordable housing initiatives, totaling a record $\$ 1.09$ billion.

## FHLBanks

As of December 31, 2020, all 11 FHLBanks exceeded the minimum 4.0 percent regulatory capital ratio. The regulatory capital-to-assets ratio for the FHLBank System was 6.1 percent at the end of 2020 , up from 5.1 percent a year before as leverage declined significantly. All FHLBanks were profitable in 2020. The FHLBanks' primary business of extending advances to members continued to operate effectively without credit losses.

Advances grew by $\$ 165.4$ billion in the first quarter of 2020 to $\$ 806.9$ billion because of market pressures caused by the coronavirus, but then declined significantly to $\$ 422.6$ billion by year-end 2020. When compared to year-end 2019, advances were $\$ 218.9$ billion lower, extending a downward trend that began in 2018. The ten largest borrowers accounted for 25.7 percent of aggregate advances outstanding at year-end 2020, down from 29.7 percent the previous year. MetLife, Inc., an insurance company, replaced Wells Fargo as the largest company borrower during the year. Generally, FHLBanks with high levels of advances outstanding have one or more large borrowers in their districts.

Overall, the FHLBanks continued to meet their primary mission of providing liquidity to their members through the purchase of whole mortgage loans, off-balance sheet programs, and support of the Affordable Housing Program. System balances of whole mortgage loans totaled $\$ 62.9$ billion at year-end 2020, down from $\$ 72.6$ billion at year-end 2019. This is the first year-over-year decline in mortgage loans since 2014.

Off-balance sheet programs include letters of credit and mortgage delivery programs. Letters of credit had a total notional value of $\$ 164.4$ billion at year-end 2020 and allow members diverse collateral options when securing public unit deposits. Mortgage delivery programs to third-party investors had a combined volume of $\$ 14.3$ billion in 2020 compared with $\$ 3.3$ billion in 2019. These programs provide members with alternative conduits to move mortgages off their balance sheets, to allow additional mortgage originations. The FHLBanks utilized these programs in greater volume in 2020 following the significant contractions in balance sheet size and mortgage concentration constraints.

In 2020, the FHLBanks contributed $\$ 315$ million toward the Affordable Housing Program, which provides funds to support local affordable housing initiatives.

## Conclusion

During 2020, FHFA engaged in significant efforts to oversee and support the safety and soundness of the Enterprises and FHLBanks, including by providing certain temporary flexibilities that supported borrowers and renters through the COVID-19 national emergency. These efforts were aligned with FHFA's statutory responsibilities and authorities to put the Enterprises into a sound and solvent financial condition, oversee the prudential operations of the FHLBanks, and to ensure that its regulated entities foster liquid, efficient, competitive, and resilient national housing finance markets that support sustainable homeownership and affordable rental housing.

## $N / A=$ not applicable $\quad N / M=$ not meaningful

Adoption of accounting guidance related to transfers of financial assets and consolidation of variable interest entities, effective January 1,2010 , significantly changed presentation of these line items in the financial statements. Financial results for 2010 and later years are not directly comparable to previous years. Effective January 1,2010 , guranty fee income associated with the securitization activities of consolidated trusts is reflected in net interest income.
b Interest income net of interest expense.
c Credit-related expense (income) includes provision (benefit) for loan losses and guaranty losses (collectively, credit losses) and foreclosed property expense (income)
Net income (loss) available to common stockholders divided by average outstanding common equity.

## Source: Fannie Mae

a Adoption of accounting guidance related to transfers of financial assets and consolidation of variable interest entities, effective January 1,2010 , significantly changed presentation of these line items in the financial statements. Financial results for 2010 and later years are not directly comparable to previous years. Adoption of this quidance resulted in the consolidation of the substantial majority of mortgage-backed securities (MBS) trusts and recognition of the underlying assets and debt of the trusts in the consolidated balance sheet.
b Beginning in 1998, the guaranty liability for Fannie Mae MBS held for investment was classified as a liability
Gross mortgage assets net of unamortized purchase premiums, discounts, cost-basis adjustments, fair-value adjustments on securities and loans. Beginning in 2002 , amounts include fair-value adjustments on available-for-sale and trading securities, as well as impairments on available-for-sale securities. Excludes allowance for loan losses on loans held for investment. Amounts for 1999 through 2001 include certain loans held for investment previously classified as nonmortgage investments.
d Data reflect unpaid principal balance net of unamortized purchase premiums, discounts, cost-basis adjustments, fair-value adjustments and impairments on available-for-sale and trading securities. Since 2005, advances to lenders have not been included. Amounts for periods before 2005 may include or consist of advances to lenders.
e Amounts for 2010 and later meet the definition of mortgage assets in the Treasury Senior Preferred Stock Purchase Agreement for the purpose of determining the maximum amount of mortgage assets that may be held. The amount for 2009 includes consolidation of variable interest entities. The 2009 amount would have been $\$ 772.5$ billion excluding consolidation of variable interest entities.
As defined in the Treasury Senior Preferred Stock Purchase Agreement for 2009 and later years

