### U.S. House Prices Rise 17.7 Percent over the Last Year; Up 4.0 Percent from the First Quarter

**Washington, D.C.** – U.S. house prices rose **17.7 percent** from the second quarter of 2021 to the second quarter of 2022 according to the Federal Housing Finance Agency House Price Index (FHFA HPI®). House prices were up **4.0 percent** compared to the first quarter of 2022. FHFA's seasonally adjusted monthly index for June was up **0.1 percent** from May.

"Housing prices grew quickly through most of the second quarter of 2022, but a deceleration has appeared in the June monthly data" said William Doerner, Ph.D., Supervisory Economist in FHFA's Division of Research and Statistics. "The pace of growth has subsided recently, which is consistent with other recent housing data."

#### **Significant Findings**

- Nationally, the U.S. housing market has experienced positive annual appreciation each quarter since the start of 2012.
- House prices rose in all 50 states and the District of Columbia between the second quarters of 2021 and 2022. The five areas with the highest annual appreciation were: 1) Florida 29.8 percent; 2) Arizona 25.5 percent; 3) North Carolina 25.2 percent; 4) Montana 24.9 percent; and 5) Tennessee 24.3 percent. The areas showing the lowest annual appreciation were: 1) District of Columbia 5.2 percent; 2) North Dakota 10.6 percent; 3) Louisiana 10.8 percent; 4) Minnesota 11.3 percent and 5) Maryland 12.0 percent.
- House prices rose in all of the top 100 largest metropolitan areas over the last four quarters. Annual price increases were greatest in North Port-Sarasota-Bradenton, FL, where prices increased by 36.4 percent. Prices were weakest in Washington-Arlington-Alexandria, DC-VA-MD-WV (MSAD), where they increased by 9.1 percent.
- Of the nine census divisions, the **South Atlantic** division recorded the strongest fourquarter appreciation, posting a 23.0 percent gain between the second quarters of 2021 and 2022 and a 5.2 percent increase in the second quarter of 2022. Annual house price appreciation was weakest in the **West North Central** division, where prices rose by 13.9 percent between the second quarters of 2021 and 2022.

• Trends in the Top 100 Metropolitan Statistical Areas are available in our interactive dashboard: <a href="https://www.fhfa.gov/DataTools/Tools/Pages/FHFA-HPI-Top-100-Metro-Area-Rankings.aspx">https://www.fhfa.gov/DataTools/Tools/Pages/FHFA-HPI-Top-100-Metro-Area-Rankings.aspx</a>. The first tab displays rankings while the second tab offers charts.

The FHFA HPI is the nation's only collection of public, freely available house price indexes that measure changes in single-family home values based on data from all 50 states and over 400 American cities that extend back to the mid-1970s. The FHFA HPI incorporates tens of millions of home sales and offers insights about house price fluctuations at the national, census division, state, metro area, county, ZIP code, and census tract levels. FHFA uses a fully transparent methodology based upon a weighted, repeat-sales statistical technique to analyze house price transaction data.

FHFA releases HPI data and reports on a quarterly and monthly basis. The flagship FHFA HPI uses seasonally adjusted, purchase-only data from Fannie Mae and Freddie Mac. Additional indexes use other data including refinances, FHA mortgages, and real property records. All the indexes, including their historic values, and information about future HPI release dates are available on FHFA's website: <a href="https://www.fhfa.gov/HPI">https://www.fhfa.gov/HPI</a>.

Tables and graphs showing home price statistics for metropolitan areas, states, census divisions, and the U.S. are included on the following pages.