Source: Fannie Mae
a Beginning in 2010, excludes effect of accounting guidance related to transfers of financial assets and consolidation of variable interest entities, effective January 1,2010 . Amounts for 2010 have been revised from amounts previously reported to reflect this exclusion
b Unpaid principal balance.
c Amounts for 2002 to 2009 include mortgage-related securities consolidated as loans at period end. For 1999 through 2001, includes certain loans held for investment classified as nonmortgage investments.
d Amounts for 2002 to 2009 exclude mortgage-related securities consolidated as loans at period end.
e Includes mortgage revenue bonds
Amounts for 2010 and later meet the definition of mortgage assets in the Treasury Senior Preferred Stock Purchase Agreement for the purpose of determining the maximum amount of mortgage assets that may be held. Amounts prior to 2010 include consolidation of variable interest entities. Mortgage assets as defined under the Senior Preferred Stock Purchase Agreement for 2009 totaled $\$ 772.5$ billion excluding consolidation of variable interest entities.

## Source: FannieMae

d Unpaid principal balance. Amounts for 2002 to 2009 exclude mortgage-related securities consolidated as loans at period end.
b Beginning in 2010 , excludes effect of accounting guidance related to transfers of financial assets and consolidation of variable interest entities, effective January 1, 2010. Amounts for 2010 have been revised from amounts previously reported to reflect this exclusion
c Beginning in Q3 2015, we reclassified certain Fannie Mae Single-Family securities from fixed-rate to adjustable-rate
d Excludes mortgage revenue bonds.

## Source. FannieNae

$\mathrm{N} / \mathrm{A}=$ not applicable

- Unpaid principa balance.
b Beginning in 2010, excludes effect of accounting guidance related to transfers of financial assets and consolidation of variable interest entities, effective January 1, 2010. Amounts for 2010 have been revised from amounts previously reported to reflect this exclusion
Includes unamortized premiums, discounts, deferred adjustments, and fair-value adjustments on securities and loans. Beginning in 2002, amounts include fair-value adjustments and impairments on mortgage-related securities and securities commitments classified as trading and available-for-sale. Excludes allowance for loan losses on loans held for investment and all owance for credit losses on Available for Sale Securities
d Amounts for 2010 and later meet the definition of mortgage assets in the Treasury Senior Preferred Stock Purchase Agreement for the purpose of determining the maximum amount of mortgage assets that may be held. The amount for 2009 indudes consolidation of variable interest entities. The 2009 mount would have been $\$ 772.5$ billion excluding consolidation of variable interest entities.

a Beginning in 2002, includes mortgage-backed securities options, swap credit enhancements, and forward-starting debt. Forward-starting debt is a commitment to issue debt at some future time (generally to fund a purchase or commitment that starts at the agreed future time).
b Beginning in 2010, includes exchange-traded futures, if applicable.
Beginning in 2016, includes credit risk transfer transactions that we account for as derivatives.

Source: Fannie Mae
Single-family loans are seriously delinquent when the loans are 90 days or more past due or in the foreclosure process. Rate is calculated using the number of conventional single-family loans owned and backing Fannie Mae mortgage-backed securities (MBS). Includes loans referred to foreclosure proceedings but not yet foreclosed. Prior to 1988, data included all seriously delinquent loans for which Fannie Mae had primary risk of loss. Beginning in 1998, data include all seriously delinquent conventional loans owned or backing Fannie Mae MBS with and without primary mortgage insurance credit enhancement. Data prior to 1992 include loans and securities in relief or bankruptcy, even if the loans were less than 90 days delinquent, calculated based on number of loans
Before 1998, data indude multifamily loans for which Fannie Mae had primary risk of loss. Beginning in 1998 , data include all multifamily loans and securities 60 days or more past due. Beginning in 2002 , rate is calculated using the unpaid principal balance of multifamily loans owned by Fannie Mae or underlying Fannie Mae guaranteed securities as the denominator. For the period 1998 to 2001 , the denominator also includes other credit enhancements Fannie Mae provides on multifamily mortgage assets and multifamily non-Fannie Mae mortgage-related securities held for investment.
Beginning in 2020, credit (income) losses consists of wite-offs, recoveries, foreclosed property income (expense), write-offs on the redesignation of mortgage loans and gains on sales and other valuation adjustments. Before 2020 credit (income) losses consisted of charge-offs, net of recoveries and foredosed property expense (income). Average balances used to calculate ratios subsequent to 1994 . Quarterly data are annualized. Beginning in 2005 , credit losses exclude the impact of fair-value losses of credit impaired loans acquired from MBS trusts. Beginning in 2008 , credit losses also exclude the
effect of Homesaver Advance program fair-value losses.
d Guaranty book of business refers to the sum of the unpaid principal balance of mortgage loans held as investments, Fannie Mae MBS held as investments, Fannie Mae MBS held by third parties, and other credit enhancements Fannie Mae provides on mortgage assets. It excludes non-Fannie Mae mortgage-related securities held for investment that Fannie Mae does not guarantee. Before 2005, the ratio was based on the mortgage credit book of business, which consists of the guaranty book of business plus non-Fannie Mae mortgage-related securities held as investments not guaranteed by Fannie Mae.
Beginning in 2000, the credit-enhanced category was expanded to include loans with primary mortgage insurance. Amounts for periods before 2000 reflect the proportion of assets held for investment with additional recourse from a third party to accept some or all of the expected losses on defaulted mortgages. Additionally, beginning in 04 2016, the credit-enhanced category was expanded to include credit enhancements from Connecticut Avenue Securities (CAS) transactions.

Sources: Fannie Mze and FHFA

## $\mathrm{N} / \mathrm{A}=$ not applicable $\quad \mathrm{N} / \mathrm{M}=$ not meaningful

- On October 9, 2008, the Federal Housing Finance Agency (FHFA) suspended capital classifications of Fannie Mae. As of the fourth quarter of 2008, neither the existing statutory nor the FHFA-directed regulatory capital requirements were binding and will not be binding during conservatorship.
b The sum of the stated value of outstanding common stock (common stock less treasury stock), the stated value of outstanding noncumulative perpetual preferred stock, paid-in capital, and retained earnings (accumulated deficit). Core capital excludes accumulated other comprehensive income (loss) and senior preferred stock.
c Beginning in the third quarter of 2005, FHFA required Fannie Mae to maintain an additional 30 percent capital in excess of the statutory minimum capital requirement. The regulator reduced the requirement to 20 percent as of the first quarter of 2008 and to 15 percent as of the second quarter of 2008. The minimum capital requirement and minimum capital surplus numbers stated in this table do not reflect these additional capital requirements.
. Minimum capital surplus is the difference between core capital and minimum capital reauirement
e Total capital is core capital plus the total allowance for loan losses and guaranty liability for mortgage-backed securities (MBS), less any specific l loss allowances
Risk-based capital requirement is the amount of total capital an Enterprise must hold to absorb projected losses flowing from future adverse interest rate and credit risk conditions and is specified by the Federal Housing Enterprises Financial Safety and Soundness Act of 1992. For 2004 through 2006 , the requirements were calculated based on originally reported, not restated or revised, financial results.
9 The difference between total capital and the risk-based capital requirement. For 2004 through 2006 , the difference reflects restated and revised total capital, rather than total capital originally reported by Fannie Mae and used by FHFA to set capital classifications. FHFA is not reporting on risk-based apital levels during conservatorship
Stock price at the end of the period multiplied by the number of outstanding common shares.
Adoption of accounting quidance related to transfers of financial assets and consolidation of variable interest entities, effective January 1,2010 , significantly changed presentation of this item in the financial statements. Financial results for 2010 and beyond are not directly comparable to previous years. Unconsolidated MBS are those held by third parties.
k Common dividends declared during the period divided by net income available to common stockholders for the period. As a result of conservatorship status and the terms of the Senior Preferred Stock Purchase Agreement with Treasury, no amounts are available to distribute as dividends to common or preferred stockholders (other than to Treasury as holder of the Senior Preferred Stock)

Source Freddie Mac
Based on unpaid principal balances. Excludes mortgage loans and mortgage-related securities traded but not yet settled.
Consists of loans purchased from lenders, as well as those loans covered under other mortgage-related guarantees.
Not included in total mortgages. From 2002-through the current period, amounts include non-Freddie Mac mortgage-related securities as well as repurchased Freddie Mac mortgage-backed securities (MBS) held for investment. Before 2002, amounts exclude Freddie Mac real estate mortgage investment conduits and other structured securities backed by Ginnie Mae MBS. Amounts in 2010 through the current period, include purchases of Freddie Mac MBS, most accounted for as debt extinguishments under Generally Accepted Accounting Principles rather than as investment in securities
Freddie Mac mortgage-related securities include mortgage-related securities issued or guaranteed by Freddie Mac. In prior periods, certain of these securities that were issued by third-party trusts but guarantteed by Freddie Mac were classified as non-agency mortgage-related securities. The"total private-label" data for 2009 and later periods have been revised to conform to the current period presentation.