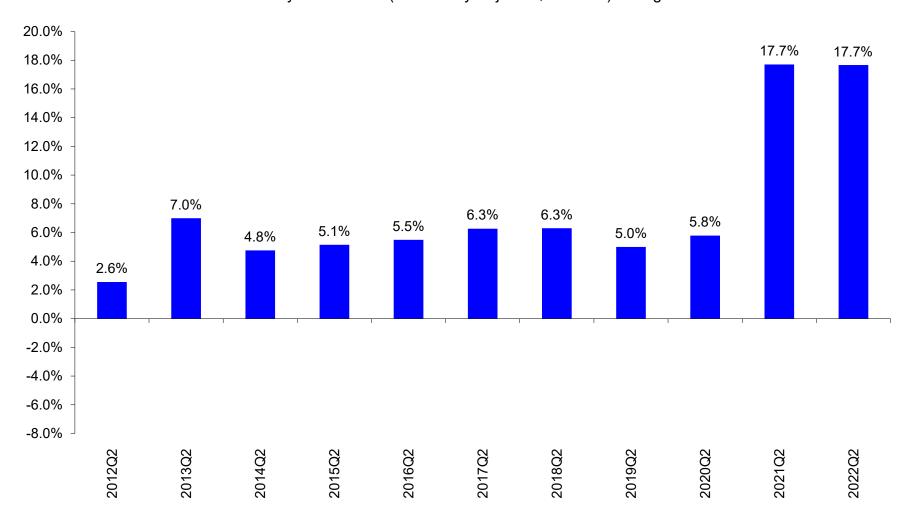

#### **Notes**

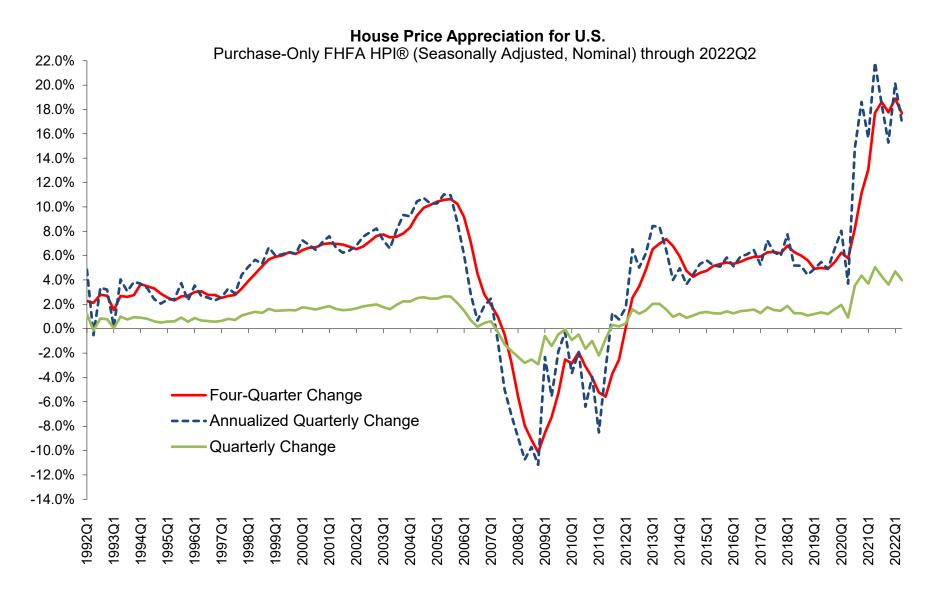

- The next monthly HPI report (including data through July 2022) will be released September 27, 2022, and the next quarterly HPI report (including data for the third quarter of 2022 and monthly data for September) will be released November 29, 2022.
- Release dates for the remainder of 2022 and all of 2023 are posted at <a href="https://www.fhfa.gov/DataTools/Downloads/Pages/House-Price-Index.aspx#ReleaseDates">https://www.fhfa.gov/DataTools/Downloads/Pages/House-Price-Index.aspx#ReleaseDates</a>.

### An overview of the FHFA HPI

The FHFA House Price Index® (FHFA HPI®) is a broad economic measure of the movement of single-family house prices in the United States. The production of the FHFA HPI is statutorily mandated (12 U.S.C. 4542) but it began in 1995 with one of FHFA's predecessor agencies, the Office of the Federal Housing Enterprise Oversight (OFHEO). The initial reports contained information about regional and national house price movements. Sample coverage has expanded with better access to new data sources and technological improvements for processing such information. Today, indexes cover all 50 states and over 400 American cities while extending back to the mid-1970s.

FHFA constructs several indexes for different market geographies and periods. The entire suite of indexes is often referenced, in a general sense, as the "FHFA HPI" to reflect that all indexes are created in the same technical manner. The flagship FHFA HPI is the purchase-only index which uses seasonally adjusted, purchase-only data; the index is the most common choice for press releases, news stories, and social media. Additional indexes have been created to address questions about house price changes in other market segments like with refinances, FHA mortgages, or the entire single-family property market. Data constraints preclude the production of some kinds of indexes in certain geographic areas, but multiple index types (flavors) are generally available. Quarterly reports usually contain index flavors such as:

- "Purchase-Only" HPI: Tracks changes in transaction prices for conforming, conventional mortgages that are purchased or securitized.
- "All-Transactions" HPI: Appraisal values from refinance mortgages are added to the Purchase-Only HPI data sample.
- "Expanded-Data" HPI: Sales price information sourced from county recorder offices and from FHA-backed mortgages are added to the Purchase-Only HPI data sample. This index is used to adjust the conforming loan limits, which establish the dollar amount of loans that can be acquired by Fannie Mae and Freddie Mac
- "Distress-Free" HPI: Sales of bank-owned properties and short sales are removed from the Purchase-Only dataset prior to estimation of the index.
- "Annual" HPI. Uses the All-Transactions data but indexes are constructed on a yearly basis to provide data for very small geographic areas like counties, ZIP codes, and census tracts.

The summary table below details the frequency and geography of the available indexes.

	National	Census Division	States	MSAs or Cities	ZIP3, Non-metro	ZIP Codes	Counties	Census Tracts
Monthly	<b>✓</b>	<b>✓</b>						
Quarterly	<b>~</b>	<b>~</b>	<b>~</b>	<b>~</b>	<b>~</b>			
Annual	<b>✓</b>	<b>~</b>	<b>✓</b>	<b>~</b>	<b>~</b>	<b>✓</b>	<b>~</b>	<b>~</b>

The FHFA HPI suite is built on tens of millions of home sales and offers insights about house price fluctuations at various geographic levels.