## Source: Freddie Mac

a Based on unpaid principal balances. Excludes mortgage loans and mortgage-related securities traded but not yet settled.
b Amounts for 2010 and later include purchases of Freddie Mac mortgage-backed securities (MBS), many accounted for as debt extinguishments under Generally Accepted Accounting Principles rather than as investment in securities. Amounts for 2012 and later primarily consists of third party purchases.
c Before 2002, amounts exclude real estate mortgage investment conduits and other structured securties backed by Ginnie Mae MBS.
Freddie Mac mortgage-related securities include mortgage-related securities issued or guaranteed by Freddie Mac. In prior periods, certain of these securities that were issued by third-party trusts but guranteed by Freddie Mac were classified as non-agency mortgage-related securities. 2009 and later periods have been revised to conform to the current period presentation.

${ }^{\text {a }}$ Based on unpaid principal balances. Excludes mortgage loans, mortgage-related securities traded but not yet settled and unguaranteed subordinated whole loan securities. Includes issuance of other mortgage-related guarantees for mortgages not in the form of a security.
b Includes mortgage-backed securities (MBS), real estate mortgage investment conduits (REMICs), other structured securities, and other securitization products. From 2002 through the current period, includes Freddie Mac REMIC and other structured securities backed by Ginnie Mae MBS. Before 2002 excludes Freddie Mac REMICs and other structured securities backed by Ginnie Mae MBS. Amounts are not included in total MBS issuances if the activity represents a resecuritization of Freddie Mac MBS.
Includes activity related to multiclass securities, primarily REMICs, but excludes resecuritizations of MBS into single-class securities. Amounts are not included in total MBS issuances if the activity represents a resecuritization of freddie Mac MBS,

$N / M=$ not meaningful
Adoption of accounting guicance related to transters of financial assets and consolidation of variable interest entities, effective January 1, 2010, significantly changed presentation of these items in the financial statements. Consequently, financial results for 2010 and later are not directly comparable to previous years. Effective anuary 1,2010 , guarantee fee income associated with the securitization activities of consolidated trusts is reflected in net interest income.
b 2018 and 2019 have been revised to conform to current period presentation.
For years 2018 through the current period, defined as provision/benefit for credit losses, credit enhancement expense, benefit for (decrease in) credit enhancement recoveries, and real-state owned operations income/expense. For years 2002 through 2017 , defined as provision/benefit for credit losses
and real-estate owned operations income/expense. For years 2000 and 2001, includes only provision for credit losses
d Ratio computed as annualized net income (loss) available to common stockholders divided by the simple average of beginning and ending common stockholders' equity (deficit).

## Source: FreddieMa

Based on unpaid principal balances of mortgage guarantees held by third parties. Excludes mortgage-backed securities (MBS) held for investment by Freddie Mac and unguaranteed subordinated whole loan securties.
b Includes U.S. Department of Agriculture Rural Development (RD) Ioan programs.
From 2001 to the current period, includes MBS with underlying mortgages classified as balloon/reset loans. Freddie Mac discontinued purchase of balloon/reset mortgages on January 1, 2013
From 2002 to the current period, includes resecuritizations of non-Freddie Mac securities
Excludes mortgage loans and mortgage-related securities traded but not yet settled. From 2002 to the current period, amounts include real estate mortgage investment conduits and other structured securities, other guarantee transactions, and other guarantee commitments of mortgage loans and MBS held by third parties.

Freddie Mac mortgage-related securities include mortgage-related securities issued or guaranteed by Freddie Mac. In prior periods, certain of these securities that were issued by third-party trusts but guaranteed by Freddie Mac were classified as non-agency mortgage-related securities. 2017 and later periods have been revised to conform to the current period presentation.

## Source: Freddie Mac

a Based on unpaid principal balances.
b Includes nonagency mortgage-related securities backed by home equity lines of credit.
c Consists of nonagency mortgage-related securities backed by option ARM loans. Before 2006, incudes securities principally backed by subprime and Alt-A mortgage loans. ARM stands for adjustable-rate mortgage.
d Freddie Mac mortgage-related securities include mortgage-related securities issued or guaranteed by Freddie Mac. In prior periods, certain of these securities that were issued by third-party trusts but guaranteed by Freddie Mac were classified as non-agency mortgage-related securities. 2017 and later periods have been revised to conform to the current period presentation.

Source: Freddie Mac
a Based on the number of mortgages 90 days or more delinquent or in foreclosure. Excludes modified loans if the borrower is less than 90 days past due under the modified terms. Rates are based on loans in the single-family credit guarantee portfolio, which excludes that portion of freddie Mac real estate mortgage investment conduits (REMICs) and other structured securities backed by Ginnie Mae mortgage-backed securities (MBS). Rates for years 2005 and 2007 also exclude other guarantee transactions. Single-family delinquency rates for 2008 and thereafter include other guarantee transations.
Based on the unpaid principal balance of loans, 60 days or more delinquent or in foreclosure and include other guranantee transactions.
Credit losses equal to real estate owned operations expense (income) plus net charge-offs and exclude other market-based valuation losses. Calculated as credit losses divided by the average balance of mortgage loans in the total mortgage portfolio, excluding non-Freddie Mac MBS and the portion of REMICs and other structured securities backed by Ginnie Mae MBS.
d Calculated based on the balance of mortgage loans in the total mortgage portfolio excluding non-Freddie Mac MBS and the portion of REMICS and other structured securities backed by Ginnie Mae certificates. The credit enhanced percentage of our total mortgage portfolio has been rounded to the nearest whole percent. Since 2004, the credit-enhanced percentage of our total mortgage portfolio has been rounded to the nearest whole percent
e Includes loans with a portion of the primary default risk retained by the lender or a third party who pledged collateral or agreed to accept losses on loans that default. In many cases, the lender's or third party's risk is limited to a specific level of losses at the time the credit enhancement becomes effective. Also includes credit enhancement coverage, such as through STACR debt notes or other risk transfer transactions that were completed by the end of each period.

## Sources: Freddie Mac and FHFA

## $\mathrm{N} / \mathrm{A}=$ not applicable $\quad \mathrm{N} / \mathrm{M}=$ not meaningful

a On October 9 , 2008, the Federal Housing Finance Agency (FHFA) suspended capital classifications of Freddie Mac. As of the fourth quarter of 2008, neither the existing statutory nor the FHFA-directed regulatory capital requirements were binding and will not be binding during conservatorship.
b The sum of the stated value of outstanding common stock (common stock less treasury stock), the stated value of outstanding noncumulative perpetual preferred stock, paid-in capital, and retained earnings (accumulated deficit). Core capital excludes accumulated other comprehensive income (loss) and senior preferred stock.
Beginning in the fourth quarter of 2003, FHFA directed Freddie Mac to maintain an additional 30 percent capital in excess of the statutory minimum capital requirement. On March 19,2008 , FHFA announced a reduction in the mandatory target capital surplus from 30 percent to 20 percent above the statutory minimum capital requirements. The minimum capital requirement and minimum capital surplus (deficit) numbers stated in this table do not reflect the additional capital requirement. Minimum capital suplus (deficit) is the difference between core capital and the minimum capital requirement.
Total capital includes core capital and general reserves for mortgage and foreclosure losses.
The risk-based capital requirement is the amount of total capital an Enterprise must hold to absorb projected losses flowing from future adverse interest rate and credit risk conditions and is specified by the Federal Housing Enterprise Financial Safety and Soundness Act of 1992.
The difference between total capital and risk-based capital requirement.
Stock price at the end of the period multiplied by the number of outstanding common shares.
Adoption of the changes in the accounting guidance related to transfers of financial assets and consolidation of variable interest entities changed presentation of total assets on the balance sheet. Financial results for 2010 and later are not directly comparable to years before 2010 .
i Includes unconsolidated MBS held by third parties. Before 2010, Freddie Mac MBS held by third parties were not consolidated.
Common dividends paid as a percentage of net income available to common stockholders. As a result of conservatorship and the Senior Preferred Stock Purchase Agreement with Treasury, no amounts are available to distribute as dividends to common or preferred stockholders (other than Treasury as the holder of the Senior Preferred Stock)

[^38]Before 2000, the Federal Home Loan Banks charged a $\$ 300$ million annual capital distribution to the Resolution Funding Corporation (REFCORP) directly to retained earnings.
2 The Federal Home Loan Banks made their final payment satisfying the REFCORP obligation on July 15, 2011 based on income earmed in the second quarter of 2011.
Financial data is from the FHLBanks' Office of Finance annual Combined Financial Report for each yearl listed. Data may not reflect subsequent adjustments or restatements.
Quarterly values are from quarterly Combined Financial Reports.

| Sources: Department of Housing and Urban Development (HUD), Federal Housing Finance Agency, Freddie Mac <br> a Conforming loan limits are 50 percent higher in Alaska, Hawaii, Guam, and the U.S. Virgin Islands. <br> b Maximum loan limits for loans acquired between 2012 and 2021 were determined based on the formula established in the Housing and Economic Recovery Act of 2008. <br> Public Law 111-242 set maximum loan limits for mortgages originated through September 30, 2011 at the higher of the limits established by the Economic Stimulus Act of 2008 or those determined under a formula prescribed by the Housing and Economic Recovery Act of 2008. Loans originated atter September 30 were subject to the Housing and Economic Recovery Act limits, which had a celing of $\$ 625,500$ in the contiguous U.S. |  | d Public Law 111-242 set maximum loan limits for mortgages originated in 2010 at the higher of the limits established by the Economic Stimulus Act of 2008 or those determined under a formula prescribed by the Housing and Economic Recovery Act of 2008. For all areas, the resulting 2010 limits were the same as those in effect for 2009. <br> e Loan limits for mortgages originated in 2009 were initially set under provisions of the Housing and Economic Recovery Act of 2008 , which allowed for high-cost area limits of up to $\$ 625,500$. In February 2009 , however, the American Recovery and Reinvestment Act of 2009 restored the $\$ 729,750$ maximum loan limit for mortgages originated in 2009. <br> f The Economic Stimulus Act of 2008 allowed Fannie Mae and Freddie Mac to raise the conforming loan limits in certain high-cost areas to a maximum of $\$ 729,750$ for one-unit homes in the continental United States. Higher limits applied to two-, three-, and four-unit homes. Alaska, Hawaii, Guam, and theVirgin Islands have higher maximum limits. The limits applied to loans originated between July 1,2007 , and December 31, 2008. |  |  |

[^41]Public Law 111-88 set maximum loan limits for mortgages with credit approvals issued in 2010 at the higher of the limits established by the Economic Stimulus Act of 2008 or those determined under a formula prescribed by the Housing and Economic Recovery Act of 2008. For all areas, the resulting 2010 limits were the same as those in effect for 2009.
Loan limits for mortgages with credit approvals issued in 2009 were initially set under provisions of the Housing and Economic Recovery Act of 2008, which allowed for high-cost area limits of up to $\$ 625,500$. In February 2009 , however the American Recovery and Reinvestment Act of 2000 restored the $\$ 729,750$ maximum loan limit for mortgages with credit approvals issued in 2009 .
The Economic Stimulus Act of 2008 allowed the Federal Housing Administration to increase the single-family insurable limits to a maximum of $\$ 729,750$ for one-unit homes in the continental United States. Higher limits applied to two-, three-, and four-unit homes. Alaska, Hawaii, Guam, and the Virgin Islands have higher maximum limits. The limits applied to loans with credit approvals issued between July 1,2007 , and December 31, 2008.

a Percentage changes based on FHFA's purchase-only index for 1992 through 2020 and all-transactions index for prior years. Annual data are measured based on fourth quarter to fourth quarter percentage change. Quarterly data for 2019 reflect changes over the previous four quarters. Because quarterly index estimates are subject to revision, the historical values in this table may not exactly match values for the same period in previous Annual Reports to Congress.

[^0]:    1 "The Rescue of Fannie Mae and Freddie Mac," Federal Reserve Bank of New York, Staff Report No. 719, March 2015, at 9.
    ${ }^{2}$ Id. at 10.
    ${ }^{3}$ The FHLBank System includes the 11 FHLBanks and the Office of Finance, a joint office of the FHLBanks.
    4 12 U.S.C. § 4511 (a).

[^1]:    512 U.S.C. § $4511(\mathrm{~b})(2)$.
    ${ }^{6} 12$ U.S.C. § 4513(a)(1).
    712 U.S.C. § 4517 (a), (b). Examination of the FHLBanks is also performed pursuant to Section 20 of the Federal Home Loan Bank Act. 12 U.S.C. § 1440.
    ${ }^{8}$ Unless otherwise specified, all dates in this report refer to 2020.

[^2]:    9 See FHFA Examination Rating System, Advisory Bulletin AB 2012-03 (December 19, 2012).
    ${ }^{10}$ The FHLBanks' Office of Finance is not a regulated entity; it receives only two component ratings and a composite rating.
    ${ }^{11} 12$ U.S.C. § $4617(\mathrm{~b})(2)(\mathrm{D})$.
    1212 U.S.C. § 5220(b)(1).

[^3]:    ${ }^{13} 12$ U.S.C. § $4617(\mathrm{~b})(2)(\mathrm{E})$.
    ${ }^{14}$ See 12 U.S.C. § 1716 (Fannie Mae); 12 U.S.C. § 1451 note (Freddie Mac).

[^4]:    15 "Effects of Recapitalizing Fannie Mae and Freddie Mac Through Administrative Actions," Congressional Budget Office, August 2020.

[^5]:    ${ }^{16}$ See 12 U.S.C. § 4518 note. The Equity in Government Compensation Act of 2015 effectively limits the annual direct compensation for the CEOs of Fannie Mae and Freddie Mac to no more than $\$ 600,000$ in base salary. The law also provides that compensation and benefits for the CEOs may not be increased while the Enterprises are in conservatorship or receivership.

[^6]:    ${ }^{17}$ Comprehensive income is the sum of net income and changes in other comprehensive income (items excluded from net income on the income statement because they have not been realized). For both Enterprises, other comprehensive income primarily consists of changes in unrealized gains (losses) on available for-sale securities and changes in defined-benefit plans. Freddie Mac's other comprehensive income also includes unrealized gains (losses) on cash flow hedging relationships.

[^7]:    ${ }^{18}$ Unless otherwise noted, FHFA developed all figures in this report using data provided by the regulated entities.
    ${ }^{19}$ The "Guaranty Book of Business" (Fannie Mae) and "Total Mortgage Portfolio" (Freddie Mac) includes mortgages and mortgage-related securities held as investments and mortgages pooled into MBS for which the Enterprise guarantees payment of principal and interest.

[^8]:    ${ }^{20}$ In November 2020, FHFA released a final capital rule that establishes the Enterprise Regulatory Capital Framework (ERCF) as a new regulatory capital framework for the Enterprises. The final capital rule became effective on February 16, 2021.
    ${ }^{21}$ Refer to the Fannie Mae and Freddie Mac January 14, 2021, letter agreements, available on the Treasury website, for more details.
    ${ }^{22}$ In addition to the one-time CECL transition adjustments of $\$ 1.1$ billion and $\$ 0.2$ billion to retained earnings, in the first quarter of 2020, Fannie Mae and Freddie Mac recorded provision for credit losses of $\$ 2.6$ billion and $\$ 1.2$ billion, respectively, due to the COVID-19 national emergency.

[^9]:    ${ }^{23}$ The liquidation preference, with respect to the senior preferred stock issued to Treasury by the Enterprises, refers to the amount that must be paid to Treasury before investors in more junior classes of preferred or common stock can receive any payment on their stock in the event of liquidation. The amount of liquidation preference for the senior preferred stock is specified in the PSPAs and subsequent letter agreements amending certain terms of the PSPAs.

[^15]:    ${ }^{40}$ As defined in the Bank Act, the term Community Financial Institution (CFI) means a member, the deposits of which are insured under the Federal Deposit Insurance Act, that has average total assets over the last three years at or below an established threshold. For calendar year 2020, the CFI asset threshold is $\$ 1.239$ billion. FHLBank members that are CFIs may pledge small business loans, small farm loans, small agri-business loans, and, for 2013 and thereafter, community development loans, all of which may be fully secured by collateral other than real estate, and securities representing a whole interest in such loans.

[^16]:    ${ }^{41}$ Mortgage purchases include premiums and discounts. As a result, this amount will not align with the unpaid principal balance of new mortgage acquisitions.
    ${ }^{42}$ This measure includes Treasury Securities.
    ${ }^{43}$ This paragraph reports metrics by par value.

[^17]:    ${ }^{44}$ Banks reclassify capital stock subject to redemption from capital stock to mandatorily redeemable capital stock (a liability) generally after a member exercises a written redemption right, gives notice of intent to withdraw from membership, or attains non-member status by merger or acquisition, relocation, charter termination, or involuntary termination from membership. Additionally, after FHFA's 2016 Final Rule on FHLBank Membership declared captive insurance companies ineligible for membership at FHLBanks, all remaining captive insurance capital stock was reclassified as mandatorily redeemable capital stock.

[^27]:    ${ }^{61}$ Statute also calls for the survey to include a determination of whether subprime and nontraditional borrowers would qualify for prime lending. Because of uncertainty around defining the concept of subprime (see Interagency Statement on Subprime Mortgage Lending, 72 FR 37569 (July 10, 2007)) and the paucity of data on the subprime market, it has not been feasible to incorporate such determinations in the NMDB.

[^28]:    ${ }^{62}$ Measure RM5 - Responses to the Federal Employee Viewpoint Survey reflect that "My work unit has the job-relevant knowledge and skills necessary to accomplish organizational goals."

[^29]:    ${ }^{63}$ In September 2020, the Financial Stability Oversight Council issued a statement noting that "The proposed rule requires a meaningful amount of capital for the Enterprises, and is a significant step towards ensuring that the Enterprises would be able to provide liquidity to the secondary mortgage market and satisfy their obligations during and after a period of severe stress. However, the Council's analysis using benchmark comparisons suggests that risk-based capital requirements and leverage ratio requirements that are materially less than those contemplated by the proposed rule would likely not adequately mitigate the potential stability risk posed by the Enterprises."

[^30]:    Source: Fannie Ma
    a Includes purchases of Fannie Mae mortgage-backed securities held for investment. Based on unpaid principal balances. Includes mortgage-related securities traded but not yet settled. Includes activity from settlements of dollar rolls accounted for as purchases and sales of securities but does not include activity from settlements of dollar rolls accounted for as secured financings.

[^31]:    Source: Fannie Mae

[^32]:    Source:FannieMa
    a Lender-originated mortgage-backed securities (MBS) plus issuances from Fannie Maés investment portfolio. Based on unpaid principal balances. Excludes mortgage-related securities traded but not yet settled
    b Beginning in 2006, includes grantor trusts, real estate mortgage investment conduits, and stripped MBS backed by Fannie Mae certificates,
    Beginning with the introduction of single security in June 2019, includes the portion of Freddie Mac-issued securities that back Fannie Mae-issued multiclass MBS.

[^33]:    ource: Fannie Mae
    Unpaid principal balance of Fannie Mae mortgage-backed securities (MBS) held by third-party investors. Includes guaranteed whole loan real estate mortgage investment conduits (REMICS) and private-label wraps not included in grantor trusts. The principal balance of resecuritized Fannie Mae MBS is included only once.
    Beginning in Q3 2015, we reclassified certain Fannie Mae Single-Family securities from fixed-rate to adjustable-rate.
    FHA stands for Federal Housing Administration. RD refers to loans guaranteed by the U.S. Department of Agriculture Rural Development (RD) loan programs. VA stands for Department of Veterans Affairs.
    Beginning in 2005, consists of securities guaranteed by Fannie Mae and backed by Ginnie Mae collateral, grantor trusts, and REMICs, as well as stripped MBS backed by Fannie Mae certificates.

[^34]:    Source: Fannie Mae
    Unpaid principal balance. Beginning in 2010, excludes the effect of accounting guidance related to transfers of financial assets and consolidation of variable interest entities, effective January 1,2010 . Amounts for 2010 have been revised from amounts previously reported to reflect this exclusion.
    Amounts for 2002 to 2009 include mortgage-related securities consolidated as loans at period end. For 1999 through 2001 , includes certain loans held for investment classified as nonmortgage investments.
    Includes balloon loans. Prior to 2012, includes energy loans.
    RD refers to loans guaranteed by the U.S. Department of Agriculture Rural Development (RD) loan programs. FHA stands for Federal Housing Administration. VA stands for Department of Veterans Affairs.

[^41]:    Source: Federal Housing Administration
    HUD loan limit authority given by Congress in the Economic Stimulus Action of 2008 and extended by the Consolidated and Further Continuing Appropriations Act of 2012 (P.L. 112-55) expired at the end of December 2013. The Federal Housing Administration single-family loans limits for 2014 were established using the permanent authority under section 203(b)(2) of the National Housing Act, as amended by the Housing Economic Recovery Act of 2008. This shift in legal authority resulted in changes in loan limits for 2014 and beyond.
    Public Law 111-242 set the maximum loan limits for mortgages with credit approvals issued in Fiscal Year 2011 (October 1, 2010-September 30, 2011) at the higher of the limits established by the Economic Stimulus Act of 2008 and those determined under a formula prescribed by the Housing and Economic Recovery Act of 2008. The maximum limit for loans with case numbers assigned between November 18, 2011 and determined under a formula prescribed by the Housing and Economic Recovery Act of 2008.
